KANSAS CITY, MO.—The supervising architect, Washington, D. C., received the following bids Sept. 25 for the iron and steel work for roof, etc., of the U. S. public building in this city, as advertised in Engineering News:

		Time.
Wisconsin Bridge & Iron Co., Milwaukee.	$8,665	60 days
Fort Pitt Bridge Works, Pittsburg.......	9,790	58 days
Haugh-Woelke Iron Works, Indianapolis.	7,005	60 days
Milwaukee Br. & Ir. Wks., Milwaukee..	9,978	60 days
Gillette-Herzog Mfg. Co., Minneapolis...	7,973	60 days
Missouri Valley Br. & Ir. Wks....	7,965	60 days
Stewart Iron Works, Cincinnati, O......	8,888	60 days
L. Schreiber & Sons Co., Cincinnati, O..	8,960	60 days
Universal Construction Co., Chicago....	7,428	3 mos.
Brown-Ketcham Iron Wks., Indianapolis.	7,404	60 days
Thos. Marshall, Pittsburg, Pa....	7,999	4 mos.
Kansas City Wire & Iron Wks., Kan. City.	8,886	60 days
Koken Iron Works, St. Louis, Mo.......	9,100	60 days
Snead & Co. Iron Works, Louisville, Ky.	9,582	60 days

——W. F. Hackney, Beals Bldg., has prepared plans for a new $100,000 manual training school building in this city.

LA JUNTA, COLO.—The county commissioners are considering the question of a new court house, to cost $15,000.

GALVESTON, TEX.—The Galveston, La Porte & Houston Ry. Co. has purchased two blocks of land for a station in this city. Ch. Engr., H. J. Simmons, Houston.

HOUSTON, TEX.—Bids are asked until Oct. 15 for the metal work for the range beacon, fogbell signal, etc., and for constructing an oil house, wharf, boat house, etc., at the Brazos River Light Station, Tex. Maj. J. R. Quinn, U. S. Engr., New Orleans, La.

SEATTLE, WASH.—Plans have been prepared for about $90,000 worth of improvements to the Mutual Life building on Pioneer Place. Arch., W. E. Boone, 717 New York Life Bldg., Seattle.

PASADENA, CAL.—Plans and specifications have been prepared for the United Presbyterian Church to be built at Los Robles Ave. and Colorado St.

OAKLAND, CAL.—Chas. Mau, 957 Broadway, Oakland, is reported to have prepared plans for a $30,000 house for the Acme Athletic Club.

SALINAS, CAL.—W. G. Hind is preparing plans for Adam Lang for a 3-story hotel building on his lot on Castroville St. in this city.

LOS ANGELES, CAL.—It is reported that Mr. Potter is to erect a $100,000 hotel in this city. C. W. Gray, Los Angeles, can probably give information.

SAN FRANCISCO, CAL.—The Pacific Union Club is considering sites for its proposed new clubhouse.——The board of fire commissioners have filed plans for two new fire department buildings.——The Spring Valley Water-Works has also filed plans for a 6-story building at Geary and Stockton Sts., to cost $30,000; Arch., Clinton Day, Mutual Life Bldg.——J. H. O'Brien has been awarded the contract for a new roof for the old City Hall at $197,000. Archs., Shea & Shea, 26 Montgomery St.

SAN FRANCISCO, CAL.—The appropriation of $200,000 for the Mission High School has been approved by the board of supervisors. A site will now be chosen and the work of construction begun at once.

TULARE, CAL.—Bids are asked until Oct. 10 for constructing the Elk Bayou school building. A. V. Berry, Chn. Trustees.

WHITTIER, CAL.—Bids are asked until Oct. 17 for erecting a $30,000 trades school building. Supt. J. E. Coffin, Whittier; C. H. Keyes, Chn. Com., Berkeley, Cal.

SALT LAKE CITY, UTAH.—An addition is to be built to St. Mark's hospital, 100 × 30 ft. The building when completed will enable the hospital to admit about 100 patients.

ST. JOHN, N. B.—Bids are asked until Oct. 10 for erecting a warehouse on Water St., for W. H, Thorne. Arch., G. E. Fairweather, 84 Germain St.

WATER-WORKS.

DEERING, ME.—There is some prospect that the city will investigate the desirability of securing a water supply from Duck Pond, with a power plant.

BOSTON, MASS.—Bids are asked until Oct. 16 for furnishing 42 and 48-in. cast-iron water pipe, as stated in our advertising columns. F. P. Stearns, Ch. Engr.; W. N. Davenport, Secy., 3 Mount Vernon St.

PAWTUCKET, R. I.—The council has appropriated $7,000 for extending water mains.

PAWTUCKET, R. I.—Efforts are again being made to secure an extension of the water mains to Marieville.

DARIEN, CONN.—The plant of the Darien Water Co. partially completed, is reported to have been sold to the Stamford Water Co.; work to be resumed at once.

CANASERAGA, N. Y.—The water commissioners are reported as advertising for bids for completing the reservoir, which was not accepted from the contractor.

CASTLETON, N. Y.—An election was held last week, according to reports, to vote on an issue of $25,000 in bonds for water-works.

CHERRY VALLEY, N. Y.—The contract for trenching and pipe-laying has been awarded to George Monahan, of Richfield Springs, at $9,500.

DANSVILLE, N. Y.—The $60,000 in water bonds have been awarded to the City Bank of Buffalo, at 3% premium. The bonds will bear 4½% interest and will mature in 1921, with option of call after 1901.

ELMIRA, N. Y.—The Elmira Heights trustees have authorized a contract with the Elmira Heights Water Co. for the construction of works; water supply to be pumped from artesian well to a reservoir; hydrant pressure 110 lbs.

HARTWICK, N. Y.—The Hartwick Water-Works Co. was incorporated Oct. 5 with a capital stock of $18,000, by R. T. Luce, J. M. Bush and A. D. Beach.

KINGSTON, N. Y.—The contract for constructing new reservoir and connecting pipe line has been awarded to Miles Tierney, the bids being as follows:

Hilt & Johnson, Albany, N. Y.	$72,163
Francis Curnan, Rhinebeck, N. Y.	68,614
Campbell & Dempsey, Kingston	60,076
Steward & Rexford, New York	58,480
Clinton Beckworth & Co., Herkimer, N. Y.	57,337
Miles Tierney, New York	53,478

LANSINGBURG, N. Y.—The commissioners are considering the advisability of increasing the water supply by sinking artesian wells.

NEW YORK, N. Y.—Bids are asked until Oct. 27 for building a reservoir and dam at Byram Pond, a channelway to convey the waters of Stony Brook into this reservoir, and improving the channel of Byram River in the towns of North Castle and Bedford; also for the construction of archway and roadway under the old Croton aqueduct on the line of Burnside Ave., 24th Ward. C. H. T. Collis, Comr. Pub. Wks.

NIAGARA FALLS, N. Y.—The board of public works has requested an appropriation for repairing the pumps and pump house.

NYACK, N. Y—The water commissioners have reported to the village trustees in favor of a gravity supply from Spring Valley. James S. Haring, Engr.; E. H. Cole, Clk.

POTSDAM, N. Y.—This village will probably construct a gravity system or a new pumping plant with a system of filters in the near future. W. F. P. Sealy, Supt.

POUGHKEEPSIE, N. Y.—The council has appropriated $3,000 to complete the new filter bed. Chas. E. Fowler, Supt. Pub. Wks.

WHITESBORO, N. Y.—The incorporation of the Whitesboro Water Co. was noted last week. The Utica Water Co. has offered to extend its mains through this village for $2,500 and place 20 hydrants for $100 each per year; municipal works are estimated to cost about $21,000, with $2,380 annual expense. At a public meeting, Sept. 28, it was decided not to construct works but to purchase a steam fire engine instead, at a probable cost of about $3,500.

CAMDEN, N. J.—Jones & Co., bankers of Philadelphia, have disposed of the $200,000 in 30-year 4% water bonds at par.

CLINTON, N. J.—The Clinton Water & Supply Co. was incorporated Oct. 2, with a capital stock of $2,000, commencing with $1,000, by J. M. Johnson and H. G. Frederick, Millersburg, Pa., and W. H. Johnson, C. W. Leigh and others, of Clinton, N. J.

EGG HARBOR CITY, N. J.—The committee appointed about a year ago has reported in favor of works and an ordinance providing for a system passed first reading in the council Sept. 29. It is stated that work will be commenced as soon as possible.

BARNESBORO, PA.—The Barnesboro Water Co. was incorporated Sept. 30 with a capital stock of $15,000, by John Barnes, of Barnesboro, Thos. Barnes, George W. Zeigler, of Philipsburg, and others.

CARLISLE, PA.—M. P. Quinn, of Pottsville, commenced work last week on the proposed plant of the Carlisle Water Co.; water supply from Boiling Springs, 14 miles distant. It is hoped to have the plant completed by Jan. 1.

EMSWORTH, PA.—The Valley Water Co. of this place has published notice of intention to apply for a charter. T. Lee Clark, E. S. Reynolds, A. C. Shaw and W. L. Sloan are interested.

FAYETTE CITY, PA.—Application will be made Oct. 26 by H. C. Huston, M. B. Cutter, Andrew W. Black and others for a charter for the Fayette Water Co., to supply the township of Lower Tyrone, Fayette county.

LANCASTER, PA.—The special committee has approved the plans of S. M. Gray for an improved water supply estimated to cost about $112,000, as follows: 4,800 ft. of 16-in. low service main, $8,640; 5,600 ft. of 30-in. force main, $32,480; gates, valves, etc., $3,500; stand-pipe, $20,000; two 200-HP. boilers, $7,000; one 12,000,000-gallon pump in exchange for old pump, $40,000.

McKEESPORT, PA.—The East McKeesport Water Co. is reported as soon to erect a large pumping station on the banks of the Monongahela River, opposite Duquesne.

NORRISTOWN, PA.—A press report, Oct. 2, states that the Springfield Water Co., comprising nine water companies in Montgomery, Bucks and Delaware counties, has filed a mortgage in favor of the Columbia Ave. Saving Fund, Safe Deposit, Title & Trust Co. for $3,000,000, to secure 30-year 5% bonds to that amount.

PHILADELPHIA, PA.—Local papers announce that the filtration schemes are now being agitated in the councils and it is believed that the proposed loan of $3,000,000 for a system of filters will soon be authorized.

PITTSBURG, PA.—The filtration committee is reported to have voted to visit the plants in operation at Lawrence and Lowell, Mass.

WEST CHESTER, PA.—An extension of the water supply is contemplated, but no steps have yet been taken. D. J. Scott, Pres. Council; E. A. Mercer, Supt. W. W.

CHARLOTTESVILLE, VA.—Surveys for an additional water supply for this city have been completed; length of line 16 miles, with a masonry dam at the head of Moormans River, in the Blue Ridge Mountains. C. D. Carter, Chn. Com.; C. E. Dickinson, Engr.

LUMBERTON, N. C.—Artesian wells are being sunk and it is probable that a system of water-works will be constructed. E. K. Proctor, Jr., Mayor.

ADAIRSVILLE, GA.—The "Banner" of this city is agitating the early construction of works.

AUGUSTA, GA.—The committee has recommended extensions of the mains in West End.——The Augusta "Herald" urges that steps be taken for a new water supply.

COCHRAN, GA.—There is talk of constructing works and an electric light plant.

CLEARWATER, FLA.—F. W. Maloney, superintendent for George H. Fernald, left Sanford last week to begin the construction of water-works at Clearwater, H. B. Plant's new city.

FLORENCE, ALA.—The city purchased the works at the sale Sept. 30 for $125,000. T. A. Howell, Supt.

ONEONTO, ALA.—Efforts are being made to secure the construction of water-works.

HILL CITY, TENN.—Chattanooga papers state that water-works will probably be constructed at this place after the election.

MILAN, TENN.—This place will soon have water-works, according to reports.

SOUTH PITTSBURG, TENN.—This city was reported last week as on the verge of a water famine, owing to the dry weather.

FRANKLIN, KY.—An election will be held Nov. 3 to vote on an issue of $21,000 in bonds for the construction of municipal works. James N. LaRue, Mayor; S. N. Forline, City Clk.

LANCASTER, KY.—John E. Stormes is reported as receiving bids for sinking an 8 and 6-in. artesian well 1,000 to 1,500 ft. deep.

CANTON, O.—L. E. Chapin, Cy. Engr., has been directed to make surveys and estimates for getting more well water, also for an improved water supply.

EAST CLEVELAND, O.—Bids are asked until Oct. 17 for furnishing and laying a water main in Euclid Ave. George L. Quayle and A. F. Ingersol are the committee. ——The council has rejected the two bids received for the $35,000 in water bonds.

HIRAM, O.—B. S. Dean, Clk. Bd., informs us that it has been found necessary to postpone the water-works construction; all bids have been rejected and the work will be readvertised late in the winter so as to put in the plant early in the spring.

ZANESVILLE, O.—Bids for a 6,000,000 or 8,000,000-gallon pumping engine were received Sept. 28 as follows: Nordberg Mfg. Co., Milwaukee, $22,424 to $33,305; Snow Steam Pump Co., Buffalo, $13,017 to $24,848; Laidlaw-Dunn-Gordon Co., Cincinnati, $12,228 to $36,730; Holly Mfg. Co., $18,500 to $22,515; Henry R. Worthington, $13,900 to $23,365. T. D. McCaddon, Secy.

LEAVENWORTH, IND.—At a meeting Sept. 29 the citizens subscribed $5,000 toward water-works, which will probably be built by a company; it is hoped to have the plant in operation by Dec. 1.

MUNCIE, IND.—C. C. Brown, Consult. Engr., Indianapolis, has reported to the council in favor of increasing the pumping and boiler plant about 50% and of improving the distribution system.

DELRAY, MICH.—Efforts are being made to secure a village charter; there is talk of water-works to cost $20,000, fire department $8,000, electric lights and other improvements.

WYANDOTTE, MICH.—The city clerk has been authorized to advertise for bids for two new boilers for the water-works.

BLUE ISLAND, ILL.—Bids are asked until Oct. 19 for furnishing and laying a 6-in. cast-iron water main in three streets. P. R. Fletcher, Village Engr; Fred Hohmann, Village Clk.

CHICAGO, ILL.—Bids are asked until Oct. 12 for laying water service pipes in eight strets.——The amount of deposit for pumping machinery, as advertised in Engineering News, has been changed from $25,000 to $10,000. Joseph Downey, Comr. Pub. Wks.

KANKAKEE, ILL.—The asylum authorities have commenced the construction of a new reservoir 70 ft. long and it is stated that a filter plant will be put in.

LAGRANGE, ILL.—This village is reported as much exercised over the condition of the water supply, which is believed to be polluted.

PLYMOUTH, ILL.—It is reported that ordinances have been adopted to bond the town for $3,000 for a water supply.

SUPERIOR, WIS.—It is reported that more wells will be sunk next spring.

WAUKESHA, WIS.—James K. Anderson, Pres. Waukesha Water Co., has made a proposal to the Chicago board of education to furnish the public schools with pure spring water through the line built for the World's Fair.

SIDNEY, IA.—Bonds to the amount of $10,000 have been voted to extend the water-works; will commence construction as soon as bonds are sold.

DULUTH, MINN.—Bids are asked until Oct. 23 for furnishing water gates, check valves, etc.; also for trenching and laying 1,500 ft. of 60-in. steel intake pipe and for placing the submerged crib at the outlet end. W. B. Patton, Cy. Engr.; M. J. Davis, Pres. Bd. Pub. Wks.

EAGLE BEND, MINN.—Bids are asked until Oct. 17, according to reports, for boring a well. Peter Munch, Clk. School District 85.

MILACA, MINN.—It is reported that bonds have been voted for water-works.

WHITE SULPHUR SPRINGS, MONT.—M. S. Parker, of Great Falls, has reported that works can be constructed for $30,000; no definite action yet taken.

KANSAS CITY, KAN.—It is reported probable that the Metropolitan Water Co. will construct a large reservoir, abandoning the Kaw Point pumping station and pumping its entire supply at Quindaro.

FORT SMITH, ARK.—The Municipal Water Co. is reported about to commence the construction of settling basins and other improvements to cost about $40,000. Pres., Geo. M. Myers, Kansas City; Supt., S. T. Rosamond.

PALESTINE, TEX.—A contract was closed Sept. 24 with J. W. Brynes & Co., of Galveston, according to press reports, to construct works for $90,000; water supply from wells; council has refused to purchase the present plant.

TRINIDAD, COLO.—A water company is negotiating for the sale of its plant to the city; company has a 50-year franchise and has heretofore refused to sell.

DENVER, COLO.—The advisory board of health has adopted a resolution urging the appointment of a commission to investigate the sources of water supply and make necessary recommendations.

NEWBERG, ORE.—Bids are asked for the purchase of $15,000 in 20-year water bonds; population, 1,100; no present indebtedness. J. G. Hadley, Cy. Recdr.

ANAHEIM, CAL.—Bids are asked until Oct. 13 for the purchase of $11,000 in water bonds and $7,000 in electric light bonds, as noted in our issue of Sept. 17. C. S. Rogers, of Anaheim, is preparing specifications for the water-works and bids for the construction will be received as soon as the bonds have been sold. M. Nebelung, Cy. Clk.

LOS ANGELES, CAL.—Efforts have been made by the council to purchase the existing plants, but press reports announce that these efforts have been unsuccessful and that the council has instructed the city clerk to advertise for bids for the construction of a water plant adequate to the city's needs.

SALINAS, CAL.—The Salinas City Light & Water Co. was incorporated Oct. 1 with a capital stock of $200,000, commencing with $500, by H. S. Ball, Luther Rodgers, E. P. Iverson and others of Salinas.

MONTREAL, QUE.—The superintendent has reported that the upper level reservoir leaks 70,000 gallons each 24 hours; $120,000 is asked for this and other improvements.

THREE RIVERS, QUE.—A new 9-in. main will probably be laid at an early date. O. Z. Hamel, Supt.

WINNIPEG, MAN.—It is reported that the city council will print the pamphlet describing the proposed water-works with supply from driven wells and distribute the same in time for the electors to vote on an issue of $600,000 in bonds for such a plant next December.

SEWERAGE.

DEERING, ME.—The city engineer has been directed to prepare estimates and to advertise for bids for building a sewer in three streets to cost $4,200. I. W. Barbour, Cy. Engr.

MANCHESTER, N. H.—The question of constructing sewers for draining that portion of the city known as Whittier Land is being considered by the sewer committee. John C. Ray is interested.

BOSTON, MASS.—The aldermen have voted to appropriate $150,000 for sewers. W. J. Donovan, Alderman from East Boston, is interested.

BOSTON, MASS.—Bids are asked until Oct. 13 for building a sewer in Ruggles St., the work to include 9,390 ft. of earth excavation and refill for 2 ft. 6 ins. × 3 ft. brick sewer; 210 cu. yds. brick masonry (American cement mortar); 10 cu. yds. brick masonry (Portland cement mortar); 193 cu. yds. concrete; 14.8 M. ft. B. M. spruce lumber and 217 spruce piles. B. W. Wells, Supt. of Sts.

HOLYOKE, MASS.—J. J. Kirkpatrick, Cy. Engr., writes us that all sewers are built by city laborers. Lyman & Kellogg, of Holyoke, have been awarded the contract for furnishing 1,450 ft. of 24 and 10-in. sewer pipe at 78½% off the price list.

HYDE PARK, MASS.—J. H. McKnight, of Everett, Mass., and T. H. Bryne, of Medford, Mass., have been awarded the contracts for constructing four sections of the sewer system, as advertised in Engineering News. Engr., P. W. Blake, Hyde Park; F. A. Wyman, Chn. Comrs.

MARLBORO, MASS.—The council is reported to have voted to issue $4,000 in bonds for new filter beds. C. F. Bigelow, Cy. Engr.

QUINCY, MASS.—C. F. Knowlton, Comr. Pub. Wks., writes us that an appropriation of $68,000 for building one section of the brick main sewer has been ordered to a second reading in the council and will probably be passed this fall. Surveys and plans are all prepared. E. W. Branch is the official in charge.

STONEHAM, MASS.—Ferguson & Quimby, of Boston, have the contract for building six miles of sewers and the city will build three miles by day labor. Des. Engr., B. R. Felton, 10 Tremont St., Boston; L. L. Gerry, Engr. and Supt. of Streets.

UXBRIDGE. MASS.—Edward Parker, Town Clk., writes us that no action has yet been taken on the Dribble Tail Brook sewer.

WORCESTER, MASS.—S. M. Gray, Providence, R. I., and T. M. Drown, Pres. Lehigh University, Bethlehem, Pa., have been engaged to consult with F. A. McClure, Cy. Engr., in regard to the purification of the sewage of this city; estimated cost, $890,000.

WARREN, R. I.—We are informed that no sewers will be built at present. Plans for a complete system have been prepared by Chas. F. Chase, 75 Westminster St., Providence, R. I.

MIDDLETOWN, CONN.—The sewer committee has recommended the construction of 500 ft. of brick sewer in North Main St. E. P. Augur, Cy. Engr.

TORRINGTON, CONN.—Surveys are being made for a storm sewer in Main St.

JAMAICA, N. Y.—The state board of health and the village authorities are again considering the plans for the proposed sewer system. Dr. P. M. Wood, Chn. Sewer Comn.; J. J. McLaughlin, Village Engr.

JAMESTOWN, N. Y.—At an election held Sept. 26 the question of issuing $50,000 in bonds for sewers was defeated. John Conway, Chn. Bd. Pub. Wks.

JAMESTOWN, N. Y.—The board of public works is reported to have been directed to make new plans for the disposal of sewage. The favored plan is to extend the sewers to Cassadaga Creek.

ONEIDA, N. Y.—We are informed that the following bids were received Sept. 29 for constructing two miles of pipe sewers. as advertised in Engineering News; Engrs., Stanwix Engineering Co., Rome., N. Y.; M. J. Dewey, Pres. Comrs.:

John Marsden, Utica, N. Y.	$5,990
L. D. Hurlburt, Syracuse, N. Y.	8,123
E. G. Gay, Oneida	9,045
Makin & Cockman, Niagara Falls, N. Y.	10,007
Fitch & Fisher, Oneida	7,751
F. H. Gott, Buffalo (awarded contract)	5,132

SYRACUSE, N. Y.—The question of constructing the two intercepting sewers into Onondaga Creek to cost $1,000,000 is again being considered. Des. Engr., Samuel M. Gray, 174 Weybosset St., Providence, R. I.; Wm. A. Sweet, Engr., Syracuse.

HOBOKEN, N. J.—Bids are asked until Oct. 28 for rebuilding the sewer in 3d St. M. V. McDermott, Cy. Clk.

NEW BRUNSWICK, N.J.—The contract for constructing pipe sewers, for which bids were received Oct. 5, as advertised in Engineering News, has been awarded to James Gilligan, of New Brunswick, at $6,644. The itemized bids will probably be published next week. Asher Atkinson, Cy. Surv.

ALLEGHENY, PA.—Sewer contracts were awarded last week as follows: Wm. J. Dunn, $754; Sloan, McIlvain & Ott Bros., $3,500; Harvey Sloan, $10,451. D. L. Fulton, Supt. Sewers; Robt. McAfee, Dir. Pub. Wks.

PITTSTON, PA.—The council has let a contract for constructing pipe sewers to Hart & Gibbons, at $3,357.

CLEVELAND, O.—We are informed that the following bids were received Sept. 23 for constructing 3,865 ft. of 8 to 6-ft. circular brick sewer, with junctions and plank sheetings left in trench, all bidders being residents of Cleveland. D. E. Wright, Dir. Pub. Wks.: L. H. Fahey (awarded contract), $41,264; Northern Ohio Paving & Construction Co., $62,528; Clements Bros.' Construction Co., $64,363; Ford P. Beers, $66,710; Campbell Bros., $68,949; W. H. Ford & Co., $75,986; M. Bramley, $83,447; J. Connelly & Son, $86,769.

MARIETTA, O.—Bids are asked until Oct. 29 for improving sewers in the fifth district. Carl Becker, Cy. Clk. ——We are informed that the T. B. Townsend Contracting Co., of Zanesville, O., has been awarded the contract for constructing 42,000 ft. of 24 to 8-in. pipe sewers. W. P. Mason, Cy. Engr.

CRAWFORDSVILLE, IND.—At the last council meeting it was voted to issue $20,000 in bonds to begin a system of sewerage and thereby give employment to the city's poor during the winter. The work is to be done by the city, no contract. No other steps have yet been taken. Steps towards plans will be taken at once. F. Hoffman, Cy. Engr.

INDIANAPOLIS, IND.—Bids are asked until Oct. 14 for constructing a main sewer in five streets; also for 1,110 ft. of 36 to 32-in. brick and about 3,800 ft. of 22 to 6-in. pipe sewers. B. J. T. Jeup, Cy. Engr.

RICHMOND, IND.—Bids are asked until Oct. 16 for constructing a sewer, according to reports; bond, $5,000. J. H. Winder, Clk.; H. L. Weber, Cy. Engr.

DETROIT, MICH.—J. A. Mercier & Co. have been awarded the contract for constructing 1,754 ft. of brick sewer in McClellan Ave., at $3.42 per ft. and James Hanley for constructing a brick sewer in Cadillac Ave., at $1,148. H. D. Ludden, Cy. Engr.

CHICAGO, ILL.—Bids are asked until Oct. 12 for constructing private drains in seven streets and sewers in 25 other streets. Joseph Downey, Comr.——The question of constructing an intercepting sewer north of Fullerton Ave. and south of 39th St. is being discussed by the mayor and the city authorities; estimated cost, $2,225,000. L. B. Jackson, Cy. Engr.

LINCOLN, ILL.—It is reported that this city will soon ask for bids for constructing a sewer system for the Brainard branch. T. S. Davy, Cy. Engr.

WEBSTER CITY, IA.—Nothing definite has yet been done in regard to sewers for this city. Engr., Edward E. Fox, 702, 86 La Salle St., Chicago, Ill.

TOPEKA, KAN.—The council has acted favorably on the report for sewers in North Topeka. W. H. Barnes, Cy. Engr.

ST. PAUL, MINN.—Bids are asked until Oct. 10 for a sewer in Waltham St. John Copeland, Comr. Pub. Wks.; John C. Mueller, Clk.

GALVESTON, TEX.—The commissioners' court is considering the question of draining about 12,000 acres of land in Arcadia, North Arcadia and South Alta Loma; estimated cost about $20,000.

TELLURIDE, COLO.—The Telluride Sewerage Co. has been incorporated by Arthur M. Read, H. H. Daniels and A. E. Pattison, with a capital stock of $25,000, to construct a sewerage system in this city.

PORTLAND, ORE.—The council has decided to construct a 12-in. pipe sewer in several streets. A. N. Gambell, Audr.

SAN RAFAEL, CAL.—Geo. L. Richardson, Cy. Engr., writes us that estimates have been prepared for a system.

SANTA MONICA, CAL.—It is stated that arrangements are being made by the city engineer for constructing sewers in this city.

SONORA, CAL.—Bids are asked until Nov. 2 for constructing a pipe sewer in Sonora Creek. R. Inch, Cy. Clk.

SALT LAKE CITY, UTAH.—L. G. Wilkerson and A. L. Hobson have been awarded contracts for constructing sewers in two streets, at $3,082 and $2,888, respectively. F. C. Kelsey, Cy. Engr.

LONDON, ONT.—It is reported that Chas. H. Rust, City Hall, Toronto, Ont., has submitted a report on the proposed sewer system for this city.

GARBAGE DISPOSAL—STREET CLEANING.

BROOKLYN, N. Y—The following bids were received Oct. 5 for the removal, collection and final disposition of garbage in the city from Jan. 1, 1897, to Dec. 31, 1901, all local bidders; Z. Taylor Emery, Comr. of Health; T. B. Willis, Comr. Cy. Wks:

Thos. F. Byrnes (Holthaus system), $166,000 for 1st year, $180,000 for 2d, $191,000 for 3d, $208,000 for 4th, and $224,000 for 5th year.

Jas. Kane and Geo. Cunningham (Brownlee system), $200,000, $180,000, $185,000, $190,000 and $195,000, respectively, for the five years.

Chas. Hart and I. S. McGiehan (system not stated), $179,500, $184,500, $189,500, $149,500, $199,500.

E. J. McKeever & Bro., $148,400 a year, using the McKay system, or $144,000 for the Brownlee system.

Brooklyn Sanitary Co., F. D. Cranford, Pres.; W. J. Cranford, Secy.-Treas. (Arnold system), $113,000, $117,000, $120,000, $125,000 and $130,000 for a plant on Barren Island, or $90,000, $91,000, $92,000, $93,000 and $94,000 a year for a plant to be erected within three miles of the City Hall.

YONKERS, N. Y—The board of trade has adopted resolutions protesting against the proposed construction of a garbage crematory at the foot of Ashburton Ave.

READING, PA.—The contract for a garbage crematory, as advertised in Engineering News, has been awarded to the Dixon Sanitary Crematory Co., Findlay, O., at $10,000; capacity 100 tons in 24 hours. The bids were published in our issue of Sept. 24.

YORK, PA.—The sanitary committee has recommended that a Dixon Crematory be purchased at a cost of $7,400. The bids were received last month, as advertised in Engineering News. John W. Brant, Cy. Clk.

WASHINGTON, D. C.—The garbage crematory, at the foot of South Capitol St., which has been in operation for five months as an experiment, has suspended operations, and local papers state that the garbage is now conveyed down the river in scows and dumped on a farm. No permit for the erection of a new crematory has yet been secured, owing chiefly to the opposition of residents in each neighborhood where a site has been selected.

HELENA, MONT.—The contract for a new garbage crematory was signed Sept. 28; it will be built by Gebbardt & Wagner.

LOS ANGELES, CAL.—The board of public works is preparing specifications preparatory to advertising for bids for street sweeping, according to reports.

STREETS AND ROADS.

BOSTON, MASS.—Bids are asked until Oct. 8 for about 10,000 sq. yds. of macadam paving, 17,000 cu. yds. of excavation, 6,300 lin. ft. of guard rail, etc., in Andover and Troro. T. C. Mendenhall, Chn. Mass. Highway Comn., Worcester; Chas. Mills, Ch. Engr., 4 Mount Vernon St., Boston.——Plans for extending Dorcester Ave. have been submitted to the harbor and land commissioners for approval. The department of parks received the following bids Sept. 29 for building a road in the Arnold Arboretum, the work to consist of 44,600 cu. yds. of loam and earth excavation: T. F. Finneran and M. J. O'Hearn, $13,092; James Doonan, $13,750; F. X. Faucier, $15,152; Neil McBride, $15,909; Andrew Carberry, $17,572; Collins & Ham, $18,177; John Crowley, $20,272; Thomas Minton, $20,778; T. M. Broderick, $21,460; H. P. Nawn, $25,159; John A. Whittemore & Sons, $28,540.

CLINTON, MASS.—The road commissioners have asked for an appropriation of $7,150 for macadam paving and sewers. J. Thissell, Cy. Engr.

LOWELL, MASS.—The Good Roads League was organized in Jackson Hall, Sept. 30, to urge the extension of good roads in this vicinity. Pres., T. P. Hall; Vice-Pres., C. H. Conant; Secy. and Treas., Geo. H Stevens.

QUINCY, MASS.—The board of trade is considering the question of widening and improving Hancock St. from City Square to the Neponset bridge; estimated cost of paving, $99,000. S. O. Moxon, Councilman, and W. B. Rice are interested.

HARTFORD, CONN.—Local papers state that the board of street commissioners has decided next year to pave four streets with sheet asphalt and two other streets with asphalt blocks. Chas. M. Northam, Pres. Comrs.

ARDSLEY, N. Y.—The question of issuing $25,000 in bonds for paving is being considered by the citizens.

BROOKLYN, N. Y.—Bids are asked until Oct. 13 for asphalt repaving in Greene St. T. B. Willis, Comr. Cy. Wks.——The commissioner will at once begin the improvement of certain streets in the interest of bicyclists, to cost $2,100.

NEW YORK, N. Y.—Bids are asked until Oct. 12 for grading and flagging in two streets and for constructing sewers in three streets. L. F. Haffen, Comr. St. Improvements, 2622 Third Ave.——It is stated that work will soon be resumed by James D. Leary on the Harlem River Driveway. A retaining wall 800 ft. long will be built. S. V. R. Cruger, Pres. Pk. Bd., and Samuel McMillan, Park Comr., compose the special commission.

RICHMOND HILL, N. Y.—A committee has been authorized to engage an engineer to prepare specifications for the macadamizing of Briggs Ave.

ROCHESTER, N. Y.—Wm. H. Jones & Sons have been awarded the contract for Medina stone paving in Allen St., at $20,573. E. A. Fisher, Cy. Engr.

SCARSDALE, N. Y.—It is stated that the residents of this place have voted to issue $4,500 in street improvement bonds.

STAPLETON, N. Y.—The board of supervisors of this county at its last meeting, Sept. 25, directed Henry P. Morrison, Engr. County Roads, to make surveys and prepare plans and specifications for about 8½ miles of additional macadam road work. Bids will probably be asked about the end of December for this work.

CAMDEN N. J.—Dr. J. H. Wills, of the Egypt Wheelmen, has petitioned the council for permission to build at the club's expense a bicycle path three-quarters of a mile long in Haddon Ave.

JERSEY CITY, N. J.—Bids are asked until Oct. 12 for about 4,500 sq. yds. of paving, 3,100 cu. yds. of earth excavation, filling, 7,000 sq. yds. of asphalt paving, etc. J. C. Kaiser, Chr. Com.

KEARNEY, N. J.—Bids are asked until Oct. 13 for grading, flagging, etc., in two streets. B. E. Canfield, Township Clk.; W. S. Logan, Town Surv., Midland Ave., Arlington, N. J.

ALLENTOWN, PA.—It is reported that the citizens will vote in November on the question of increasing the debt $350,000 for paving and sewers. R. S. Rathbun, Cy. Engr.

ALLEGHENY, PA.—D. L. Fulton, Supt. Bureau of Highways and Sewers, informs us that A. V. Purnell has been awarded a contract for paving and grading at $23,000.

BELLEVUE, PA.—At the election in November the question of issuing $36,000 in bonds for paving will be voted upon.

CONNELLSVILLE, PA.— S. M. Troust, Borough Engr., writes us that the contract was to be let Oct. 3 for 3,700 sq. yds. of repressed brick paving.

JOHNSTOWN, PA.—John H. Dye, F. E. Cresswell and Chas. Hower are making surveys for the proposed Indiana and Westmoreland counties turnpike. About $9,000 has so far been raised by Dr. W. E. Matthews for the road.

SCOTTDALE, PA.—Bennett & Co. have been awarded the contract for paving Broadway, at $1.29 per sq. yd.

BALTIMORE, MD.—The mayor has approved the ordinances for paving and grading in three streets. Janon Fisher, Cy. Comr.

HAGERSTOWN, MD.—The commissioners have ordered the widening and improvement of two streets. J. E. Roger, Cy. Engr.

SPARTANBURG, S. C.—J. M. Elford, Cy. Clk., writes us that the city is now macadamizing certain streets. Des. Engr., A. Madole; C. M. Amos is the official in charge.

ATLANTA, GA.—Porter King, Mayor, has approved the contract awarded to A. W. Hammond for paving Whitehall St.

AUGUSTA, GA.—It is stated that the Aiken Improvement Society is considering the question of building a wagon road from Aiken to this city.

CHATTANOOGA, TENN.—The city has been authorized to issue $37,000 in 6% street improvement bonds. Robt. Hook, Cy. Engr.

AKRON, O.—Hayes & Sons, of Cleveland, have purchased $46,000 of 5% improvement bonds. S. W. Parshall, Cy. Engr.

CLEVELAND, O.—The board of park commissioners received the following bids Sept. 23 for improving Doan Brook Parkway, all bidders being residents of Cleveland: Northern Ohio Paving & Construction Co., $101,741; W. H. Ford & Co., $114,593; W. J. Gawne, $110,359; Brannan & DeCelle, $80,107; Burnett & Carr, $72,803; and James B. Macdonald, of Fairmount, O., $68,738 (awarded contract).——The following bids were received Sept. 23 for 14,014 sq. yds. of brick paving in East Madison Ave.: M. J. Bromley, $19,106; Brennan & Buettner, $19,347; The N. O. Paving & Construction Co., $19,486; Burnett & Carr, $20,628; Burgess & Gribbin, $23,395. E. A. Roberts, Secy. Bd. Control; D. E. Wright, Dir.

COLUMBUS, O.—The city engineer and the county surveyor are considering the lowering of the grade of West Broad St. Josiah Kinnear, Cy. Engr.

DEFIANCE, O.—It is reported that this city has sold $40,000 of 5% street improvement bonds.

IRONTON, O.—The county commissioners awarded contracts to Harry Brown, J. J. Robinson, Edward Wolfe and Josiah Thompson for building sections of the Branch turnpike.

MARIETTA, O.—Bids are asked until Oct. 26 for brick paving in Fourth St. Carl Becker, Cy. Clk.——W. J. Berry, Bellaire, O., has been awarded the contract for 34,000 sq. yds. of brick paving. W. P. Mason, Cy. Engr.

PLEASANT RIDGE, O.—Bids are asked until Oct. 24 for grading and macadamizing Liberty St., and also John St.; check, $1,000. J. A. Hosbrook, Village Engr., 56 Pike Bldg., Cincinnati; J. B. Hayward, Village Clk.

INDIANAPOLIS, IND.—Bids are asked until Oct. 14 for 1,600 ft. of cement sidewalks.——Resolutions have been adopted for brick paving and sewers in a number of streets.

PERU, IND.—Bids are asked until Oct. 13 for improving certain streets. David Irwin, Cy. Clk.

DULUTH, MINN.—The following contracts have been awarded by the county commissioners for constructing the Miller trunk road: Gulbrandson Bros., section No. 4, $6,716; P. McDonnell, No. 5, $6,450; W. H. Randall, No. 6, $5,215; C. H. Chaffee, section No. 11, four miles, $4,997. Contracts for other sections are also to be let, making the cost about $60,500. John Hawkinson, Supt. of County Roads.

ST. PAUL, MINN.—Bids are asked until Oct. 12 for grading in a number of alleys. John Copeland, Comr.

KANSAS CITY, MO.—The board of park commissioners has rejected the bids for paving Scarritt Ave., at $1.77 per sq. yd.——F. G. Trestrail has been awarded the contract for paving a portion of Grand Boulevard at $1.68 a sq. yd. H. A. Wise, Cy. Engr.

PORTLAND, ORE.—The question of paving First St. with brick is being considered. T. M. Hurlburt, Cy. Surv.

CLOVERDALE, CAL.—The residents of Yorkville are discussing the question of building a road to Fish Rock; and a committee has been appointed by the supervisors to make a report.

EUREKA, CAL.—At the election Nov. 3 the question of issuing $30,500 in bonds for building roads will be voted upon. F. E. Herrick, Surv., Eureka; H. D. Smith, F. Z. Roynton, Com.

SANTA BARBARA, CAL.—The supervisors are considering the question of building a new county road over the Santa Ynez Mountain, to cost about $12,000. F. F. Flourney, County Surv.

SAN RAFAEL, CAL.—Geo. L. Richardson, Cy. Engr., informs us that A. E. Buckman, San Francisco, Cal., has been awarded the contract for grading and macadamizing Fourth St. at $12,000, and E. Schwieran, San Rafael, for grading one section of Irwin St. at $1,500.

MANUFACTURING PLANTS.

BOSTON, MASS.—The "Transcript" says that plans have been submitted by J. C. Spofford for a machine shop to be erected in Marginal St., East Boston, near Jeffries St., for J. H. Long. The plans are for a frame structure, 75 × 100 ft., two stories high, and will cost about $6,000.

BROCTON, MASS.—H. H. Howard and others have leased the old Sawtel caster factory for the manufacture of wire nails, and are putting in machinery for the purpose. The concern, it is said, has orders for its product which will keep it busy for some time.——The Mawhinney Last Co., which is to remove its plant from Worcester here, has purchased the factory at Montello recently occupied by the Field-Hazzard Co.

FALL RIVER, MASS.—The contract for the erection of a large cotton mill in Mexico is said to have been awarded to D. H. Dyer & Son, of this city.

WORCESTER, MASS.—The directors of the new brewery are reported to have awarded the contract for the foundations of the building to the Webb Granite & Construction Co.

CAMDEN, N. J.—A 2½-story brick building at Point and Pearl Sts., used by two woolen and worsted yarn spinning firms, was destroyed by fire Oct. 3. Sheimer & Boyer and James E. Ackroyd were the losers. The loss is estimated at $100,000; insurance, $85,000 to $100,000.

STIRLING, N. J.—The Stirling Silk Mills were totally destroyed, with their machinery and contents, on Oct. 2; loss about $200,000, on which there is about $150,000 insurance. The mills were owned by Alfred Screull, Plainfield, N. J. The mills will be rebuilt when the insurance is adjusted.

ALLEGHENY, PA.—The American Laundry & Mfg. Co. has taken out a building permit for the erection of a 2-story and basement brick building at Madison Ave. and O'Hara St., to cost $13,500. William Lang is president of the company.

BLOOMSBURG, PA.—A wind storm on Sept. 30 destroyed the buildings of the Bloomsburg Mfg. Co. and the Brass & Copper Co. The School Furniture Co. lost the roof, stack and the end of its building. The Paragon Plaster Co.'s building is completely demolished.

CAMBRIA, PA.—It is reported that the Cambria Iron Co. wil make improvements this year in their plant that will cost from $500,000 to $800,000.

LANCASTER, PA.—The brick planing mill of H. Burd Cassel, collapsed during the storm of Sept. 30, destroying valuable machinery and involving a loss of about $10,000.

PENCOYD, PA.—The Pencoyd Iron Works, of Philadelphia, is preparing to erect another large addition to its plant, according to reports.

PHILADELPHIA, PA.—Hales & Ballinger, 1200 Chestnut St., have prepared plans for a factory for Richard C. Remmey & Son, 2600 Cumberland St., to be five stories high; built of brick and iron with slate and tin roof, steam heat and elevator, and to cost $50,000.

STROUDSBURG, PA.—Chas. W. McMurran, of Hightstown, N. J., as trustee, representing New York capitalists, proposes to erect a large plant for the manufacture of brick.

TITUSVILLE, PA.—A dispatch states that Titusville has secured the silk ribbon factory of Chas. Horne, of New York.

PHILADELPHIA, PA.—H. Disston & Sons, it is said, propose to build a one-story brick and iron boiler house, 94 × 50 ft. at Tacony.

BALTIMORE, MD.—The Anheuser-Busch Brewing Association, of St. Louis, Mo., is reported to have had plans prepared for an ice-plant, etc., to cost about $75,000.

SAVANNAH, GA.—The guano works, of Hull & Co., and the Savannah Guano Co.'s mills, were wrecked by the storm last week; and will be rebuilt. Comer, Hull & Co. lost their entire plant, and will put in an entirely new equipment in the new building which they will erect.

JACKSON, MICH.—The Michigan Central is reported to have set aside $160,000 to be expended in new shop buildings at Jackson Junction.

CHICAGO, ILL.—Fire destroyed a large portion of the Chicago Architectural Iron Works plant Sept. 30. The works are at Oakley Ave. and Kinzie St. Loss, about $25,000. The large building known as the finishing works and warehouse was entirely destroyed.——The city architect is preparing plans for a machine shop, repair shop and storage sheds to be built for the city on Ashland Ave., near 22d St., to cost $60,000.

FARMER CITY, ILL.—A plan is on foot to locate an iron foundry here. It is proposed to erect a number of buildings, the main one to be 200 × 50 ft., three stories high. The foundry part will be 100 × 60 ft., one story high. Three or four other buildings will also be erected. The entire plant to be constructed of brick.

MENDOTA, ILL.—It is stated that a stock company has been organized at this place to build a $60,000 box factory.

MARINETTE, WIS.—The United States Leather Co. is said to be advertising for bids for 2,050 ft. of dock and the dredging of a 90-ft. channel 2,000 ft. long and 10 ft. deep. As soon as the contract is let active work on a tannery will start and it will be running in the early part of 1897. It will cost $500,000.

MONTROSE, COLO.—The Farmers' & Merchants' Flouring Mill was burned Sept. 30. Estimated loss, $53,000.

ALAMEDA, CAL.—Dr. W. S. Halpruner, of 1501 Pacific Ave., is said to be working on a scheme to establish a bicycle manufactory in this city.

MINING.

MOUNT CARMEL, PA.—Messrs. Brennan, Boyle & Foy, of Pittston, have decided to erect a breaker of 450 tons capacity, and sink a slope or shaft on their newly acquired coal land, east of this place; cost about $100,000.

NORTH CAROLINA.—Our correspondent writes us as follows: A number of Northern capitalists have been in Charlotte (the center of the gold mining belt of the state) and in adjoining counties for the past week, looking into the possibilities of the gold mining industry in that locality. Several of them have secured options on tracts of gold-bearing land, and the prospects are that considerable money will be expended in thoroughly testing and developing that section——The mica mines in Mitchell county are now being worked more largely than ever before, all of them being in full blast, and the mica is claimed to be of a superior quality to any heretofore taken out. The best mica, and the most extensive mica mines in this country are now being worked in the western part of the state.——Near Lincolnton, where there are several undeveloped gold mines, nuggets weighing 350 dwts. have been found recently. Over 1,800 dwts. of such nuggets have been picked up at odd times on the property of Major Burton, who lives three miles from Lincolnton.

BUTTE, MONT.—It is reported that new boilers and a new hoisting engine will be installed at the Original mine, W. A Clark, owner.

CENTRAL CITY, COLO.—The Denver "Republican" states that Toensmeier & Co. have taken a new lease on the Alva Adams in Lake district and intend to sink another shaft on the west end of the claim, to a depth of 300 ft., and will connect with the west level of the main shaft at that depth. A new 100-HP. boiler will be placed in the main shaft and they intend to sink another lift of 100 ft., working the shaft to a total depth of 425 ft. ——At the Lotus shaft house, in Russell, necessary repairs are being made to the building to withstand the winter, and owner Sternberger says that he will soon put on a larger plant of machinery, intending to sink the shaft, at present a depth of 475 ft., to a depth of 1,000 ft.

CRIPPLE CREEK, COLO.—The tunnel, owned by the Squaw Mountain Tunnel & Mining Co., has been leased by R. M. Maloney, Lyman White and E. J. Cooper, at $200,000, for 18 months. They are bound by the lease to run 600 ft. of tunnel during the first 12 months, besides other work on the veins already cut. A new plant and machinery will be put in.

BAKER CITY, ORE.—A stamp mill is to be erected at the Maid of Erin mine, on Powder River, in the spring, according to reports. Col. Alexander may be addressed.

SONORA, CAL.—It is stated that the owners of the Confidence mine intend to erect hoisting works, a 30-stamp mill and an electric plant.

VIRGINIA, NEV.—It is said that plans and specifications have been prepared for the building of a new 30-stamp mill near the Clifton tunnel. P. T. Farnsworth, Gen. Mgr.

SANDON, B. C.—The Reco Mining & Milling Co. has been incorporated with a capital stock of $1,000,000, and will at once erect a concentrator and tramway at the Reco mine. On Sept. 22 one of the ore sheds over the tunnel was destroyed by fire; loss, $500. F. T. Kelly is interested in the company.

MISCELLANEOUS CONTRACTS.

BOILERS.—Atlanta, Ga.—The Georgia Ice Co. is reported as about to purchase two new boilers.

FIRE HOSE.—Niagara Falls, N. Y.—The fire and water committee has voted to advertise for bids for 2,000 ft. of fire hose.

WHARF.—Boston, Mass.—Bids are asked by the harbor and land commissioners, 65 Bowdoin St., until Oct. 14 for building a wharf at South Boston flats.

FIRE ENGINE.—Whitesboro, N. Y.—At a public meeting last week it was voted to purchase a steam fire engine to cost about $3,400. Address Dr. W. W. Jones.

RETAINING WALL.—Niagara Falls, N. Y.—The management of the Gorge Road will build a retaining wall, 30 × 50 ft., facing the abutments of the new steel bridge.

SMOKESTACK.—St. Paul, Minn.—Bids are asked until Oct. 9 for a smokestack set up complete at the Centerville pumping station. John Caulfield, Secy. Water Comrs.

HARBOR WORK.—Olympia, Wash.—A local paper states that Savage & Scofield have just been awarded a contract, at about $11,000, for government work on the harbor at Everett.

ROCK CRUSHER.—Lynchburg, Va.—This city will buy a rock crusher and other machinery to be used in improving the streets and roads of the town. La Fayette P. Rodes, Cy. Engr.

DREDGING PLANT.—Wilmington, N. C.—Bids are asked until Nov. 2 for furnishing a new or second-hand dredging plant, as stated in our advertising colums. Lt. Col. D. P. Heap, U. S. Engrs.

CANAL.—Boston, Mass.—The Maritime Canal Co., which proposes to build a canal across Cape Cod, has been authorized by the Massachusetts Railroad Commissioners and Harbor and Land Commissioners, sitting jointly, to issue from time to time the $6,000,000 of stock and $6,000,000 of bonds.

FILLING.—Brooklyn, N. Y.—Bids are asked until Oct. 14 for filling in a portion of the wharf at the foot of 96th St. Engr., E. C. Swezey, Third Ave. and 39th St.; E. R. Kennedy, Pres. Shore Road Comn.

DREDGING.—Sault Ste Marie, Mich.—The Lake Superior Power Co. received four bids last week for dredging at the head of the proposed canal, all at the same price; work will be re-advertised.

ROCK.—Portland, Ore.—Bids are asked until Oct. 29 for furnishing rock and placing same on the north jetty at the entrance to Coos Bay, Ore., as stated in our advertising columns. Capt. W. L. Fisk, U. S. Engrs.

GRADING.—New York, N. Y.—Bids are asked until Oct. 12 for grading about 50 acres at Sandy Hook, N. J., the site of the new post of Fort Hancock. Address Capt. C. A. Devol, A. Q. M., Army Bldg.; Jas. M. Moore, A. Q. M. Gen., U. S. A.

SURVEYS AND MAPS.—Sea Cliff, N. Y.—Bids are asked until Oct. 19 for surveying and furnishing maps of this village, as stated in our advertising columns. C. S. Dunning and G. H. Brouwer, Committee, Room 28, 47 Broadway, New York.

TELEPHONE LINES.—Long-distance telephone lines are to be built between Columbia and Charleston, S. C., and from Charleston to Augusta, Ga., to Atlanta and other points. Dist. Supt. Easterling, of Atlanta, Ga., has the matter in charge.

FLUME.—Cleveland, O.—Bids are asked until Oct. 15 for the reconstruction of the wooden flume in Walworth Run, from the westerly line of Scranton Ave. to a point 250 ft. southerly of the Abbey St. viaduct; check, $200. D. E. Wright, Dir. Pub. Wks.

DRAINAGE DITCH.—Omaha, Neb.—Bids are asked until Ost. 27 for constructing an external drainage ditch in the U. S. public building at Omaha, as stated in our advertising columns. Wm. M. Aiken, Supervising Architect, Washington, D. C.

BELT-POWER ELEVATORS, ETC.—Washington, D. C. —Bids are asked until Oct. 13 for furnishing two belt-power elevators, 3 iron cupolas and 800 tons of coal for the Washington navy yard, as stated in our advertising columns. Edwin Stewart, Paymaster Gen., U. S. N.

DRY DOCK AND MARINE RAILWAY.—Vancouver, B. C.—Press reports state that a marine railway and dry dock which will be able to handle all lumber ships and most steamers arriving at this port, will be constructed by English capital. The site has been chosen near the sugar refinery and the money has been raised.

PARK AND RAILWAY.—The Stribbling Springs Park Co., of Augusta county, Va., has been incorporated to subdivide 3,000 acres into building lots, construct ten miles of electric railway, modernize the hotel and build numerous cottages. Pres., E. D. Root, Winchester, Va.; Engr., C. E. Dickinson, Charlottesville, Va.

BRICK CONDUIT.—Boston, Mass.—The following bids were received Sept. 24 for constructing a 15½ × 17-ft. brick conduit for Stony Brook, section 5: Shea, Chapman & McCalla, New York city (all others Boston), $47,642; H. P. Nawn, $53,655; J. P. O'Connell, $60,613; Metropolitan Construction Co., $63,223; T. O'Leary, $63,326; D. E. Lynch, $77,037; Trumbull & Ryan, $89,008.

CANAL WORK.—Albany, N. Y.—The contract for repairing the steel dam across the Mohawk River at Cohoes, has been awarded to Curringham & Monty, of Sandy Hill, at $11,710.——The bids for rebuilding lock No. 9, Champlain Canal, between Mechanicsville and Stillwater, were as follows:

Jno. Cunningham, Sandy Hill (accepted)	$27,447
Troy Public Works Co., Troy, N. Y.	28,613
Whalen & Higgens, Waverly, N. Y.	28,092
Flood & Sherrill, Sandy Hill, N. Y.	30,739
Beckweth & Quackenbush, Greenbush, N. Y.	30,773
Hilt & Johnson, Greenbush, N. Y.	37,578

STONE DRY DOCK.—Norfolk, Va.—Rear-Admiral Geo. Brown, commandant at the navy yard, has sent to Washington specifications for a new stone dry dock to be constructed at the Norfolk yard. It will be 600 ft. long and 30 ft. deep over the sill, thus having sufficient capacity to hold any vessel afloat. Local papers state that the new timber dry dock has been attacked by worms and although it is only seven years old, it will be worthless in less than six years more. An appropriation of $10,000 will be used for sheathing the timbers of the dock with copper. The material from which the new stone dry dock will be constructed, should the work be authorized, will be the artificial stone manufactured at this yard. This composition is made of washed pebbles, cement and fine sand and is very durable.

PIER WORK, ETC.—New York, N. Y.—Bids are asked by the department of docks until Oct. 13 for repairing and extending pier at West 131st St. and North River.——The department of docks will construct four piers near Washington Market, North River, from 676 to 726 ft. in length and 125 ft. in width, with 250 ft. of open water between them; water to be 35 ft. deep up to the bulkhead line; entire cost of improvement to be $8,000,000.——The North Side board of trade is agitating the question of having the Bronx Kills, which run between the Harlem River and Long Island Sound, converted into a channel 350 ft. wide and 50 ft. deep, in accordance with a Government survey made in 1881, and having the Bronx River widened and dredged to a navigable depth, as far as West Farms. If the Bronx River should be converted into a navigable waterway 100 ft. wide it is claimed it would be of inestimable value to the entire North Side, and would give new and valuable water front two miles long and penetrating well into the 24th ward.

SHIP YARD.—Brooklyn, N. Y.—Owen P. McGowan and others, who recently bought the old Mumm's shipyard, at the foot of 55th St., are said to intend to thoroughly equip it for the repair and building of steam and sailing craft of every description. The improvements involve the dredging out of the basin, new buildings and machinery. The basin will be dredged out to a depth of 20 ft. over an area 135 × 800 ft. This work will be begun soon. Provision will be made for two marine railways, one of which will be capable of handling vessels of 500 tons, and drawing 11 ft. of water. The other will be for those of 200 tons burden and 9 ft. draft. The new boiler and machine shop is 70 × 100 ft. It will be equipped with the latest machinery and appliances. Nearby and connected with the machine shop will be a blacksmith shop. The establishment will also be provided with a large furnace shed for frame setting, plate setting and shop work and a building for the storage and display of plans. It will be some time before the plant is completed.

CONTRACT PRICES.

PUMPING STATION WORK.—New Bedford, Mass.—The following bids were received Oct. 1 for the building of foundations for the engine house, boiler house and chimney and coal shed at the new pumping station, Little Quittacas Pond, and for the laying of 400 ft. of intake into that pond, and for the masonry connection between Little and Great Quittacas, as advertised in Engineering News; Geo. S. Rice & Geo. E. Evans, Engrs., 95 Milk St., Boston; R. C. P. Coggeshall, Supt.:

Quantities.			E. W. Everson, $99,480.	Aab & Co., $89,192.	Steward & McDermott, $86,797.	Acock & Son, $73,235.

REPAIRING ASPHALT PAVING.—Omaha, Neb.—Judge Powell has refused to grant an injunction restraining the city from contracting with John Grant for repairing asphalt paved streets. The bids were received in June and the contract has since been awarded. It covers 40 paving districts, aggregating 200,000 sq. yds., and is for five years, the price to be paid being 98 cts. to $1.10 a sq. yd. for repairs actually made.

NOTE:—The reader will observe that these last two pages of Construction News are numbered consecutively with the loose part of the Supplement. The leaf may be readily cut out and pasted thereto by those who keep the Supplement on file.

MACADAMIZING.—Council Bluffs, Ia.—The following bids were received Sept. 25 for macadamizing a roadway in Broadway, from 12th St. to the bridge, about five miles; class A for macadam composed entirely of limestone and class B for macadam composed of a bottom course of limestone and a top course of Sioux Falls granite; prices are per cubic yard:

Bidder.	Class A.	Class B.	Grading.
L. W. Furnas	$2.70	$3.50	$0.20
F. H. Guanella	1.78½	2.37	.34
J. J. Hughes	1.97¾	2.19	.25
E. Van Court & Co.	1.89	2.45	.35
E. A. Wickham	1.83½	2.35	.25
J. E. Riley	2.37½	3.00	.27

The lowest bids on stone alone, omitting grading, give the following totals: Class A, 16 ft. wide, $10,471; 18 ft. wide, $11,781; 20 ft., $13,089. Class B, 16 ft. wide, $12,847; 18 ft. wide, $14,454; 20 ft., $15,059. Awarding of contract was postponed one week. Thos. Tostevin, Cy. Engr.

METAL MARKET PRICES.

FOUNDRY PIG IRON.—New York: $11 to $12. Pittsburg: $10.75 to $11.50. Chicago: $10.50 to $11.50.

LEAD.—New York: 2.7 to 2.8 cts. Chicago: 2.6 cts. St. Louis: 2.55 to 2.6 cts.

BARB WIRE.—Pittsburg: $1.75 to $1.80 for galvanized and $1.55 and $1.65 for painted in carload and less than carload lots at mill.

NAILS.—Pittsburg: $2.55 per keg for carload lots and $2.65 for less than carload lots of wire nails at mill, $2.30 and $2.40 for cut nails at mill. Chicago: $2.70 and $2.80 for wire nails, $2.45 and $2.55 for cut nails. New York: $2.70 and $2.80 for wire nails and $2.45 and $2.55 for cut nails.

SCRAP.—Car wheels, $10.50 to $11.50; wrought turnings, $9 to $9.50; cast borings, $7 to $7.50, all delivered at purchasers' works; hammered car axles, $15.50 to $16, delivered at New York; wrouought pipe and tube, $7.50 to $8, delivered at New York: No. 1 railway wrought, $11 to $12; cast machinery, $11 to $11.50 at mill.

TRACK MATERIAL.—New York: angle bars, 1.2 to 1.3 cts.; spikes, 1.6 to 1.65 cts.; track bolts, 1.85 to 1.95 cts. with square and 1.95 to 2.05 cts. with hexagon nuts. Chicago: angle bars, 1.4 to 1.45 cts.; spikes, 1.7 to 1.75 cts.; track bolts, $1.95 to 2 cts. with square, and 2.05 to 2.1 cts. with hexagon nuts.

RAILS.—New York: $28 at eastern mills and $28.75 at tidewater; old rails, $12.50 to $13.50 for iron, and $11 to $11.50 for steel; light rails, $29; girder rails, $28 up to 7-in., and $30 for over 7-in. rails. Pittsburg: $28 for standard sections of 45 lbs. and over; old rails, $15 to $16 for iron, and $12 to $13 for steel. Chicago: $29 to $31 for standard sections, $28 for light sections; old rails, $12 for iron and $8.50 to $9 for steel.

STRUCTURAL MATERIAL.—New York: beams, 1.7 to 1.75 cts.; channels, 1.7 to 1.75 cts.; angles, 1.35 to 1.4 cts.; tees, 1.6 to 1.7 cts.; universal mill plates, 1.3 to 1.4 cts.; steel plates, 1.35 to 1.45 cts. for tank; 1.45 to 1.55 cts. for shell; 1.6 to 1.7 cts. for flange; 1.8 to 1.9 cts. for ordinary firebox; 2.25 to 2.5 cts. for locomotive firebox. Pittsburg; beams, 1.55 to 1.75 cts.; channels, 1.55 to 1.75 cts.; angles, 1.15 cts.; tees, 1.4 cts.; Z-bars, 1.3 to 1.35 cts.; universal mill plates, 1.2 to 1.25 cts.; steel plates, 1.15 to 1.2 cts.; for tank, 1.25 to 1.3 cts. for shell; 1.35 to 1.4 cts. for flange; 2.5 cts. for ordinary firebox, 2.5 to 3.5 cts. for locomotive firebox. Chicago: beams, 1.7 to 1.8 cts.: channels, 1.7 to 1.8 cts.; angles, 1.3 to 1.35 cts.; tees, 1.55 to 1.6 cts.: universal plates, 1.35 to 1.4 cts.: steel plates, 1.35 to 1.4 cts. for tank; 1.55 to 1.6 cts. for flange; 2.15 to 2.25 cts. for ordinary firebox; 4 cts. for locomotive firebox.

IRON AND STEEL.—According to the reports in the "Iron Age" the outlook is encouraging for a good revival in business after the election shall have put affairs on a sound-money basis. There has been more activity in Bessemer pig in the central west than there has been for some time, and in the Chicago district some large inquiries are in the market. Under moderate transactions, relatively speaking, Bessemer pig has advanced to $11 in the valleys as the asking price for delivery into next year. Steel bars are phenomenally low, only 1 ct. per lb. at Pittsburg. In Pig Iron for foundry purposes the feeling is better and more inquiries are coming forward, although the actual consumption is not believed to have been growing much of late. Makers, notably those of the south, are holding out for better prices, and $7 for No. 2 Foundry at Birmingham is regarded as rock bottom.

At Philadelphia, movements in the iron and steel trade have not been large during the past week, neither have prices appreciated, but there is a strong indication that things are surely shaping for a very decided improvement in the future. So far as actual transactions are concerned, however, there is no particular change from the earlier weeks of the month, and it is not unlikely that similar conditions will rule during October, as manufacturers will not accept ruling prices for long deliveries, and consumers will not pay an advance until the election of McKinley is an accomplished fact.

At Pittsburg, the last week of September was the best for some time, as far as sales of pig iron and steel were concerned. The situation is steadily improving and October is expected to show still further improvement. In the opinion of many people in the trade here, the country could hardly be in better condition for the revival in business which is expected to come with the defeat of free silver at the November election. Stocks are practically exhausted all over the country and railways are badly in need of material and will buy heavily as soon as they can realize on their securities. The extension of electric lines in the next five years will be rapid and will require a large tonnage of iron and steel in various shapes. The fact that stocks are practically extinct is illustrated by the way in which buyers are trying to place orders at present prices, but for deliveries running through the first half of 1897.

At Chicago inquiries are increasing, the demand is becoming more general and confidence is growing on all sides. The railways are particularly prominent in making inquiries for prices, some desiring figures for a year's supplies. The improved feeling appears to be based almost entirely on the belief in McKinley's election, and a great deal of business has been partly placed that is contingent on that event. At the same time there are some influences which are assisting in improving the general situation, one of which is the reduction in freight rates on grain to Eastern points.

INDUSTRIAL NOTES.

THE S. MORGAN SMITH TURBINE WORKS, York, Pa., has recently shipped two 33-in. water wheels to a town in Wisconsin.

MILLER BROS. & CO., Pittsburg, Pa., are stated by the press to have the contract for the erection of a large steel plant at Mariopol, Southeastern Russia.

THE NILES TOOL WORKS, Hamilton, O., it is reported, will soon ship a number of planers and boring machines to Italy and Austria.

THE HAMILTON MACHINE TOOL CO., Hamilton, O., has completed, it is said, another order for drill presses to be shipped to Stockholm, Sweden.

B. W. PAYNE & SONS, Elmira, N. Y., boiler manufacturers, have had their plant attached by the sheriff. The assets of the firm are stated to be $260,000.

THE JAMES McKINNON PILE DRIVING & BRIDGE BUILDING CO., Providence, R. I., has been dissolved by mutual agreement. James McKinnon will continue the business under the firm name.

THE BROOKLYN HEIGHTS RY. CO., Brooklyn, N. Y., has put into service 14 new cars from its own shops. These cars are fitted with electric buttons for the use of passengers in signaling to stop the car.

THE MORGAN ENGINEERING CO., Alliance, O., is reported to have shipped last month 200 tons of machinery to Russia for the new locomotive works there. There were two steam hammers, a hydraulic crane and a hydraulic flanging press.

THE BRIGHTMAN FURNACE CO., Cleveland, O., has sold to the Union Pacific Co., it is said, three large stokers. Contracts are now on hand from the Jewish Orphan Asylum, Cleveland Steam Fitting Co., both of Cleveland, and B. F. Goodrich Co., Akron, O.

THE LACONIA CAR CO., Laconia, N. H., may have a receiver appointed. The capital stock is $200,000; the plant is mortgaged for $150,000 and has outstanding debts of $250,000. The appointment of a receiver is asked so that work may continue on present contracts amounting to $30,000.

THE GATES IRON WORKS, Chicago, Ill., is reported to have shipped two rock crushers, with a daily capacity of 200 tons each, to the Coolgardie gold fields of West Australia. The company has also an order for one of its largest crushers, capacity two tons per minute, for the Basalt Actien Gesellschaft of Kolen, Germany.

THE UNIVERSAL CONSTRUCTION CO., Chicago, Ill., has built a steel car for the Northern Pacific Ry., which has no wood in its construction. The platform is made of rolled steel. It weighs 25,860 lbs., and has a capacity of 80,000 lbs. It is 33 ft. long and standard height. The trucks are massive in construction and the journals are 4¾ × 8 ins. box bearing.

MR. N. F. HUGO, of Duluth, Minn., has the contract for three miles of 42-in. steel force main for the Duluth water-works and is now getting the necessary machinery in place. Mr. Hugo intends to have a plant in operation soon for doing all kinds of structural work, including bridge work. The plates for the force main will be rolled by the Ironton Structural Steel Co., of Duluth.

R. P. & J. H. STAATS, 29 Broadway, New York city, have the contract for the new ferry building for the Pennsylvania R. R. Co., to be erected at the foot of West 23d St., New York city. The building is to be of steel, two stories in height. The same firm has the contract for the new pier and steel shed thereon for the North German Lloyd Steamship Co., to be built at the foot of 2d St., Hoboken, N. J.

THE YOUNGSTOWN BRIDGE CO., of Youngstown, Ohio, is completing a two-span truss bridge for the Pennsylvania Lines Northwest, over the Tuscarawas River. It has contracts for several other bridges for the same company; three girder spans for shipment to Russia; furnace building for the new plant of the Punxsutawney (Pa.) Iron Co.; and among other structural work, several buildings for mining plants in Arizona. Work is also under way on a seven-span bridge for Lewiston, Me., consisting of 85-ft. plate girders, carrying granite pavement.

WM. SKINNER & SONS, Baltimore, Md., are said to have a contract from the Baltmore & Ohio R. R., for ten large freight lighters, for use in New York harbor. Five are covered and the remainder are open freight lighters, equipped with heavy masts and hoisting gear. The latter are for ordinary heavy freight, while the covered lighters are intended principally for moving frozen meats. All the lighters are 80 ft. long, 28 ft. wide and 8 ft. deep. The entire lot is to be finished and delivered by the first of next year and will cost in the aggregate between $40,000 and $50,000.

THE WEST SUPERIOR IRON & STEEL CO., West Superior, Wis., it is said, may be reorganized. It is proposed that the bondholders and creditors shall combine and take possession and operate the plant. The principal obstruction to this is the position of the Land & River Improvement Co., one of the largest stockholders and creditors. The indebtedness of the West Superior Iron & Steel Co. is between $3,000.000 and $4,000,000, of which nearly $1,400,000 is represented by bonds. Mr. John D. Rockefeller is a large bondholder, and is working for a reorganization.

THE JACKSON FILTER CO., 312 North 4th St., St. Louis, Mo., Mr. Powell Jackson, Pres., informs us that it has been awarded the contract for putting in a 500,000-gallon filter for the Sullivan, Ind., water-works, and a 200,000-gallon filter for the Rex Mill Co., Kansas City, Mo.; a 200,000-gallon filter for the St. Charles Hotel, New Orleans, and two 100,000-gallon filters for the Boston Club of New Orleans. Among the plants recently installed by this company are: The 800,000-gallon filters for the Cameron, Tex., water-works; a 200,000-gallon filter for the Century Bldg., St. Louis; a 100,000-gallon filter for the Chemical Bank Bldg., St. Louis; a 300,000-gallon filter for the East St. Louis (Ill.) Ice & Cold Storage Co.; a 300,000-gallon filter in the Planter's Hotel, St. Louis; a 150,000-gallon filter for Anthony & Kuhn Brewing Co., and many filters of smaller capacities.

NEW COMPANIES.—Falls City Chain Works, Louisville, Ky.; $10,000; E. M. Hubbert, Jacob Block and Newton Seibert.

Southern Electric Co., Baltimore, Md.; James F. Morrison, Paul Winsor, John S. Boyd.

Faurot Steam Boiler Mfg. Co., Denver, Colo.; $150,000; Joseph H. Smith, C. B. Ayres, Charles S. Faurot.

Phillipstown Crushing Co., Cold Spring, N. Y.; to deal in road machinery and to contract for crushing stone and constructing and repairing roads; $2,500; Henry Metcalfe, and Richard Giles, of Cold Spring; John M. Touchey and William Church Osborne, of Garrison, N. Y.

Pacific Coast Water Grate Bar Co., San Francisco, Cal.; $100,000, commencing with $75,030; W. N. Faris, S. R. Jacobs, L. P. Bolander.

C. C. Bradley & Son., Syracuse, N. Y.; to conduct a general manufacturing business in wood and iron and hardware specialties; $25,000; Christopher C. Bradley, Christopher C. Bradley, Jr., and Cora M. Bradley, all of Syracuse.

Lansing Boiler & Engine Works, Lansing, Mich.; $100,000.

Greenville Tube Co., Greenville, Pa.; to manufacture iron and steel; $1,000; F. W. Ensworth, G. B. Chase, Carl Buck, Levi Morrison and H. N. Shrom.

State Line Natural Gas Co., Point Marion, Pa.; J. M. Cooper, W. F. Johnson and T. J. Lockwood.

Forciped Co., New York city; to maufacture bicycles and a patented appliance for same; $500,000, commencing with $25; W. E. Prall, Chas. T. Hunt, Fernando Baltes, New York city.

Hamilton Pressed Brick Co., Scranton, Pa.; $100,000, commencing with $10,000; Treas., C. O. Sutton, Scranton, Pa.

George B. Inman Contract Co., New York city; to construct water-works, gas and electric light works, electric railways, etc.; $10,000; George B. Inman, Edwin L. Hunt, New York city, and George Frohl, of Brooklyn, N. Y.

Ajax Electric Co., Brooklyn, N. Y.; to manufacture studs and electric appliances; $50,000; T. C. R. Horsfield, Arthur S. Willdig and W. D. Spelman, of Brooklyn.

Air Pressure Cylinder Co., New York city; to manufacture material and appliances for the transmission or use of gas, air, or other substances at high pressure; $1,000,000; Charles E. Warren, Norton, Conn.; Henry A. Robinson, Yonkers, N. Y.; John T. Little, Jr., Henry L. Stimson, New York city.

Eagle Mfg. Co., Kansas City, Mo.; $100,000, commencing with $50,000; Hiram F. Devol, George H. Devol, Samuel B. Stockley.

Edwards Car Coupler Co., Troy, N. Y.; $500,000; Richard J. Edwards, Galena, Ill.; Charles E. Lewis, Philadelphia; Charles H. Wallow and John A. MacDonald, Troy.

Northern New York Oil, Gas & Mining Co., Chicago; $50,000; Victor Barothy, Herman Will, John Berry and William P. Byrne.

Otway Stone Co., Otway, O.; $50,000.

Standard Telephone Mfg. Co., Philadelphia, Pa.; to manufacture telephones and electrical supplies; $500,000, commencing with $100; Chas. K. Yungman, Geo. F. Payne, Chas. G. Wetter, all of Philadelphia.

Mineola Town Co., Los Angeles, Cal.; to deal in real estate, construct water-works, etc.; $100,000, commencing with $100; F. R. Strong, James M. Wilde, M. E. Hammond, all of Los Angeles.

Bellaire, Benwood & Wheeling Ferry Co., Wheeling, W. Va.; to operate a ferry between Bellaire, O., and Benwood, W. Va.; $100,000; Jas. H. Reed, Jacob Friday, W. C. Jutte, all of Pittsburg, Pa.

Solar Oil Co., Columbus, O.; $25,000, commencing with $300; H. W. Webb, S. V. Point, H. L. Gilbert, all of Columbus, O.

New Jersey & Delaware Leffler Ry. Co., Philadelphia, Pa.; Indiana Leffler Ry. Co., Indianapolis, Ind.; Illinois Leffler Ry. Co., Chicago, Ill.; to deal in mines and timber lands, build railways and canals; each with a capital stock of $5,000,000, commencing in each case with $100; John B. Muchmore, Shelbyville, Ind.; H. W. Lester, Chicago, Ill.; C. E. Payen, Chicago, Ill.

British Canadian Gold Field Exploration, Development & Investment Co., Spokane, Wash.; $2,500,000; W. H. Wallbridge, W. L. Stuart, C. B. Murroy, all of Toronto, Ont.

Hoffman Foreign Machine Co., New York city; to manufacture and deal in machinery; $300,000, commencing with $500; R. L. Shainwald, Chas. Fishel, Adolph Liebes, all of New York city.

Imperial Electric Co., Westfield, N. J.; to manufacture electrical machinery and specialties; $60,000, commencing with $1,000; W. B. Elliot, J. W. Eskholme, Westfield, N. J.; H. J. Linder, Brooklyn, N. Y.

Alcatraz Co., San Francisco, Cal.; to manufacture oils, asphalts, gas, etc., and to conduct a general contracting business; $5,000,000, commencing with $50; Chas. E. Green, C. E. Foerster, A. F. Morrison.

Central Steamboat Co., Providence, R. I.; to build and operate steamboats; $1,000,000, commencing with $10,000; Robert Coit, J. N. Harris, Augustus Brandegree, New London, Conn.

Electric Gas Light, Heat & Power Co., Pittsburg, Pa.; to manufacture gas and electricity and to deal in engines and electric apparatus; John McGarvey, 72 Paccart St., Allegheny, Pa.; G. D. Williams and Ralph Theophilus.

Lincoln Fuel Gas Co., Pittsburg, Pa.; $1,000; Treas., Jeremiah Miller, Pittsburg, Pa.

Warren Granite Co., Bucksport, O.; to manufacture granite; $20,000, commencing with $11,000; Ed. L. Warren and A. I. Warren.

Wiard Foundry Co., of Brooklyn, N. Y.; $10,000; Matthew Wiard, William N. Calder, of New York city, and William J. Berrell, of Bayonne, N. J.

Automatic Switch Lock Co., Charlestown, W. Va.; $50,000, commencing with $50; Harry M. Stevenson, Chas. L. Spencer, Frederic F. Culver, all of New York city.

Forest City Mfg. Co., Cleveland, O., to manufacture nails, nail machinery, iron and steel; $25,000; Charles S. Bently, N. C. Brooks, and L. B. Bears.

American Patent Diamond Dop Co., New York city; to manufacture diamond dops and other diamond cutting and polishing articles; $5,000; E. Loesser, Leon Dreyfus, Ernest Loesser, of New York city.

Rogers Mfg. Co., Kansas City, Kan.; $50,000; John, George S. and Samuel H. Rogers and O. T. Stephenson, all of Kansas City, Kan.

Commercial Construction Co., New York city, to construct electric railways, electric light plants and subways, and deal in electrical suppiles; $10,000; George Hilliard, George M. Still, New York city; Archibald J. Martin, Brooklyn.

Monarch Duplex Engine Co., Tucson, Ariz.; $1,000,000; D. D Hobbs, J. T. Hobbs and W. G. Meade.

Little Giant Fire Extinguisher Co., New York city; to manufacture fire extinguishers; $500,000; Edgar H. Ellis, C. H. Bellows, of Brooklyn; Jay W. Watkins, C. H. Peno, of New York city.

Clinton Hills Powder Co., Cooperstown, N. Y.; $10,000; George S. Brooks, George M. Jarvis and E. V. Adams, all of Cooperstown.

Lincoln Fuel Gas Co., Harrisburg, Pa.; to operate in McKeesport, Elizabeth, West Elizabeth and other towns in Allegheny county; $1,000; Jeremiah Miller, John M. Boyd, Frank J. Paulson, all of Pittsburg.

Los Alamitos Sugar Co., Los Angeles, Cal.; to erect and operate a sugar factory; $1,000,000, commencing with $400,000; William A. Clark and Will A. Clark, Jr., of Butte, Mont., and J. Rose Clark, of Los Angeles.

DESIRABLE ITEMS.

Much of the very best information published in our Construction News columns comes to us from subscribers who send items in reference to work with which they are connected or in which they are interested. Such reliable items are not only greatly desired by us but frequently result in much good to the sender by bringing his name and his work to public attention. If you are not already doing so we ask you, hereafter, to send us the earliest possible information of work that comes under your notice.

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering New

PERSONALS.

Mr. Edward McGovern, railway contractor, of Lancaster, Pa., died Oct. 1.

M. Victor de Lesseps, son of the late Count de Lesseps, died in Paris, France, Oct. 6.

Mr. James T. Goodwin, Superintendent of the Virginia Iron Works, Norfolk, Va., died Oct. 1.

Mr. W. H. Ferguson, Superintendent of the Dayton Coal & Iron Co., of Dayton, Tenn., has resigned.

Capt. W. E. Nason, Superintendent of the Franklin Water-Works, Franklin, O., died Oct. 10.

Mr. James Wood, proprietor of the Duquesne Tin Plate Works, Pittsburg, Pa., died Oct. 2, aged 35.

Mr. Chas. R. Kelsey, Manager of the Sweetwater Coal Mining Co., of Hopkins, Wyo., resigned recently.

Mr. Thomas B. Packer, of the firm of Hubbard & Packer, mechanical engineers, of Pittsburg, Pa., died Oct. 5.

Mr. H. McIntire, formerly Roadmaster of the Des Moines & Fort Dodge R. R., at Grand Junction, Ia., died Sept. 29.

Mr. Chas. P. Russell has been appointed General Superintendent of the North Adams (Mass.) Gas & Electric Light Co.

Mr. Charles H. Russell, City Engineer of Providence, R. I., was married Oct. 7 to Miss Florence Russell, of Lockport, N. Y.

Mr. W. A. Wolford, Master Mechanic of the Cleveland, Cincinnati, Chicago & St. Louis Ry., at the Wabash shops, has resigned.

Mr. Joachim B. Mathisen, of the firm of Howard & Mathisen, architects, San Francisco, Cal., committed suicide Sept. 26.

Mr. E. W. Knapp, Master Mechanic of the Mexican National R. R., at Acambaro, Mex., has been transferred to the City of Mexico.

Mr. Henry Breed, of Lynn, Mass., died Sept. 27, aged 67. He was the first Superintendent of the Boston, Revere Beach & Lynn R. R.

Mr. Henry Holmes, for several years Master Mechanic of the Wabash, St. Louis & Pacific R. R., died at East Buffalo, N. Y., Sept. 29.

Lieut.-Com. William Wilberforce Gillpatrick, U. S. Navy, Light-house Inspector of the Fourteenth District, at Cincinnati, O., died last week.

Mr. Bernard F. O'Connor has been elected President, and Mr. James M. Fish, Secretary, of the Underground R. R. Co., of New York city.

Mr. E. D. Stegall has been appointed Master Mechanic of the Mexican National R. R., at Acambaro, Mex., to succeed Mr. E. W. Knapp, transferred.

Mr. D. R. Murphy has been appointed Division Superintendent of the Duluth, Mississippi River & Northern Ry., with headquarters at Hibbing, Minn.

Mr. Adam Harkness has been appointed Division Superintendent of the Pennsylvania Coal Co., at Dunmore, Pa., to succeed Mr. Anthony Horan, deceased.

Mr. W. H. Brehm has been appointed Master Mechanic of the Missouri, Kansas & Texas Ry., with headquarters at Parsons, Kan., to succeed Mr. C. T. McElvany.

Mr. John L. Wigton has been appointed Master Car Builder of the Missouri, Kansas & Texas Ry., with headquarters at Sedalia, Mo., to succeed Mr. J. Doyle.

Mr. H. Walter Webb, Third Vice-President of the New York Central & Hudson River R. R., has been appointed Receiver of the Ogdensburg & Lake Champlain R. R. Co.

Mr. Edwin Hawley, Vice-President of the Minneapolis & St. Louis R. R., has been elected President of the same, to succeed Mr. W. L. Bull, resigned, as noted in our last issue.

Mr. R. Fitzsimmons, Acting Master Mechanic of the Mexican National R. R., at the City of Mexico, has been appointed Foreman of Engines, with headquarters at Saltillo, Mex.

Mr. Paul Minnis, formerly General Manager of the Home Telephone Co., Mobile, Ala., has accepted the position of electrical engineer with the Best Telephone Mfg. Co., Baltimore, Md.

Mr. H. U. Wallace has been appointed Roadmaster of the First Division of the Illinois Central R. R., with headquarters at Chicago, Ill., to succeed Mr. A. Philbrick, transferred.

Mr. Charles O. Jolly, Superintendent of the Toronto branch of the Ontario Rolling Mill Co., has been made Superintendent of the New Haven Rolling Mill Co., New Haven, Conn.

Mr. H. F. J. Porter, of Chicago, Ill., delivered a lecture on "Hollow Steel Forgings," illustrated by stereoptican views, before the students of Purdue University, Lafayette, Ind., Sept. 28.

Mr. T. F. Grover, Superintendent of the Milwaukee & Wuwatosa Electric Co., has been appointed General Manager of the Fond du Lac Electric Light & Power Co., of Fond du Lac, Wis.

Mr. A. Philbrick, Roadmaster of the First Road Division of the Illinois Central R. R., at Chicago, Ill., has been transferred in the same capacity to the Thirteenth Division, with office at Memphis, Tenn.

Mr. Stewart Rapalje, of Northport, N. Y., died Oct. 8, aged 54. He was the author of a "Digest on Railroads and Corporation Decisions," and was at one time the editor of "The Railway and Corporation Law Journal."

Mr. S. S. Babbitt, mechanical engineer, formerly with the Shoenberger Steel Co., has accepted a position as representative, in Pittsburg, Pa., of Wm. Todd & Co. and Wm. B. Pollock & Co., of Youngstown, Pa.

Mr. George Senft, General Superintendent of the Ligonier Valley R. R., was shot and seriously injured in a conflict which occurred Sept. 29, at Ligonier, Pa., between two parties of laborers over a disputed piece of property.

Mr. A. T. Sabin, Engineer of Maintenance of Way of the Chesapeake, Ohio & Southwestern R. R., has been appointed Roadmaster of the Tenth Road Division of the Illinois Central R. R., his headquarters remaining at Louisville, Ky.

Mr. Lawrence Fisher Frazee, Superintendent of the Bergen Point & Port Richmond Ferry Co., died Oct. 10, aged 83. He was interested in the old Camden & Amboy R. R., and was active for many years in various branches of the Pennsylvania R. R.

Mr. F. W. Brazier, General Foreman of the car shops of the Illinois Central R. R., at Burnside, Ill., has been appointed Assistant Superintendent of Machinery of that road and of the Yazoo & Mississippi Valley R. R., with headquarters at Chicago, Ill.

Prof. William Kendrick Hatt has returned to Purdue University, Lafayette, Ind., to take charge of the work in Applied Mechanics in the Department of Mechanical Engineering, having been pursuing for the past year a course of studies at Cornell University, Ithaca, N. Y.

Mr. Edwin Mitchell, Assoc. M. Am. Soc. C. E., has opened an office at 5 East Lexington St., Baltimore, Md., as a civil and sanitary engineer. He is a graduate of Union University, Schenectady, N. Y., and has been engaged in municipal and railway engineering for the past 11 years.

Col. Augustus Boyd, retired iron manufacturer, of Philadelphia, Pa., died Oct. 5, aged 70. At the age of 21 he became the Manager of the Elizabeth Iron Furnace in Lancaster county. Pa. After the war, in which he served creditably, he engaged in the manufacture of iron at Coatesville, Pa.

Mr. Lewis Kingman, Chief Engineer of the Mexican Central Ry,. with headquarters in the City of Mexico, has been engaged by the management of the Atchison, Topeka & Santa Fe Ry. Co. to inspect the entire Santa Fe system and report an estimate of what it would cost to reproduce the several lines.

Mr. Geo. H. Sturtevant, Jr., and Mr. F. H. Todd, have formed a partnership under the firm name of Sturtevant & Todd, with offices at 506 Association Building, Chicago. They will make a specialty of municipal and railroad engineering, a field in which both have practised for several years past.

Prof. C. P. Matthews has been called to the chair of Associate Professor of Electrical Engineering, Purdue University, Lafayette, Ind., and Prof. Winder F. Goldsborough, Associate Professor of Electrical Engineering, succeeds Prof. Harold Babbitt Smith, Professor of Electrical Engineering, resigned.

Mr. C. F. W. Felt, formerly Resident Engineer of the Gulf, Colorado & Santa Fe Ry., was appointed Sept. 1 Chief Engineer in charge of the maintenance of tracks, buildings and bridges and water service and all construction work, with headquarters at Galveston, Tex,, as was noted in part in our issue of Sept. 3.

Mr. P. J. McWeeney, of Herkimer county, New York, has been appointed Deputy Superintendent of Public Works of the N. Y. State Department of Public Works, and will perform the duties of Superintendent Aldridge in his absence, except those as a member of the State Canal Board and of the Capitol Construction Commission.

Mr. John W. Hill, M. Am. Soc. C. E., consulting engineer, of Cincinnati, O, and Mr. Geo. H. Benzenberg, M. Am. Soc. C. E., City Engineer and President of the Board of Public Works, of Milwaukee, Wis., have been selected by Mayor Swift, of Chicago, Ill., as two of the three experts authorized by the special council committee to investigate the matter of building intercepting sewers.

Mr. Ira Judson Coe, civil engineer, was married Oct. 14, to Miss Harriet Whiteman Halloway, daughter of the Rev. William W. Halloway, D. D., of Dover, N. J. Mr. Andrew H. Green, Jr., Manager of the Solvay Process Works, Detroit, Mich., was the best man, and Messrs. Daniel B. Clark, of the Metropolitan Water-Works, Boston, Mass., and Robert H. Jacobs, civil engineer, of the New York Water-Works, were the ushers. All three were classmates of Mr. Coe, at Cornell University.

Mr. H. Collbran, President and General Manager of the Midland Terminal Ry., with office at Denver, Colo., has left for a six months' trip to Corea, Asia, in the further investigation of certain mining and railway concessions obtained by him and others from the government of that country, Mr. W. T. Carley, a railway engineer of considerable experience in the south, and two mining engineers accompanying him. Mr. W. K. Gillett, Vice-President and Treasurer, will assume the entire management of the road during the absence of Mr. Collbran.

Mr. J. B. Cleveland, Receiver for the Port Royal & Western Carolina Ry., with headquarters at Spartanburg, S. C., has been elected President of the Charleston & Western Carolina Ry., which is a consolidation of the former named road with the Port Royal & Augusta Ry. Mr. A. W. Anderson, Superintendent of the Port Royal & Western Carolina Ry., with offices in Augusta, Ga., will retain that office under the new organization. Mr. A. H. Porter, recently Superintendent of the Central of Georgia Ry., has been appointed Roadmaster of the Charleston & Western Carolina Ry.

Mr. Robert Neilson, M. Am. Soc. C. E., General Superintendent of the Northern Central and the Philadelphia & Erie Division, Pennsylvania R. R., died, in Williamsport, Pa., Oct. 12, aged 59 years. Mr. Neilson was born in Ontario, Canada, Aug. 19, 1837. He graduated from the Renssalaer Polytechnic Institute in 1861 and entered the service of the Philadelphia & Erie Railway as rodman. He has been connected with the Pennsylvania R. R. and its branches ever since. In January, 1882, he was appointed to the position held at the time of his death. He became a member of the American Society of Civil Engineers on Feb. 17, 1869.

Mr. Alfred F. Noyes, M. Am. Soc. C. E., of the firm of Noyes & Hazen, of Boston, died suddenly of heart failure on Oct. 12, at the age of 45. He was City Engineer of Newton, Mass., for the 15 years ending in the middle or latter part of 1893, when he resigned to accept the position of Assistant Chief Engineer of the Massachusetts State Board of Health. In 1895 he was appointed a member of the Metropolitan Sewerage Commission, which has charge of the construction of a great system of trunk sewers for Boston and vicinity. Mr. Noyes had been President of both the Boston Society of Civil Engineers and the New England Water-Works Association.

Major Wm. H. McClintock, Manager of the Alabama Car Service Association, died at Birmingham, Ala., Oct. 2. He was born Dec. 13, 1844, at Edgefield Court House, S. C., and entered the railway service Jan. 1, 1881, being from that time until '82 Assistant Engineer on the Louisville & Nashville R. R. During the following year he was Superintendent of the Road Department, and from Jan. 1, 1883, to April 15, 1886, Assistant Engineer of the Southern divisions of the same road, from Decatur to New Orleans. On the latter date he became Resident Engineer of the Atlanta & West Point R. R. and the Western Ry. of Alabama, and held this office until April 1, 1887, when he was appointed Superintendent of the Columbus & Western and the Savannah & Western Divisions of the Central of Georgia Ry. At the end of 1889 he was appointed Superintendent of Roadway of the Louisville, New Orleans & Texas R. R., and General Superintendent of the New Orleans & Northwestern Ry. in Sept., 1890. In Feb., 1891, he was appointed to the office he held at the time of his death.

Col. Levi K. Fuller, M. Am. Soc. M. E., ex-Governor of Vermont, died at his home in Brattleboro, Vt., Oct. 10. He was born in Westmoreland, N. H., Feb. 24, 1841. When 16 years of age the Windham County Agricultural Society awarded him a prize for a steam engine improvement. He subsequently went to Boston, where he took a course of scientific study. In 1860 he entered the Estey Organ Works, of Brattleboro, as a machinist and he was gradually promoted until he became Vice-President of the company, which position he has held for 20 years. In 1873 he was tendered the appointment of commissioner to the Vienna Exposition by President Grant, but declined the honor, owing to pressure of private business. He was an active member of the American Association for the Advancement of Science and of the American Society of Mechanical Engineers. Mr. Fuller is said to have been granted over 100 patents upon his inventions, chiefly upon machinery for the manufacture of musical instruments. He was interested in astronomy and had an observatory attached to his residence with a fine equatorial telescope. He held many town offices and in 1880 was elected to the state senate. In 1886 he was elected Lieutenant-Governor, and in 1892 was chosen Governor.

William Harrison Grant, M. Am. Soc. C. E., died at his home in Sing Sing, on Oct. 10. Mr. Grant was born at Neversink, Sullivan County, N. Y., on May 15, 1815, and he was educated at the New Paltz Academy, where he studied surveying. After some experience on the New York & Erie Railway, he continued his mathematical studies at Ithaca Academy. He was then appointed assistant engineer on the enlargement of the Erie Canal, under the late William J. McAlpine and remained in that service about nine years, though for two winters he was a deputy clerk in the New York legislature and for a time assistant to Adjutant-General Niven. Later he was an assistant engineer on the Hudson River Railway survey, under Chief Engineer John B. Jervis; but before this road was completed he was made Chief Engineer of the Cleveland

Zanesville & Cincinnati Railway, of which he constructed 60 miles. He then surveyed a railway from Georgetown to Hagerstown, Md., on a route afterwards occupied in part by the Baltimore & Ohio Railway. Returning to New York, he was appointed Superintending Engineer of Central Park and was connected with that work until its completion. Mr. Grant was later made Civil and Topographical Engineer of the Department of Public Works, with the Annexed District under his charge, and he was also constructing engineer of the same department at a later period. In 1876 he formed a partnership with Donald G. Mitchell, as landscape architect. In 1878 he was employed upon the improvement of rivers and harbors in Maryland and Virginia and his last public position was that of Superintendent of the new U. S. Naval Observatory. He resigned all work in 1893 and took up his residence in Sing Sing. In addition to the professional work noted he was connected with the Ontario & Western and the West Shore railways and designed and partly constructed the Yonkers water supply. A widow and three children survive him.

Prince Michael Hilkoff, Imperial Minister of Ways of Communication of Russia, and the master spirit in the construction of the Trans-Siberian railway, was one time a resident of the United States, and is familiar with our methods of constructing and operating railways. As announced in our issue of Sept. 17, this high official is now making an extended tour through this country for the purpose of further studying the latest American practice in railway engineering. A correspondent of the San Francisco "Chronicle," presumably a member of the World's Transportation Commission of the Field Columbian Museum, gives a detailed sketch of the career of Prince Hilkoff, and from this the following abstract is made: Prince Michael Hilkoff traces his descent from a princely Tartar house of six centuries ago. At the age of 16 he was an officer in the Imperial Guards and served during the Crimean War. In 1857 he first visited the United States, bearing letters from the Emperor Alexander II., to President Buchanan, and he travelled very extensively over the country, extending his journey as far as the Rocky Mountains. After spending another year in travel and study in Europe, he entered the service of the Foreign Office at St. Petersburgh at the age of 23. But the ukase of Alexander II. abolishing serfdom throughout Russia, reduced the head of the house of Hilkoff to comparative poverty, and later family dissension led to the son Michael leaving home to seek his own fortune. He sailed for the United States, and arriving in Philadelphia he obtained work in the machine shops of a Mr. Wainwright at a dollar per day, working under the assumed name of John Magill. In the service of Mr. Wainwright he went to the Argentine Republic and was for some time engaged in railway construction, and also obtained his first practical knowledge of locomotive engineering. He was finally called back to Russia by his father, but on his way home he spent some months in the erecting shops of a locomotive builder at Birkenhead, England. After some effort and numerous disappointments he obtained the position of superintendent of locomotives and railway carriages at Moscow, and remained there until about 1879. In 1880 General Annenkoff commenced his famous railway movement into Central Asia, and he secured the services of his old friend and schoolmate, Prince Michael Hilkoff, as chief of the mechanical division of this work. He later became Chief Director of the Trans-Caspian railways and Minister of Public Works of Bulgaria. In 1885 arose the emergency for speedily pushing the Trans-Caspian railway to the Amu Daria, and General Annenkoff again called Michael Hilkoff to his aid. These two men built nearly 500 miles of railway between June 1, 1885, and Dec. 4, 1886. After serving 8 years in Central Asia and the Trans-Caspian region, Prince Hilkoff was made the director of several lines in European Russia, and in 1894 he was promoted to the position he now holds.

ENGINEERING ASSOCIATION OF THE SOUTH.
Oct. 23. Secy., L. P. Brown, Nashville, Tenn.
INDIANAPOLIS ENGINEERING CLUB.
Oct. 24. Secy., C. C. Brown, Indianapolis, Ind.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Oct. 27. "Gas Producers and the Mechanical Handling of Fuel for Same," C. L. Saunders. Secy., F. A. Colburn, Case Library Bldg.
WISCONSIN POLYTECHNIC SOCIETY.
Oct. 27. Secy., W. K. Means, Loan and Trust Bldg., Milwaukee, Wis.
CHICAGO ELECTRICAL ASSOCIATION.
Nov. 6. "The Metric System in Electrical Industries," by F. S. Hickok. Secy., J. R. Cravath, 810 Old Colony Bldg.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.—At the meeting of Oct. 5, a discussion of continuous rails on concrete foundation in connection with asphalt pavements was opened by Mr. Wilson and continued by Mr. Curtin. C. L. Annan, Secy.

IOWA ENGINEERS' SOCIETY.—Articles of incorporation of this society were filed for record on Oct. 3 in Des Moines, Ia. Incorporators are L. Higgins, C. R. Allen, Seth Dean, F. L. Easley and J. D. Wardle. The society is an organization of civil engineers.

THE WESTERN SOCIETY OF ENGINEERS.—At the regular meeting of Oct. 7, a paper on "Steel for Boilers and Fire Boxes" was read by T. L. Condron, and H. F. J. Porter, of the Bethlehem Iron Co., spoke on "Steel Forgings," illustrating his lecture by stereopticon views of steel in process of construction.

BROOKLYN ENGINEERS' AND ARCHITECTS' ASSOCIATION.—This society has been organized in Brooklyn, N. Y., and all civil, mechanical, naval, military, electric and mining engineers are eligible for membership. In the Brooklyn library an alcove with several thousand books of reference has been set apart for the use of the association. Mr. A. J. Provost is temporary chairman of the organization, and the committee which has been appointed to draft a constitution and by-laws includes Mr. Provost, William G. Ford, Walter Meserole, A. J. Caldwell and George W. Wilson.

AMERICAN RAILWAY ASSOCIATION.—At the meeting held in New York on Oct. 7, with the President, Mr. E. T. D. Myers, in the chair, the business consisted principally of the reading of reports from a number of committees, including those on train rules, on gages, on general regulations, on standard wheel and track gages, on general regulations for employes and the report of the executive committee. There are now 252 railway companies, operating 154,000 miles of road, represented in the association by their presidents, vice-presidents, general managers, general superintendents, division superintendents, or other officers of the operating departments.

AMERICAN SOCIETY OF CIVIL ENGINEERS.—At the meeting on Oct. 7, Mr. Benjamin M. Harrod, Vice-President, in the chair, the Secretary read a paper by Mr. W. A. Rogers on "The Reconstruction of the Grand River Bridge." The bridge is on the line of the Chicago, Milwaukee & St. Paul Ry., and the new structure consists of steel truss spans on masonry piers, replacing wooden spans on pile piers. The trusses were erected on the old piers and then shifted longitudinally onto the new piers. All the work was done by the Bridge and Building Department of the road.

The Secretary announced that although the library had been kept open every Wednesday evening during the season, for about two years, on request of a number of members, the attendance has been very small. As a further experiment the Board of Direction has decided to keep it open every week day during November and December. He announced the deaths of Mr. Robert L. Harris, of New York city; Mr. Francisco De Garay, City of Mexico; and Mr. Vernon H. Gridley.

The nominating committee has presented to the Board of Direction, as required by the constitution, the following nominations for the offices to be filled at the next annual meeting: President, Benjamin M. Harrod, New Orleans, La.; Vice-Presidents, George H. Mendell, San Francisco, Cal., and John F. Wallace, Chicago, Ill.; Treasurer, John Thomson, New York city. Directors: James Owen, Newark, N. J.; Rudolph Hering, New York city; H. G. Morse, Wilmington, Del.; B. L. Crosby, St. Louis, Mo.; H. S. Haines, Atlanta, Ga.; and L. M. Johnson, Eagle Pass, Tex.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.—At the September meeting Professor Fessenden presented a paper on "The Economic Use of Electric Motors for Driving Machine Shops," which stated that reliability, flexibility and convenience in operation were questions of more importance than that of cost. The reason for this being that the total cost for power in the average manufacturing business is only a small fraction, less than one quarter of 1% of the total cost of the finished output. Hence a shut-down for a single day means the loss of more money than the coal bill would amount to in a number of months. Estimates were given of the total first cost, and operation of, a machine shop when the power was furnished in five different ways. It was demonstrated that when the tools were run electrically in large groups, the first cost and cost of operation were greater than with engine-driven shafting, but that with small groups or with individually driven tools the reverse was the case. This is due to the fact that by doing away with the friction losses the size of the generating plant could be decreased, and the saving so made through having a smaller steam plant, and no main countershafting or large belts, hangers, etc., more than counterbalances the additional cost for motors and dynamo. He pointed out that it was not sufficient to simply choose a good engine and a dynamo having high efficiencies, but that the shape of their characteristic curves must be carefully chosen so as to correspond to the class of work to be done. Otherwise poor results might be obtained under the actual conditions of working.

RAILWAYS.

East of Chicago.

BUTLER & PITTSBURG.—The Pittsburg, Pa., "Post" states that the new equipment to be bought for this road, described last week, includes 25 locomotives and 400 cars. The Pittsburg, Shenango & Lake Erie, which is the northern outlet for the Butler & Pittsburg, will also order new equipment and heavier rails.

CINCINNATI, UNION CITY & CHICAGO.—A press dispatch from Wabash, Ind., states that this uncompleted railway, noted in our issue of Oct. 8, will be sold Oct. 28. John Bliss and F. W. Short, of Chicago, are said to be trying to reorganize the company so as to complete the road.

LAWRENCE LUMBER.—E. E. Greenwood, Ch. Engr., Skowhegan, Me., writes us that the Lawrence Bros. Lumber Co., St. Gardiner, Me., has had this railway, noted in our issue of Oct. 8, as the Dead River, located to develop timber land in Franklin County, Me. Its outlet is on the bank of the Dead River. The road will be built next season and extensions made later.

MIDLAND.—It is reported that the contract between the Midland Ry. Co. and the Dominion government for the construction of a railway between Truro and Windsor, N. S., has been signed.

ST. LAWRENCE & ADIRONDACK.—It is stated that the extension between Beauharnois and Caughnawaga, Que., which has been in progress for some months, is now complete to connect with the Canadian Pacific at Caughnawaga.

ST. CATHARINES & NIAGARA CENTRAL.—This company may ask from Parliament the right to issue new bonds, and to extend its line to meet the Toronto, Hamilton & Buffalo Ry. at Smithville, Ont.

ST. JOSEPH VALLEY.—A press dispatch states that work is in progress on this line between Buchanan and Benton Harbor, Mich. The existing line is 11 miles long. Ch. Engr., W. W. Graves, St. Joseph, Mich.

Southern.

BUTTERS' LUMBER.—W. H. Butters, Hub, N. C., writes us that this line is 15 miles long, from Hub to Fair Bluff, N. C., and is now nearly finished; all material is purchased. Pres., H. Butters; Ch. Engr., B. A. Jackson, Hub, N. C.

KENTUCKY MIDLAND.—A press dispatch states that this railway is ordered to be sold by the Franklin Circuit Court on Jan. 1, 1897. The upset price is fixed at $150,000. It has been ordered sold twice before, once at $320,000 and once at $250,000, but no bids were received. The road is 40 miles long and cost over $1,000,000 to build it. G. B. Harper, Receiver, Frankfort, Ky.

TENNESSEE, GEORGIA & ALABAMA.—It is stated that preliminary surveys have been begun on this railway, noted in our issue of Sept. 17.——The United States Construction Co. has been organized at Atlanta, Ga., with a capital of $250,000 to construct the railroad between Augusta and Chattanooga. Ch. Engr., F. S. Wallace, Chattanooga, Tenn.

WASHINGTON, ANNAPOLIS & CHESAPEAKE.—Surveys for several routes are in progress. L. H. Hyer is in charge of the survey and is stated to have been at Davidsonville, Md., last week. The line runs from Washington to a point on the Severn River.

Northwest.

CHICAGO & ALTON.—It is said that the Chicago & Alton has determined on building a branch into Peoria, Ill. For the last few months it has been running trains to that city over the tracks of Toledo, Peoria & Warsaw, a distance of 12 miles. Surveys are now in progress. Ch. Engr., H. C. Draper, Chicago, Ill.

FLINT & PERE MARQUETTE.—This line is now completed a distance of about 19 miles from near Monroe, Mich., to Alexis Junction, O.

PENNSYLVANIA CO.—The Chicago "Herald" says that Thomas Rodd, Ch. Engr., Pittsburg, has submitted incomplete plans for the elevation of the company's tracks from 55th to 63d Sts., Chicago. The plans call for substantially the same construction as was employed in the elevation of the Rock Island tracks, steel bridges at the street crossings with earth embankments between. It is probable that work will soon begin.

GREAT NORTHERN.—A. R. Cook, Mgr., Hope, N. Dak., writes us that the extension from Hope, noted last week, touches the towns of Aneta, Findley and Sharon, a distance of 28 miles and is now almost finished. The Halstad branch is now completed to Carmen, Minn., a distance of 33 miles. There are five stations, about 6 miles apart. The line is through a rich section of the Red River Valley. Foley Bros. & Guthrie, of St. Paul, are the contractors.

NORTHERN PACIFIC.—A press dispatch from Frazee, Minn., says that this company has been making improvements in its yard at that place, and is also building and preparing to put in an iron bridge across Otter Tail River, near Frazee. The company has had between 100 and 200 men at the work for the last month.

SHEBOYGAN, ST. PAUL & WESTERN.—A report from Sheboygan, Wis., says that this company, noted in our issue of Oct. 8, has asked Sheboygan to issue $35,000 in city bonds to aid the project.

WISCONSIN & MICHIGAN.—The press states that it is now officially announced that the Wisconsin & Michigan Ry. will extend to Iron Mountain and Norway, Mich., next spring. Track will be laid from the northern terminus of the line at Faithorn Junction. It will require 15 miles of track to reach the Menominee range. Ultimately the line will reach Ironwood and Bessemer. Ch. Engr., A. M. Kinsman, Menominee, Mich.

Rocky Mountain and Pacific.

FLORENCE & CRIPPLE CREEK.—Surveys are said to have been made for the branch line, from Victor, Colo., to Goldfield and Altman, about 12 miles. Grading has begun. J. B. Orman has the contract for the work.

PE ELL.—Geo. H. Ellsbury, Centralia, Wash., writes us that the survey is now in progress from Pe Ell, Wash., to the mouth of the Columbia River. The first object of the survey was to find a suitable location and pass through the Coast Range of mountains; there is ample capital behind the proposition if the location is satisfactory; this is now beyond doubt, as the survey is past the summit; a very easy pass has been found and the grade established proves to be more satisfactory than was even anticipated; the force of engineers is still in the field and will be through in about three weeks. The distance from Pe Ell to the mouth of the Columbia River is about 30 miles, and the object of building is to open up the large quantities of coal which lie near Centralia and to establish a coaling station at the mouth of the Columbia, the only good and deep harbor on the Pacific coast north of San Francisco; and also to establish a short route from Puget Sound points to San Francisco. The jetty recently completed at the mouth of the Columbia has altogether altered the channel and transferred it from the Oregon to the Washington side.

MONTANA.—Reports state that tracklaying on this line to Castle is now complete for 22 miles from Helena, Mont. About 250 men are at work. The contract calls for the completion of the work by Nov. 15.

STREET AND ELECTRIC RAILWAYS.

BOSTON, MASS.—The "Financial News" states that the Southbridge & Fiskdale Electric Ry. will probably be extended through Brimfield, Mass.

CLINTON, MASS.—It is reported that $150,000 has been subscribed for building the Worcester & Clinton Electric Ry.

FALL RIVER, MASS.—The city council has granted an extension of the time for the completion of the tracks of the Globe St. Ry. Co. until Aug., 1897.

FRAMINGHAM, MASS.—It is understood that a new line extending from Marlboro to Framingham Center via Southboro may be built by the Framingham Union St. Ry. Co. Pres. Jas. R. Entwistle.

MILFORD, MASS.—The Milford, Holliston & Framingham St. Ry. Co. has been granted a franchise. The lines may be built this fall.

WEST ROXBURY, MASS.—A company is said to have been organized to build a street railway between West Roxbury and Newton, a distance of ten miles.

WORCESTER, MASS.—The Consolidated St. Ry. Co. has bought land for an extension of its tracks.

SHELTON, CONN.—The Shelton St. Ry. Co., it is said, will relay its track; John Fagan & Sons have been awarded the contract for the construction.

BINGHAMTON, N. Y.—The Binghamton St. Ry. Co. has obtained permission to make extensions.

BUFFALO, N. Y.—A franchise for extensions has been granted the Buffalo Ry. Co.

FLUSHING, N. Y.—The Highway Commissioners of the towns of Flushing and Newtown have granted the Brooklyn City R. R. Co. permission to cross Strong's bridge over Flushing Creek. The company has agreed to pay $2,000 toward the cost of the new iron bridge. The work of completing the line into this village will be pushed forward, and it is expected that cars will be running in a few days. The opening of the road will give Flushing a direct connection with Brooklyn for the first time.

LYNBROOK, N Y.—It is reported that electricity may be substituted for steam on the Long Beach Ry.

OSWEGO, N. Y.—It is stated that the Oswego St. Ry. is to be sold under first mortgage bonds held by the Knickerbocker Trust Co., of New York. C. Sidney Shepard, of New York, who has advanced the local company about $60,000, will, in all probability, become the road's owner.

MOUNT VERNON, N. Y.—It is understood that the Union Electric Ry. Co. will soon extend its trolley line from Mount Vernon to Eastchester.

BENSALEM, PA.—It is rumored that the East Penn Traction Co., recently incorporated with a capital stock of $350,000, will build a trolley line 51 miles long, to touch Bensalem, Flushing, Newportville, Emilie, Falkington, Morrisville and other points. Among those interested are: Malcomb A. Buckman, Wm. Barnsley, John L. Janney and A. J. Cleaver, all of Newtown, Pa.

DOYLESTOWN, PA.—Geo. S. Gaudy, Philadelphia, Pa., is quoted as saying that the Doylestown & Willow Grove projected trolley line will be built soon.

PITTSBURG, PA.—The Second Ave. Traction Co. has started work on the laying of a permanent roadbed and track on the California Ave. branch, from Woodland Ave. to city line at High Bridge. The new road will be built of 9-in. T-rails and new ties will be used entirely. Granite blocks will be laid between the rails and for a distance of 1 ft. on either side.

WESTCHESTER, PA.—Wm. S. Kirk, Pres., 806 Province Bldg., Philadelphia. Pa., writes us that good progress is being made and that bids are now being received for building the projected electric railway.

RICHMOND, VA.—Mayor Taylor has signed the ordinance granting a franchise to the Traction Co. to build a line to Hollywood. The company will begin the construction of this extension at once.

CHESTER, W. VA.—J. E. McDonald, Pres., East Liverpool, O., writes us that the electric line of the East Liverpool & Rock Spring St. Ry. Co., now building between East Liverpool and Chester, is two miles long and will be completed inside of 60 days. The capital stock of the company is $30,000, all paid in.

DE LAND, FLA.—Frank E. Bond writes us that the electric railway projected from De Land to Datona is 27 miles long. The surveys are made and a 50-year franchise granted by De Land with exemption from taxation for 20 years. Work is in progress on obtaining right of way. It is expected to start on construction by Jan. 1.

BUCYRUS, O.—On Oct. 7 the city council granted a franchise for an electric railway to Wm. E. Haycox, of Mansfield, and Fred B. Perkins, of Toledo. The road is to connect Bucyrus and Galion, and will be built next year; noted in our issue of Oct 8.

CLEVELAND, O.—An ordinance has passed the city council allowing the Consolidated Ry. Co. to extend its tracks.

IRONTON, O.—It is reported that the street railway will be changed into an electric system.

CHICAGO, ILL.—Press dispatches say that $5,000,000 in bonds of the General Electric Ry. of Chicago have been underwritten by J. Pierpont Morgan & Co., of New York. There will be an immediate issue of $3,000,000 of these bonds to provide for the construction of 11½ miles of road provided for under the present ordinance owned by the company. The remaining $2,000,000 will be issued as the money is needed for further extensions.——The Lake Street and the Metropolitan Elevated railways are to be notified to raise their tracks at Rockwell St. The work will cost about $5,000.

MILWAUKEE, WIS.—A local paper states that work on the Milwaukee & Wauwatosa Dummy line tracks has not been resumed since its suspension on Aug. 6. The property is still under the direction of the courts, and in the hands of a receiver in the interest of the mortgage bondholders. The option held by J. S. McDonald of Detroit for the promoters of the projected Waukesha line has expired, but can be renewed by the new directors of that company. A practical railway contractor is quoted as saying that 80% of the ties must be replaced with new ones within the coming year. The estimated cost of renovating the track and constructing a power-house and electric equipment is about $65,000. It is said that the bonded indebtedness of the old company is $125,000, for which new bonds will be issued if a readjustment and reorganization plan is consummated.

DES MOINES, IA.—The Des Moines City Ry. Co. is making arrangements, it is said, to extend its lines.

OMAHA, NEB.—An ordinance has been granted the Metropolitan St. Ry. Co. allowing it to extend its lines on certain streets.

PINE BLUFF, ARK.—D. C. Bell is interested in a proposed electric railway.

AUSTIN, TEX.—F. H. Waitress, of Chicago, and J. O. Weatherbee, of Boston, owners of a majority of the stock of the Austin Rapid Transit Ry., are said to be considering the extending of their lines to the driving club track and other points in the near future.

HOUSTON, TEX.—Citizens are attempting to secure an extension of the Houston Electric St. Ry.

PHOENIX, ARIZ.—D. A. Abrams writes us that nothing will be done on the street railway project until after the election.

BERKELEY, CAL.—The Ryder Electro-compressed Air Motor Co., which was incorporated in San Francisco in May, will put its new motor system on the Central University and ferries car line during the present month. After the Berkeley system is in operation it is stated that the Santa Rosa St. Ry. Cos. will consolidate and equip the entire system with the Ryder motor.

ELECTRIC LIGHT AND POWER.

BARTON, VT.—It is reported that this place will ask for authority to issue $40,000 in bonds for an electric light plant. It already has permission to issue $10,000 in bonds.

BOSTON, MASS.—Bids are asked until Oct. 15 for furnishing a boiler and all piping, pumps, etc., for an electric plant at the House of Correction, Deer Island, Boston Harbor; estimated cost, $12,000. F. B. Bogan, Supt. Pub. Bldgs., Old Court House.——An appropriation of $25,000 has been made for other electrical work.

BOSTON, MASS.—Bids are asked until Oct. 30 for electric wiring, heating, etc., for the state house. Arch., A. G. Everett, State House, Boston; J. D. Long, Chn. Comrs., 27 Mount Vernon St.

BRAINTREE, MASS.—The residents of this place have voted to appropriate $3,000 for a new generator for the electric light plant.

MARBLEHEAD, MASS.—The committee has submitted a report on the construction of an electric light plant for this place. J. B. Litchman, Chn.

NEW BEDFORD, MASS.—The aldermen have appointed a committee to report not later than Nov 12, on the question of an electric light or gas plant. A. B. Drake, Supt. Pub. Wks.

WATERTOWN, MASS.—Bids are asked until Oct. 26 for an electric light and power plant at the arsenal. Maj. J. W. Reilly, Ordnance Dept., Watertown.

BARRINGTON, R. I.—The council will hold a meeting Oct. 17 to consider the question of granting a 25-year franchise to the Bristol Electric Light Co.

WARREN, R. I.—The Bristol County Gas & Electric Co. has asked for a 25-year franchise.

ALEXANDRIA BAY, N. Y.—It is reported that A. E. Hume has purchased the plant of the Alexandria Bay Electric Light & Power Co. and will at once make a number of repairs to it.

BROOKLYN, N. Y.—Bids are asked until Oct. 22 for the electric wiring and fixtures for the county court house. T. B. Willis, Comr. Cy. Wks.

BUFFALO, N. Y.—The board of public works has been directed to prepare plans and advertise for bids for the electric lighting of the public buildings for three and five years. James Mooney, Chn. Comrs.——A contract has been made by the Buffalo Transmission Co. with the Niagara Falls Power Co. for transmitting power to this city by way of North Tonawanda. Geo. Urban, Jr., and Tracy C. Becker, are interested in the Buffalo company.

FLUSHING, N. Y.—It is stated that the trustees have decided to issue $4,000 in bonds for erecting 40 arc lights. G. A. Roullier, Village Engr.

HAMBURG, N. Y.—There is some talk of building a new electric light plant in this place. The three-year contract with the Hamburg Water & Electric Light Co. has expired and the price of $70 per light a year is considered too high.

WHITESTONE, N. Y.—It is reported that the construction of an electric light plant and an electric fire alarm system is to be considered. Engr., G. A. Roullier, Flushing.

EGG HARBOR CITY, N. J.—Geo. Pfeiffer, contractor for the water-works at Camden, N. J., has secured a conditional contract for an electric light plant and water-works in this city. This contract must be ratified by the citizens at an early election.

CHAMBERSBURG, PA.—The Chambersburg Electric Light Co. will increase its plant at once.

PITTSBURG, PA.—The question of building an electric light plant to cost $10,000 for the city hall is being discussed. J. O. Brown, Dir. Pub. Safety.

CUTHBERT, GA.—Bids are asked until Oct. 27 for constructing an electric light plant, as stated in our advertising columns. Robert L. Moye, Mayor and Chn. Comn.

ROME, GA.—It is stated that the plant of the Rome Light Co. is to be enlarged. C. E. Woodruff, Receiver, Rome.

FERNANDINA, FLA.—The committee is reported as wanting bids for an engine to operate an arc dynamo of 40,800 c. p. and incandescent dynamo of 500 32 c. p., and 500 16 c. p. lights.

ATLALLA, ALA.—It is stated that an electric light plant is proposed for this place.

DEMOPOLIS, ALA.—This city wishes to have an electric light plant; probable cost $5,000; with two 75-HP. boilers, one 100 HP. engine and five miles of wire, as described in our advertising columns. Gesner Williams, Mayor; J. G. Chisholm, Clk.

OKOLONA, MISS.—At an election held Oct. 5 the people voted in favor of building an electric light plant and water-works. Plans and specifications will be prepared at once, according to reports. E. J. Ezell, Chn. Com.

CAMDEN, TENN.—It is stated that an electric light plant for this place is being considered.

CLARKSVILLE, TENN.—It is reported that the Clarksville Electric St. Ry. Co. has decided to put in an electric light plant at once.

BRIGHTWOOD, IND.—Dr. Wm. H. Johnson, Pres. Town Bd., proposes to erect an electric light plant to cost about $4,000.

GLADSTONE, MICH.—The plant of the Gladstone Electric Light Co. was destroyed by fire Oct. 10. The contract with the city expires in a short time and unless a new contract is made the plant will not be rebuilt.

WEST BAY CITY, MICH.—This city is reported to be asking for propositions for an electric light plant, with an option by the city to purchase the plant. Geo. Wask, Cy. Clk.

CHICAGO, ILL.—Bids are asked until Oct. 16 for erecting and furnishing an electric light plant for the isolation hospital at 34th St. and Lawndale Ave. Joseph Downey, Comr. Pub. Wks.

CHICAGO, ILL.—Bids are asked until Oct. 19 for furnishing two triplex power pumps for the public library in Dearborn Park. W. B. Wickersham, Secy., City Hall; Archs., Shepley, Rutan & Coolidge, Venetian Bldg., Chicago.

KANKAKEE, ILL.—Bids are asked until Oct. 19 for poles and arc lights for the city lighting. Engr., F. B. Rae, 134 Monroe St., Chicago, Ill.; J. H. Brayton, Mayor; S. L, Swinney, Clk.

STAUNTON, ILL.—We are informed that the following bids were received Sept. 29 for an electric light plant; Engrs., Bryan & Humphrey, Turner Bldg., St. Louis, Mo.:

Steam plant:

Russell & Co., Massillon, O.	$2,663
A. L. Ide & Son, Springfield, Ill.	2,700
Dudley Machinery Co., 11 N. 3d St., St. Louis.	2,075
Moses P. Johnson Machinery Co., St. Louis.	1.722
Electric Eng. Co., 8 S. Commercial St., St. Louis.	....
[2]Benj. H. Richards, Edwardsville, Ill.	1,351

	Apparatus.	Const'n.
General Electric Co., Schenectady, N. Y.	$3.880	....
[1]Ft. Wayne Elec. Corp., Ft. Wayne, Ind.	4,567	$3,747
Western Electric Co., Chicago, Ill.	3,700	....
E. B. Tyler, 11 S. 9th St., St. Louis.	3,664	4,520
Electrical Engineering Co., St. Louis.	....	4,282

---

[1] Awarded contracts; [2] erecting buildings, bid rejected.

STAPLES, MINN.—Press reports state that the council has voted to grant a franchise for an electric light plant. R. Aundle, Pres. Village.

GENOA, NEB.—Bids are asked until Oct. 22 for erecting a brick power house at the Indian school. J. E. Ross, Supt., Genoa.

BIG TIMBER, MONT.—The Big Timber Electric & Power Co. is preparing to put in a 70-HP. water motor at the site of its plant on the Yellowstone River. The water will be taken from the Boulder River.

BEEVILLE, TEX.—Arrangements are reported to have been made by L. D. Rhodes, of Karnes City, Tex., for putting an electric light plant in this town.

WACO, TEX.—It is reported that the committee has reported on a city electric light plant to cost $40,000. Stephen Turner, Cy. Engr.

CAMERON, MO.—It is stated that at an election held recently it was voted to issue bonds for erecting an electric light plant.

ARLINGTON, ORE.—The erection of an electric light plant is being considered, according to reports.

PARRSBORO, N. S.—Dr. J. R. Smith is reported to have been granted a franchise for an electric light plant.

AUBURN, ONT.—J. M. Campbell, of Kingston, Ont., is reported to be preparing plans and specifications for the plant for the Auburn Light & Power Co.

PETERBORO, ONT.—The council of this city is reported to be considering the question of an electric light plant.

MONTREAL, QUE.—It is reported that the National Underground & Conduit Co., of New York, N. Y., has been awarded the contract for building a conduit by the Lachine Rapids Hydraulic & Land Co.

NEW COMPANIES.—Bryan Water, Ice, Light & Power Co., Bryan, Tex.; $20,000; J. N. Cole, W. E. Sandles, G. W. Smith.

Akron Light, Fuel & Power Co., Akron, Erie county, N. Y.; $10,000; J. W. Stearn, J. Henry Troutman, Irving D. Eckerson, Richard H. Bell, of Akron; J. S. Campbell, of Butler, Pa.

Bossert Electric Construction Co., Utica, N. Y.; $16,000, with all paid in; Pres., Wm. F. Bossert, 40 Broadway, Utica; Vice-Pres., H. P. Crouse, Utica; Secy. and Treas., Seth C. Adams, Utica.

Wheeling Private Electric Corporation, Wheeling, W. Va.; $25,000, with $50 paid in; H. S. Sands, H. E. Hohman, T. H. P. Keyser, Robt. W. Kyle, all of Wheeling.

BRIDGES.

BANGOR, ME.—It is stated that the Boston & Maine R. R. Co. is having plans prepared for a new steel bridge over the Piscataquis River. H. Bissell, Ch. Engr., Boston, Mass.

BOSTON, MASS.—The state board of health is reported to have asked for bids for rebuilding the canal bridge over the Sudbury River in Wayland. The structure will be of stone and concrete, 30 ft. long and 20 ft. wide. S. W. Abbott, Secy. Bd., State House.

MALDEN, MASS.—The aldermen have been asked by the aldermen of Everett to appoint a committee to consider the question of widening the Malden bridge. E. W. Lydston, Cy. Engr., of Everett, Mass.; G. A. Wetherbee, Cy. Engr., of Malden.

PROVIDENCE, R. I.—The council has appropriated $2,000 for rebuilding the Tar bridge over the Woonasquatucket River.——The question of asking the general assembly for permission to issue $320,000 in bonds for rebuilding the Weybosset St. bridge and the river walls is being considered by the council. Robt. E. Smith, Comr. Pub. Wks.; J. H. Shedd, Cy. Engr.

WESTERLY, R. I.—This place has been authorized to build a highway bridge over the breachway at Wards Pond.

WOONSOCKET, R. I.—Bids are asked until Oct. 20 for building abutments and pier for a new bridge on River St. Joseph J. McGee, Chn. Com., Woonsocket.

NEW HAVEN, CONN.—The supreme court has decided that a new bridge must be built on Chapel St. C. W. Kelley, Cy. Engr.

NEW YORK, N. Y.—The board of street openings, on Oct. 9, passed a resolution authorizing the commissioner of street improvements in the 23d and 24th wards to build a viaduct at 153d St. over the New York Central R. R. Co.'s tracks. Plans are reported to be prepared for viaducts at 168th and 171st Sts. L. F. Haffen, Comr.

WATERTOWN, N. Y.—A meeting will be held Nov. 6 in the office of Maj. W. S. Stanton, U. S. Engr., to consider the question of constructing a draw in the bridge over the Chaumont River at Chaumont, which belongs to the Rome, Watertown & Ogdensburg R. R. Co. Supt., E. G. Russell, Watertown.

HARRISON, N. J.—Bids are asked until Oct. 15 for constructing the north approach in Harrison to the proposed highway bridge over the Passaic River at South Fourth St., Harrison, and Jackson St., Newark. Engr., T. H. McCann, Jersey City; P. J. Cairns, Pres. Council, Harrison.

MERCHANTVILLE, N. J.—An overhead bridge 66 ft. wide will be built soon at Moorestown turnpike by the Pennsylvania & N. J. R. R. Co.

NEWARK, N. J.—The following bids were received Sept. 30 by the joint bridge committee of Essex and Hudson counties for a bridge over the Passaic River at Jackson St., as advertised in Engineering News; Thos. McCann, Engr. Hudson County, Jersey City; James Owen, Engr. Essex County, Newark; (1) being for Essex county approach, (2) for the superstructure:

	1.	2.
Edgemoor Bridge Wks., Wilmington, Del.	$20,750	$94,950
Fagan Iron Wks., Hoboken, N. J.	21,612	*78,194
M. T. Connolly, Jersey City	29,876	81,576
Boston Bridge Wks., Boston, Mass.	26,506	93,990
Millard & Lahey, Philadelphia, Pa.	27,000	97,000
Youngstown Bridge Co., Youngstown, O.	28,700	100,300
F. H. Riddle	.....	64,000
Norfolk & Sillery	.....	76,228
Holmes & Cogan, Jersey City	.....	73,000
P. Sanford Ross, Jersey City	.....	74,250
A. Spronks	.....	68,762
Sanford & Skillman, Jersey City	.....	61,975

---

*Awarded contract.

Masonry: F. C. O'Reilly, $3,488; A. C. Sandford, $3,998; M. T Connolly, $6,820; Fagan Iron Works, $6,800; Norfolk & Sillery, $3,750. Ten bids were received for the Harrison approach, divided in separate bids each, for 60,000 cu. yds. of filling, 5,000 sq. yds. of paving, 16,000 sq. ft. of flagging, and 2,000 ft. of curbing.

COLUMBIA, PA.—It is reported that the Western Maryland R. R. Co. is considering the question of a bridge over the Susquehanna River at Columbia. J. M. Hood, Pres., and Gen. Mgr., Baltimore, Md.

HARRISBURG, PA.—The county bridge over the Conodoquinet Creek north of New Kingston, will be repaired. It was badly damaged by the recent storms.

MEDIA, PA.—It is reported that the grand jury has been petitioned to erect a new bridge over Lobbs Run, in Alden.

MERCERSBURG, PA.—The recent storm destroyed a county bridge near this place, according to reports.

PHILADELPHIA, PA.—The committee on plans and improvements of the Fairmount Park commission, in conjunction with councils committee on Fairmount Park, has adopted a resolution to direct the engineer to advertise for bids for the sale and removal of the old bridge over the ravine in the west park, and the finance committee has been recommended to apply for $5,000 to be used for a new bridge over Allen's Lane, Wissahickon Creek. Russell Thayer, Ch. Engr.

WRIGHTSVILLE, PA.—It is stated that the Pennsylvania R. R. Co. will erect a double deck drawbridge across the Susquehanna River, at Wrightsville. W. H. Brown, Ch. Engr., Broad St. Station, Philadelphia.

WYALUSING, PA.—The township commissioners are considering the question of rebuilding the 65-ft. bridge over the river which was recently destroyed; estimated cost, $2,000. E. C. Ingham and W. B. Dean are Commissioners.

LEXINGTON, VA.—The county supervisors are making arrangements for reconstructing and repairing the bridges recently destroyed by the storm.

MOUNDSVILLE, W. VA.—Press reports state that the Baltimore & Ohio R. R. Co. has surveyors at Moundsville, where plans are being prepared for the new bridge which is to span Litle Grave Creek. The old bridge was washed out during the late storms and since that time the company has been using a temporary structure. The company will have a larger structure than the old one and it is possible that the south abutment will be extended over to the Ohio River Co.'s track, who will also use it. J. E. Griener, Engr. Bridges, Baltimore.

ATLANTA, GA.—Bids were opened Oct. 10 for painting the Nelson St. bridge and the Grant St. bridge and the contract awarded to J. F. Snelling, agent. There were nine bidders, from $385 to $125. R. M. Clayton, Cy. Engr.

CLEVELAND, O.—It is probable that the construction of the proposed bridge at Willson Ave., by the New York, Chicago & St. Louis R. R. Co. will be put off until next spring. D. E. Wright, Dir. Pub. Wks.

YOUNGSTOWN, O.—At the election, Nov. 3, the question of building three county bridges over the Mahoning River in this city to cost a total of $150,000 will be voted upon.

INDIANAPOLIS, IND.—The county commissioners are considering plans for rebuilding the bridge over Williams Creek, on the Noblesville road.

GROSSE POINT, MICH.—It is stated that a number of bridges will be built here by the village, and that C. D. Waterman, of this place, with offices at 92 Griswold St., Detroit, will erect an iron bridge over the river at his own expense.

MENOMINEE, MICH.—It is stated that Menominee will build 352 ft. of the proposed bridge north of Stephenson Island, and Marinette, Wis., will build 95½ ft. more than was originally intended. By this arrangement Marinette will build a total of 821 ft. and Menominee 699 ft. Menominee's original proposition was to build 612 ft. The report of the two committees to their respective councils will likely be adopted. E. L. Shaw, Cy. Engr., Marinette, Wis.

CAIRO, ILL.—J. S. Rearden, Comptroller, 1101 Commercial Ave., Cairo, informs us that the following bids were received Oct. 6 for constructing a bridge over the Coche River:

J. T. Garrett, St. Louis, Mo.		$3,049
C. F. Hunt Co., Indianapolis, Ind.		2,900
Wrought Iron Bridge Co., Canton, O.		2,850
King Bridge Co., Cleveland, O.	$2,480 and	4,000
Massillon Bridge Co., Massillon, O.	$2,695 and	3,500
Indiana Brdge Co., Muncie, Ind.		3,075
St. Louis Bridge & Iron Co., St. Louis.	$2,680 and	2,580
Stutt Bros. Bridge & Iron Co., St. Louis.		2,896

The above bids were all rejected, and new bids invited on plan B of the St. Louis Bridge & Iron Co.

St. Louis Bridge & Iron Co., St. Louis, Mo.	$2,380
C. F. Hunt Co., Indianapolis, Ind.	2,420
King Bridge Co., Cleveland (awarded contract)...	2,174

JOLIET, ILL.—Bids have been asked by the commissioners for erecting a 100-ft. steel bridge and two stone abutments for the same, and also an arch culvert, according to reports. O. E. Cary, Comr. Highways.

MENASHA, WIS.—The citizens of this place have voted to build an iron bridge here at a cost of $14,800, according to reports. W. W. Reed, Cy. Engr.

WAUSAU, WIS.—C. W. Nutter, Cy. Engr., is reported to have prepared plans for a steel and iron bridge at this place.

DOUDS STATION, IA.—It is reported that the board of supervisors of Van Buren county has voted to appropriate $20,000 for erecting a bridge over the Des Moines River, between this place and Leando.

IOWA CITY, IA.—The supervisors are considering the question of a bridge over the Adar River, according to reports.

MASON CITY, IA.—Bids were opened recently for building the abutments for the Main St. bridge over Willow Creek. All were rejected, and the work will be done under the superintendence of the county commissioners. Two new trusses are to be added and the bridge widened to 66 ft. It is now about 30 ft. wide and 120 ft. long. The span will remain the same. The bridge when completed will have a 12-ft. space between the inside trusses for the street car line, an 18 ft. roadway on each side and 6-ft. sidewalks outside of the outer trusses. C. T. Dike, Cy. Engr.; O. E. Stanley, Asst. Cy. Engr.

ST. PAUL, MINN.—The city engineer has been directed to prepare plans for an iron bridge over the railway tracks at Raymond Ave.; estimated cost, $10,000. It is probable that the contract will be let about January 1. L. W. Rundlett, Cy. Engr.

NILES, CAL.—It is stated that a 2-span steel bridge is to be built at this place. The structure will be on masonry foundations and will have a 196-ft. span and a 100-ft. span. G. L. Nusbaumer, County Surv., Oakland.

OAKLAND, CAL.—The supervisors have been requested to repair the canal bridge.

VISALIA, CAL.—Surveys have been made for the Valley Ry. bridge over the Kings River at Reedley.

HOWICK, QUE.—It is reported that D. R. Hay is receiving bids for rebuilding the bridge at Riverfield in the parish of Tres St. Sacrement. The structure is to be 125 ft. long and 16 ft. wide. Plans are to be furnished by the bidders.

LOUISE, ONT.—W. Cranston, Clk., of Louise, is reported as receiving bids for repairing and extending the bridge at this place.

BUILDINGS.

BANGOR, ME.—Cope & Stewardson, 314 Walnut St., Philadelphia, Pa., are preparing plans for a $50,000 residence for Edgar Scott, of this city, according to reports.

ST. ALBANS, VT.—It is stated that this village will ask the legislature, which is now in session, for authority to issue about $35,000 of 4% town hall bonds, to be dated Jan. 1, 1897.——The St. Albans Academy and Graded School District is also about to issue school building bonds for $25,000.

GREAT BARRINGTON, MASS.—Press reports state that a fire here Oct. 12 destroyed the Hollenbeck Block, the Miller House, and a row of brick houses on Railroad St., causing a loss of $200,000. The brick row and the Kennedy House, which was also destroyed, were owned by E. D. Humphrey, Chas. Watson and Dr. Camp.

SOUTH HADLEY, MASS.—It is reported that arrangements are being made for re-erecting the buildings of the Mount Holyoke College, which were destroyed by fire Sept. 27. It is proposed to build eight cottage dormitories, at a cost of about $35,000 each; a gymnasium, to cost $35,000, and a chapel, to cost about $100,000. Mrs. E. Storrs Mead, Pres., South Hadley.

PROVIDENCE, R. I.—State Senator Eastman has introduced a resolution in the senate authorizing an appropriation of $40,000 to continue the construction of the state normal school.——This city has been authorized by the senate to spend $15,000 for erecting a casino at Rogers Williams Park, and $150,000 for park purposes.

NEW HAVEN, CONN.—The fire commissioners have decided to erect a new engine house in Edgewood Ave.

NEW LONDON, CONN.—Bids are asked until Nov. 5 for erecting a post office building and custom house in this city, as stated in our advertising columns. Wm. Martin Aiken, Supervising Arch., Washington, D. C.

NEW LONDON, CONN.—Sperry & Treat have been awarded the contract for erecting the new Osterweis building at a cost of $40,000.

BUFFALO, N. Y.—Bids are asked until Oct. 24 for the foundation of the new state armory on Niagara St., for the 74th Regiment. The building will be 530 × 240 ft. The appropriation immediately available for the work is only $25,000, but at the coming session of the legislature it is promised that an appropriation will be made sufficiently large to pay for the roofing in of the building. State Arch., I. G. Perry, Binghamton and Albany, N. Y.; Maj. H. P. Stacpole, Secy. State Armory Comn., Albany; Wm. Lansing, of Lansing & Beierl, 371 Pearl St., Buffalo, Supt. of Construction.

NEW YORK, N. Y.—Bids are asked until Oct. 20 for erecting an ambulance station and vaccine laboratory on 17th Street; two sureties of $25,000 each. C. G. Wilson, Pres. Health Dept., Criminal Court Bldg.——Bids are asked until Oct. 21 for erecting a school building in Fordham Ave., and improving six school buildings. Robt. Maclay, Chn. Com., 146 Grand St.——Geo. S. Morison, 1742 Monadnock Bldg., Chicago, Ill.; Prof. Wm. H. Burr, 151 West 74th St., New York; and Gen. Wm. P. Craighill, Washington, D. C., the consulting engineers of the department of docks, have submitted a report in which they recommend the construction of one ferry house for the accommodation of the ferry companies at the Battery.——The Church of the Divine Paternity, now at 5th Ave. and 45th St., has purchased from Slawson & Hobbs, agents, the property at Central Park West and 76th St., on which the church will erect a new building. The committee will ask for competition on the plans for the structure, which will cost about $200,000. W. J. Pingue, Pres. Bd. Trustees; Chas. H. Eaton, Pastor, 35 West 48th St.——It is stated that the Harmonie Club is considering the question of a site on Fifth Ave., for its proposed new club house. About $800,000 is to be spent on the purchase of the ground and the erection of the house. Henry Morgenthau, Tribune Bldg., Chn. Com.; Pres., J. W. Mack, 92 Liberty St.——Plans have been filed by the Roman Catholic Church of St. Joseph, 138 Waverley place, for a 5-story brick school building, to cost $50,000. Arch., G. H. Streeton, 287 Fourth Ave.; by W. G. Webber, 649 Amsterdam Ave., for two 5-story brick flats, to cost $56,000: by Joseph Cirrito, 167 West 80th St., for a 5-story brick flat, on 103d St., to cost $50,000; Archs., Neville & Bagge, 217 West 125th St.; by Chas. F. Rogers, 70 Fifth Ave., for two 5-story brick flats, to cost $90,000, Archs., Neville & Bagge, New York.——Albert C. Morris and Chas. H. Osborne are to erect a 10-story apartment house on 72d St., through to 71st St., on the east side of the retaining wall of the N. Y. C. & H. R. R. R.; estimated cost, $600,000.——The Chas. S. Kendall Co., 1368 Broadway, who has been awarded the general contract for erecting the 15-story Herald Square Hotel, at 36th St., Broadway and 6th Ave., is receiving estimates for sub-contracts; estimated cost, $1,000,000. Archs., Hill & Turner, 44 Broadway; D. H. Schneider, 1360 Broadway, is the owner.——Robinson & Wallace, 123 East 23d St., have been awarded the contract for erecting a 4-story brick and stone building at Morningside Park and 119th St., for Barnard College; estimated cost, $250,000; Archs., Lamb & Rich, 35 Nassau St.——J. E. Ware, 489 Fifth Ave., is preparing plans for a block of model tenements, 300 × 100 ft.——Thos. Cockerill & Son, 550 West 41st St., have the contract for erecting a $124,900 school building. Arch., C. B. J. Snyder, 146 Grand St.

CAMDEN, N. J.—J. C. Newson, 1001 Chestnut St., Philadelphia, Pa., has prepared plans for a church building, 140 × 82 ft., for the Broadway M. E. Church, to cost $60,000.

PASSAIC, N. J.—It is stated that the Erie R. R. Co. proposes to erect new passenger stations in Passaic, Rutherford, Middletown and Paterson, N. J. C. W. Buchholz, Ch. Engr., 21 Cortlandt St., New York.

ALLEGHENY, PA.—A. & G. Wilson have been awarded the contract for erecting an $80,000 residence for A. M. Byers, Ridge and Grant Aves. Archs., Alden & Harlow, Vandegrift Bldg., Pittsburg.

WATER-WORKS.

BOSTON, MASS.—The city engineer has prepared plans for a water supply from the harbor for fire protection, estimated to cost $50,000. The plans provide for 12-in. mains and four stations on the water front at which fire boats could be connected. William Jackson, Cy. Engr.; John E. Cheeney, Asst. Cy. Engr.

SHARON, MASS.—The town has authorized the water commissioners to spend $10,000 for extending and improving the water plant.

PROVIDENCE, R. I.—The aldermen have appropriated an additional $50,000 for water-works construction purposes.

DARIEN, CONN.—It is stated that the construction of a large dam across the valley was commenced Oct. 8 by J. B. Rider, Engr., South Norwalk.

PUTNAM, CONN.—The Putnam Water Co. contemplates adding a new 1,250,000-gallon Deane pump and a 60-HP. boiler next spring. Wm. Wheeler, Engr., 89 State St., Boston.

ALBANY, N. Y.—The council has voted to issue $52,000 in water bonds to construct a new intake, erect additional coal sheds and make extensions to the mains.

ARCADE, N. Y.—The construction of works will probably be commenced as soon as bonds can be sold, either this fall or next spring. G. N. Cowan, Engr.

BINGHAMTON, N. Y.—John Anderson, Secy., writes us that the following bids were received last month for a 12,000,000-gallon pumping engine, as advertised in Engineering News:

Holly Mfg. Co., Lockport, N. Y. (awarded contract)	$31,875
Henry R. Worthington, Brooklyn, N. Y.	32,900
Lake Erie Engineering Co., Buffalo, N. Y.	38,000
The Dickson Mfg. Co., Scranton, Pa.	44,750
Nordberg Mfg. Co., Milwaukee, Wis.	46,414

WILLARD, N. Y.—A. H. Eldridge, of Cornell University, is reported to have prepared plans and specifications for a new water supply system for the Willard State Hospital. Dr. William Mahon, Supt.

SHARON SPRINGS, N. Y.—The question of water-works is again being agitated.

SKANEATELES, N. Y.—The court has refused to grant an injunction restraining this village from constructing municipal works, for which contracts were recently awarded.

WHITE PLAINS, N. Y.—J. F. Daly, of Yonkers; John Berry, of Mount Vernon, and W. T. Emmett, of New Rochelle, have been appointed commissioners to appraise the local plant of the Westchester Water Co. It is understood that the company has refused to sell for less than $210,000.

CAMDEN, N. J.—The land for the well system is now being transferred to the city and subcontracts for tube wells are about to be let by George Pfeiffer, the general contractor. The 4% water bonds have been disposed of, as noted last week, money to be available Oct. 20.

EGG HARBOR CITY, N. J.—A contract for water-works has been awarded to Geo. Pfeiffer, of Camden, subject to a vote of the citizens at an early election.

BEAVER FALLS, PA.—The supreme court has made perpetual the temporary injunction restraining this borough from constructing works, and it is stated that a private company, recently organized, will build a plant as soon as a charter is secured.

COATESVILLE, PA.—The question of better water supply will be voted upon next month, according to reports.

DAWSON, PA.—D. J. Redding, Chn. Com., writes us that the following contracts have been awarded: Pipe and specials, National Foundry & Pipe Works, $1,473; valves and hydrants, Bailey & Farrell Co., Pittsburg. $360; pipe laying, F. L. Garrard, Dawson, $784; reservoir, P. Hickey, Mount Pleasant, Pa., $548. Taylor, Romine & Scott, Engrs., McKeesport, Pa.

HALIFAX, PA.—The council appointed a committee Oct. 5 to contract with any party who will agree to construct works, the borough to pay $300 a year annual rental. J. J. Rouch, Secy. Council.

LEBANON, PA.—The council has appropriated $5,000 for sinking a 10-in. well at South Mountain, six miles from the city, with a view to increasing the water supply.

HIGHLAND, PA.—A press report states that bonds have been voted for water-works, sewers, etc.

McKEESPORT, PA.—Bids are asked until Oct. 26 for furnishing and erecting two pumping engines, and also for sinking a system of wells, etc., as stated in our advertising columns. J. Schinneller, Engr., McClintock Bldg., Pittsburg; Edwin Soles, Supt.

MOUNT JOY, PA.—The borough authorities are said to be in the market for a new boiler, pumps, etc., for the water-works.

PENNSBURG, PA.—Efforts are again being made to organize a local company to construct works, estimated to cost $25,000, according to reports.

PHILADELPHIA, PA.—The water committee of councils has voted in favor of contracting with the Holmesburg Water Co. to supply the new county prison with 100,000 gallons of water a day for ten years at $3,000 a year.

WEST READING, PA.—The West Reading Water Co. has contracted with the Cumberland Mfg. Co., of Boston, for a $5,000 filter plant, according to reports. James Matz, Supt.

DELAWARE CITY, DEL.—It is reported that W. Taylor Leland and others, of Philadelphia, contemplate the construction of water-works at this place.

WASHINGTON, D. C.—Capt. Edwin Burr, Asst. Engr., Comr., has completed his annual report, in which he deals with the inadequate water supply of the city; an appropriation of $10,000 is recommended for sinking additional wells next year.

BERRYVILLE, VA.—O. W. Gardner and S. C. Callahan, of Hollidaysburg, Pa., are reported to have secured a 60-day option on the plant of the old Berryville Water Co., and it is thought that the plant will soon be completed.

SUMMERVILLE, GA.—It is reported that this city will issue bonds for water-works.

UNADILLA, GA.—The city council has awarded a contract for an artesian well.

OKOLONA, MISS.—At the election on Oct. 5 the citizens voted 165 to 15 in favor of issuing $30,000 in bonds for water-works and an electric light plant, for which plans will soon be ready. Address E. J. Ezell.

FRANKLIN, LA.—We are informed that no contract for water-works was awarded Oct. 1. L. B. Tarlton, Mayor.

CLOVERPORT, KY.—It is reported that A. A. La Heist is making plans for works and will try to organize a company to construct the plant.

BUCYRUS, O.—The Bucyrus Water Co. has purchased land for the construction of an 80,000,000-gallon reservoir. Frank P. Kaler, Supt.

CLEVELAND, O.—Bids are asked until Nov. 6 for the purchase of $300,000 in 4% water bonds, maturing Oct. 1, 1926. H. L. Rossiter, Cy. Audr.

DAYTON, O.—Several plans are being considered for a water supply for the asylum.

MARION, O.—The state board of health was investigating the water supply of this city last week; report not yet submitted.

HUNTINGTON, IND.—Bids are asked until Oct. 24 for sinking 12 8-in. tubular wells, rebuilding pumping station, erecting a 30 × 75-ft. stand-pipe, etc. Sturtevant & Todd, Consult. Engrs., Association Bldg., Chicago; E. Q. Drummond, Cy. Clk.

INDIANAPOLIS, IND.—The Indianapolis Water Co. has recorded a mortgage for $3,000,000. It is stated that the wells now being sunk will be tested before a filter plant is put in.

ZANESVILLE, O.—The bids for an 8,000,000-gallon pumping engine, published last week, have all been rejected and it is stated that new bids will soon be asked.

CHICAGO, ILL.—Bids are asked until Oct. 20 for laying water mains in 26 streets. Joseph Downey, Comr. Pub. Wks.

MINONK, ILL.—M. H. Pfaffle, Cy. Clk., writes us that the council has decided to reject all bids for a 60-ft. brick tower and a 3,000-bbl. steel tank, received Oct. 5, as advertised in Engineering News, and defer the building until spring; the bids were as follows:

	Tower.	Tank.
Joliet Bridge & Iron Co.	$3,350	$4,000
A. B. Kipp, Minonk	2,848	4,633
Reeves Bros., Alliance, Ohio	.....	2,413
E. P. Hodgkins, South Chicago	3,250	.....
Cobett & Stadler, Aurora	.....	2,438
Chicago Bridge & Iron Co.	.....	2,512
Heggie Bros., Joliet	.....	2,700
O'Brien Boiler Works, St. Louis	.....	2,341
Wm. Tunny, Lockport, Ill.	3,900	.....

Irregular Bids:

Martin O'Connell, Minonk (complete)	$7,629
Geo. C. Morgan, Chicago (own design)	6,000
Chicago Bridge & Iron Co. (own design)	6,000
Chicago Bridge & Iron Co. (all steel)	5,000
Joliet Bridge & Iron Co. (all steel)	5,500
Joliet Bridge & Iron Co. (stone tower and tank)	6,795

PARK RIDGE, ILL.—The contract for laying 7,000 ft. of water mains, etc., has been awarded to S. W. Robinson, of Park Ridge. Joseph Lalone, Village Clk.

BALDWIN, WIS.—Bids are asked until Oct. 20 for furnishing and erecting a water tank, 16 × 16 ft. of 3-in. staves, and a steel tower 60 ft. high. Chas. Settergren, Village Clk., writes us that $1,000 will probably be spent this fall and works constructed in the spring.

DULUTH, MINN.—Bids are asked until Oct. 30 for furnishing and laying about three miles of 42-in. riveted steel or cast-iron pipe, as stated in our advertising columns. W. B. Patton, Cy. Engr.; M. J. Davis, Pres. Bd. Pub. Wks.——The following bids were received Oct. 7 for new pump house; all local bidders:

Bidder.	Brick walls, brownstone trimmings.	Brownstone ashlr. facg. rubble bckg.	Broken range rubble.	Rubl. mas'ry from native trap rock.
Tullock Bros.	$22,410	$22,990	$20,490	$19,790
C. J. Fredrickson	18,900	18,318	16,400	16,500
Nils Nilson	23,897	25,657	20,354	.....
McLeod, Campbell & Smith	19.765	25,931	24,061	22,191

ST. LOUIS, MO.—The lowest bids received Oct. 6 are reported as follows: For 75 tons special castings, Howard-Harrison Iron Co., $2,395.60; 200 tons of castings, Harrison Iron Co., $6,388; 5,050 tons water pipe, Harrison Iron Co., $100,697; 77 stop valves, St. Louis Iron & Machine Works, $7,401; five stop and check valves, Michigan Brass & Iron Works, $3,090; 4,960 tons water pipe, Harrison Iron Co., $98,902; for laying 27,300 ft. of water pipe, George P. Prendergast, $24,241.

ROSEBUD, S. DAK.—Bids are asked for constructing a water and sewer system for the boarding school plant now in course of construction at the Rosebud Agency. Chas. E. McChesney, U. S. Indian Agt.

ANAHEIM, CAL.—The plans of C. S. Rogers, of Anaheim, include three 10-in. wells, about 135 ft. deep, and the erection of a 60,000-gallon tank, in addition to mains, etc. onds were to be sold this week, after which bids will be asked for constructing the plant.

REDDING, CAL.—It is reported that George Groves will petition for a franchise to construct works.——The new owners of the Mad Mule mining property, near Whiskytown, are reported about to erect a large pumping station on the Grizzly gulch and pump water about a mile over the mountain.

SAN DIEGO, CAL.—A local paper states that the stockholders of the Temesco Water Co. will soon vote on the issue of $175,000 in bonds for supplying water in Corona and for improving the pipe system.

SUSSEX, N. B.—The Sussex Water & Electric Light Co. has been organized.

PARRSBORO, N. S.—Prof. W. R. Butler, of Kings College, Windsor, is preparing plans and specifications for water-works, to be constructed in the spring. N. H. Upham, Town Clk.

CHAMBLEY BASIN, QUE.—Bids for constructing an aqueduct are reported as being received by this village and Chambly Canton. E. L. De La Vallee & Cie, Engrs., 17 Place d'Armes Hill, Montreal.

COWANSVILLE, QUE.—It is reported that works are being constructed.

BRIDGEBURG, ONT.—The Welland "Telegraph" states that John Galt, of Toronto, has prepared plans for works to cost $27,000; also that D. A. Coste will construct works if granted a franchise.

WELLAND, ONT.—It is reported that this city has been directed to invest $50,000 in water-works, or suffer a raise of 50% in insurance rates.

HUNTSVILLE, ONT.—Bids are being received for the construction of works, according to reports. William Rumsey, Clk.

LONDON, ONT.—The superintendent has reported that a separate system of water-works for street water would cost about $38,000.

VANCOUVER, B. C.—Bids are asked until Oct. 28, according to reports, for a quantity of steel riveted pipe and stop valves. T. F. McGurgan, Cy. Clk.

IRRIGATION.

EL PASO, TEX.—Wm. W. Follett, Engr., 233 East Maple St., Denver, Colo., writes us that no steps have yet been taken looking to the immediate construction of reservoir at El Paso, Tex. Some information is being collected as to use of water in the United States, the Mexicans claiming that the recently large increase of the use of water in Colorado has deprived them of it at El Paso. ——Press reports state as follows: A. Engledue, Chn. London board of directors of the Rio Grande Dam & Irrigating Co., accompanied by W. T. Johns, Secy., recently arrived in El Paso to open permanent offices here. The company they represent proposes to commence in a few days the construction of a dam and reservoir across the Rio Grande River in New Mexico, 90 miles above El Paso, and the irrigation canal will pass through El Paso to the valley below. About $2,000,000 has been subscribed to the capital of the company.

AMERICAN FORK, UTAH.—Press reports state as follows: The joint irrigation committee of American Fork, Pleasant Grove and Lehi met here Sept. 22 to consider the report of Civil Engineer McAllister concerning the proposed reservoirs at Silver Lake and Milkmaid flat. The plans and specifications show that the water in Silver Lake could be raised to a depth of 15 ft., and the water already in the lake, averaging about 8 ft. in depth, could be drained therefrom through the solid granite below for about $900. This would furnish enough extra water to irrigate 215 acres of land. It is also estimated that a reservoir could be built in Milkmaid flat to hold sufficient water to irrigate 578 acres for about $12,000; or that a reservoir to irrigate 949 acres, bringing the water to a 30-ft. level, could be built for about $19,000. The plan for the Silver Lake reservoir was adopted by the committee.

NEW COMPANIES.—Bridge Creek Irrigation Co., Coolidge, Hamilton county, Kan.; $150; it is stated that the company proposes to build a large canal; Pres., W. E. Brown; Secy., M. O. Clark; Treas., H. J. Laubach.

Crater Reservoir Co., Hotchkiss., Colo.; $7,200; it is proposed to construct a reservoir in Delta county in the vicinity of Bald and Crater peaks. The waters will be taken out of Leroux Creek. A. D. Simpson, N. D. Bennett, C. R. Miller, E. E. Hall, E. M. Houts, Percy Houts, R. O. Wilmont, H. R. Bennett, S. E. Ellington.

SEWERAGE.

ST. ALBANS, VT.—We are informed that the main outlet sewer is being built by the village. About 5,000 ft. will be built this year, but will not be let by contract. Chas. E. Collins, Engr. and Supt., Cambridge, Mass.

SPRINGFIELD, MASS.—Daniel W. Mellen, Springfield, has been awarded the contract for extending the Long Hill sewer into the Connecticut River, by the construction of 300 ft. of 18-in. cypress pipe outlet with a 24-in. storm water sewer, and also tile and cast-iron sewer pipe, at $4,825. McKenzie & Peterson, of Springfield, were the only other bidders at $4,969. Chas. M. Slocum, Cy. Engr.

PROVIDENCE, R. I.—Plans have been prepared for a sewage disposal plant by precipitation, the contracts for which will probably be let next spring. J. H. Shedd, Cy. Engr.

NEW HAVEN, CONN.—The committee has reported favorably on the construction of sewers in five streets. C. W. Kelley, Cy. Engr.

BROOKLYN, N. Y.—Bids are asked until Oct. 23 for furnishing 48-in. cast-iron pipe and special castings for the main relief sewer along the Clinton Ave. bulkhead wall, and for constructing sewers in two streets. Theo. B. Willis, Comr. Cy. Wks.

BUFFALO, N. Y.—Bids are asked until Oct. 16 for constructing a 12-in. pipe sewer in Pearl St. R. G. Parsons, Secy. Pub. Wks.

GENEVA, N. Y.—Walker & Robinson, of Tippecanoe, O., who had the contract to construct the 24 miles of sewers here, have failed and the work has been relet to John F. Dolan, of this place. About nine miles have been built. The new contract has about the same prices as the old. Work will be resumed at once.——Bids were submitted by Walker & Robinson June 5 at $39,800 with trenching, rock and embankment, and at $36,800 without rock and embankment, as stated in our issue of June 25. S. G. Gano, Engr. in charge, Geneva; J. J. R. Croes, Consult. Engr., 68 Broad St., New York; E. W. Herendeen, Pres. Comrs.

WALDEN, N. Y.—The following submitted bids Oct. 2 for pipe sewers in six streets: John J. Taylor, Cornwall; Syracuse Stone Co.; Costello & Dunn, Kingston; Frank G. Wood, Newburg; Taylor & Bateman, Walden; Samuel A. Wilson, Newburg; Morgan & McCartly, Kingston; Henry E. Weiner, Kingston; E. S. Sayre, Walden; Cornelius Daley, Poughkeepsie; John Duff, Newburg; John Mitchell, Kingston; Isaac Edwards, Cornwall. For digging trenches: E. H. Van Kueren, M. Depuy, E. Mitchell, G. M. Millspaugh, Wm. Tompkins, J. Fetherston, Stephen Stickels, of Walden. E. S. Sayre, Walden, was awarded the contract for furnishing 3,400 ft. of 15 and 12-in. sewer pipe, and G. H. Van Kuren, M. Depuy, Stephen Stickles, Wm. Tompkins and Edward Mitchell the contracts for constructing.

ROCHESTER, N. Y.—Bayer & Albaugh were the only bidders Oct. 7 for constructing a 24-in. pipe sewer 2,090 ft. in the Culver Road, at $12,228. E. A. Fisher, Cy. Engr.

TRENTON, N. J.—Bids are asked until Oct. 20 for constructing sewers in several streets, according to reports. C. Edward Murray, Cy. Clk.

ALLENTOWN, PA.—R. S. Rathbun, Cy. Engr., submitted a report Oct. 6 on the construction of a filtration plant to cost about $80,000, and of trunk and lateral sewers to cost about $141,000. The question will be voted upon at the next election.

PHILADELPHIA, PA.—Geo. S. Webster, Ch. Engr., informs us that bids for two small connections with the Manayunk intercepting sewer will be asked soon, estimated cost about $6,000.

SHARPSBURG, PA.—Bids are asked until Oct. 31 for the completion of the sewer system, consisting of about 1,665 ft. of brick sewer and about 16,500 ft. of pipe sewer, with the necessary manholes, catch basins and flush tanks. Bids will be received for the whole work or for one or more of the three sections into which the work is divided. E. C. Hulbert, Borough Engr., 1035 N. Canal St., Sharpsburg; G. D. McMorran, Pres. Council; C. A. Clowes, Clk.

YORK, PA.—Joseph L. Wickes, Atlantic City, N. J., has been selected by the council to prepare plans for a sewer system. About 30 engineers submitted bids Sept. 20 for preparing plans, as advertised in Engineering News. Sebastian Mayer, Chn. Com.

UNIONTOWN, PA.—Surveys are reported as being made for a sewer system for this place.

BALTIMORE, MD.—The Southwest Baltimore Improvement Association, at its meeting Oct. 8, at 712 South Warner St., discussed the question of a sewer in Stockholm St. Chas. A. Briscoe, Chn. Com.

BALTIMORE, MD.—Bids will soon be asked for a 36 and 30-in. cast iron pipe sewer in Charles St.; estimated cost, $8,000. Janon Fisher, Cy. Comr.

TAMPA, FLA.—J. H. Neff, Cy. Engr., writes us that no work can be done on the proposed sewer system until after Nov. 15. Des. Engrs., Waring, Chapman & Farquhar, 874 Broadway, New York.

LOUISVILLE, KY.—J. H. Pearson, Cy. Engr., writes us as follows in regard to projected sewer work: Our sewers are all built out of a general tax fund, whether new or reconstruction, and usually by city force. The system takes both surface and house drainage, and is becoming overtaxed. I have recommended for this new year several large sewers, but there is no probability that more than one of them will be built, which one I cannot say; approximate estimate is as follows:

	Diameter.	Estimate.
30th St., Bank St. and 34th St. (all one)	8 ft.	$154,200
Clay St. sewer	7 ft., 6 ft.	67,060
Christie and Barrett Ave., sewer	2 ft., 3 ft., 5 ft.	50,000
Enterprise No. 1	5 ft., 9 ft.	22,000

We have a large filthy stream running through our East End (Beargrass Creek), which takes all the East End sewage. I am in hopes of starting a scheme to improve it, making it 50 ft. wide, 5 ft. deep, between walls, and laying the bed invert in vitrified brick or cement, so as to give it a uniform grade, and straighten its course for about two miles; estimated cost, $550,000; work to be done in yearly installments, unless funds are raised for it by bonds. We cannot turn it around the city, and have to put up with it, but can improve it, and this will have to be done, no matter what it costs, some time. We also have a great deal of trouble in cleaning out our sewers, and I am getting up an elevator bucket arrangement for the purpose.

MANSFIELD, O.—L. E. Chapin, Cy. Engr., of Canton, O., has submitted a report on plans and specifications for the proposed sewage disposal works for this city, according to reports.

INDIANAPOLIS, IND.—The board has adopted resolutions for constructing about 4,700 ft. of 39 to 32-in. brick and 20 to 12-in. pipe sewers. B. J. T. Jeup, Cy. Engr.

HOLLAND, MICH.—The board of public works is considering the question of extending the sewers. Engr., A. L. Holmes.

LAURIUM, MICH.—Joseph R. Murphy, Clk., writes us that an election to issue $35,000 in sewer bonds to build a system was held Sept. 12, and resulted in a tie vote. Nothing further will be done for the present. Probably an effort will be made next year to again obtain permission to issue bonds.

SAGINAW, MICH.—It is proposed to build a system in the west side. and also a sewer to cost $3,120 in Michigan Ave. H. E. Terry, Cy. Engr.

LINCOLN, ILL.—Bids are asked until Oct. 19 for constructing about 7,800 ft. of 24 to 8-in. pipe sewers. T. S. Davy, Cy. Engr.; Frank Bollin, Cy. Clk.——In addition to the above there is 1,800 ft. of 18-in. pipe sewers to be built soon.

ROSEBUD, S. DAK.—Bids are asked for constructing a sewer system and water-works for the boarding school on the Rosebud reservation. Chas. E. McChesney, U. S. Indian Agent, Rosebud.

ARNPRIOR, ONT.—We are informed that probably no bids will be asked until next spring for constructing 20,000 ft. of 42 × 30-in. brick and 24 to 6-in. pipe sewers, to cost $25,000. J. L. Morris, Engr., Pembroke, Ont.

NAPANEE, ONT.—The council is considering the question of constructing sewers.

GARBAGE DISPOSAL—STREET CLEANING.

OSWEGO, N. Y.—A press report states that a local garbage company has been organized and began work Oct. 4, and that is hoped to have a small crematory soon. H. D. McCaffrey, Pres. Bd. Pub. Wks., can probably give information.

WASHINGTON, D. C.—The commissioners on Oct. 7 authorized the issuing of a permit to J. N. Warfield for a Smith garbage crematory near the old observatory grounds. It is said that the plant will cost $25,000 and be completed within 90 days.

CLEVELAND, O.—The council has appointed a committee of five to visit other cities and investigate garbage disposal plants before awarding the contract in this city.

ST. PAUL, MINN.—A committee of six is to be appointed to prepare plans and specifications for the garbage contract for 1897.

STREETS AND ROADS.

BOSTON, MASS.—Bids are asked until Oct. 16 for 10,500 sq. yds. of macadamizing, 6,800 sq. yds. of gravel sidewalks, 6,000 cu. yds. of gravel, grading, etc., in Boylston St. B. W. Wells, Supt. of Streets. b

QUINCY, MASS.—The question of appropriating $18,000 for paving Copeland St. is being considered by the council. C. F. Knowlton, Cy. Engr.

ROCHESTER, MASS.—It is stated that work will soon be begun on the macadamizing of a road from Rochester Centre to the Marion line, to cost $7,500.

DANIELSON, CONN.—At a recent town meeting it was voted to appropriate $30,000 for macadam roads. J. A. Atwood, of Wauregan, Conn.; W. D. Rouse, of Central Village, Conn., and Floyd Cranska, of Moosup, Conn., have been appointed a committee to take charge of the work.

HARTFORD, CONN.—The question of raising the streets along the water front, at a cost of about $300,000, is again being considered by the council and the citizens. Chas. H. Northam, Pres. St. Comrs.; C. C. Goodrich, Supt.; D. G. Stoughton, Chn. Com.; H. F. Smith, Cy. Clk.

SUFFIELD, CONN.—We are informed that E. Hennessy, agent, Suffield, bid Sept. 30 as follows for grading and macadamizing a road: For 2,000 ft., $1.10 per lin. ft.; for 600 lin. ft., $1.12½; for 500 lin. ft., $1.15; or so much as the selectmen may direct.

BROOKLYN, N. Y.—The grading and paving committee has reported favorably upon resolutions for paving portions of 18 streets with asphalt, at a cost of about $130,000; two with macadam at a cost of $25,000, and one with Belgian blocks, to cost $13,000.—The assessment committee is considering the question of grading and macadamizing Ocean Ave., at a cost of $25,000. Wm. S. Curtis, Jr., Chn.

BUFFALO, N. Y.—The following bids were received by the board of public works Oct. 9 for paving; R. G. Parsons, Clk.:

	Cazenovia St.	Asbury Alley.
P. B. McNaughton, brick	$13,442	$1,112
Standard Paving Co., asphalt	14,500	1,100
German Rock Asphalt Co., asphalt	16,797	1,297
L. H. Gipp, brick	13,558	1,115

NEW YORK, N. Y.—Bids are asked until Oct. 19 for asphalt paving in three streets and grading and curbing in Naegle Ave. C. H. T. Collis, Comr. Pub. Wks.——L. F. Haffen, Comr. St. Improvements for the 23d and 24th wards, has asked for $955,340 for street work in the north side.——The board of estimate, Oct. 6, appropriated $1,000,000 under the legislative act for the repaving of the city streets. The act provides that $3,000,000 may be used for repaving, but not more than $1,000,000 in any one year. Appropriations were also made for repairs and fences for the Boulevard.——E. W. Bloomingdale of Bloomingdale Bros.; P. H. Dugro, Hotel Savoy, and John D. Crimmins have petitioned the board of street opening to widen 59th St., from 5th Ave. to 3d Ave.

NEW YORK, N. Y.—Bids are asked by the department of parks, The Arsenal,, until Oct. 26 for 53,600 sq. ft. of cement walk at the Grant Tomb, Riverside Park. The work will include 55,000 sq. ft. of sod, 3,100 lin. ft. of granite coping, about 11,000 cu. yds. of excavation. filling, mold, etc.

NIAGARA FALLS, N. Y.—The board of public works has reported the following estimate for paving Third St.: asphalt, $22,200; brick, $20,400. W. W. Read, Cy. Engr.

PELHAM MANOR, N. Y.—It is stated that the board of estimate of New York city has appropriated $29,000 for improving the Pelham road.

SCHENECTADY, N. Y.—The council passed an ordinance Oct. 6 for sheet asphalt paving in Jackson Place. The work must be completed by Nov. 15. L. B. Sebring, Cy. Engr.

WHITESTONE (L. I.), N. Y.—The village trustees are considering the question of holding an election Oct. 23 to vote on the subject of issuing $50,000 in bonds for macadamizing. W. S. Overton and W. L. Watson are trustees.

CAMDEN, N. J.—Bids are asked until Oct. 23 for Belgian block paving in St. John St., according to reports. L. E. Farnham, Cy. Engr.

HACKENSACK, N. J.—N. J. Conover, of Freehold, N. J., has been awarded the contract for grading, etc., in several streets.

JERSEY CITY, N. J.—Bids are asked until Oct. 19 for 8,500 sq. yds. of granite and 2,230 sq. yds. of macadam paving. Geo. T. Bouton, Clk. Comrs.

NEWARK, N. J.—The commissioners have approved ordinances for asphalt paving in five streets. Wm. Stainsby, Pres. Bd.; W. E. Greathead, Clk., J. M. Seymour, Mayor.

PATERSON, N. J.—Bids are asked until Oct. 27 for macadamizing two roads. J. J. Van Noordt, Dir. Freeholders; A. B. Pearce, Clk.

UNION, N. J.—Bids are asked until Oct. 17 for 2,250 lin. ft. of stone sidewalks. A. M. Woodruff, Township Clk.; Address Wm. P. Bonnell, Roselle, N. J.

ALLENTOWN, PA.—R. S. Rathbun, Cy. Engr., has presented estimates for about 180,000 sq. yds. of paving with either brick, granite block or asphalt, to cost $320,000, $440,000 or $450,000, respectively. Of this work the Traction company would probably pay for 33,000 sq. yds.

GREENSBURG, PA.—It is stated that the contract will be let at once for constructing six miles of the Johnstown, Indiana & Westmoreland Turnpike. Engr., John E. Dye, Johnstown, Pa.

SEWICKLEY, PA.—It is reported that some of the streets of this borough are to be paved soon. Geo. H. Anderson, Burgess.

BALTIMORE, MD.—The question of making a speedway out of Pimlico Ave. is being considered; $25,000 has already been pledged. Dr. A. W. Clement is interested.

LOUISVILLE, KY.—J. H. Pearson, Cy. Engr., writes us as follows: Paving contracts are usually awarded in small blocks, costing $3,000 to $6,000. All new streets, alleys, sidewalks, fire cisterns, hydrants and wells, when first built, are paid for by the abutting property owners on warrants issued to contractors to collect themselves. Reconstruction of sidewalks is paid for in the same way, but reconstruction of streets, etc., is paid for out of the several funds raised by general taxation. We have tried a number of different kinds of brick for our streets, such as Bannon pavers (local), a yellow brick; Mack brick, Sciota blocks, McManagal blocks, Star blocks, Porter A, and new Ironton pavers. None of them have lasted in good order five years. We have used Barber asphalt, (Trinidad Lake asphalt), and find it rolls up very badly. We are now trying Kentucky natural rock asphalt, laid by the Breckinridge Natural Rock Asphalt Co., and have one block finished and so far we think it is good. The company has some ten miles in Buffalo under another name, I think. We use also Georgia granite blocks and they do well as to wear.

DAYTON, O.—The council has voted to issue $18,000 in bonds for paving in Richard St. F. M. Turner, Cy. Engr.

SPRINGFELD, O.—The board of public affairs will soon advertise for bids for grading and graveling, curbing and guttering five streets. S. J. Wilkerson, Cy. Clk.

WYOMING, O.—Bids are asked until Nov. 2 for the purchase of $4,370 of 6% street bonds. Engr., C. A. Ewing, Carlisle Bldg., Cincinnati; W. A. Clark, Clk.

INDIANAPOLIS, IND.—Bids are asked until Oct. 21 for about 20,000 sq yds. of graveling and 11,000 sq. ft. of sidewalks, and until Oct. 23 for graveling in a number of streets. B. J. T. Jeup, Cy. Engr.

OTTUMWA, IA.—Bids are asked until Oct. 21 for brick paving and curbing in district No. 53; check, $500. S. D. Baker, Chn. St. Com.

SIOUX CITY, IA.—The residents of Nebraska Ave. have petitioned the council to pave a portion of that avenue with asphalt. L. F. Wakefield, Cy. Engr.

ST. PAUL, MINN.—The park board is discussing the question of constructing a boulevard for the Bluffs on the West Side. John Copeland, Comr. Pub. Wks.

SEATTLE, WASH.—The board of public works has decided to ask for bids for wooden block paving in Cherry St. R. H. Thomson, Cy. Engr.

SAN FRANCISCO, CAL.—The supervisors propose to improve portions of about 110 streets with bitumen, macadam, etc. C. S. Tilton, Cy. Engr.

VALLEJO, CAL.—It is proposed to pave 2,310 sq. yds. with broken stone at a cost of $1,000. Engr., F. R. Simonton, Vallejo.

MANUFACTURING PLANTS.

CAMBRIDGE, MASS.—It is stated that the Damon Safe & Iron Works Co., which some time since removed its plant to Philadelphia, is to return to Cambridge, and an application for a permit to begin the construction of a factory building has been presented. It will be 84 × 198 ft., two stories high, part of wood and part of steel.

BROOKLYN, N. Y.—It is reported that Arbuckle Bros. have decided to erect a large sugar refinery adjoining their coffee plant.

KINGSTON, N. Y.—The Colonial Glass Co., which began business in Kingston last spring, is stated to want $10,000 or $12,000 with which to enlarge its plant and provide it with the capital necessary for the management of the business. Citizens are asked to take stock to the amount named. The company has two months' orders on hand.

CAMDEN, N. J.—With the rumor that Arbuckle Bros. will build a sugar refinery in Brooklyn, it is stated that an application has been made for a charter for the Standard Sugar Refining Co. to build a large refinery at Kaighn's Point, Camden, N. J. The capital stock is $2,000,000, and the incorporators are Joseph A. Baker, Charles Baker, W. S. Williams, Herman Hooper and Thomas B. Harned. Adolph Segal, 1304 N. Broad St., Philadelphia, Pa., is also said to be interested.

GUTHSVILLE, PA.—Peter Bros. will erect a shoe factory, and are in the market for a line of machinery.

PHILADELPHIA, PA.—Wm. H. Berry has purchased ground on Crosby St., Chester, and it is said that a large boiler manufactory will be erected on the site.

WILMINGTON, DEL.—On Oct. 8 the morocco factory of Garrett & Barr, on East 2d St., was destroyed by fire; loss about $30,000; the factories of Charles Baird & Co. and of Washington Jones & Co., on Walnut St., were badly damaged; loss estimated at $80,000 and $150,000 respectively.

ANNISTON, ALA.—Thompson Bros., of Birmingham, Ala., are said to have been awarded the contract for the erection of the buildings for the new mills of the American Net & Twine Co., of Boston, to be built in this city, and to be known as the Gold Medal Twine Mill.

KNOXVILLE, TENN.—A press report says that J. W. Patton, Secy. and Treas. of the Manchester Stove Works, of Manchester, O., is in Knoxville with a view of locating a branch stove manufacturing plant.

NEW ATHENS, ILL.—A new flour mill may be erected on Richland St. A company, consisting of Jos. Dietz, George Gross and Mrs. Mary Dietz, has been formed, with a capital stock of $12,000.

KANSAS CITY, MO.—A site is said to have been bought on which to erect a brewery, to cost $40,000, by the Leisy Brewing Co.

ANAHEIM CAL.—Press reports state that W. A. Clarke may build a beet sugar plant. It will cost about $400,000, making 15,000 tons of sugar in the four months of the season. He is also considering the erection of a sugar factory in Montana.

ONTARIO, CAL.—Fred and George Stamm are manufacturing a gas engine. Should the model prove successful they will add new machinery to their shop for the manufacture of these engines.

GAS PLANTS

READING, MASS.—O. E. Weller has been appointed receiver for the Citizens' Gaslight Co., of this place, and Stoneham; liabilities, $85,000, of which $50,000 is preferred.

AKRON, N. Y.—The Akron Light, Fuel & Power Co., has been organized with a capital stock of $10,000, to manufacture gas and electricity; directors, James W. Stearns, Irving D. Eckerson and Richard H. Bell, of Akron, and John S. Campbell and J. Henry Trautman, of Butler, Pa.

CANISTEO, N. Y.—The Canisteo gas works has been sold under mortgage foreclosure to Milo M. Acker, of Hornellsville, for $7,755. It is stated that arrangements will be made at once to improve the plant.

RICHMOND HILL, N. Y.—The Brooklyn & Queens County Gas Co. has asked for an extension of 60 days time in which to lay its mains, owing to the financial depression.

ROCHESTER, N. Y.—The Rochester Gas & Electric Co. has been granted permission by the executive board to lay gas mains in several streets.

NEW YORK, N. Y.—The Metropolitan Fuel Gas Co. has filed a petition for a franchise to lay mains in the streets of this city. It proposes to furnish gas at 50 cts. a thousand to householders, and at 35 cts. to large manufacturers. When the franchise is secured $100,000 is to be paid into the treasury, and at the expiration of five years the city is to receive 3½% on the net business done; also a bond for $500,000 is to be furnished.

ECHO, PA.—The Philadelphia Gas Co. is drilling a number of wells for gas in this vicinity with small success; oil has been found in some of the wells.——The People's Natural Gas Co. is erecting a large pump station near Glouster's Mills, and when completed, expects to increase the pressure on its mains.

MIDDLESEX, PA.—A press report states that the Mahoning Gas & Fuel Supply Co. will run a line to this place and West Middlesex, to compete with the Oil City Fuel Supply Co. It is hoped to have the work completed by Nov. 1, L. F. Barger, Mgr.

PITTSBURG, PA.—The State Line Natural Gas Co. has been incorporated to operate in Fayette county, Pa.; capital stock, $5,000, commencing with $500. Treas., W. F. Johnston, Pittsburg, Pa.——The Pintsch Compressing Co. has been given a permit for the erection of a brick gas house on 2d Ave., to cost $7,800.

BRUNSWICK, GA.—The plant of the Electric & Gas Light Co. is said to have been destroyed by a recent storm; loss estimated at $20,000.

FLORENCE, ALA.—The Florence Gas Light & Fuel Co. is proposing to extend its distribution system, provided the town will pledge itself to a sufficient consumption.

FINDLAY, O.—The city gas board has ordered the laying of mains along East High St.——The contract for drilling a new well was given to J. C. Curren, at 32 cts. a ft.

CINCINNATI, O.—The Cincinnati Gas & Coke Co. has applied for permission to open Montgomery turnpike, from the north corporation line to Deercreek road, and along that road to Smith, for the purpose of putting in mains, and also to open Carthage Ave., from the north line of Norwood to the corporation line of Carthage. This will enable it to supply gas to Norwood, Evanston and Carthage.

INDIANAPOLIS, IND.—The Consumers' Gas Trust Co., of this city, is reported about to add 60 new wells to its source of supply; already 33 have been completed and about 30 miles of field mains are being laid to connect these new wells with the city main. A 10-in. main, 26 miles long has been completed, connecting the field with the 16-in. main at Allisonville and a pumping station is being built in Hamilton county, seven miles southeast of Noblesville. The cost will be about $350,000.——The Indianapolis Gas Co. is also at work upon a number of new wells.

CHICAGO, ILL.—The Western Republic Construction Co. has permits for the erection of the following buildings for the Ogden Gas Co.: An office two stories high, 50x38 ft.; a two-story purifying house, 33x133 ft.; a two-story generating house, 73x40 ft.; and a boiler house one-story high, 73x32 ft.; cost, $35,000.

MILWAUKEE, WIS.—The Milwaukee Gaslight Co. has been awarded the contract, by the committee on street lights of the common council for lighting the streets for five years at the rate of $20 a lamp a year. The city has 2,700 lamps in use and now pays $22 a lamp. It is said that a limited number of Welsbach lights may be added later.

KANSAS CITY, MO.—The Kansas City Gas Co. is reported to be laying a new 16-in. gas main on Cherry St. to reinforce its main on Holmes St. Col. M. J. Payne, Pres. The gas consumption is said to have increased very much of late.

SACRAMENTO, CAL.—The Sacramento Gas & Fuel Co. was incorporated Sept. 29 with a capital stock of $500,000, commencing with $9,600, to manufacture and sell gas for illumination and fuel; incorporators, F. R. Bell, J. H. Lounge and R. C. Semmler, San Francisco; Elmer Reed, Oakland, and W. C. Wolfe, Los Angeles.

HALIFAX, N. S.—The Halifax Gas Co. is to sell its plant to the People's Heat & Light Co.; the latter, which supplies gas for illuminating and heating purposes, will use its own plant for one kind of gas and the newly acquired system for the other.

CONTRACT PRICES.

DRAIN.—Mount Vernon, N. Y.—John F. Fairchild, Engr., informs us that the contract for constructing the Midland Ave. drain, as advertised in Engineering News, has been awarded Bellew & Merritt Co., of Tuckahoe, N. Y. There will be about 5,000 ft. of open cement drains and about 17,600 ft. of tile drains, 2 to 36 ins. in diameter. The open drain consists of a trench 3 ft. 6 ins. wide and 25½ ins. deep, filled with concrete 10 ins. thick at the bottom and 9 ins. at the top of each side, the semicircular drain 15 ins. radius being formed in this and faced with a ½-in. coat of neat cement, this coat extending out on each side for 6 ins. over the top of the concrete to join the side slopes. The slopes are 1 to 1 to the surface. The average cutting of this drain is about 5½ ft.; the average cutting of the smaller drains about 3 ft., and the cutting of the 36-in. pipe, 17½ ft. in a sand cut. The bids were as follows:

Bids Received by the Midland Avenue Drainage Commission, Mount Vernon, N. Y., Oct. 2, 1896.

Quantities.		Bellew & Merritt Co.	Cortright & Kenlon.	H. P. McTague.	Smith Bros.	Malloy & Murray.	N. J. Conover.	Woolfolk& Sillery.	Edw. Berrigan.	Peter Fury.

GRANITE PAVING.—Memphis, Tenn.—A contract for 2,700 sq.yds. granite paving on 7 ins. concrete was awarded Sept. 29 at $2.47 a sq. yd. A. T. Bell, Cy. Engr.

MACADAM ROAD.—Merchantville, N. J.—The contract for macadamizing 1,500 lin. ft. of macadam road for which bids were opened Oct. 6, as advertised in Engineering News, has been awarded to D. P. Regan & Bro., of Philadelphia, at 16 cts. a cu. yd. for grading, and 62½ cts. a cu. yd. for macadamizing. The curbing and guttering contemplated has been postponed indefinitely. F. S. Walton, Chn. Com.; A. W. MacCallum, Engr.

SEWERS AND ROCK EXCAVATION. — Coffeyville, Kan.—Jno. M. Walker, Cy. Engr., writes us that the following bids were received Sept. 30 for constructing pipe sewers, lump bid being submitted for sewers and price per cubic yard extra for rock work; quantities are: 15-in. vitrified pipe sewer, 2,350 ft.; 12-in., 700 ft.; 10-in., 5,450 ft.; 8-in., 25,300 ft.; 8 × 6 Y's, 660; 8 × 8 Y's, 4; 8 × 8 T's, 34; 10 × 6 Y's, 60; 12 × 6 Y's, 16; 15 × 6 Y's, 6; flushstands, 20; manholes, 20; lampholes, 32:

	Sewer.	Rock excav.
W. A. Myne, Coffeyville (accepted)	$18,000	$1.50
H. P. Selden & Co., Kansas City, Mo.	22,500	2.50
N. P. Glann & Co., Toledo, Ohio	17,985	1.50
W. P. Brown, Coffeyville, Kan.	19,865	2.00
Jas. Gilkerson, Lexington, Mo.	21,375	2.65

SEWERS.—Roselle, N. J.—H. M. Herbert, Ch. Engr., Bound Brook, N. J., writes us that the following bids were received Oct. 2 for constructing 8,500 ft. of 12 to 8-in. pipe sewers, as advertised in Engineering News; bid of E. C. Wells, of Philadelphia, was at first declared informal, but was afterwards found to be regular, prices being 76 cts., 93 cts., 80 cts., 31 cts., 78 cts., 33 cts., 40 cts., 44 cts., 19 cts., $24, 36 cts., $7.50, 34 cts., $62, $44, $45, $43.50 and $7.86 respectively for the items as given in the table; total, $7,977; contract was awarded Oct. 7 to Headley & Christie, 410 Clinton Ave., Newark, N. J.

Bids Received Oct. 2 for Constructing Sewers, Roselle, N. J.

Total		$132,520	$69,920	$68,910	$67,847	$62,752	$61,420

DREDGING.—Philadelphia, Pa.—The following bids were received by Maj. C. W. Raymond Oct. 5 for 162,500 cu.yds. of dredging in Cooper Creek, N. J., as advertised in Engineering News: John P. Randerson, Albany, N. Y., 19¾ cts. a cu. yd.; American Dredging Co., Philadelphia, 24 cts.; Virginia Dredging Co., Richmond, 19.7 cts.; Hess & Co., Detroit, 24 cts.; Frank C. Somers, Camden, N. J., 17¾ cts.; A. M. Clegg, Washington, 13.7 cts.

SEWERS.—Washington, D. C.—The following bids were received Oct. 10 for constructing 640 ft. of 24-in. pipe sewer: James McCandlish, $1.35 a lin. ft.; John P. Largney, $1.75; E. G. Gummel, $1.39; all local bidders.

IMPROVING PARK ENTRANCE.—Philadelphia, Pa.—The contract for improving the Diamond St. entrance to the park to include grading for 12-ft. walks, etc., for which $10,000 was appropriated, has been awarded to David Anderson, whose prices were as follows: Excavation, 17 cts. a cu. yd.; cinder surfacing, 18 cts. a cu. yd.; sodding, 7¾ cts. a sq. yd.; and relaying sodding, 4½ cts. a sq. yd.

JETTY WORK.—New Orleans, La.—Maj. James B. Quinn received the following bids Sept. 30 for jetty construction for improving the mouth and passes of Calcasieu River, La.: Gulf Towing Co., Velasco, Tex., 13,000 sq. yds. brush mattress, $1 a sq. yd.; 15,000 tons riprap stone for hearting, $2.90 a ton; 2,000 tons granite capping stone, $4.25 a ton; total, $65,000; John A. Davis, Galveston, Tex., $1.05, $3.25, $4.50 and $71,400; Charles Clarke & Co., Galveston, Tex., 91 cts., $2.80, $4.50 and $62,830.

BRICK PAVING.—Memphis, Tenn.—The following contracts were awarded Sept. 29 for paving with brick on 7-in. concrete foundation: Beale St., Main to De Soto, 7,388 sq. yds., at $2 a sq. yd.; Madison St., Front to Bayou, 9,404 sq. yds., at $2; Monroe St., Front to Main, 1,726 sq. yds., at $1.98; Union St., Bayou to Wellington, 3,720 sq. yds., at $1.98. A. T. Bell, Cy. Engr.

PIPE SEWER.—Scranton, Pa.—The following bids were received Oct. 1 for constructing 420 ft. of 10-in. pipe sewer on Monsey Ave.; depth, 13 ft.; 3 manholes, 1 basin: Hart & Gibbons, Wilkes Barre, Pa., $1.40 per lin. ft. complete; P. J. Thornton & Co., Scranton, Pa., $1.28; P. F. Mulligan, Scranton, Pa., $1.15. Joseph P. Phillips, Cy. Engr.

GRANITE BLOCK PAVING.—Camden, N. J.—Several small contracts for paving with granite blocks, of good quality, on sand foundation, have been awarded at $1.22 a sq. yd. L. E. Farnham, Cy. Engr.

ASPHALT PAVING.—Schenectady, N. Y.—The following bids were received Oct. 6 for paving Liberty St. with sheet asphalt: Trinidad Asphalt Refining Co., New York, 5,000 sq. yds. asphalt, $2.82 a sq. yd.; 4 × 20-in. stone curb, 4,340 lin. ft., $1.01 a ft.; Metropolitan Paving & Construction Co., Schenectady, $2.69 and 69 cts., respectively. Lewis B. Sebring, Cy. Engr.

DREDGING.—Milwaukee, Wis.—Capt. Geo. A. Zinn received the following bids Oct. 6 for dredging:

Menominee River:	Clay, 59,400 cu. yds.	Hardpan, 10,600 cu. yds.	Total.
A. H. Vogel	$0.129	$0.129	$9,030
W. A. Starke	.09	.25	7,996
Green's Dredging Co.	.15	.25	11,560
Racine Dredging Co.	.09	.27	8,208

Green Bay Harbor (200,000 cu. yds.):	Per cu. yd.
Arthur H. Vogel, Milwaukee, Wis.	$0.087
Green Bay (Wis.) Dredge & Pile Driver Co.	.08
William A. Starke, Milwaukee, Wis.	.10
Green's Dredging Co., Chicago, Ill.	.13
W. A. McGillis & Co., Cleveland, O.	.085
Racine Dredging Co., Racine, Wis.	.066

GRADING.—New York, N. Y.—The following bids were received by Capt. C. A. Devol, Asst. Q. M., Oct. 12, for grading about 50 acres at Sandy Hook, N. J,, the site of the new post of Fort Hancock; approximate quantity, 180,000 cu. yds.:

	Per cu. yd.
W. B. Strang, Jr., & Co., 15 Wall St., New York.	$0.22½
Allston Gerry, Pelham Manor, N. Y.	.22
M. J. Fenton & Co., 137 Broadway, New York	.08½
J. Rufus Terry, 357 Webster Ave., Long Island City.	.22
Richd. H. Brodhead, Marlboro, N. J.	.29
Isaac T. Brown, 11 Pine St., New York	.17¼
James S. Rogers, Plattsburg, N. Y.	.39
Aetna Construction Co., 186 Remsen St. Brooklyn	.22
R. B. Mitchell & Co., 350 Fulton St., New York	.069
W. K. Ryan, 621 Broadway, New York	.16
Alex. Crawford Chenoweth, 41 E. 59th St., N. Y.	.16⅝
Joseph Johnson, 193 Broadway, New York	.41½

BRICK PAVING.—Evansville, Ind.—The following bids were received Sept. 26 for paving portions of two streets with brick; Bedford, Weikel & Nugent, brick, $1.61 a sq. yd.; for limestone curbing, dressed and set, 48 cts. a lin. ft.; for limestone circular corners, dressed and set. $1 a lin. ft.; for redressing and resetting old curbing, 20 cts. a lin. ft.; Eichel, Arnold & Co., $1.65, 50 cts., $1 and 20 cts., respectively.

ROCK.—New Orleans, La.—The bids received by Capt. Geo. McC. Derby Sept. 26 for 5,000 tons of rock for improving New Orleans Harbor, as advertised in Engineering News, are reported as follows, price being per ton:

Chas. G. Smith & Son, Washington, D. C.	$3.38
David V. Howell, New York city	3.38
John Barrett, Cincinnati, O.	2.40
William J. Bishop, Lithonia, Ga.	2.64
A. P. Birch, Blount Springs, Ala.	2.21
Charles Clark & Co., Galveston, Tex.	2.90
Allan A. Goodwin, Zimmerman, La.	4.00
D. & J. Trauchina, New Orleans (600 or 700 tons).	1.72
Lewis M. Dalgaru, Natchez, Miss.	2.45
A. A. Goodwin, Zimmerman, La.	3.00
Leo Gunning, Redwood, Miss.	3.35
L. J. Mestier & Co., New Orleans (only 3,000 tons)	2.40
W. R. Harteck, New Orleans, La.	2.60
The Georgia-Quincey Granite Co., Macon, Ga.	2.60
Frederick Hartweg, Cincinnati, O.	2.95
Silas C. Doby, Lithonia, Ga.	2.98
J. A. Andrews & Son, New Orleans, La.	2.71
Robert J. Connelly, New Orleans, La.	3.35
G. Herbert Ellerbe, New Orleans, La.	2.51

CEDAR BLOCK PAVING.—Port Huron, Mich.—F. F. Rogers, Cy. Engr., writes us that the contract for paving Pine Grove Ave. has been awarded to B. D. Bartow, who has deposited a $4,000 bond preparatory to beginning work; all blocks shall be cut from good, sound, live cedar timber, free from defects, and shall not measure more than 9 ins., nor less than 4 ins., in diameter, and shall be 7 ins. in length, and so placed to make as near as possible the spaces of uniform size; they shall be sawed perpendicular to the axis and of exact length. These shall be set on the end of the grain, and shall be selected and placed so as to make triangular spaces, each block shall have a close full depth contact with at least three other blocks; the paving will be on sand foundation with Medina stone curbing:

Bids Received at Port Huron, Mich., Sept. 19, for Cedar Block Paving.

Bidder.	Block excavation.	Earth excavation.	Medina curb.	Berea curb.	Oak curb, 4 × 12 ins.	Iron catch-basins.	Brick inlets.	Moving st'ne catchbasin.	8-in. sewer.	Medina stn. curves.	Berea stone curves.	Cedar block paving.	Total.

[1]Richmond. [2]Philadelphia. [3]Baltimore.

LEVEE WORK.—New Orleans, La.—The following contracts have been awarded for levee work: Bondurant (sections 1, 2 and 3), 45,000 cu. yds..; secs. 1 and 2 at 9.25 cts., and section 3, at 8.5 cts., to J. G. Boney, of Duckport, La. Cottage Home levee (sections 1 and 2), 25,000 cu. yds., at 10.49 cts., to C. D. Leeper, of Baton Rouge. Section 2 of Harper's levee, 16,500 cu. yds., at 14 cts., to Garbish & O'Neil, of Point Pleasant, La. Evergreen levee (sections 1 to 8), 127,500 cu. yds., at 9.43 cts. for river side enlargement and 9 cts. for land side enlargement, to Batt O'Brien, of Point Pleasant, La. At the office of the state engineers bids were opened for work on the parish line levee (between St. Charles and St. John parishes), about 70,000 cu. yds., and the contract was awarded to J. C. Hodge, at 13½ cts. a cu. yd.

MISCELLANEOUS CONTRACTS.

DREDGING.—Baltimore, Md.—Bids are asked until Oct. 26 for dredging ship channel leading to Baltimore Harbor. Col. Peter C. Hains, U. S. Engrs.

CHEMICAL ENGINE.—Sinking Spring, Pa.—The committee has recommended the purchase of a Babcock chemical fire engine. Samuel Field, Chn. Com.

ARTIFICIAL POND.—Oldtown, Me.—J. W. Sewall, Cy. Engr., has prepared plans for an artificial pond in the Forest Hill Cemetery. James Wentworth, Chn. Com.

WHARF.—Bangor, Me.—The Maine Central R. R. Co. is said to have received permission to build a wharf to cost $25,000, on the Penobscot River, at Bangor, Me.

MORTAR BATTERY.—Baltimore, Md.—Bids are asked until Oct. 26 for building a mortar battery at North Point. Col. Peter J. Hains, U. S. Engrs., 9 Pleasant St., Baltimore, Md.

CONDUITS.—Boston, Mass.—The aldermen have granted a franchise to the New England Telephone & Telegraph Co., to construct underground conduits for electric wires and cables in nine streets.

HYDRAULIC DREDGES.—St. Louis, Mo.—Bids are asked until Nov. 11 for furnishing two hydraulic dredges, as stated in our advertising columns. Capt. H. E. Waterman, Secy. Miss. River Comn.

CANAL IMPROVEMENTS.—Albany, N. Y.—Bids are asked until Oct. 29 for improving the Erie Canal from the head of the Lockport locks to station 328, near McDonald's culvert; also from station 83 × 10, near Ferry St., to Commercial slip, and on slips 1, 2, and 3 and Commercial slip, at Buffalo; also between station 328, near McDonald's culvert, to station 87 × 10 near Ferry St., Buffalo; also for building the Cartersville waste weir and spillway, all as advertised in Engineering News. The first three pieces embrace 28 miles of the Erie Canal, between the head of the Lockport locks, Ferry St., in Buffalo, including the Commercial slip and slips 1, 2, and 3 in that city. The fourth piece provides for a waste weir and spillway at Cartersville, Monroe county. These improvements will necessitate an outlay of $1,043,000. C. W. Adams, State Engr., Utica; R. G. Lay, Asst. Supt. Pub. Wks., Rochester; Geo. W. Aldridge, Supt. Pub. Wks., Albany.

DREDGING MACHINERY. — Portland, Ore.—Bids are asked until Nov. 10 for furnishing dredging machinery at Coos Bay, Ore., as stated in our advertising columns. Capt. W. L. Fisk, U. S. Engrs.

ELECTRIC POWER FOR BRIDGE.—Brooklyn, N. Y.—Bids are asked until Oct. 23 for equipping the bridge across Newtown Creek, at Metropolitan Ave., with electric motive power. T. B. Willis, Comr. Cy. Wks.

FILLING.—Boston, Mass.—Bids are asked until Oct. 19 for 160,000 cu. yds. of filling at the Standway, South Boston, for the department of parks. Edward C. Hodges, Chn. Bd. Park Comrs.. Room 509 53 State St.

BREAKWATER AND PIER EXTENSIONS.—Buffalo, N. Y.—Bids are asked until Nov. 30 for 12,500 ft. of breakwater extension and for sand-catch pier extension, as stated in our advertising columns. Maj. T. W. Symons, U. S. Engrs.

DAMS AND SHORE PROTECTIONS. — Rock Island, Ill.—Bids are asked until Nov. 10 for constructing dams and shore protections on Upper Mississippi River, as stated in our advertising columns. Lt. Col. W. R. King, U. S. Engrs.

MECHANICAL STOKERS.—Cleveland, O.—The following bids were received Sept. 22 for equipping six boilers at the city infirmary and city hospital with mechanical stokers: American Smokeless Furnace Co., $3,700; American Stoker Co., $3,600; Brightman Furnace Co., $2,740; Oehlstrom Stoker Co. (awarded contract), $2,425.

REPAIRING CRIBWORK.—New York, N. Y.—Bids are asked until Oct. 20 for the removal of about 306 lin. ft. of backing log and decayed facing timbers, and for 225 pine piles, about 8,000 lbs. bolts, nuts, washers, spikes, etc., for the cribwork at the foot of East 4th St., East River. E. C. O'Brien, Pres. Dept. Docks, Battery Place.

PARK WORK.—Newark, N. J.—Bids are asked by the Essex county park commission, 800 Broad St., Newark, until Oct. 19 for work at Branch Brook Park; the work to include 200 cu. yds. of rock excavation, 130,000 cu. yds. of earth excavation, 7,600 lin. ft. of curbing, 10,700 sq. ft. of flagging, etc. Bids for six different branches of work are asked for.

WHARF.—Sitka, Alaska.—The "Mining Record," Juneau, Alaska, is quoted as stating that the government is asking for bids for the construction of a new wharf at Sitka. The specifications, however, are so little in accordance with local circumstances, that it is not probable that any Alaskan contractor will care to do the work, which is to be commenced in about 60 days.

CANAL IMPROVEMENTS.—Albany, N. Y.—State Engineer Adams has sent to Supt. Aldridge plans and specifications for 31 pieces of work to be done upon the canals under the $9,000,000 appropriation. On the eastern division of the Erie and the Champlain canals the parts to be improved first are as follows: Eastern Division, Erie Canal—Between locks 18 and 19, 8.86 miles; between locks 20 and 21, 3.22 miles; between locks 27 and 28, 5.21 miles; between locks 28 and 29, 1.97 miles; between locks 32 and 33, 5.11 miles; between locks 33 and 34, 2.57 miles; between locks 42 and 44, 2.96 miles; between lock 22 and bridge No. 55, 3.29 miles; between locks 44 and 45, 1.24 miles. Champlain Canal—Twelve-mile level between Fort Edward and Fort Ann, 11.75 miles; between locks 6 and 7, 3 miles; between locks 4 and 5, 1.30 miles.

DRAINAGE.—Laporte, Ind.—It is stated that the projectors of the movement to reclaim the Kankakee region have determined to begin work at once, and a meeting was held Oct. 7 to confer with the engineers. The organization, perfected in four counties, now promises to be followed by action that will insure the drainage of the entire Kankakee region, and the reclamation of 500,000 acres of land. Pres., D. W. Place, South Bend, Ind.; Vice-Pres., Chas. A. Danielson, Hamlet, Ind.; Secy., H. C. Shannon, Laporte; Treas., H. L. Weaver.

PIER WORK.—New York, N. Y.—The following bids were received by the department of docks, Geo. S. Terry, Secy., Oct. 13, for repairing and extending pier at West 131st St. and North River:

John W. Flaherty, 510 Macon St., Brooklyn	$8,974
Barth S. Cronin, 85½ 3d pl, Brooklyn	8,740
Spearin & Preston, 67 E. 3d st, Bayonne, N. J.	9,289
P. Sanford Ross, 277 Washington St., Jersey City	10,144
Wm. H. Jenks, 130 Pearl St., N. Y. City	8,445
Gildersleeve & Rolf, 39 Cortlandt St. (accepted)	8,237
Henry D. Steers, 5 Bowling Green, N. Y.	8,352

DRAINAGE CANAL.—Chicago, Ill.—The county court has been petitioned by about 5,300 voters to form a new sanitary district for a drainage canal from the Calumet River to the Chicago Drainage Channel, which is now being constructed. The district which the petitioners desire to have made into a sanitary district comprises about 70 square miles, and has within it all that portion of the city south of 87th St., Blue Island, Morgan Park, part of Harvey, North Harvey, South Holland and the vilages of Riverdale, Dalton, West Hammond and portions of Worth, Thorrton, Calumet and Bremen. It is proposed to construct a canal to cost $3,000,000 to $5,000,000. The canal will start at the Calumet River and will connect with the great drainage canal at Sag.

INDUSTRIAL NOTES.

THE MICHIGAN PIPE CO., Bay City, Mich., has secured a contract from the Detroit Electric Lighting Commission for 50,000 lin. ft. of creosoted conduit.

McHOSE & LYON, Dayton, O., manufacturers of bridges and heavy castings for buildings, assigned Oct. 5. The assets are $37,000; liabilities about $50,000. Their shops have closed down.

THE BETTENDORF HOLLOW STEEL AXLE WORKS, Davenport, Ia., is figuring on manufacturing railway ties from steel, pressed cold. At present it is making its all-steel axle and gear and a patent brake beam from pressed steel.

THE BUDA FOUNDRY & MFG. CO., of Chicago, has recently shipped from its works at Harvey, Ill., a car load of hand cars to Mexico, to the Sierra Madre Construction Co., John P. Ramsey, Gen. Mgr. It reports that the Buda railway velocipede which it has had upon the market for about a year is giving good satisfaction, and that it will send it to responsible parties upon trial.

J. R. PATTERSON & CO., 84 Adams St., Chicago, have been awarded the contract for a considerable portion of the cement to be used in constructing the Melan concrete bridge over the Kaw River at Topeka, Kansas. The Diamond brand will be used. Mr. H. V. Hinckley is the superintendent of construction for the county. Mr. Patterson also states that 40 car-loads of Diamond cement were furnished by him for use in building the Century Building of St. Louis.

A. E. ROSENTHAL, 649 The Rookery, Chicago, has resigned as manager of the Chicago office of Joseph Joseph & Bros., which position he has held for 3½ years, to engage in business for himself. Mr. Rosenthal will make a specialty, as heretofore, of buying and selling all weights of relaying rails. He will also carry on a business in general railway supplies, including the purchase and sale of all kinds of railway scrap material, cotton and woolen waste, etc.

STEEL FOR SWITZERLAND.—A press dispatch from Washington announces that Consul Eugene Germain has written the department of state that American pig iron, steel and tools are wanted in Switzerland. One of the largest houses in Zurich requests him to let American dealers know that they want 40,000 tons of pig iron for foundry purposes, 55,000 tons of blooms, billets, wire rods, bars and sheets; 3,200 tons of pipes and tubes, and 2,000 tons of hardware goods, chains, bolts, nuts, screws, etc.

THE STREET SWEEPING & LOADING MACHINE CO., 2520 Bismarck St. (factory 3521 South 2d St.), St. Louis, Mo., has been organized to handle the patents owned by Mr. Henry Mueller, Jr., and to sell the Mueller street sweeping and loading machines which have been in use in St. Louis for several years. Mr. Mueller has recently shipped two of these machines to Memphis, Tenn., and advises us that his machines are now in use in Chicago, Ill.; Indianapolis, Ind.; St. Louis, Mo.; Memphis, Tenn., and several other cities.

GEO. P. NICHOLS & BRO., 1325 Monadnock Block, Chicago, have taken the agency for the western states for the J. H. McEwen Mfg. Co., of New York, manufacturers of the McEwen engines and the Thompson-Ryan dynamos. Mr. Nichols states that they now have the contract for a 100 K-W. direct-connected dynamo from A. M. Rothschild & Co., Chicago, and that this is the second order and the third Thompson-Ryan dynamo that this firm has installed. They have also recently completed the installation of the machinery for operating the draw span of the Rock Island-Davenport bridge.

THE NEW YORK FILTER MFG. Co., 145 Broadway, New York, informs us that on Friday, Sept. 18, suit was brought by it in the United States Circuit Court, at Utica, N. Y., against the Elmira Water-Works Co. for infringement of the Hyatt patent dated Feb. 19, 1884, which has heretofore been sustained in both the United States Circuit Court and the United States Circuit Court of Appeals. The suit grows out of the contract recently given by the Elmira Water-Works Co. to the Morison-Jewell Filtration Co., of New York and Philadelphia, for the erection of that company's filter plants for the Elmira company, and in due season it will be followed by an application to the court for an injunction.

NEW COMPANIES.—McAdams Engine Co., of San Francisco, Cal.; $50,000; Louis C. McAdams, Joseph Schwartz, J. B. Letter, Albert J. Lowenberg and Charles J. Ambruster.

Standard Valve Gear Co., Jersey City, N. J.; to manufacture locomotives, cars, coaches and vehicles; $500,000, commencing with $300,000; Wm. H. Cutler, Milburn, N. Y.; Chas S. Farnum, Philadelphia, Pa.; Chas N. King, Jersey City, N. J.

Wilmont Fire-Proofing Co., Baltimore, Md.; $100,000, commencing with $50; Wm. Montgomery, Jr., John M. Ingram, Sidney S. Frank, all of Baltimore.

NOTE:—The reader will observe that these last two pages of Construction News are numbered consecutively with the loose part of the Supplement. The leaf may be readily cut out and pasted thereto by those who keep the Supplement on file.

International Underground Electric Co., Camden, N. J., to manufacture electrical appliances; $250,000, commencing with $1,000; Simeon J. Martin, Ellery P. Ingham, Frank Battles, Philadelphia, Pa.

Mountain Springs Ice Co., Ogden, Utah; $5,000; Henrietta R. Griffith, G. O. Griffith, G. G. Griffith.

Hamilton Pressed Brick Co., Scranton, Pa.; $100,000; A. M. Atherton, Michael Baumgardner, Arthur Hitchcock.

Monarch Iron Co., of Duluth, Minn.; $200,000; S. W. Eckman, Arthur Howell and T. W. Wahl, all of Duluth.

Peerless Powder Co., San Jose, Cal.; to manufacture smokeless powder; $20,000; Rocca Salomone, P. Hariata, L. A. Spinelli, Robert Menzel and H. A. Gabriel.

Globe Stone Co., Cleveland, O.; to operate stone quarries and manufacture brick and tile; $250,000, commencing with $2,500; J. F. Harper, Frank Bradley, Tyron Bailey, Chagrin Falls, O.

Caldwell Lumber Co., Charleston, W. Va.; $100,000; Howell Smith, Walter Smith, Brooklyn, N. Y.; Fred. K. Fitch, David Fitch, New York city.

Templeton Mfg. Co., New York city; to deal in spring motors and machinery; Ed. R. Rollins, Wm. Lupton, Henry Klune, all of New York city.

Kankakee River Improvement Co., La Porte, Ind.; to improve the channel of the Kankakee River and tributaries.

NEW YORK STATE CANALS.

NOTICE TO CONTRACTORS.

OFFICE OF THE
SUPERINTENDENT OF PUBLIC WORKS.
ALBANY, N.Y. October 12,1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Thursday, October 29th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from Station 83 × 10, near Ferry Street, to Commercial slip, and on slips Nos. 1, 2 and 3, and Commercial slip, at Buffalo, N. Y.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works, in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS.—In the selection of cements to be used in the said work, those manufactered in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794, of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state. payable at sight to the Superintendent of Public Works, for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $21,500, and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract. $150,500; the amount of bond for the faithful performance of contract, on execution of contract, $215,000. All proposals for the above work must be addressed to the Superintendent of Public Works, at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal from Station 83 × 10, near Ferry Street, to Commercial slip, and on slips Nos. 1, 2, and 3, and Commercial slip, at Buffalo, N. Y." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
42-2t Superintendent of Public Works.

NEW YORK STATE CANALS.

NOTICE TO CONTRACTORS.

OFFICE OF THE
SUPERINTENDENT OF PUBLIC WORKS.
ALBANY, N. Y., October 12, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Thursday. October 29th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal by building the Cartersville waste weir and spillway at Station 721, Sec. 15.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works, in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS.—In the selection of cements to be used in the said work, those manufactered in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submited to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794, of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works, for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $500, and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract. $3,500; the amount of bond for the faithful performance of contract, on execution of contract, $5,000. All proposals for the above work must be addressed to the Superintendent of Public Works, at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal, by building the Cartersville waste weir and spillway, at Station 721, Sec. 15." The right is reserved to reject any or all bids..

GEO. W. ALDRIDGE,
42-2t Superintendent of Public Works.

NEW YORK STATE CANALS.

NOTICE TO CONTRACTORS.

OFFICE OF THE
SUPERINTENDENT OF PUBLIC WORKS,
ALBANY, N. Y., October 12, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896. sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Thursday. October 29th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal on Sec. 21, from the head of the Lockport locks to Station 328, near McDonald's culvert.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works, in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS.—In the selection of cements to be used in the said work, those manufactered in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794, of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works, for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $15,500, and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $108,500; the amount of bond for the faithful performance of contract, on execution of contract, $155,000. All proposals for the above work must be addressed to the Superintendent of Public Works, at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal, on Sec. 21 from the head of the Lockport locks to Station 328, near McDonald's culvert." The right is reserved to reject any or all bids.

WATER WORKS.

HUNTINGTON, IND.

Sealed proposals will be received at the office of the City Clerk at Huntington, Ind., until 6 p. m., of October 24, 1896, for the following work, to wit:

1st. For sinking and completing twelve (12) eight (8) inch tubular wells, and reconnecting the eleven (11) six-inch wells now in use for water supply.

2d. For rebuilding the pumping station, and resetting and connecting pumping machinery and steam plant.

3d. For furnishing all material and erecting a steel standpipe, thirty (30) feet in diameter and seventy-five (75) feet in height, on a brick or concrete masonry substructure, twenty-five (25) feet in height.

4th. For furnishing and laying, approximately, six (6) miles of cast-iron water mains with the necessary hydrants and valves; and for taking up and relaying ten (10) inch mains.

Plans and specifications will be on file at the office of the Superintendent of Water Works, at Huntington, Ind.; also at the office of the Consulting Engineers, room 506 Association Building, Chicago, Ill., on and after October 5, 1896.

Each proposal must be sealed, addressed to E. Q. Drummond, City Clerk, Huntington, Ind., marked "Proposal for Water Works Adfied check or surety company bond made payable to the City Treasurer of Huntington, Ind., for the sum of one thousand (1,000) dollars, as a guarantee that the bidder will enter into a contract for the construction of said work and furnish the required bond within five days from the date of award.

The City Council reserves the right to reject any and all bids.

Dated at Huntington, Ind., October 3, 1896.
E. Q. DRUMMOND, City Clerk.
STURTEVANT & TODD, Consult. Engrs.
42-1t

U. S. ENGINEER OFFICE, 106 Granby St., Norfolk, Va., Sept. 9, 1896.—Sealed proposals for DREDGING Western Branch of Elizabeth River, Va., will be received here until 12 o'clock, Oct. 26, 1896, and then publicly opened. Information furnished on application. THOS. L. CASEY, Capt. Engrs. 40-2teow

---

TOWARDS THE SETTING SUN.

'Tis said that every land has its season a time when nature smiles in all her scenic beauty. Mexico and California have opened their doors for the winter travel that seeks a milder and more genial clime. The Southern Railway, "Piedmont Air Line," in connection with the Southern Pacific, via New Orleans, offers the most attractive route. Taking a southerly course, no snow or ice, where the winds are soft and mellow and the very air coaxes one to revel among the thousand charms of nature. The Southern Pullman Vestibuled Limited, operated solid between New York and New Orleans the year round, is one of the finest equipped vestibuled trains, carrying dining and sleeping cars, and, after November 9th, the Sunset Limited will resume its schedules to connect, thus giving the most superb service between New York and the Pacific coast. For further information call on or address General Eastern Office Southern Ry., 271 Broadway.

IT'S A GO.

Since October 1st, when the open season began, the influx of sportsmen to the "Wilds of Maine" has been generally increasing.

These annual shooting expeditions are to the hunter a source of great pleasure, and for a long time previous to his departure for the "Happy Hunting Ground," his time is occupied in elaborate preparation for the trip, which to him has no equal.

A day's time will carry one into the wildest of forests where Moose, Deer and other game reign supreme, and with the assistance of a guide and a good gun it will be no one's fault but your own if you don't have a good time.

In the remotest sections of the hunting region are well-equipped camps belonging either to hunting clubs or private individuals, which can be hired for short periods, and where the "Brown October Days" can be passed in bliss and happiness.

The through service of the Boston & Maine Railroad and its connecting lines to all hunting points is fully equipped, and every facility which will benefit the huntsman or the traveller will be inuagurated.

Information regarding trains, etc., may be obtained at the station ticket offices, or at the Boston City Ticket Office, 322 Washington St.

PERSONALS.

Mr. Edw. C. Lindner, contractor, died at Hamilton, Ont., Oct. 14.

Mr. C. F. Abernethy has been elected City Engineer of Circleville, O.

Mr. Otto G. Bleedorn has been elected City Engineer of Janesville, Wis.

Mr. Karl Capple, retired contractor, of Homestead, Pa., died Oct. 15, aged 58.

Mr. John T. Linn, Manager of the McKeesport (Pa.) Coal Co., died Oct. 14.

Mr. W. H. Parsons, Water Commissioner, of Forestville, N. Y., has resigned.

Mr. C. B. Beasom, Master Mechanic of the New Orleans & Western R. R., has resigned.

Mr. William P. Moore, at one time Water Commissioner of Kansas City, Mo., died there Oct. 15.

Mr. H. C. Adams, Jr., has been appointed Secretary of the Phillips Insulated Wire Co., of Pawtucket, R. I.

Mr. William Death, contractor, of Paterson, N. J., was killed in a runaway accident while driving, Oct. 14.

Mr. C. Sidney Shepherd has been appointed Receiver for the Lake Ontario & Electric Street R. R., of Syracuse, N. Y.

Mr. F. W. Fratt has been appointed General Manager of the Texas Midland R. R., with headquarters at Terrell, Texas.

Mr. S. T. Everett has been elected Vice-President of the Cleveland Terminal & Valley R. R., with headquarters at Cleveland, O.

Mr. Joseph S. Pollock, of Cleveland, O., has been appointed Superintendent of the Sheridan (Pa.) furnaces of the Sheridan Furnace Co.

Mr. W. Hale, Superintendent of the Montana Division of the Great Northern Ry. Line, with headquarters at Havre, Mont., has resigned.

Mr. L. W. Rundlett, City Engineer of St. Paul, Minn., has been engaged as Consulting Engineer for the new water-works system of Duluth.

Mr. W. C. Pond, Secretary and Treasurer of the Hyde Park Gas Co., of Chicago, Ill., has been elected Vice-President and General Manager.

Mr. Christopher L. Williams has been appointed Acting Commissioner of Public Works of Evanston, Ill., to succeed Mr. Mark Wymcnd, resigned.

Mr. W. S. Henning, Supervisor of Bridges and Buildings, of the New Orleans & Western R. R., with headquarters at New Orleans, La., has resigned.

Mr. J. P. Rogers has been appointed Assistant Superintendent of the Kalispell Division, of the Great Northern Ry. Line, with headquarters at Kalispell, Mont.

Mr. William Duncan, formerly Second Vice-President of the Baltimore & Ohio Southwestern Ry., has been elected President of the St. Louis Cotton Compress Co., St. Louis, Mo.

Mr. J. A. L. Waddell, consulting bridge engineer, of Kansas City, Mo., is at present delivering a course of lectures on "Bridge Designing," at McGill University, Montreal, Can.

Mr. J. W. Kendrick, Vice-President of the Lake Superior Terminal & Transfer Ry., has been elected President, to succeed Mr. W. F. Fitch, with headquarters at Marquette, Mich.

Mr. Walter C. Swindell, contractor, of Pittsburg, Pa., died Oct. 16. His death was due to blood poisoning resulting from washing blue prints when he had a small cut in his thumb.

Mr. George B. Post, architect, of New York city, has been elected President of the American Institute of Architects, and Mr. Alfred Stone, of Providence, R. I., has been elected Secretary.

Mr. C. D. Boyd, Vice-President and General Superintendent of the San Diego, Pacific Beach & La Joua Ry., with headquarters at San Diego, Cal., has resigned, and the office has been abolished.

Mr. Peter Ward, for many years Superintendent of the Willimantic (Conn.) gas light works, died Oct. 16, aged 61. He was in charge of the gas plant of the New York, New Haven & Hartford R. R., in New Haven, at the time of his death.

Mr. Thos. H. Wickes, Second Vice-President of the Pullman's Palace Car Co., with headquarters in Chicago, Ill., has been elected First Vice-President to succeed Gen. Horace Porter, resigned.

Mr. William Hainsworth, formerly President of the Hainsworth Steel Co., of Pittsburg, Pa., died at West Seattle, Wash., Oct. 12. He was the proprietor of iron and steel works at West Seattle.

Mr. J. J. Thomas, Jr., Master Mechanic of the Birmingham & Atlantic R. R., with headquarters at Talladega, Ala., has been appointed to a similar position on the Mobile & Birmingham R. R.

Mr. John Fogarty, contractor, of West Superior, Wis., was killed Oct. 15, by a train, while superintending some work for which he had the contract on the Chicago & Northwestern Ry., near Baraboo, Wis.

Mr. Frank Julian, formerly connected with the testing department of the Illinois Steel Co., Chicago, Ill., has been appointed Chief Chemist of the Great Northern Ry. line, to succeed Mr. P. H. Conradson, resigned.

Mr. W. C. Farrington, General Manager of the Eastern Ry. of Minnesota, with headquarters at Duluth, Minn., has been elected Vice-President of the Lake Superior Terminal & Transfer Ry., to succeed Mr. J. W. Kendrick.

Mr. D. F. Maroney, Superintendent of Car Service, of the Baltimore & Ohio R. R., with headquarters in Baltimore, has been promoted to be Superintendent of Transportation with headquarters at Camden Station, to succeed Mr. T. Fitzgerald.

Mr. D. H. Louderback, President of the Tri-City Ry. Co., of Davenport, Ia., has resigned. Mr. E. E. Cook, of Davenport, Ia., has been appointed to succeed him. The company operates 30 miles of street railway in Davenport, Rock Island and Moline.

Mr. Lefferts L. Buck, Chief Engineer of the New East River Bridge, has been appointed as a member of the board of experts which will report on the feasibility and practicability of the surface railway cars and the elevated railway cars, or either of them, crossing the New York and Brooklyn Bridge.

Mr. E. S. Whitney, civil engineer, of Allentown, Pa., formerly on the engineer corps of the Pennsylvania R. R. and the Philadelphia & Reading R. R., has been appointed Inspector to represent the latter road during the construction of the Pennsylvania Ave. subway and tunnel in Philadelphia.

Hon. James Shearer, died at Bay City, Mich., Oct. 14. He was born in Albany, N. Y., and moving to Detroit, became a member of the original Board of Sewer Commissioners of that city. He removed to Bay City in 1865 and was instrumental in organizing and building the waterworks there, besides being a member of the State Capitol Commission.

Mr. O. W. Beckwith, Chief Train Dispatcher of the Chicago Division of the Cleveland, Cincinnati, Chicago & St. Louis Ry., with headquarters at Kankakee, Ill., has been appointed Trainmaster of the Cincinnati Division, with office at Springfield, O., to succeed Mr. Thos. J. English, whose promotion to Division Superintendent was announced in our issue of Oct. 8.

The board to select the site for a harbor on the Pacific coast, for which $2,900,000 was appropriated by the last Congress, has been appointed by President Cleveland, and consists of Rear Admiral John G. Walker, U. S. Navy; Asst. Engr. Augustine F. Rogers, U. S. Coast and Geodetic Survey, and Messrs. William H. Burr and George S. Morison, of New York, and Ricard P. Morgan, of Illinois.

Mr. Lewis Kingman, Chief Engineer of the Mexican Central Ry., with headquarters in the City of Mexico, has been chosen as an expert to appraise the value of the Atlantic & Pacific Ry., from Isleta Junction, N. Mex., to The Needles, Cal. We have this on the authority of "The Two Republics" of the City of Mexico of the date of Oct. 16, and the same corrects our statement concerning Mr. Kingman, which appeared in our issue of the 15th instant.

Mr. J. M. Wallis, Superintendent of Motive Power of the Pennsylvania R. R., at Altoona, Pa., has been appointed General Superintendent of the Philadelphia & Erie and Northern Central Divisions, to succeed the late Mr. Robert Neilson, whose death was announced in our issue of Oct. 15. Mr. Wallis is also at present Acting General Superintendent of the Main Division, during the absence of Mr. F. L. Sheppard, as we noted in our issue of May 21 last.

Mr. Robert E. O'Brien, civil engineer and railway expert, died in New York city, Oct. 18, aged 63. He was born in Philadelphia, Pa., and entered the service of the Pennsylvania R. R. in 1849. He held the office at one time of Chief Engineer of the Atlantic & Great Western Ry., and was also General Superintendent of the same. In 1881 he became Assistant Manager of the Oregon Ry. & Navigation Co. and then successively Manager of the Northern Pacific Terminal Co. and Chief Engineer of the Oregon & Trans-continental Co.

Mr. Bertrand T. Wheeler, civil engineer, of Dorchester, Mass., has been appointed a member of the Metropolitan Sewerage Commission, of Boston, Mass., to succeed Mr. Alfred F. Noyes, whose death occurred on Oct. 12, as noted in our issue of the 15th inst. Mr. Wheeler is a graduate of Dartmouth College, Hanover, N. H., in the class of 1884, and was a Resident Engineer on the Old Colony R. R. from 1885 until its lease to the New York, New Haven & Hartford R. R. In 1895 he was appointed Superintendent of Streets of Boston, and held the office for a year.

Mr. J. G. Pinkerton, Master of Transportation of the Kansas City, Memphis & Birmingham R. R., was killed at Sulligent, Ala., Oct. 20, while attempting to board a train. He had just given the signal to move ahead and his foot slipping, fell beneath the train. He was born at Lancaster, Pa., April 6, 1850, and entered the railway service in 1873, with the Northern Pacific Ry. and became Train Dispatcher on this road, and afterwards on the Missouri, Kansas & Texas Ry., Denver & Rio Grande R. R., Kansas City, Fort Scott & Memphis R. R. and others. He had been Master of Transportation of the Kansas City, Memphis & Birmingham R. R. for ten years.

Mr. John H. Drake, President of the Drake & Stratton Co., contractors, of New York, Philadelphia and Pittsburg, died Oct. 20, in Philadelphia. He was born near Monticello, N. Y., in 1840, and with Mr. Stratton entered the employ of the Watson Mfg. Co., of Paterson, N. J., as a young man. In course of time he became Manager of the company and his future partner was the Superintendent. The two started the contracting firm of Drake & Stratton in 1870. In 1891 the Drake & Stratton Co., Ltd., was formed with Mr. Drake, President, and Mr. Stratton, General Manager. It built the foundation of the Statue of Liberty in New York Harbor, rebuilt the Johnstown (Pa.) bridge after the great flood, and constructed several bridges in the vicinity of New York. At present it is engaged on work for the Baltimore & Ohio, Pennsylvania and Erie railways. Mr. Drake was in charge of the Philadelphia branch of the company and his home was in Middletown, N. Y.

Mr. James Henry Greathead, M. Inst. C. E., and well known to engineers for his system of tunnel construction, died at Streatham, England, on Oct. 22. He is said to have been born about 50 years ago, and to have commenced his professional career as a mechanical draftsman in the employ of Isambard Kingdom Brunel. But as Brunel died in 1859, he must have been very young at the time, if his age is correctly stated. After some years spent in England, he followed the practice of his profession in India and Australia for about ten years and then returned home and adopted tunnel construction as a specialty. The work which first gave him prominence was the building of the tunnel under the River Thames, for the City & South London Electric Ry., completed in November, 1890. The so-called Greathead system, so successfully applied in this work, was one of details rather than of general methods. He built his tunnel in an iron cylinder, built up of segments, protected in front during the excavation by a shield; and he used compressed air in passing through water-bearing material and injected grout between the outer skin of the tunnel and the surrounding material so as to make the structure water-tight and assist in preserving the shell. Mr. Greathead also constructed the Waterloo & City Ry. tunnel and was engineer of the Central London Electric Underground Ry., lately commenced. With Sir Benjamin Baker, he was one of the consulting engineers of the Hudson River Tunnel, under the English management.

NATIONAL IRRIGATION CONGRESS.
Dec. 15, 16 and 17. Annual meeting to be held in Phoenix, Ariz. Secy., C. M. Heintz, Los Angeles, Cal.

AMERICAN SOCIETY OF CIVIL ENGINEERS.—At the meeting on Oct. 21, the President, Mr. T. C. Clarke, in the chair, there was a very large attendance of members and visitors to listen to the discussion of a paper on "Suspension Bridges," by Mr. Geo. S. Morison. A brief abstract of the paper was first presented by Mr. Morison, explaining his design for a bridge of 3,080 ft. span, having steel towers and a continuous stiffening truss extending beyond the towers. There are four cables, cradled (or not arranged in vertical planes), and attached to the tops of the towers, instead of being continuous; separate backstay cables extend from the towers to the anchorages. The cables are to be built up of twisted wire ropes.

Mr. Theodore Cooper did not approve of the use of twisted wire ropes, nor did he think clamps sufficient for the attachment of the suspenders, as it would be difficult to prevent them from slipping, unless secured so tightly as to possibly injure the cable. He presented a proposed plan for connecting the clamps by wires or cables attached to trunnions on the clamps. Mr. Spillsbury, who had made a number of test ropes of the style advocated by Mr. Morison, described a compound socket for the cable connections at the tower saddles, the purpose of which was to utilize the greatest possible percentage of the strength of the cable beyond the socket. Each layer of wires is longer than the one outside of it, and is attached to a sleeve socket resting against that of the next outer layer. Mr. Meyer considered it best to have the cables hanging in vertical planes, instead of being cradled, as in the design of the Union Bridge Co. for the New York & New Jersey bridge; he also preferred a deep stiffening truss, with central hinge joint to the continuous shallow truss proposed by Mr. Morison. Mr. T. C. Clarke did not approve of separating the cables at the towers, but considered it preferable to have them continuous between the anchorages. He referred to the system of vertically braced cables, as designed by Mr. Lindenthal for the North River bridge, and also pointed out the advantages of cradling the cables in keeping them outside the line of the bridge at the towers, so that the bridge could pass through the tower without interference with the roadway or the tower bracing. For a six-track railway bridge, however, he would prefer the cantilever type of bridge, with a center span of 1,600 ft.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.—The subject for discussion at the meeting of Oct. 21, was "Electric Traction Under Steam Railway Conditions." Dr. Chas. E. Emery, M. Am. Inst. Elec. E,, read a paper containing much data to show that the cost of installing electricity on steam railways is such that an increase in receipts of 12½% would be necessary to warrant the change. He emphasized the fact that notwithstanding popular opinion, electric locomotives do not run more smoothly nor with less wear on rails and track than steam locomotives. He believed that electric traction for long distance traffic had an advantage over the steam locomotive only in increased convenience and comfort to passengers.

A report was read from the Nantasket Beach division of the New York, New Haven & Hartford Ry. (described in Engineering News, Oct. 22). It was incomplete so far as drawing any comparison between the cost of steam and electric operation. One serious accident and a number of minor ones had resulted from workmen and others coming in contact with the live third rail. Steam locomotives had in some instances short circuited the third rail, touching it with the pilot, and tied up traffic until the locomotive could be removed from the line.

Mr. H. Ward Leonard, M. Am. Inst. Elec. E., believed the cost of installing electricity, with present methods, to be greater than steam, but the advantages of electricity might lead to its adoption. In pointing out some of these he showed that higher speed cannot be reached with steam locomotives due to the limiting velocity at which steam will pass into the cylinder; while there is practically no limit to the speed of electric motors. Electric locomotives may be built of any desired horse-power while it does not seem probable that the capacity of the present steam locomotive can be much exceeded. Electric locomotives have already been built with 230,000 lbs. on the drivers; the heaviest steam locomotives have only 170,000 lbs. Electric locomotives are now running at 60 miles an hour very smoothly and without vibration. Mr. Leonard thought 120 miles an hour possible without fear of injury to equipment. In order to reduce the cost of installation he proposed high tension alternating currents, with rotary transformers and storage batteries carried on the locomotives. In this way the cost of transmission would be greatly reduced.

It was the general opinion of the members present that electricity cannot be advantageously substituted for steam except for short distances, light weights and frequent service. Among those who took part in the discussion were Messrs. Chas. H. Davis and Geo S. Strong.

RAILWAYS.

East of Chicago.

BENTON HARBOR & SOUTHEASTERN.—A press report from Laporte, Ind., says that work has been begun on the construction of the Benton Harbor & Southeastern R. R., which will be built from Benton Harbor, Mich., to Nappanee, Elkhart county, Ind., where connection will be made with a line surveyed to be built to Cincinnati, thus opening direct communication between Cincinnati and Milwaukee via Lake Michigan. The projectors of the two roads, who are reputed to be eastern capitalists, propose to run a line of steamers to carry the freight and passenger traffic to Milwaukee, which will be the terminal point of the water route.

HAMILTON & DUNDAS.—Leather & Watson, of Hamilton, Ont., are said to have been awarded the contract for the material for renewing this line and work will be commenced soon. New 65-lb. rails will be laid on the entire line and steel culverts will take the place of the present structures.

LEHIGH & NEW ENGLAND.—The Deckertown, N. J., "Independent," says that a spur will be built from the main line to Deckertown, a distance of a little over one-half a mile. The line has been surveyed and it is the intention to complete it by Nov. 15.

PERRY, LIVINGSTONE & WYOMING.—This company was incorporated Oct. 27. It is proposed to construct a standard gage steam road about 12½ miles in length from a point on the Silver Lake Ry., in Perry, Wyoming county, N. Y., to a point on the Delaware, Lackawanna & Western R. R., at Greigsville, Livingstone county; capital stock, $125,000; directors, Arthur G. Yates, Frederick W. Yates, George E. Merchant, John F. Dinkey, George H. Clune, George L. Eaton, Robert W. Davis, Rochester; Harry Yates, Buffalo; William D. Page, Perry.

PITTSBURG & BROWNSVILLE.—This company was incorporated in Pennsylvania, Oct. 27, to operate a railway from Brownsville, Fayette county, Pa., to McClellandtown, Fayette county; capital stock, $150,000, commencing with $15,000. Pres., Geo. S. Davidson, Pittsburg, Pa.

Southern.

CAIRO, HOPKINSVILLE & CUMBERLAND GAP.—Hood Tucker, Ch. Engr., Franklin, Ky., writes us that the preliminary surveys of this proposed line have reached Pine Knoll, Ky., on the Cincinnati Southern. It is expected to finish the surveys next month. Estimates and maps are now being prepared, and it is expected to commence work early next spring. The line as now run commences at Cairo, Ill., thence to Mayfield, Hopkinsville, Franklin, Scottsville and Tompkinsville to Jellico and Cumberland Gap, Ky.; running entirely through the oil fields in Southern Kentucky. Length 330 miles.

FLORIDA WESTERN.—R. S. Burnett, Pres., Tallahassee, Fla., writes us that the projected length is 120 miles, touching Apalachicola, Carrabelle, Tallahassee, Centreville and Thomasville. The right of way is mostly obtained; capital secured. Hopkins & Damond were to have begun grading Oct. 20. Bridge building will begin about Jan. 1.

GEO. S. BAXTER.—A company of this name, manufacturer of crossties and other railway material, has been organized at Way Cross, Ga. It is composed of George S. Baxter and Walter Ferguson, of New York; A. H. Morgan, of Way Cross, and E. C. Long, of St. Paul, Minn. The capital stock is $50,000. The company, it is said, owns 55,000 acres of lumber land southeast of Dupont and is building a railway from the nearest point on the Plant system to the main body of timber, a distance of 25 miles.

KENTUCKY MIDLAND.—The Louisville "Journal" states that a representative of an English syndicate has been conducting an investigation of the affairs of the Kentucky Midland R. R. Co. The road is to be sold by order of court on Jan. 4, 1897, and the former upset price of $320,000 has been reduced to $150,000. If it becomes the purchaser, it is the company's intention to extend the road from Frankfort across Franklin county to Alton, where it will tap the Louisville Southern, and from Paris into Bath county, where it may tap the Chesapeake & Ohio.

LOUISVILLE & NASHVILLE.—R. Montfort, Ch. Engr., Louisville, Ky., writes us that he knows nothing of the reported extension to the Florida state line.

LINVILLE RIVER.—A. B. Camp, Vice-Pres. and Gen. Mgr., Montezuma, N. C., writes us that the projected length is 20 miles, touching Cranberry, Horse Creek, Old Fields, Montezuma and Pineola. Surveys are made and part of capital secured. Pres., W. W. Demming, Montezuma, N. C.; Ch. Engr., F. G. Phillips, Knoxville, Tenn.

WESTERN MARYLAND.—C. O. Vandevanter, Ch. Engr., Baltimore, Md., writes us that there is no foundation for the newspaper reports that this company is contemplating an extension.

Northwest.

CHICAGO, MONTELLO & NORTHWESTERN.—A press dispatch from Madison, Wis., states that this company has been incorporated with a capital stock of $2,000,000. The incorporators are James L. Pennifill, Chicago; Clarence E. Pierce, Germanie, Wis.; Elbridge W. Underwood and Samuel W. Stennor, Montello, Wis. The intention of the incorporation is the construction of a railway 120 miles in length through Green Lake, Adams and Juneau counties, Wis.

DULUTH, SUPERIOR & WESTERN.—A press dispatch from Bemidji, Minn., states that surveyors for the Duluth, Superior & Western, the Canadian Pacific's new line, are at work in that vicinity, pushing west from the end of track at Deer River as rapidly as possible. The road will cross the county somewhere between this place and Red Lake. It will pass through the heaviest oak timber in the county and also the best agricultural land of the Red Lake reservation. Another Beltrami county townsite is being located on the east side of Red Lake. A large sawmill will be put up and a steamer built to ply on the Black Duck and Turtle Lake country. The town will be about 16 miles north of Buena Vista.

KANSAS CITY & SOUTHERN.—A press report from Arkansas City, Kan., says that this projected railway between Arkansas City and Beaumont, Kan., has been abandoned. The property of the company will probably be sold within a short time.

MICHIGAN CENTRAL.—It is stated that plans have been prepared for new yards in Chicago. These yards are to be put in at Calumet Park and are to be operated in connection with the Michigan Central, Pennsylvania lines, the Chicago & Calumet Terminal and the Chicago, Hammond & Western. The plans show a series of store, switch and transfer tracks. Close traffic arrangements will be made with the Chicago, Hammond & Western, which circles Chicago. Work on the yards, the complete equipment of which will cost in the neighborhood of $500,000, will begin early next week and will be completed in 60 days. The Elgin, Joliet & Eastern has purchased a large tract of land just across the state line from Hammond, Ind., as noted in our issue of last week, on which to lay out extensive yards for switching and storing cars. The land lies along the right of way of the Western Indiana and extends from the state line to Burnham, Ill. It is rumored that a number of other roads are interested in the deal.

WISCONSIN & MICHIGAN.—The Superior, Wis., "Leader" says that it is now officially announced that the Wisconsin & Michigan Ry. will extend to Iron Mountain and Norway next spring, from Marinette. Track will be laid from the northern terminus of the line at Faithorn Junction. It will require only 15 miles of track to reach the Menomonee range. Ultimately the line will reach Ironwood and Bessemer, passing through Florence.

Southwest.

ATCHAFALAYA RIVER.—The New Orleans, La., "Picayune" states that a survey is being made from Port Allen, in West Baton Rouge parish, through Point Coupee to a point opposite Simmesport, on the Atchafalaya River, a distance of 60 miles. The company was organized by F. M. Welch, of Bunkie, La., and others.

KANSAS CITY, SHREVEPORT & GULF.—It is stated that this company has completed its southern extension to Many, La., a distance of 76 miles from Shreveport. It is preparing a time card, and freight and passenger trains will be started in the course of a few weeks.

ST. LOUIS & OKLAHOMA CITY.—As stated in our issue of last week, this line is surveyed, starting at Sapulpa, Ind. Ter., at the terminus of the St. Louis & San Francisco, extending in a generally southwesterly direction 109.4 miles to Oklahoma City, Okla. Ter., the terminus at the last-named town being beyond the tracks of the Choctaw, Oklahoma & Gulf, and of the Atchison, Topeka & Santa Fe. The line as laid out will require no grade greater than 1%, although at three or four places it will be necessary to do some heavy work in order to keep within this limit. The maximum curvature will be 4°. The first 41 miles from Sapulpa lies in the Creek Nation. Several tributaries of the Canadian River are here crossed, but the bridging is light, the longest span being 125 ft. There will be needed five plate-girder bridges 40 ft. long and trestle approaches. Ch. Engr., M. L. Lynch.

Rocky Mountain and Pacific.

ALUM ROCK.—A press dispatch from San Jose, Cal., says that a party of surveyors under A. T. Herrmann are at work on the extension of the Alum Rock Ry. into Alum Rock Park. The extension will be about three-quarters of a mile in length. The work of construction will commence as soon as the surveying is finished. The cost will be about $10,000.

LAKE PARK.—A press dispatch from Tacoma, Wash., says that Col. William Bailey and associates have completed arrangements for the purchase of the 12 miles of Lake Park Ry. Grading from Lake Park southward was commenced Oct. 13

STREET AND ELECTRIC RAILWAYS.

BANGOR, ME.—It is reported that the Bangor & Winterport Electric R. R. is soon to be built. Gen. Henry L. Mitchell, its chief promoter, is quoted as saying that the material has been ordered. Work will soon begin south of the Hampden line. The city council has passed an order giving the Public Works Co. permission to extend its tracks from its present terminus, about 600 ft. north of the tin bridge, to the Hampden line. The Public Works Co., will, it is understood, at once begin work on the extension. The work upon the Winterport line will be pushed through this fall as far as Stearns' mill if possible. The Bangor & Winterport Co. contemplates the laying out of a public park somewhere along the bank of the river between Bangor and the southern terminus of the road.

PORTLAND, ME.—It is stated that Worster & Wilson will soon begin the work of blasting out the ledge on Stevens Plains Ave. for the extension of the Portland R. R. Co.'s electric line to North Deering.

MANCHESTER, N. H.—The Manchester St. Ry. Co. has been granted permission to extend its lines provided that the extensions are completed before next January.

BURLINGTON, VT.—Mr. Smith, representative from Burlington, has introduced a bill into the Vermont house to incorporate the Burlington & Grand Isle Electric R. R. Co., to build an electric railway from Grand Isle to this city.

BURLINGTON, VT.—The Winooski & Burlington Horse R. R. Co. has petitioned the city council for authority to extend its trolley line to Winooski by way of Winooski Ave. and the river road. When the horse railway was first built the line to Winooski was by this route, but upon the adoption of electricity as motive power this route was abandoned and the track removed.

SPRINGFIELD, VT.—Fred T. Ley & Co., Springfield, Mass., write us that the projected length of the Springfield Electric Ry. is 7½ miles, from Springfield, Vt., to Charlestown, N. H. All grading finished; overhead work will be completed in about four weeks; most of the capital is secured. The General Electric Co., Schenectady, N. Y., has the contract for generators and motors; for cars, Jackson & Sharp Co., Wilmington, Del.; for power plant, W. H. H. Slack, Springfield, Vt.; track and overhead work, Fred T. Ley & Co. Pres., A. Brown; Ch. Engr., V. K. Nash.

BEVERLY, MASS.—The board of aldermen has granted the Lynn & Boston R. R. permission to equip the Cove branch with electricity.

BOSTON, MASS.—The Wellesley & Boston St. Ry. Co., it is stated, has been granted permission to build an electric railway.

BRIMFIELD, MASS.—N. S. Hubbard writes us that only the preliminary steps have been taken for a railway between Brimfield and Palmer. No survey has yet been made and no franchises yet secured.

HOLYOKE, MASS.—It is stated that a new electric railway company may be formed to build a line between Willimansett and Fairview. The line would be about three miles long, and the plans include a bridge at the Boston & Maine R. R. tracks at Willimansett and a power station in that village. C. C. Abbey, Chicopee, Mass., is said to be interested.

IPSWICH, MASS.—It is stated that the directors of the Georgetown, Rowley & Ipswich Electric Ry. met recently to talk over plans for this new line. The company's attorney is quoted as saying that work will be commenced on the road early next spring. The route will undoubtedly be the straight one through Rowley to Ipswich, over the regular road. This will make Ipswich the center of the main line from Haverhill to Gloucester.

SPRINGFIELD, MASS. — A report states that active steps will soon be taken toward an electric railway connection between this city and Westfield. The road is now under construction as far as Tatham hill in West Springfield and it would not take long to continue it to Westfield. The distance is about five miles.

NEW HAVEN, CONN.—Work is said to have commenced on the extension of the Congress Ave. branch of the Winchester Ave. road.

ALBANY, N. Y.—The Oneonta St. R. R. Co. has purchased the building formerly occupied by the Oneonta Mineral Paint Co. on Mechanic St., which will as soon as plans can be completed be converted into a car house and power station.

BROOKLYN, N. Y.—It is stated that President Baldwin, of the Long Island R. R., is considering the advisability of using electricity as a motive power. If the system is adopted there will be frequent trains over the line, and fares may be reduced.

BUFFALO, N. Y.—The Tonawanda Electric Ry. contemplates building extensions of its lines to this city and to Niagara Falls, a total distance of about 18 miles.

NEW YORK, N. Y.—The Third Ave. R. R. Co. has asked for permission to operate a trolley road in Broadway, from 162d St. to Spuyten Duyvil Creek.

OLEAN, N. Y.—An electric road, it is reported, is to be built between Olean and Bradford, Pa., at an estimated cost of $100,000.

PORT CHESTER, N. Y.—A press report states that the trustees of the village announce that they are ready to grant a franchise for an electric railway, providing a first-class system can be procured. The street railway company has agreed to a clause precluding the use of horse or steam power, and expresses its willingness to adopt any practicable motive power that may be selected by the trustees.

SAUGERTIES, N. Y.—The committee on the proposed electric railway from Palenville to the Long Dock met at the court room in the Russell block last week to discuss the matter. It was reported that the road had been surveyed, and a number of consents obtained. The meeting adjourned until Nov. 5.

WHITE PLAINS, N. Y.—R. E. Slade, Secy., writes us that the New York, Elmsford & White Plains Ry. Co. is projecting an extension of 4½ miles from Elmsford to Tarrytown. Surveys are completed, capital obtained and contracts will be let soon.

ATLANTIC HIGHLANDS, N. J.—The Atlantic Highlands, Red Bank & Long Branch Electric Ry. Co. is asking for a right of way from Eatontown through Oakhurst, Elberon and Deal Beach to Asbury Park.

BOUND BROOK, N. J.—Plans and surveys are said to have been made for an electric railway between Bound Brook and Trenton, N. J., contracts for which are soon to be let.

TRENTON, N. J.—It is stated that a trolley line will be put in operation from Willow Grove, Pa., to Trenton. The company will be known as the East Penn Traction Co. A. D. Cadwallader, of Yardley, Pa., is president, and David Hanley Stone, of this city, the secretary. Surveys have been made, and the company will endeavor to have cars running before Jan. 1, 1897.

ALTOONA, PA.—It is said that the Altoona & Logan Valley Electric R. R. will soon be sold by the sheriff of Blair county. The road was chartered in 1892 with an authorized capital stock of $500,000. The line is over 16 miles in length. The per cent. of operating expenses to total receipts for the 6½ months ending Dec. 31, 1893, was 39, for the year ending Dec. 31, 1894, was 45, and for 1895, was 49.

QUAKERTOWN, PA. — The Richlandtown Turnpike Co. is said to have leased the turnpike to C. Taylor Leland, of Philadelphia, for a trolley road. The promoters of the trolley road propose to lease the turnpike for 10% a year on the capital stock of the turnpike company, which is $5,000. The borough council of Quakertown has granted the trolley company a right of way in the streets of the town.

MINERSVILLE, PA.—The Minersville town council has annulled the franchises of the Schuylkill Electric Ry. Co., granted about 18 months ago. The company has failed to extend its line through Hickscherville Valley, as agreed to by the franchise.

MOUNT CARMEL, PA.—It is stated that the Shamokin-Mount Carmel Electric Ry. will soon extend a branch of its road to Ashland from Centralia. Another company has the right of way but it is thought the local corporation can secure these rights.

WASHINGTON, D. C.—It is rumored that the Eckington & Soldiers' Home and Belt Ry. Co.'s may adopt the overhead trolley if permission can be secured.

WASHINGTON, D. C.—Plans are now under consideration, it is reported, by the officials of the Great Falls Electric R. R. to build a double line of tracks from Georgetown as far as the District line. The work, it is stated, will shortly be begun; the construction may be started next month, and rapidly pushed through. The road has a number of sidings laid part of this distance, the aggregate of which is quite large, and which assist materially in the construction of another track.——The Glen Echo R. R. is also keeping up its work, and extending its terminals. The eastern end has been extended as far as Chevy Chase circle, the work being nearly completed. At the western terminal tracks have now been laid across the Conduit road, and are nearly ready to be connected with the main line of the Great Falls Electric R. R., which, from the point of the proposed junction to Cabin John bridge, is a double track.

BALTIMORE, MD.—It is stated that contract for constructing the extensions to be made by the Central Ry. Co. in East Baltimore has been awarded to David E. Evans & Co. Work is to be commenced at once. The feed-wires of the line will be placed underground in conduits. About six miles of double track will be built.

RICHMOND, VA.—The board of aldermen is said to have granted the Richmond Traction Co. permission to extend its Broad St. line to Hollywood.

CHARLESTON, S. C. — E. S. Jarrell and Chas. H. Draus, of New York, and J. B. Chastain and J. L. Lawrence, of Baltimore, were in Charleston last week in consultation with local street railway men concerning the proposed extensions to the trolley lines of the city. It is said that several miles of additional track will be laid and new rolling stock bought later on.

COLUMBIA, S. C.—The Columbia Street Electric Ry. Co. will make a considerable extension to its lines, and last week obtained a permit from the board of aldermen for that purpose. It is stated that additional rolling stock is also to be purchased soon.

FAIRPORT, O.—Citizens of this place, it is said, are trying to secure an extension of the Cleveland, Zanesville & Eastern Electric Ry. to this city. It is understood that a financial proposition will be submitted to the company.

NEWARK, O.—A petition has been filed asking for the appointment of a receiver for the Newark & Granville Electric St. Ry. Co. The company operates 13 miles of road, with a capital stock of $100,000, $73,000 of which has been issued.

TOLEDO, O.—The Traction Co. is said to have plans ready for extensive improvements.

DETROIT, MICH.—Work on the new electric line between the easterly and westerly limits of Springwells on Michigan Ave. has been suspended by the Detroit Ry. With the exception of paving between the tracks and the securing of the trolley wire the road is ready for traffic.

GRAND RAPIDS, MICH.—The Valley City Street & Cable Ry. Co. has been granted permission to construct a street railway.

CHICAGO, ILL.—The Chicago City Ry. Co. has been granted permission to lower its tracks 10 ins. below their present level under the Archer Ave. subway. The surface of the street must also be lowered and repaved.

CHICAGO, ILL.—A decision of the appellate court has left the Union Loop Elevated Ry. Co. free from any litigation which will prevent building in Van Buren St. The company now has nearly all the iron ordered, and a considerable portion of this is now ready for shipment. It is the intention of the company to begin the erection of iron the first week in November. Unless there are delays the Van Buren St. side of the loop will be completed so trains will begin running by Feb. 1. The Wabash Ave. side is now almost ready for the running of trains. All the ties are in place, the rails are laid, and a locomotive has been run over the road to carry the cables which are to serve as feeders for the third rail which furnishes power. The Metropolitan Elevated will begin the work of constructing its connection with the Union Loop at once. This will branch off from the present line at Franklin St., running south one-half block to Van Buren St., and east on Van Buren St. to a connection with the loop. The portion of the Van Buren St. line from Franklin St. to Halsted will not be built at once. One thing which may prevent the completion of the south side of the loop by Feb. 1 will be the stations. The iron for the three stations is not yet ordered, and after it is ordered it will take some time to complete it ready for erection.——The Chicago General Electric Co., which has franchises for constructing electric lines in the southern part of the city, will be enabled to prosecute its work. The injunction proceedings against the corporation have been denied. It is stated that the General Electric people are organizing their company in New York. The organization is expected to be effected some time this week, and considerable construction work may be done between now and March.

ST. LOUIS, MO.—A press report states that preparations will be made this fall for extending the Scullin system of street railways to Ferguson, Mo., and probably to the Chain of Rocks. All the suburban districts have street car facilities with the exception of the above-named suburb and the rails will be laid before the spring.

SEDALIA, MO.—It is stated that Edward Wood, of Chicago, who is interested in the Joplin-Webb City Electric Ry., is interested in a similar line from Sedalia to Monett. in Lawrence county, via Windsor, Clinton, Stockton, Greenfield and Mount Vernon. He will put the surveying corps in the field at once and complete the survey early in November. Mr. Wood is said to be backed by New York, Chicago and Boston capitalists.

JUNCTION CITY, KAN.—It is stated that an electric line will be built from Junction City to Fort Riley, at a cost of about $30,000.

NEW ORLEANS, LA.—It is reported that the Traction Co. will build a power plant to cost between $400,000 and $500,000. R. M. Wamsley, Pres.

CRIPPLE CREEK, COLO.—The work of construction on the Cripple Creek electric railway is reported to have been commenced. The main line will touch Victor, Gillett and Cripple Creek. Hills & Sharp are interested.

DENVER, COLO.—Judge Hallett has issued an order on petition of Frank Trumbull, receiver of the Denver & South Park Ry., permitting the South Park road to assist in the construction of the Denver, South Park & Hill Top Ry., from Fairplay to the Hill Top mines, by the use of second-hand rails and fastenings, and also allowing the South Park road to enter into a traffic agreement with the new road to furnish the rolling stock.

LOS ANGELES, CAL.—An ordinance has been adopted by the council granting to J. W. Hinton the right to construct and operate an electric street railway in the city of Los Angeles.

MIDDLETOWN, CAL.—Col. O. E. Moore, Mgr. Clear Lake Electric Co., with Dr. Wylie, Mr. Raymond, and Mr. Wallace, are stated to be on their way to Lower Lake in the interest of the proposed electric railway from that place to Napa.

MODESTO, CAL.—F. T. Knewing, J. W. Woodside and J. W. Dunlap, of Oakdale, have petitioned the supervisors for a franchise from Oakdale to the Tuolumne county line for an electric railway to Sonora.

REDLANDS, CAL.—It is reported that A. H. Smiley has ordered a preliminary survey for an electric railway to Fregolda Park. It is proposed to make it a mountain road, and Engineer McPherson, who built the Mount Lowry R. R., is at present making the survey. A portion of the power for this road is to be obtained from the canyon along the route and the remainder will be taken from the Redlands plant.

NIAGARA FALLS, ONT.—It is stated that the Niagara Falls Park & River Electric Ry. will be extended from Chippewa to Fort Erie, and from Queenstown to Niagara-on-the-Lake. The company may also develop and sell power.

LIVERPOOL, N. S.—An electric railway may soon be built from Liverpool to the pulp mill at Milton, to connect the mills with the seaport.

ELECTRIC LIGHT AND POWER.

GARDINER, ME.—The council has appointed a committee to employ an electrical engineer to prepare plans, specifications, etc., for a new electric light plant; and also to advertise for bids for lighting the city by private companies. The committee is to report before the meeting in December. The committee consists of Alderman Willey, Councilmen Foster and McCausland.

PAWTUCKET, R. I.—The electric light committee has postponed action in regard to the proposed city plant until after the municipal election. L. G. Ladd, Comr. Pub. Wks.

ITHACA, N. Y.—It is stated that the Elmira Electric Co. is considering the question of erecting a separate incandescent light plant on East State St. It is now furnishing about 6,000 incandescent lights.

JAMAICA, N. Y.—The Jamaica Electric Light Co. has purchased a plot of land adjoining the railway near Van Wyck Ave., on which it is proposed to erect an additional plant; estimated cost, $15,000.

JAMAICA (L. I.), N. Y.—The Jamaica Electric Light Co. has increased its capital stock from $20,000 to $200,000.

NEW BRIGHTON (S. I.), N. Y.—The village trustees have been petitioned by a new electric light and power company for a franchise in this place and West Brighton. Supervisor Doyle and John J. Kennedy are interested.

JERSEY CITY, N. J.—Bids are asked until Nov. 2 for lighting the streets with electricity, gas or oil for one, three or five years. The minimum number of lights that will be required is 900 arc, 100 gas, with Welsbach lamps, and 700 oil lights. This year there are 782 electric lights, 1,000 oil lamps and 550 gas lamps. Next year there will be from 900 to 1,000 electric lights, 700 oil lamps, 300 gas lamps, and there will be introduced a new feature—100 Welsbach lights. The board has $13,800 more to spend for lights next year than it has this year. Ferdinand Heintze, Chn. Com. Municipal Lighting; Geo. T. Bouton, Clk. Bd. St. and Water Comrs.

NEWARK, N. J.—The market committee, composed of Aldermen Virtue, Schreihofer and Waldron, are considering the question of erecting an electric light plant for the use of the market.

SEA ISLE CITY, N. J.—The residents of this city are agitating the question of better lights. It is said that the local electric light company, which is paid $2,500 a year for supplying lights, is giving unsatisfactory service.

FOREST CITY, PA.—The Forest City Electric Light & Power Co. has been granted a franchise for constructing a plant and for furnishing the city with 12 arc lights. Work will be begun at once, according to reports. Pres., A. R. Raub, Scranton, Pa.; Treas., W. D. Boyer, Scranton; Secy., A. D. Kehrens, Forest City.

PHILADELPHIA, PA.—An ordinance will probably soon be introduced in the councils to advertise for bids for electric lighting in time to allow free field for competition. ——The citizens' municipal association has petitioned the councils to appropriate $500,000 for a city electric light plant. Jacob J. Seeds, Chn. Com.

PITTSBURG, PA.—It is reported that new bids will be asked for an electric light plant of 200 HP. capacity for the public safety building; estimated cost, about $12,000. J. O. Brown, Dir. Pub. Safety.

WASHINGTON, N. C.—It is reported that plans are being prepared by Thomas & Hunter, of Richmond, Va., for an electric light plant for this place. Bids will probably soon be asked.

PAOLA, FLA.—Press reports state that bids are being asked for the construction of a 2-story brick building for the electric light plant, plans for which were prepared by the Royal Electric Co., Peoria, Ill. R. G. Blake, Cy. Clk.

BARNESVILLE, GA.—It is reported that this place will issue in a short time $7,000 in bonds for an electric light plant and $8,000 for a new school building.

CINCINNATI, O.—Local papers state that a new electric light plant will be erected in this city for the Edison company.

BAY CITY, MICH.—The electric light commissioners have directed the secretary to advertise for bids for a new boiler and engine for the power station and for furnishing three new arc lights for the city hall. Wm. Keith, Comptroller.

BIG RAPIDS, MICH.—Bids are asked until Nov. 6 (postponement from Oct. 19) for lighting this city with at least 50 arc lights for one, three, five or ten years. J. W. Morton, Cy. Clk.

MARLETTE, MICH.—An election will be held Nov. 9 to vote on the question of issuing $4,000 in bonds for an electric light plant, according to reports.

STORM LAKE, IA.—It is stated that a fire at this place recently destroyed the electric light plant, causing a loss of about $5,000. E. E. Mack and E. C. Cowles are interested.

ST. PAUL, MINN.—The council has granted a franchise for an electric light and power plant in Wards Nos. 10 and 11, to Brooks Bros., St. Paul.

MILES CITY, MONT.—It is reported that Supt. Hayden of the electric light plant will probably soon purchase a 1,500-light dynamo and other machinery for the additions to the plant.

MEXICO, MEX.—It is stated that a Boston syndicate proposes to furnish this city with electric power to be secured about nine miles from the city. Robt. Gayul, Cy. Engr.

BALLARD, WASH.—Mr. Olson, an electrical engineer, and Falcon Joslyn, of Seattle, Wash., have applied to the council for a franchise for an electric light plant, according to reports.——The council proposes to erect a plant of its own.

ANAHEIM, CAL.—The committee is considering the propositions of electrical engineers for preparing plans for an electric light plant, according to reports.

AUBURN, CAL.—Bids are asked until Dec. 19 for furnishing and placing the fixtures and electric wiring the county court house, jail and hall of records; deposit, $1,500. Wm. I. May, Clk.

OGDEN, UTAH.—Bids are asked until Nov. 16 for constructing a masonry dam and spillway, about 400 ft. long and 60 ft. high, as described in our advertising columns; bond, $50,000. C. K. Bannister, Ch. Engr. Pioneer Electric Power Co., Ogden.

RAT PORTAGE, ONT.—Press reports state as follows: The Keewatin Power Co. is preparing to utilize the water power at its dam at Keewatin by making a contract for the transmission of at least 5,000 HP. 120 miles to Winnipeg, Man. It has for some time been investigating the possibility of making this transmission, which has resulted favorably, and the company is now prepared to enter into a contract with a construction company. The right of way has already been partly secured.

RENFREW, ONT.—The electric light companies of this city have been consolidated, and it is reported will erect a new power plant at once to supply over 500 HP. Mackay & Guest and A. A. Wright & Co. are interested.

NEW COMPANIES.—Beacon Electric Co., Chester, Pa.; $120,000, with $12,000 paid in; Treas., J. Engle Cochran, Jr., Chester.

West Side Electric Co., New York, N. Y.; $25,000; to light the west side from 49th to 125th St.; subways are now being built; William A. Mitchell, of Brooklyn; Egbert C. Simonson, 146 Broadway; and Charles V. E. Gallup, New York city.

Beatrice Heat, Light & Power Co., Beatrice, Neb.

Grindley Electric Light & Power Co., Grindley, Cal.; $3,000, with $2,110 paid in; L. K. Vaughan, R. A. Norman, Wm. Moore, C. H. Brown, Grindley.

New York Lighting Co., Camden, N. J.; $10,000, with $1,000 paid in; to supply light, power, heat, etc.; John S. Parker, Geo. W. Mark, 27 Pine St., New York, N. Y.; Clifford W. Perkins, Orange, N. J.

Sunapee Electric Light & Power Co., Sunapee, N. H.; $4,000.

BRIDGES.

WOONSOCKET, R. I.—Bids are asked until Nov 5 for constructing a steel bridge over the Blackstone River at River St., as stated in our advertising columns. Jos. J. McGee, Chn. Com.; Frank H. Mills, Cy. Engr.

BLACKSTONE, MASS.—The question of widening and altering the bridge over the New York & New England R. R. is being considered by the selectmen and the railway officials; estimated cost, $20,000.

YARMOUTH, MASS.—Bids are asked until Oct. 31 for building a bridge in this town. The work will include 200 cu. yds. of rubble masonry; 150 lin. ft. of railing, 3,213 ft. B. M. pine and spruce, etc. Chas. Mills, Engr., 4 Mount Vernon St., Boston, Mass.

WOONSOCKET, R. I.—T. W. Reilly, of Providence, R. I., has been awarded the contract for the masonry work for the River St. bridge at $6,000. The other bidders were Ross & Fowler, F. L. Allen and J. H. Leavitt.

HARTFORD, CONN.—James J. Goodwin, Asylum Ave. and Woodland St., has been awarded the contract for constructing a masonry bridge over Park River at Asylum Ave., at about $10,000.

BINGHAMTON, N. Y.—We are informed that nothing has been done regarding the Ferry St. bridge, which is estimated to cost about $50,000. Nothing is likely to be done until next spring. S. E. Monroe, Cy. Engr.

NEW YORK, N. Y.—The new East River Bridge Commission on Oct. 21 awarded the contract for building the New York tower of the bridge, as advertised in Engineering News, to Patrick H. Flynn, of Brooklyn, at $383,150. The facings of the tower are to be of granite and the backings of limestone. Mr. Flynn was the lowest of 12 bidders, his bid being $426,150 for all granite and $383,150 for granite and limestone. The itemized bids were published in our issue of Oct. 15.

SYRACUSE, N. Y.—The bids received last week for the steel girder bridge over Onondaga Creek at Cortland Ave. have been rejected, and new bids will be asked for at once; estimated cost, $10,000. R. R. Stuart, Cy. Engr.

WATERTOWN, N. Y.—It is reported that a new bridge is to be built soon at Mill St., to take the place of the one which recently was partly destroyed. C. O. McComb, Cy. Engr.

PITTSBURG, PA.—Bids are asked until Oct. 31 for filling approaches to four county bridges. James A. Grier, County Controller, Pittsburg.——Plans for a bridge over Spruce Creek at Ben Avon, Pa., have been prepared by Gustave Kaufman, 813 Hamilton Bldg., Pittsburg. The length will be 520 ft., roadway 18½ ft. and sidewalks 8 ft.

RIVERTON, MD.—It is stated that the Wrought Iron Bridge Co., of Canton, O., has been awarded the contract for replacing a span of the bridge over the North River at this place at $2,100.

BAYARD, W. VA.—The county court, it is stated, has appropriated $1,000 to aid in the construction of a steel bridge over the Potomac River at this place, which is estimated to cost $2,000, the other half of which will be paid by the town.

SUTTON, W. VA.—Bids are asked by the county court for erecting a 53-ft. iron bridge over Granny's Creek, according to reports.

AMERICUS, GA.—The construction of a bridge over the railway tracks at Lee St. is being considered by the council and the Georgia & Alabama R. R. Co.

COLUMBIA, MISS.—It is reported that bids will probably be asked in December for building an iron bridge over Pearl River in Marion county, plans for which will be submitted about Nov. 2. Engr., Maj. Belton Mickles, West Point, Miss.; C. J. Meyson, County Clk., Columbia.

CLEVELAND, O.—Bids are asked until Nov. 20 for the purchase of $20,000 of 4% bridge bonds. H. L. Rossiter, Cy. Audr.

CLEVELAND, O.—Bids are asked until Nov. 6 for furnishing and delivering for the Kingsbury viaduct about 67,000 ft. of planking. D. E. Wright, Dir. Pub. Wks.

CINCINNATI, O.—Frank S. Krug, County Engr., Cincinnati, has been instructed to prepare plans at once for building an iron bridge over the Baltimore & Ohio Southwestern Ry. Co.'s tracks at Norwood.

GREEN BAY, WIS.—It is reported that the council is considering an ordinance authorizing the issue of $12,000 in bonds for rebuilding the draw in the bridge at Main St.

MENASHA WIS.—We are informed that this city has just awarded the contract for an iron and steel bridge with stone substructure to the Chicago Iron & Bridge Co., at about $15,000. The structure will be 633 ft. long, with an 18-ft. roadway and two 7-ft. sidewalks. W. W. Reed, Cy. Engr.

WAUSAU, WIS.—C. W. Nutter, Cy. Engr., on Sept. 7, was directed by the council to prepare plans for a steel and iron bridge. The plans were submitted Oct. 5, but action on the same was postponed until Nov. 2. The plans call for a 4-span bridge of 125 ft. each, and 100 ft. of iron trestle approach, a 14-ft. roadway and 6-ft. sidewalks. Iron cylinder piers 4 ft. in diameter and 5-16-in. metal are to be used for the foundation.

INDIANAPOLIS, IND.—Bids are asked by the board of public works until Nov. 4 for painting the bridge over Fall Creek at Floral Ave.; also for the Virginia Ave. viaduct, etc.——The contract for steel girders under bridge across canal at East West St. has been awarded to the Haugh-Noalke Iron Works at $693.

INDIANAPOLIS, IND.—The following bids were received by the board of public works Oct. 17 for constructing a plate girder bridge over Pleasant Run at Beecher St.:

Shiffler Bridge Co., Pittsburg, Pa.	$2,873
Bellefontaine Bridge Co., Bellefontaine, O.	2,820
Variety Iron Works, Cleveland, O.	2,714
Peter Fritz	2,673
Massillon Bridge Co., Massillon, O.	2,652
American Bridge Works, Chicago, Ill.	2,577
Lafayette Bridge Co, Lafayette, Ind.	2,490
Toledo Bridge Co., Toledo, O.	2,484
Chicago Bridge & Iron Co., Chicago, Ill.	2,449
Wrought Iron Bridge Co., Canton, O.	2,350
Wisconsin Bridge & Iron Co., Milwaukee	2,350

KNOXVILLE, IA.—Bids are asked until Nov. 11 for constructing an iron bridge over the Des Moines River at Red Rock, Ia., bidders to furnish plans. A. A. Davis, Chn. Bd. Supervisors; H. Shivvers, Audr., Knoxville.

MASON CITY, IA.—N. M. Stark & Co., of Des Moines, have the contract for remodeling the Main St. bridge. The old structure was 120 ft. long, with an 18-ft. roadway and two 6-ft. walks. When rebuilt it will have a motor roadway 12 ft. wide, two highways 18 ft., and two 6-ft. 6-in. walks; two new trusses will be added. New trusses designed for an equivalent load of 2,000 lbs. per ft.

LE MARS, IA.—Goodrich & Robson, of Sioux City, Ia., are reported to have been awarded the contract for constructing two bridges over the Big Sioux River, between Union county, S. Dak., and Plymouth county, Ia., at $1,725.

DULUTH, MINN.—Bids are asked until Oct. 31 for constructing a pile and timber approach to the Duluth-Superior Bridge at Spruce St., according to reports; check, $700. R. Murchison, Clk. Bd. Pub. Wks.

PLATTSMOUTH, NEB.—The citizens of Eight Mile Grove precinct are to vote on the question of building a bridge over the Platte River at Cedar Creek; estimated cost, $8,000.

GRAFTON, N. DAK.—It is stated that the county commissioners have ordered the construction of a 54-ft. wooden and iron bridge over Park River.

GLENWOOD SPRINGS, COLO.—It is reported that the county commissioners are considering the question of building a new bridge over the Grand River, at Rodericks Ferry.

ST. LOUIS, MO.—M. L. Lynch, Ch. Engr., St. Louis & Oklahoma City Ry. Co., has submitted a report to the directors on the construction of the proposed railway to Sapulpa, Ind. Ter., and Oklahoma City, Okla. Ter. It is stated that five plate girder bridges, each 40 ft. long, will be needed, two of 50 ft. each and one of 125 ft.

MODESTO, CAL.—Bids, plans, etc., are asked by the county clerk until Nov. 10 for a bridge over Puerto Creek, according to reports.——The supervisors are considering the question of a bridge over the Stanislaus River at Burneyville.

SACRAMENTO, CAL.—The supervisors have rejected the bids for constructing a steel bridge at Mormon Island; estimated cost, $5,500. New bids have been called for. Engr., G. A. Stoddard; W. B. Hamilton, Clk. Bd. Supervisors.

BUILDINGS.

BOSTON, MASS.—The state armory commissioners are discussing the question of appropriating $120,000 for making improvements to the armory building of the Ninth Infantry.

BOSTON, MASS.—Bids are asked until Nov. 2 for erecting a brick school building at Chambers and Poplar Sts. J. L. Faxon, Arch., 7 Exchange Place; Edward H. Dunn, Chn. Com. on Schoolhouses.

PROVIDENCE, R. I.—Bids are asked until Nov. 6 for constructing the retaining walls and steps and for the plumbing for the state normal school; check, $500; Archs., Martin & Hall, 502 Industrial Trust Co. Bldg., Providence; Thos. B. Stockwell, Secy.

NEW LONDON, CONN.—Press reports state that Frank A. Munsey, the publisher of Munsey's Magazine, has decided to erect a new 5-story brick building on State St. Arch., Wm. B. Tuthill, United Charities Bldg., New York.

BUFFALO, N. Y.—The following were the lowest bids received for work at the state hospital by the board of managers: Heating and ventilating, Edward P. Bates & Co., Buffalo, $32,500; plumbing and sewerage, Edward Joy, Syracuse, N. Y., $28,180; boiler house, laundry and chimney stack, Mosier & Fitzpatrick, Buffalo, $26,740. The contracts were awarded to the above bidders.——The following bids were received Oct. 24 for the foundation for the new armory for the 74th Regiment: Joseph A. Churchyard, $40,969; Henry Rumhill & Co., $56,027; Brown & Stable, $31,447; F. W. Carter, $36,100; Charles Mosher, $70,400; James Stewart, $40,516; W. R. Haven, $49,000; Henry Shaffer's Sons, $33,504; John F. Berrick, $33,224; George W. Flynn, $30,994. All of the bidders are from Buffalo. The last legislature appropriated $25,000 to commence the construction of the building, which is estimated to cost $400,000. The county has agreed to pay that portion of the bids which may be for excavating estimated at one-third. The structure will be 530 × 240 ft., as stated in our issue of Oct. 15. I. G. Perry, State Arch., Binghamton and Albany, N. Y.; Maj. H. P. Stackpole, Secy. State Armory Comn., Albany.

BUFFALO, N. Y.—Green & Wicks, 110 Franklin St., have been directed to prepare plans for a church for the Parkside Unitarian Congregation.

MOUNT VERNON, N. Y.—At the election Nov. 3, the question of issuing $200,000 in bonds for a new city hall will be voted upon. T. E. Fletcher, Alderman, and H. T. Jennings are interested.

NEW BRIGHTON, N. Y.—An election will be held Nov. 10 to vote on the question of issuing $75,000 in bonds for erecting a new school building.

NEWBURG, N. Y.—Bids are asked until Nov. 17 for furnishing a low pressure return circulation steam heating and ventilating apparatus. Wm. Martin Aiken, Supervising Arch., Washington, D. C.

NEW YORK, N. Y.—Bids are asked until Nov. 5 for additional work for the building to be erected in Crotona Park, near Third Ave. Arch., G. B. Post, 33 East 17th St.

Wm. L. Strong, Mayor; and until Nov. 5 for altering the alcoholic ward building, Bellevue hospital. S. C. Croft, Pres. Dept. Pub. Charities, 66 Third Ave.——It is reported that Henry Clews, Broad St., proposes to erect a 10-story office building at 9 West 34th St.——The Standard Structural Co., 7 Broadway, has been awarded the general contract for erecting the 16-story building, at 32 and 34 Broadway, for the Hudson Building Co.; Pres., A. W. Cruikshank, 176 Broadway, New York; Arch., A. F. Leicht, 97 Cedar St.; Engrs., H. W. Hodge and W. H. Burr, 71 Broadway. R. P. Bolton, 35 Nassau St., is the engineer for the heating, plumbing, elevators, etc.——It is reported that F. H. Mela, 13 Astor Place, will probably erect an 11-story building, at 830 Broadway, next year. ——The board of estimate has voted to appropriate about $500,000 for the proposed additions to the American Museum of Natural History. E. E. McLean, Engr. Park Dept.——Plans have been filed by Chas. F. Rogers, 305 West 55th St., for two 5-story brick flats, to cost $130,000.

NEW YORK, N. Y.—Press reports state that plans to enlarge the Tombs prison in New York were to be approved by the state prison commission at Albany Oct. 28. There has been much complaint of overcrowding in the Tombs, sometimes three and four persons being placed in a cell. It is proposed to rebuild the Tombs by doubling its height and in other ways to provide for 320 additional cells at a cost of $500,000. Archs., Withers & Dickson, 54 Bible House, New York.——Warden Pillsbury, of the Blackwell's Island Penitentiary, appeared before the commission Oct. 27 with George M. Walgrove, Arch., 42 East 23d St., New York. They had plans for improvements on Blackwell's Island which contemplate a separate prison, with 112 cells, for women, and an addition to the present penitentiary building so as to provide 416 more cells, at an expense of $5,000,000. These expenditures were authorized by the legislature.——Plans have been filed by the Market and Fulton National Banking Co., 81 and 83 Fulton St., for alterations to its 7-story office building, at Fulton and Gold Sts., to cost $150,000.

NIAGARA FALLS, N. Y.—Arrangements are being made by Mayor Schoellkopf, W. Caryl Ely, W. B. Rankine and J. C. Morgan for the erection of a large convention hall in this city, in which it is proposed to hold an electrical convention and exhibition of machinery.——The same men are reported as interested in a projected hotel.

PRINCETON, N. J.—It is reported that estimates will be received until about Nov. 3 for constructing a new brick hall and dormitory for the University. The structure will be a 3-story building 710 ft. long. Archs., Cope & Stewardson, 520 Walnut St., Philadelphia, Pa.

TRENTON, N. J.—On Oct. 18 the corner stone of the new Catholic Orphanage at Hopedale was laid. A machine shop, carpenter shop and other mechanical departments are to be connected with the orphanage; estimated cost, $100,000. Bishop McFaul, Trenton, can be addressed.

ALLEGHENY, PA.—The following bids were received Oct. 20 for placing a low pressure return circulation steam heating and ventilating apparatus in the public building; Wm. Martin Aiken, Supervising Arch., Washington, D. C.:

		Time days.
Thompson & Washburn, Detroit, Mich.	$3,959	70
Blake & Williams, 186 South 5th Ave, N. Y.	4,444	70
Iron City Heating Co., Pittsburg	4,100	60
E. Rutzler, 178 Centre St., New York	4,800	60
Maginn & Lewis, Pittsburg	4,645	60
Ellicott Machine Co., Baltimore, Md.	4,880	60
Bayley Heating Co., Milwaukee, Wis.	3,814	70
Shook-Anderson Mfg Co., Pittsburg	4,703	70
Samuel I. Pope & Co., Chicago, Ill.	3,879	70
Chafer & Becker, Cleveland, O.	4,369	60
McGunnis-Smith Co., 93 Water St., Pittsburg.	3,684	60
Pittsburg Heating Supply Co., Pittsburg	3,273	60
John T. Bealor & Co., Ellenton, Pa.	4,250	45

HIGHLANDS, PA.—A second election is about to be held to vote again on the question of issuing $100,000 in bonds for a court house.

PHILADELPHIA, PA.—Local papers state that Henry G. Freeman, Jr., will begin the construction in about 80 days of a 16-story office building at Chestnut and Broad Sts.; estimated cost, $500,000.——Arrangements are being made by a syndicate for the purchase of the property at Broad and Chambers Sts. from the Chambers Presbyterian Church. The syndicate proposes to erect a 13-story office building on its site. Arch., Joseph M. Houston, 604 Provident Bldg., Philadelphia.——F. M. Day & Bro., Archs., 927 Chestnut St., have awarded the contract for constructing an office, store and factory building at 1420 Chestnut St., for the American Baptist Publishing Co., to Geo. F. Payne & Bro., 401 South Juniper St., to cost about $400,000.

PHILADELPHIA, PA.—Plans are about completed for the new mint building in this city. The structure will be three stories high and 300 × 170 ft.; estimated cost, $6,650,000. It is probable bids will be asked in a short time. W. M. Aiken, Supervising Arch., Washington, D. C.; Herman Kretz, Supt. Mint, Philadelphia.——It is reported that plans are being prepared for a new building at 11th and Filbert Sts. for the Bell Telephone Co.

PITTSBURG, PA.—Local papers state that E. M. Bigelow, Dir. Pub. Wks., has been directed by the council to prepare plans for adding two new stories to the city hall. It will take about two years to complete this work.

PITTSBURG, PA.—Building permits have been issued to J. C. Patch for a warehouse on Second Ave., to cost $26,000; to Jacob Friday, for dwellings on Stratford Ave., $6,500.——E. J. Carlisle & Co., 605 Smithfield St., have prepared plans for a school building at Duquesne to cost $20,000, and at Wall, to cost $13,000.——Bartberger & East, Westinghouse Bldg., are making plans for a hotel at Zelieuople to cost $20,000.——W. H. Sims, 502 Penn Bldg., is preparing plans for a dwelling on North Wegley Ave., to cost $20,000.

WASHINGTON, D. C.—Bids are asked by the district commissioners until Nov. 2 for constructing an 8-room school building at 5th and K Sts.

WASHINGTON, D. C.—The corner stone of the Hall of History was laid Oct. 21. The building is to be 170 × 70 ft. and is estimated to cost $200,000. Archs., W. M. Poindexter, 806 17th St., N. W., Washington, and Van Brunt & Howe, 1214a Main St., Kansas City, Mo.; John E. Andrews, Pres. Bd. Trustees, Washington.

JACKSONVILLE, FLA.—The Knoxville Building & Construction Co., Jacksonville, has been awarded the contract, at $63,550, for erecting the Gardner building on Bay St., between Main and Laura Sts.

JACKSONVILLE, FLA.—A hot water furnace, with sufficient pipe and radiators to properly heat all the offices in the new city market is proposed. A. F. Harley, Cy. Engr., would be glad to correspond with manufacturers of such plants.

FORT MONROE, VA.—The following bids were received Oct. 19 for constructing a hospital at Fort Monroe. J. W. Pullman, Q. M., U. S. A.; (1) being for the construction; (2) for plumbing; (3) heating:

	1.	2.	3.
T. D. Sipes, Portsmouth, Va.	$19,900	.....	.....
T. B. Bartlett, Newport News, Va.	19,718	.....	.....
W. W. Winfree, Bladensburg, Md.	21,476	$1,350	$3,771
J. R. Shehan, New Rochelle, N. Y.	21,940	.....	.....
E. Hart, Norfolk, Va.	18,347	.....	.....
J. H. Brinson, Hampton, Va.	17,842	.....	.....
Holtzclaw Bros., Hampton, Va.	17,684	.....	.....
R. C. Bristow & Co., Richmond, Va.	22,792	.....	.....
W. W. Biggs, Washington, D. C.	.....	3,773	.....

Newport News (Va.) Plumbing Co.	.....	1,155	.....
Whitehurst & Riley, Portsmouth, Va.	.....	1,618	.....

CLEVELAND, O.—Bids are asked until Nov. 17 for erecting the iron tower and pile foundation for the Maumee Light Station, O. Lt.-Col. J. A. Smith, U. S. Engr.

TOLEDO, O.—Bids are asked until Nov. 18 for the purchase of $125,000 of 5% bonds for erecting a high school building. H. W. Compton, Clk. Bd. Education.

INDIANAPOLIS, IND.—W. P. Jungclaus has been awarded the contract for erecting a new school building at Park Ave. and 15th St., at $31,000, the Fuller & Warren Co. getting the contract for the heating and ventilating apparatus at $2,247.

RICHMOND, IND.—The school board has decided to erect a new school building to cost $15,000. Daniel W. Surface, Pres. School Bd.; John A. Hasecoster, Arch., 30 Kelly-Hutchinson Block, Richmond.

CHICAGO, ILL.—It is reported that the Northern Pacific R. R. Co. is about to erect a new 30-stall round house at 56th and Taylor Sts., to cost $28,000. W. L. Darling, Ch. Engr., St. Paul, Minn.

CHICAGO, ILL.—Press reports state that the two large grain elevators of the Chicago & Pacific Elevator Co., at Cherry St. and the North Branch of the Chicago River were destroyed by fire on Oct. 26, causing a loss of over $1,000,000, which includes the loss of over 1,250,000 bushels of grain.——The normal school committee of the board of education is considering plans for a new normal school building at 69th St. and Stewart Ave.; estimated cost, $125,000.

LEWISTOWN, ILL.—It is stated that the contract for constructing a brick court house for Fulton county will probably be let in December. The structure will be 112 × 68 ft., and is estimated to cost $60,000. Archs., Bell & Kent, 232 Merriam Block, Council Bluffs, Ia.

MINNEAPOLIS, MINN.—The Minneapolis Mortgage & Redemption Co. has been granted a permit to erect a 5-story brick building, to cost $40,000, at Second and N Sts.

PORTLAND, ORE.—Bids are asked until Nov. 16 for the metal work for the Grays Harbor Light Station, Wash. Capt. W. L. Fisk, U. S. Engr., Portland.

HANFORD, CAL.—Bids are asked by the county clerk until Nov. 9 for constructing a county jail to cost not less than $10,000.

WATER-WORKS.

NEW CASTLE, ME.—An election was called for Oct. 28 to vote on uniting with Damariscotta in the construction of water-works. The trenching at Damariscotta is said to be nearly completed.

BELMONT, MASS.—Bids were asked until Oct. 27 for laying 4,400 ft. of 6-in. water pipe. E. A. W. Hammatt, Engr., 29 Pemberton Square, Boston.

MARLBORO, MASS.—It is reported that extensive additions are to be made.

NEW BEDFORD, MASS.—A local paper states that bids are to be opened this week for two 10,000,000-gallon pumping engines. R. C. P. Coggeshall, Supt.

SALEM, MASS.—The water board is considering the purchase of a new pump. The Nordberg Mfg. Co. has invited the board to inspect some of its pumps in Western cities. John F. Hurley, Pres. Bd.

PAWTUCKET, R. I.—The Marieville fire district has been organized and has voted to contract with this city for water-works. About a mile of pipe will be required, for which the city will receive about $400 a year. Wm. T. Smith, Village Clk., address North Providence.

SOUTHINGTON, CONN.—The water company is said to have voted last week to build a small reservoir above the distributing reservoir in the spring.

ATTICA, N. Y.—It is reported that a filtration plant is to be put in.

ELMIRA, N. Y.—The construction of the plant of the Elmira Heights Water Co., noted last week, was commenced, but owing to trouble over the employment of Italians it is stated that no more work will be done till next year.

LOCKPORT, N. Y.—The Hall Iron Works has been awarded the contract by the council for furnishing the necessary apparatus for raising water from the lower level of the canal into the reservoir above. J. Milton Woodward, Pres. Water Bd.

MORRISTOWN, N. J.—Bids are asked until Nov. 9 for constructing a 5,000,000-gallon storage reservoir, with filter basins, etc., at Morris Plains, for the state hospital at that place. Geo. W. Howell, Engr.; Chas. H. Green, Secy. Bd., 21 Washington St., Morristown.

WILLIAMSTOWN, N. J.—Press reports state that there is scarcity of water at this place; springs are unusually low and fully one-half of the wells are dry.

McKEESPORT, PA.—The following bids were received Oct. 26 for the work advertised in Engineering News Oct. 15. Edwin Soles, Supt.; J. Schinneller, Engr., McClintock Bldg., Pittsburg:

Sinking wells, etc.:

Bowman Bros., McKeesport (accepted)	$4,250
Allen Bros., Allegheny, Pa.	6,975
John McKay, Titusville, Pa.	9,000
Wagner Well Supply Co., Dayton, O.	5,750
Hocker & Shaw, McKeesport, Pa.	7,200

Pumping engines:

Hall Steam Pump Co., Pittsburg, Pa.	$4,025
Snow Steam Pump Co., Buffalo, N. Y.	4,913
Wilson Snyder Mfg. Co., Pittsburg, Pa.	5,750
Henry R. Worthington, New York (accepted)	4,390

JERMYN, PA.—The injunction noted last week is reported not to have decreased the intention of this borough to have municipal works, and another election will probably soon be held.

LEBANON, PA.—The mayor has vetoed the ordinance appropriating $5,000 for a 10-in. well at South Mountain.

MIFFLINTOWN, PA.—B. G. Coon, of Kingston, Pa., has been awarded the contract for constructing a 450,000-gallon masonry reservoir, with pipe line extensions, for the Mifflintown Water Co. S. W. Cooper, Engr.

MILLERSTOWN, PA.—This borough is agitating the question of water-works.

PHILADELPHIA, PA.—Bids are asked until Nov. 5 for water meters. Thos. M. Thompson, Dir. Pub. Wks.

REYNOLDTON, PA.—The town council is negotiating with the Elizabeth Water Co. for a water supply from the Monongahela River. The company proposes to lay a main from Elizabeth to Blair station, across the river to the town line where connection would be made with the existing mains. The water is now purchased from McKeesport, at $100 a month, and is not satisfactory.

TYRONE, PA.—The Fayette Water Co. was incorporated Oct. 26 with a capital ctock of $2,500 to operate at Tyrone; Treas., Andrew W. Black, 4229 Fifth Ave., Pittsburg.

DELAWARE CITY, DEL.—A committee has been appointed to confer with W. Taylor Leland, of Philadelphia, in regard to the proposed works, noted in our issue of Oct. 15. Geo. B. Money, Mayor; David Stielman, Cy. Clk.

BALTIMORE, MD.—A special meeting of the water board was called for Oct. 27, at which time work estimated to cost $2,000,000 was expected to be ordered. In 1894 a loan of $2,000,000 was authorized for extending the mains in the suburbs, especially in Hamden, Woodberry, Walbrook and West Arlington, and for making other improvements. S. M. Gray, Engr., Providence, R. I.

RICHMOND, VA.—Chas. E. Bolling, Supt., has submitted a report recommending that a new pump be purchased and steps taken at once to increase the water supply; estimated cost, $200,000.

COLUMBIA, S. C.—The penitentiary authorities are said to be considering plans for an independent water supply.

JACKSONVILLE, FLA.—A new stand-pipe will probably be erected. B. F. Dillon, Chn. Trustees; R. N. Ellis, Engr.

ST. AUGUSTINE, FLA.—Bids are asked until Nov. 17 for the purchase of $85,000 in 5% 30-year bonds, of which $65,000 are for new water-works. A. L. Rogers, Secy.; J. N. Hazlehurst, Engr.

OXFORD, MISS. — Bids are asked for constructing works, including 289 tons 4 and 6-in. cast-iron pipe, 47 hydrants, 65,000-gallon steel tank, etc. W. D. Porter, Secy.

STARKVILLE, MISS.—An election will soon be held to vote on the construction of works, according to reports; supply from artesian wells.

LEAVENWORTH, IND.—It is reported that a private company has been organized to construct works.

TRAVERSE CITY, MICH.—The council is considering a resolution calling for an election Nov. 17 to vote on an issue of $100,000 in bonds for water-works.

ORANGEVILLE, ILL.—Bids were asked until Oct. 27 for sinking a well and for furnishing a pump and gasoline engine, according to reports. S. S. Hutchins, Pres. Trustees.

BODE, IA.—About 1,000 ft. of extensions will be made next year. G. T. Peterson, Mayor.

BALDWIN, WIS.—The contract for a water tank and tower, as noted in Engineering News of Oct. 15, has been awarded to the Challenge Wind Mill & Feed Mill Co., Batavia, Ill., at $1,320. Chas. Settergren, Clk.

VIROQUA, WIS.—Wm. Lake & Son are said to have the contract for a 16 × 110-ft. stand-pipe.

BENSON, MINN.—The council is reported as investigating the question of better water supply.

BRAINERD, MINN.—There is talk of improvements to cost $10,000, including filters, raising boilers, extending intake, etc.

DULUTH, MINN.—The following bids were received Oct. 23 for laying intake pipe for new water-works; all local bidders: Tullock Bros. & McFee, $22,150; A. Fredin, $29,890; E. Engle, $43,250; A. & D. Sang, $56,500. W. B. Patton, Cy. Engr.

ELBA, MINN. — Works will not be constructed until spring. J. R. Steffen, Cy. Recdr.

OWATONNA, MINN.—The contract for a filter gallery has been awarded to P. H. Thornton, St. Paul, at $779.

HASTINGS, NEB.—We are informed that an election will soon be held to vote on an issue of $8,000 in bonds for new engine and new process for raising water. L. A. Kinney, Supt.

HOT SPRINGS, S. DAK.—The pumping capacity of the works is to be increased. Frank Allen, Supt.

KANSAS CITY, MO.—The contract for a 10,000,000-gallon pumping engine, as advertised in Engineering News, has been awarded to the Barr Pumping Engine Co., at $34,800. The bids were published last week (p. 142). R. M. Godfrey, Secy. Bd. Pub. Wks.

ST. LOUIS, MO.—A bill has been introduced in the council authorizing the erection of a plant to filter 100,000,000 gallons of water a day, at a cost of $2,000,000. M. L. Holman, Water Comr.

ARANSAS PASS, TEX.—The Aransas Pass Water Co. was incorporated Oct. 20 with a capital stock of $3,000, to supply water on Mustang, St. Joseph and Harbor islands and the adjoining mainland; incorporators, W. H. Stedman, Geo. W. Stedman and E. Stedman.

TRINIDAD, COLO.—An election will soon be held to vote on the purchase of the works.

SOUTH BEND, WASH.—The United States court of appeals is reported to have declared void the contract between this city and the South Bend Water Co.

TILLAMOOK, ORE.—H. Orchard, of Kalama, Wash., submitted a proposition to this city recently for the construction of gravity works; franchise will probably be granted.

HEALDSBURG, CAL.—It is expected that steps will soon be taken to secure municipal works; present plant is owned by Frank Koenig.

LAKEPORT, CAL.—The trustees have engaged A. L. Adams, of San Francisco, to report upon the different plans for works.

LOS ANGELES, CAL.—The directors of the Lake Vineyard Land & Water Co. are reported to have authorized the construction of additional tunneling.

WINDSOR, ONT.—The work of constructing a filter plant is to be commenced as soon as the citizens have voted to issue the $40,000 in bonds, according to reports.

GATINEAU, QUE.—The Gatineau Point council is reported as arranging for the purchase of steam pumps for fire protection.

IRRIGATION.

OGALALLA, NEB.—Press reports state that W. O. Rogers, of Omaha, Neb., has purchased a large tract of land in the North Platte valley under the Alfalfa ditch. Fifty teams are at work on the ditch and expect to complete the canal by Jan. 1. The Alfalfa ditch managers are considering a proposition to extend the canal seven miles further east along the North Platte valley to a point six miles northeast of Ogalalla, which will put 7,000 acres more under the ditch.

SANTA ANA, CAL.—It is reported that H. F. Gardner, Supt. Santa Ana Valley Ditch Co., submitted to the directors at their annual meeting, Oct. 10, a report of the work during the past year, showing that 101 cement gates had been put in, including 11 in main canal, 22 bridges, 1 on main canal; 7 drops, 2 large arched culverts for conveying storm water from arroyos underneath the canals, 1,398 ft. of cement pipe, 7,727 ft. of cement ditch ranging in size from 2½ to 60 heads. The total length of ditches cemented by the various works is about 2⅓ miles.

SEWERAGE.

NEWPORT, N. H.—It is reported that work will soon be begun on the proposed sewer system for this place. Edward W. Gustine, Constructing Engr., Keene, N. H.

BOSTON, MASS.—The aldermen have passed resolutions appropriating $75,000 for improving two sewage pumping stations, and constructing sewers in four streets. Wm. Jackson, Cy. Engr.

NEWTON, MASS.—The aldermen have been petitioned by the residents of Lower Falls to extend the sewer system to that part of the city. H. D. Woods, Cy. Engr.

BROOKLYN, N. Y.—Bids are asked until Nov. 5 for constructing sewers in four streets. T. B. Willis, Comr.

BUFFALO, N. Y.—Bids are asked until Nov. 5 for constructing a 12-in iron and 15 to 10-in. tile pipe sewers in two streets. R. G. Parsons, Secy. Dept. Pub. Wks.——Joseph Harrer has been awarded the contract for constructing a sewer in Meridan St. and Bailey Ave., at $36,800.

JAMAICA, N. Y.—Dr. P. M. Wood writes us as follows: The state board of health met Oct. 16 in New York city and reported adversely to the plan proposed (filtration bed system in Greater New York) by the sewer commissioners of Jamaica. John J. McLaughlin, Village Engr., has been requested by the commissioners to prepare plans for a chemical system and report at the next regular meeting of the board, Nov. 3. The commission is composed of the following gentlemen: Dr. Philip M. Wood, Chn.; Aaron A. Degraw, John Adikes, Wm. C. Bahr and J. Tyler Watts.

NEW YORK, N. Y.—Bids are asked until Nov. 2 for constructing and extending sewers in six streets. C. H. T. Collis, Comr. Pub. Wks., 150 Nassau St., and until Nov. 5 for constructing a sewer in Marion Ave., from 101st to 200th St., and also a sewer in Fox St. Louis F. Haffen, Comr. St. Improvements, 2622 Third Ave.

NIAGARA FALLS, N. Y.—It is reported that the city engineer has been directed to advertise for bids for constructing a sewer in 11th St. W. W. Read, Cy. Engr.

SYRACUSE, N. Y.—We are informed as follows, regarding the proposed intercepting sewers to empty into Onondaga Creek: The plan is being discussed in the chamber of commerce, but will end in discussion probably. Wm. A. Sweet, Engr., is in favor of deepening the creek and storing it with blocks and in concrete made smooth and argues that an open sewer is the safest, least costly and the best for sanitary reasons. It is thought that there will be no sewer construction very soon. The city is bonded to the limit of its valuation and is not raising any money on its bonds, as it has $225,000 on the market now and no bidders. R. R. Stuart, Cy. Engr.

CAPE MAY, N. J.—The council of this city is reported to have visited Philadelphia last week to inspect the sewer system of that city.

PASSAIC, N. J.—The council is considering ordinances for constructing sewers in two streets. R.B.Tindall,Cy. Clk.

SHERIDAN, PA.—G. L. Peck, Asst. Supt. Pennsylvania Co., Pittsburg, and the council are considering the question of constructing a sewer to connect with the main sewer at Cork Run; estimated cost, $2,800,. half of which the railway company is willing to pay.

ALEXANDRIA, VA.—The question of constructing sewers is again being discussed. The last legislature authorized an issue of $200,000 bonds for improvements, but so far the council has taken no action. E. C. Dunn, Cy.

GLENVILLE, O.—Bids are asked until Oct. 31 for the purchase of $4,700 in 6% sewer bonds. F. W. Morris, Village Clk.

CLEVELAND, O.—The council has passed a resolution authorizing the construction of a sewer in Duane St. Frank A. Emerson, Pres. Council.

AUBURNDALE, O.—The state board of health has approved the plans for the proposed sewer system for this place. Councilman Rakestraw, Chn. Com.; Engr., W. G. Clark, of Toledo, O.

CHICAGO, ILL.—Bids are asked until Nov. 4 for constructing sewers in three streets. Joseph Downey, Comr. Pub. Wks.——A special assessment for $1,200,000 for constructing a sewer system in the southern section of the city has been rendered invalid on a technicality.

DECATUR, ILL.—The council has appointed a committee to employ an engineer to prepare plans and specifications for a sewer in Oakland Ave.

MILWAUKEE, WIS.—John O. Jones, of Racine, Wis., was the lowest bidder Oct. 14 for constructing the first 1,800 ft. of the main tunnel sewer in Cambridge Ave., at $4.22 a foot.

RIPON, WIS.—Press reports state as follows: The city will likely be served with an injunction, prohibiting the use of its sewerage system, unless immediate steps are taken looking toward improvement below the Ceresco dam. For several years past refuse matter has been left along the creek bed, the water supply being insufficient to carry it away. During the past summer it has been especially odorous and disease in families living in the vicinity is attributable to this cause, physicians say. Ceresco citizens have made the complaint and the council will, it is thought, take quick action with regard to the matter.

WAXAHACHIE, TEX.—The city will, within a few days, begin the construction of a sewerage system, by laying about 1¼ miles of 10-in. and 8-in. pipe on the outlet end. Only the court house and jail will be connected at present. On the present work the city furnishes the materials and superintendence, while the county performs all the labor with convicts. Evens & Howard, of St. Louis, were awarded the contract for furnishing the pipe. W. A. Spaulding, C. E., will have charge of the work for the city; James S. Davis, Chn. Sewer Com.

SAN FRANCISCO, CAL.—Plans have been adopted for a sewer system in the district commencing at 23d St., thence along Indiana St. to 19th; 19th St. to Minnesota, Minnesota to 20th, 20th to Michigan, Michigan to 22d, 22d to Georgia, Georgia to 23d, and 23d to Indiana. A resolution of intention has been passed providing that 20th Ave., between California and Lake Sts., be sewered with an 8-in. iron stone pipe sewer. Thos. Ashworth, Supt. Sts.

SANTA MONICA, CAL.—A sewer district is to be formed, and a main trunk sewer constructed.

WINDSOR, ONT.—The following bids were received recently for constructing the central sewer system: Clark & Connolly, Toronto, Ont., $8,713; William Lyons (awarded contract), $7,672; Joseph Ferry, $7,607; Sewell & Smith, $9,138; Chick & Co., $9,161; Cole & Shaw, $7,797. Wm. Newman, Cy. Engr.

GARBAGE DISPOSAL—STREET CLEANING.

SYRACUSE, N. Y.—The joint health board and council committee, appointed to select a site and system for garbage disposal has visited Bridgeport, Conn., Philadelphia and other cities, and is reported as in favor of a garbage reduction plant, estimated to cost $70,000.

HARRISBURG, PA.—Local papers advise the council to investigate the cost of a garbage crematory before adopting plans for garbage disposal.

NEW BRIGHTON, PA.—Councilmen P. D. Hall and L. D. Boggs are members of a committee that has been investigating the garbage disposal plants in other cities. Thos. Dixon, Comr. Pub. Wks.

JACKSONVILLE, FLA.—The next budget of the board of public works is expected to contain an appropriation for a new garbage crematory; estimated cost, $14,000 to $18,000. A. F. Harley, Cy. Engr.

LOUISVILLE, KY.—The question of a garbage crematory or reduction plant is likely to be agitated in the near future. J. H. Pearson, Cy. Engr.

SAN FRANCISCO, CAL.—The organization of the Sanitary Reduction Co. to construct plants to dispose of the garbage of this city was noted in our issue of Oct. 1. Ex-Mayor L. R. Ellert, Pres., is said to be in the east selecting machinery for the plant .

STREETS AND ROADS.

BOSTON, MASS.—The street commissioners of Charlestown are considering the question of improving Beacham St. at a cost of $10,000. Councilman Connorton can be addressed.——The council has approved an order recommended by the finance committee appropriating $536,000 for streets, sewers and park improvements.

CAMBRIDGE, MASS.—The council proposes to appropriate about $20,000 for widening and extending two streets.

WORCESTER, MASS.—The road improvement association of Worcester held a meeting Oct. 17 at which the question of building better roads in that vicinity was considered. Chas. G. Washburn, Lincoln Holland, Albert H. Inman and Elwood Goodell are among those interested.

PASCOAG, R. I.—It is reported that this place has voted to issue $50,000 in bonds for improving and rebuilding about nine miles of roads and also for the purchase of a stone crusher, etc.

WILTON, CONN.—At a town meeting Oct. 5 the town appropriated about $5,000 for road improvements. John Knapp, Supt. of Roads.

BROOKLYN, N. Y.—Bids are asked until Nov. 2 for the construction of a roadway of macadam and brick on the Eastern Parkway extension from Rockaway Ave. to Bushwick Ave., at Vandeveer St. Bids will also be received for the removal of the granite block pavement, which is to remain the property of the department of parks, and the substitution therefor of a brick pavement on concrete foundation, on Bushwick Ave., from Vanderveer St. to Rose Place, the beginning of the brick pavement already laid on Bushwick Ave. Bids must be in two distinct offers. Timothy L. Woodruff, Comr. of Parks, Prospect Park, Brooklyn; J. E. Smith, Secy. ——Local papers state that the shore road commission will soon receive bids for the construction of a portion of the driveway. The commission will have at its disposal $250,000 to begin the work. Olmstead, Olmstead & Elliott, Boston, Mass., are the landscape architects; William Jackson, of Boston, Consult. Engr ; Edwin C. Swezey, 3d Ave. and 39th St., Brooklyn, Engr. in Charge; Pres. E. R. Kennedy.——The road committee of the good roads association, which has its headquarters at 1187 Bedford Ave., is considering the question of constructing a road from Bath Beach to connect with East New York. Frank Share and H. B. Fullerton, of the association, can be addressed.

BUFFALO, N. Y.—Bids are asked until Nov. 5 for asphalt paving in Prospect Ave. from Porter Ave. to Massachusetts St. R. G. Parsons, Secy. Dept. Pub. Wks.

NEW YORK, N. Y.—Bids are asked until Nov. 2 for asphalt block paving in three streets; asphalt paving in five and granite block paving in two other streets. C. H. T. Collis, Comr. Pub. Wks; and until Nov. 5 for grading and paving in five streets. Louis F. Haffen, Comr., 2622 Third Ave.

NORTH HEMPSTEAD, N. Y.—The town board and the commissioners of highways of this place have decided to issue $56,000 in 4% bonds for building macadam roads.

DOVER, N. J.—The board of freeholders has been petitioned to construct macadam road from Mount Arlington Boulevard to Kenvil and one from Succasunna to the county road at Ledgewood. W. E. King, County Engr., Landing, N. J.

JERSEY CITY, N. J.—It is reported that the board of freeholders of Greenville recently voted to appropriate $155,000 for asphalt paving in three streets.

NEWARK, N. J.—The Essex county park commission, 800 Broad St., Newark, has awarded the contract for the landscape alterations to the Branch Brook Park to James Serne, of Newark, at $29,156.

EASTON, PA.—The highway department has decided to macadamize and otherwise improve four streets. H. R. Fehr, Cy. Engr.

PHILADELPHIA, PA.—The highway committee has reported favorably on an ordinance for widening a portion of Letitia St., at a cost of $31,000, which does not include the land damages.

WASHINGTON, D. C.—The residents of Columbia Heights have petitioned the district commissioners to pave and grade a number of streets in that part of the city. N. A. Ballinger, Geo. V. Simons and Charles S. Bundy, of the citizens' association of Columbia Heights, are interested.

BALTIMORE, MD.—Ordinances have been approved to grade, pave and curb 15 blocks in four streets. Janon Fisher, Cy. Comr.

NEWPORT NEWS, VA.—The question of improving certain streets at a cost of about $35,000 is being considered. Geo. Y. Alsop, Cy. Engr.

COVINGTON, KY.—It is reported that at the election on Nov. 3 the proposition to issue $75,000 in bonds for brick pavements will be voted upon.

NASHVILLE, TENN.—Bids are asked until Nov. 10 for furnishing paving brick, as stated in our advertising columns. J. A. Jowett, Cy. Engr.

CLEVELAND, O.—The council has adopted resolutions for brick paving, grading and otherwise improving six streets. Howard H. Burgess, Cy. Clk.

TOLEDO, O.—Bids are asked until Nov. 2 for grading the Wallbridge Ave. approach to the Fasset St. bridge. L. P. Harris, Cy. Clk.

WARREN, O.—The council has plans for macadamizing a number of streets next year. Street Comr. McCracken can be addressed.

SAGINAW, MICH.—We are informed that about 80,000 sq. yds. of paving has been practically decided upon. Additional paving is also proposed, but the material has not yet been decided upon. H. E. Terry, Cy. Engr.

CHICAGO, ILL.—The South Park board is considering an ordinance for constructing a boulevard from Michigan Ave. to the river. James W. Ellsworth, Pres., 1820 Michigan Ave.

KANSAS CITY, MO.—Bids are asked until Nov. 2 for paving with asphalt 19th St., from Main St. to Tracy Ave., and also for improving Lydia St. H. A. Wise, Cy. Engr.

DENVER, COLO.—The board of public works has adopted specifications for grading and curbing portions of about 40 streets; estimated cost $159,702. E. Monash, Pres. Bd. Pub. Wks.

CRIPPLE CREEK, COLO.—The Manitou, Crystal Park & Cripple Creek Carriage & Toll Road Co. has been incorporated with a capital stock of $100,000. It is proposed to construct and operate a carriage, wagon and toll road over a route, which after leaving the town limits of Manitou will follow as near as may be the line of survey heretofore made for the Pike's Peak Ry. Co. in 1883, thence through Crystal Park to Cripple Creek. Walter D. Sarvin, Austin Hutchinson, W. E. Smiley, J. A. Fitting, A. B. Hutchinson and J. W. Kriger are the incorporators.

DOWNIEVILLE, CAL.—At the election Nov. 3 the question of issuing $20,000 in bonds for constructing a wagon road in Sierra county will be voted upon. A. J. Heroux, Clk.

SONORA, CAL.—The board of supervisors has been petitioned to issue $100,000 in bonds for building a road from Sonora to Knight's Ferry. D. M. Ortega, Clk.

MANUFACTURING PLANTS.

WATERBURY, CONN.—A factory occupied by the Waterbury Wrench Co. and William F. Norman & Co., manufacturers of shears, was burned on Oct. 19. The main building was a 2-story wooden structure, 150 × 40 ft., and together with certain water privileges and lands was lately bought for $22,000 by several Waterbury capitalists, organized as the Mattatuck Mfg. Co. The company will probably rebuild on an enlarged scale.

BROOKLYN, N. Y.—It is stated that the Newhall Engineering Co., of Philadelphia, has been engaged by Arbuckle Bros. to prepare the plans and superintend the construction of the sugar refinery which the firm proposes to erect in Brooklyn to refine sugar in connection with its coffee business. The refinery will have a capacity to turn out from 2,000 to 2,500 barrels of sugar per day.

NIAGARA FALLS, N. Y.—Francis Frost & Co., paint manufacturers, of Toronto, Ont., will build a branch factory on Bath Ave., this city. Electric power will be used.

BEAVER FALLS, PA.—Mayer Bros.' pottery was burned on Oct. 21, entailing a loss estimated at $100,000.

ALLEGHENY, PA.—The McKinney Mfg. Co., Market St., is reported to have begun the erection of a large iron building, adjoining its present works.

PHILADELPHIA, PA.—It is stated that plans have been submitted for a 1-story brick addition to the plant of the Glen Willow Ice Mfg. Co., just above Manayunk. It will be 116 × 40 ft. The company will also need two new boilers in its present boiler house.

WAYNESBORO, PA.—The Geiser Mfg. Co. is erecting large pattern works.

CUMBERLAND, MD.—A newspaper report states that the Baltimore & Ohio R. R. Co.'s rolling mill, at Cumberland, which has been idle for some years, will be utilized. The mill will be used as a repair shop in connection with the new machine shops, and will employ 500 men. It is said to be the intention of the company to make all of its own engines.

KEYSER, W. VA.—It is reported that the new Baltimore & Ohio car shops soon to be erected at Keyser will be built entirely of iron, 500 × 85 ft., constituting a wing to the square shops already at that place, and will employ some 200 to 300 hands, most of whom will be skilled mechanics. The town paid the company $10,000 to secure the shops. It looks as if the company has abandoned the shops at Connellsville, Pa.

BIG STONE GAP, VA.—On Oct. 19 the car shed and shops of the Howells Valley Ry. burned, together with an engine and two cars. Loss estimated at $10,000. No insurance.

BRISTOL, VA.—A press report from this place states that J. M. Crowell has closed a deal for paper mill machinery amounting to $30,000, and will organize a stock company for the purpose of manufacturing paper in Bristol.

MANCHESTER, VA.—The Richmond Cotton Mills Co. has been incorporated with a capital stock of $200,000, for the establishment of cotton mills at this place; incorporators: John A. Smith, of Bessemer City, N. C.; Alfred G. Bishop, Jr., of Richmond; Alfred G. Bishop, Sr., of New York, and Henry A. Haines, of Elizabeth, N. J.

CLIFTON, S. C.—The Clifton Cotton Mill Co. will soon begin operating a new plant. The building is 320 × 103 ft., four stories high, with a picker building 100 × 100 ft. The dam and foundation of the building cost $50,000. The power generated by water is 2,000 HP. on two pairs of 42-in. McCormick wheels, built by S. Morgan Smith, York, Pa., supplemented by an 800-HP. steam engine, manufactured by the C. G. Cooper Co., of Ohio. The power is designed for 50,000 spindles, but the present building will only accommodate 35,000, one end being left for an extension for 15,000 more spindles in the future. A weave-room containing 1,100 looms has also been completed in connection with the plant. For the benefit of the operatives, a hotel, store and a number of dwellings have been built. Pres., D. E. Converse, of Spartanburg, S. C.

WALTERBORO, S. C.—The new cotton mill on which work has been in progress for nearly a year will be completed in a few weeks, and it is expected that it will be in full operation before Jan. 1.

CHATTANOOGA, TENN.—It is stated that the plant of the Chattanooga Pulley Co., which was recently destroyed by fire, will probably be rebuilt soon, but the exact date has not yet been determined. The officers of the company contemplate the erection of a 1-story brick building with annexes, to cost about $8,000, while new machinery costing $15,000 or more will be purchased.

AKRON, O.—The stoneware works of Whitmore, Robinson & Co., were destroyed by fire on Oct. 20. Loss, about $200,000; insurance, $100,000. It is stated that the plant will be rebuilt.

INDIANAPOLIS, IND.—The Munger bicycle plant has been sold to Frank Fowler, of Chicago, formerly connected with the Fowler Bicycle Co. He expects to enlarge the plant to about four or five times its present capacity and employ from 250 to 500 people.

BAY CITY, MICH.—The Dry Dock Iron Works was destroyed by fire on Oct. 17. It was insured for $16,000.

DETROIT, MICH.—It is reported that the United Alkali Co., of Great Britain, with a capital stock of $40,000,000, has purchased for $170,000 100 acres of land in the western suburbs of Detroit and will erect a soda ash and salt works to employ 1,000 men. C. A. Rathbone, 604 Union Trust Bldg., negotiated the sale.

BARRON, WIS.—The Barron stave and heading plant burned on Oct. 24. Loss estimated at $10,000; insurance, $4,000.

GREAT FALLS, MONT.—Volk Bros.' brewery burned on Oct. 22. Loss, about $30,000; insurance, $17,500.

PETERBORO, ONT.—The Dixon Co.'s saw mill and lumber yards, Donnell's planing mill and Green's pump factory, were destroyed by fire on Oct. 26. Loss estimated at $40,000; fully insured.

GAS PLANTS

LYNN, MASS.—The Lynn Gas & Electric Co. has contracted with Bartlett, Hayward & Co., of Baltimore, Md., for the erection of a holder of 1,000,000 cu. ft. capacity, to be erected the coming summer.

BROOKLYN, N. Y.—The Coney Island Gas & Fuel Co., which was granted a franchise by the town board of Gravesend nearly three years ago, has commenced laying mains in the principal streets at Sheepshead Bay (now Ward 31). Efforts are being made to have street lamps put in. Jas. A. Eustis, Supt.

NEW YORK, N. Y.—Justice MacLean, in the Supreme Court, Oct. 27, issued an injunction to restrain the board of aldermen from awarding a franchise to the Consumers' Gas, Heat & Power Co. for laying pipes in the streets to supply fuel gas through the city. A franchise has also been asked by the Metropolitan Fuel Gas Co. which offers to furnish fuel gas to the public at 50 cts. per 1,000 cu. ft., and to manufacturers and the city at 25 cts., paying the city 25 cts. per lin. ft. of pipe laid. The company also offers the city $100,000 for the franchise and will put up a bond of $500,000 for the faithful performance of the work. The Metropolitan company's officers are: Pres., H. M. Thompson; Vice-Pres., C. D. Hauke; Secy. and Treas., H. Dailey, Jr.; Consult. Engr., James L. Hastings.

RICHMOND HILL, N. Y.—The Brooklyn & Queens County Gas Co., which recently petitioned for an extension of 60 days' time in which to lay its mains in this place, commenced work last week.

JERSEY CITY, N. J.—Bids are asked until Nov. 2 for street lighting, as noted more fully under Electric Light and Power. Geo. T. Bouton, Clk. Bd.

PHILADELPHIA, PA.—Bids are asked until Nov. 4 for two Brander patent charging machines, with all necessary appurtenances, and also for two turntables and foundations complete, at Point Breeze works; also for repairs to wharves at 25th Ward works. Thos. M. Thompson, Dir. Pub. Wks.——George W. Stewart is erecting a retort house for the bureau of gas at Tioga St. and Delaware Ave. It is to be one story high, 318 ft. square and will cost $16,000.

DELAWARE CITY, DEL.—It is stated that the syndicate that has applied for a water-works franchise has also asked for a franchise for a gas plant. J. Taylor Leland, of Philadelphia, is interested.

WILMINGTON, DEL.—A petition, said to contain 4,000 names, has been presented to the street and sewer department asking that the Oxy-Hydrogen Co., of which J. Edward Addicks is controlling stockholder, be permitted to lay mains and complete its plant.

BROWNSVILLE, TENN.—A franchise has been granted to G. W. Benedict, of Cincinnati, for a water-gas plant, to be erected at once. A. D. Bright, Jr., of Brownsville, is said to be interested.

CANTON, O.—The Stark Oil & Gas Co. was incorporated in West Virginia Oct. 19, with a capital stock of $50,000, commencing with $600, to drill oil and gas wells, etc.; incorporators, M. S. Hasler, Samuel Lowenstein, Jacob L. Simon and others, of Canton.

TOPEKA, KAN.—The Topeka Gas Co. has been petitioned to extend its pipes through Potwin, and, it is said, will probably make the extensions.

MISCELLANEOUS CONTRACTS.

FIRE ENGINE.—Lebanon, Pa.—The Rescue Fire Co. will purchase a new fire engine.

STREET SIGNS.—Indianapolis, Ind.—Bids are asked by the board of public works until Nov. 2 for street signs.

DREDGING.—Wilmington, Del.—Bids are asked until Nov. 5 for dredging in Murderkill River, Del. Maj. W. F. Smith, U. S. A.

BONDS.—Brooklyn, N. Y.—Bids are asked until Nov. 5 for the purchase of $2,111,240 in 3½% gold bonds. Geo. W. Palmer, Comptroller.

MAUSOLEUM.—Newark, N. J.—It is stated that Judge Kreuger has awarded the contract for a family mausoleum to cost $100,000 in Fairmount Cemetery.

EXTENDING WHARF.—Baltimore, Md.—Bids are asked until Oct. 29 for extending the wharf at Quarantine station. N. H. Hutton, Engr., Harbor Board.

WHARF.—Newport, R. I.—Kaull & Anthony have commenced preliminary work for their wharf 130 ft. long and 75 ft. wide, just south of Crowley's shipyard.

STONE, ETC.—Memphis, Tenn.—Bids are asked until Nov. 2 for furnishing brush, poles, rip-rap stone, etc. Capt. G. D. Fitch, U. S. Engr., 99 Madison St, Memphis.

BONDS,—Arverne-by-the-Sea, N. Y.—Bids are asked until Nov. 7 for the purchase of $8,000 in 5% village bonds. John R. Waters, Pres. Bd., 54 Franklin St., New York city.

RACE TRACK.—Fort Erie, Ont.—The Fort Erie Jockey Club will build a race track and various buildings, to cost $200,000. R. A. Waite, of Buffalo, N. Y., prepared the plans.

TELEPHONE SYSTEM.—Wilkes Barre, Pa.—The council has granted the People's Telephone Co. permission to construct and operate lines in this city. T. H. Atherton is interested.

STONE CRUSHER.—Ludington, Mich.—The county commissioners are reported to have decided to buy a stone crusher and to macadamize some of the sandy roads leading to this city.

SPRINKLING CART.—Eureka, Cal.—Supervisor Clark has been authorized to prepare specifications and advertise for bids for the purchase of a sprinkling cart for use on the Arcata Road.

TELEPHONE.—Grafton, N. Dak.—It is reported that the system of the Northwestern Telephone Co. will be extended to this place soon. H. G. Webster, Local Mgr., for Grand Forks, N. Dak.

GUN EMPLACEMENTS.—Savannah, Ga.—Bids are asked until Nov. 16 for building gun emplacements on Tybee Island, Ga., as stated in our advertising columns. Capt. O. M. Carter, U .S. Engrs.

GUN EMPLACEMENTS.—New London, Conn.—Bids are asked until Nov. 28 for building gun emplacements on Great Gull Island, N. Y., as stated in our advertising columns. Capt. Smith S. Leach, U. S. Engrs.

REMOVAL OF PIERS.—New York, N. Y.—Bids are asked until Nov. 2 for the removal of the piers at the foot of Jane and Horatio Sts., North River; 15,561 sq. ft. of area. Geo. S. Terry, Secy., Dept. of Docks.

DREDGING.—New York, N. Y.—Bids are asked until Nov. 10 for 85,000 cu. yds. of mud and sand dredging in Sherman's Creek, Harlem River. Geo. S. Terry, Secy. Dept. of Docks, Pier A, Battery Place, North River.

GUN EMPLACEMENTS.—Wilmington, N. C.—Bids are asked until Nov. 21, for building gun emplacements near mouth of Cape Fear River, N. C., as stated in our advertising columns. Lt. Col. D. P. Heap, U. S. Engrs.

CONCRETE BATTERY.—New York, N. Y.—Bids are asked until Nov. 28 for constructing a concrete battery at Fort Hancock, Sandy Hook, N. J., as stated in our advertising columns. Col. G. L. Gillespie, U. S. Engrs.

WHARF.—St. Louis, Mo.—James Short has been awarded the contract for constructing a wharf at the foot of Krauss St. in Carondelet at $7,297. The work house is to furnish the dike rock, macadam and rip-rap to be used.

DAMS.—San Francisco, Cal.—The state debris commission has authorized the following mines to construct dams: Gold Run mine, Placer county; Cascajo mine, Calaveras county; Larsen mine, El Dorado county; King Sayer mine, Plumas county.

STONE CRUSHERS, ROAD MACHINES, ETC.—Pascoag, R. I.—It is reported that the taxpayers at a meeting on Oct. 19 voted an appropriation for the purchase of a stone crusher, road machine, engine, etc.; $50,000 was appropriated for building roads.

NAVAL SUPPLIES.—Washington, D. C.—Bids are asked until Nov. 4 for supplies for the navy yards at Norfolk, Va., and Brooklyn, N. Y., and until Nov. 17 for supplies for the navy yard at Mare Island, Cal. Edwin Stewart, Paymaster-Gen., U. S. Navy, Washington.

TUNNEL AND MASONRY DRAIN.—New York, N. Y.—Bids are asked until Nov. 4 for excavating a tunnel and constructing a masonry drain at Jerome Park reservoir, near Sedgwick Ave. James C. Duane, Pres.; Edward L. Allen, Secy. Aqueduct Comn., 280 Broadway.

MARINE RAILWAY; ETC.—Bridgeport, Conn.—A. J. Beardsley & Son intend to spend $30,000 enlarging their shipyard; the marine railway will be made 400 ft. long, and will be operated by larger machinery; contract for boilers has been let to the Bridgeport Boiler Works.

DITCH.—Los Angeles, Cal.—The contract for the Rubio Canon ditch which will carry off the storm water from Rubio Canon and protect a territory of 4,200 acres to the northeast, was let Oct. 14 to Jas. H. Dovey, of Pasadena, Cal., at $6,500. The stone ditch will be 6,000 ft. long.

COLD STORAGE.—Brooklyn, N. Y.—The Metropolitan Cold Storage & Heating Co. has applied for a franchise to lay pipes, tubes, etc., for heating and refrigerating purposes. It is proposed to build a plant near Wallabout Market to cost $100,000. J. Herbert Watson is the attorney.

PARK IMPROVEMENTS.—Buffalo, N. Y.—Plans have been approved by the park commissioners for dredging the North Park lake and placing a dam and lock at end of same; also for excavating for small lakes at Humboldt Park. The last named work is provided for by a $10,000 appropriation.

PIER WORK.—Brooklyn, N. Y.—Bids are asked until Nov. 4 for removing old pier and bulkhead and preparing for and building a new wooden pier and approach, with appurtenances, including a sewer box through same, at the foot of Metropolitan Ave.; surety required, $30,000. T. B. Willis, Comr. Cy. Wks.

PIER.—Jersey City, N. J.—The Erie R. R. has filed plans for the rebuilding of Pier No. 5, just north of the station at the foot of Pavonia Ave., which was recently burned. The plans provide for the extension of the dock to the building line. It will be 900 ft. long, 70 ft. wide, and 20 ft. high; estimated cost, $40,000.

DRAINAGE WORK.—New Orleans, La.—The executive committee of the drainage board has decided to propose a plan for the removal of the drainage of the Melpomene Canal to the upper line canal, to cost $15,000. This is the beginning of the construction of an extensive drainage system for the entire city. B. M. Harrod, Ch. Engr.

CONDUITS.—Baltimore, Md.—At the election Nov. 3 the question of funding the floating debt amounting to $1,600,000 and also of issuing $1,000,000 of city bonds with which to construct conduits for electric light and other wires in the streets and alleys will be voted upon. Alcaeus Hooper, Mayor; Wm. F. Stone, Cy. Register.

PIPE LINE.—Trenton, N. J.—Vice-Chancellor Emery rendered a decision Oct. 22 in favor of the United States Pipe Line Co., in the proceedings for an injunction brought by the Delaware, Lackawanna & Western R. R. Co., to restrain the other company from laying its oil pipes under the tracks in Warren county. The Pipe Line Co. will go on now with the construction of its line to the seaboard.

GRADE CROSSING.—Boston, Mass.—A grade crossing commission is considering plans for abolishing the grade crossings of the New York, New Haven & Hartford and the New England railways in Dedham, Hyde Park and West Roxbury. Plans were submitted by Collin M. Ingersoll, Jr., of the New Haven railway. A hearing will be given Nov. 7. S. N. Aldrich, Chn. Com., 20 Beacon St.; E. B. Bishop and Henry C. Southwick, Comrs.

PARK.—Brooklyn, N. Y.—Olmstead, Olmstead & Eliot have completed plans for the new Dyker Beach park, on Gravesend Bay, between Bath Beach and Fort Hamilton, and workmen are now grading a roadway along the banks of the proposed lagoon. J. & F. Kelly have the contract for a 600-ft. wooden bridge across the meadows, to be completed before Jan. 1. The basin is to be dredged and other improvements made as rapidly as possible.

MAIL TUBE.—Brooklyn, N. Y.—At a meeting of the New York & Brooklyn Bridge trustees, Oct. 26, the New York Mail & Newspaper Transportation Co. was granted permission to construct two 8-in. pneumatic tubes on the bridge for conveying mail between the post offices of the two cities; tubes are estimated to cost $140,000; company will receive $14,000 a year from the government and will pay $1,000 a year to the bridge trustees. Maj. P. H. McNulty is interested.

FERRY APPROACH.—Galveston, Tex.—The commissioners' court received plans from the following Oct. 14 for a ferry approach at Bolivar: W. H. Tyndall, 2107 Market St., Galveston; estimated cost, with Heffron's covered piling, $37,500, with creosoted piling, $46,000; T. P. Nichols, estimated cost, with creosoted piling (not less than 20 lbs. per cu. ft.), $55,000; A. J. Johnson, $53,576, creosoted, not less than 20 lbs., etc.; H. T. Wilson, $24,957, with uncreosoted piling, $39,187, with creosoted piling, $31,197, with Poynor, Bryant, Bryant & Co.'s patent covered piling. The foregoing are all based upon a structure 35 ft. wide. H. C. Ripley submitted plans for a structure 20 ft. wide, planked all over so that wagons may pass by turning out on to the railway track.

PARK WORK.—New York, N. Y.—Bids are asked until Nov. 9 for constructing parapet-wall on Riverside Drive, from the existing wall near 86th St., to 88th St.; for grading for widening the roadway of 153d St., between 7th Ave. and Macomb's Dam Road; for an approach to the new Macomb's Dam bridge and setting curb-stones and grading and paving with asphalt the sidewalks surrounding the plot of land north of 153d St., between 7th Ave. and Macomb's Dam Road; and for furnishing and delivering garden-mold, where required on Central and Riverside parks. The engineer's estimates of the work to be done are as follows: 75 cu. yds. of concrete foundation; 112 cu. yds. of rubble masonry; 500 lin. ft. of parapet wall; 500 lin. ft. of granite coping; 1,600 cu. yds. earth and rock excavation; 9,000 sq. ft. of asphalt walk; 6,275 cu. yds. of garden mold, etc. S. V. R. Cruger, Pres. Park Comrs.

FILLING, ETC.—Hartford, Conn.—Estimates are wanted for pumping 1,250,000 cu. yds. of sand from the river and depositing same one-eighth to one-quarter of a mile distant; also information as to cost of plant to accomplish the result at the most economical rate, length of time required and if 425,000 cu. yds. can be pumped at the same ratio. This work is projected in connection with the long-discussed plans for protecting the city from the high waters of the Connecticut River. A committee has been appointed to investigate the matter and at a recent public meeting several plans were proposed. Estimates made in 1866 placed the cost of dykes at $300,000, or of raising the more important of the flooded area (45 acres) to a level 1 ft. above the 1854 flood line, requiring 425,000 cu. yds. of filling, at $170,000. The committee considering the different plans includes D. G. Stoughton and Niles B. Preston, Mayor.

TUNNEL.—Brooklyn, N. Y.—Local papers state that plans have been completed by the New York & Brooklyn R. R. Co. for a traffic tunnel under the East River, between Brooklyn and New York, which it is claimed can be completed within a year. The start is to be made as soon as the necessary franchises are secured in Brooklyn. The consent of New York has already been obtained. The Brooklyn terminal station will be located near Willoughby and Adams Sts. The route will be in nearly a straight line from the Brooklyn terminal to the New York terminal at Park Row and Ann St. The tunnel will be wide enough for four tracks. It is estimated that a speed of 25 miles an hour can be maintained, thus rendering it possible to make the trip from terminal to terminal in less than two minutes. The entire distance will be less than 8,100 ft.; estimated cost, $6,000,000. Pres., B. S. Hennessy; Secy. and Treas., Otto Andrea; Silas B. Dutcher, Pres. Hamilton Trust Co., Brooklyn; J. N. Partridge, Pres. Brooklyn City & Newtown Ry., and Emerson McMillan, who superintended the construction of the East River gas tunnel, are interested.

CONTRACT PRICES.

PIPE SEWER.—Brooklyn, N. Y.—The following bids were received by T. B. Willis, Comr. Cy. Wks., Oct. 23, for a pipe sewer in Moffatt St., between Hamburg Ave. and Knickerbocker Ave., and in Hamburg Ave., between Cooper St. and Moffatt St.:

Items.	P. Farrell, $1,907.	J. Jennings, $1,622.	A. J. Puff, $1,587.	J. J. Maloney, $1,396.	John Bray, $1,329.	R. O'Grady, $1,400.	J. J. Creem, $1,278.

Slope paving	3,000 " "	2.40	2.05	4.75	2.85	2.70	3.70
Total		$17,534	$15,446	$23,510	$17,023	$20,779	$20,374

LEVEE WORK.—Greenville, Miss.—A press report states that the board of Mississippi levee commissioners met in special session Oct. 15 and let contracts for levy work aggregating about 500,000 cu. yds., as follows: Greenville levee, section 1, to Johnson & Shippey, for 9.49 cts. a cu. yd.; Greenville levee, section 2, to Tim Sullivan, for 10.4 cts. a cu. yd.; Greenville levee, section 3, to Johnson & Shippey, for 10.88 cts.; Greenville enlargement, to C. A. Winter, for 23⅞ cts.; Ingomar levee, to Kennedy & Tracey, for 8.5 cts.; Seldens to Heaths, to A. & J. Wynne, for 10.5 cts.; Hall's landing levee, to John G. Sessions, for 10.99 cts.; Arcadia, to A. J. Roach, for 11.9 cts.

DRAINAGE DITCHES.—St. Paul, Minn.—The state drainage commission has awarded the contract for the extension of the Spring Creek ditch in Norman county: 16,000 cu. yds., to John Foley, at 9 cts. a cu. yd., to be completed in 30 days; contract for the extension of the Mustinka ditch in Grant county, 20,000 cu. yds., was awarded to W. E. Blaistead, at 8 cts. a cu. yd., to be completed in 30 days. O. H. Hoffman, Engr. Comn., was directed to examine all completed ditches and make necessary repairs.

CAST-IRON PIPE.—Holyoke, Mass.—The water commissioners received bids Oct. 19 for an additional 1,800 tons of 20-in. water pipe, and awarded the contract to the National Pipe & Foundry Works, at $20.35 a gross ton for pipe and 1.9 cts. a lb. for special castings. The bids received Sept 25 for 2,500 tons of 20-in. pipe, as advertised in Engineering News, were published in our issue of Oct. 1.

TELFORD ROAD.—Camden, N. J.—The following bids were received Oct. 13 by the town of Stockton, Camden county, for building a telford road on Cooper St., from Federal St. to Delaware River:

Items.	B. F. Sweeten & Son.	Shanley Bros.	[1]F. A. Ward, agent.
10-in. Telford, sq. yd	$0.67	$0.71	$0.72
Granite blocks, sq. yd	1,20	1.24	1.28
Covered gutter, lin. ft.	2.20	2.24	1.89
Extra earth excavation, cu. yd	0.15	0.15	0.18

[1] Awarded contract; injunction has been asked for by citizens.

RIP-RAP EMBANKMENTS.—Duluth, Minn.—The following bids were opened by Maj. Clinton B. Sears Oct. 20 for rip-rap embankment at Agate Bay, Minn., as advertised in Engineering News:

Bidder.	Embankment, 410 ft., per. ft.
Wm. H. Randall, West Duluth, Minn.	$91.34
Jacob H. Carlson, Duluth, Minn.	71.15
Samuel Menieee, Duluth, Minn.	84.20
Tulloch Bros. & Magee, Duluth, Minn.	85.90
A. & D. Sang, Duluth, Minn.	89.25
Jacob Zimmerman, Duluth, Minn.	75.48
Geo. R. King and Hugh Steele, Duluth, Minn.	71.90
Cooper & Doubleday, St. Paul, Minn.	157.98
Elisha G. Gay, Oneida, N. Y.	205.00
Wm. McCurdy, Houghton, Mich., and Alex. McCurdy, Duluth, Minn.	81.00
Powell & Mitchell, Marquette, Mich.	76.48
Porter Bros., Duluth, Minn. (accepted)	63.17
Walter H. Singer. Duluth, Minn.	85.00

Improvement of Erie Canal, Middle Division—Contract No. 1.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from the east line of Oneida county to a point 100 feet below the lower hollow quoin of Lock No. 46.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $6,800; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of coneract, $47,600; the amount of bond for the faithful performance of contract, on execution of contract, $68,000. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope. "Proposal for the improvement of the Erie canal, from the east line of Oneida county to a point 100 feet below the lower hollow quoin of Lock No. 46." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Erie Canal, Middle Division—Contract No. 2.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from a point 100 feet below the hollow quoin of Lock No. 49 to a point 100 feet below the lower hollow quoin of Lock No. 50.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

DRAINAGE CHANNEL.—Peoria, Ill.—The following bids were received Oct. 20 for the improvement of the old Farm Creek channel, as advertised in Engineering News; 10,000 ft. long, 50 ft. wide on bottom, 4 to 7 ft. deep; excavated material to be put in levees 150 ft. apart and 12½ ft. above grade of channel; Jacob A. Harman, Engr., Peoria:

Bidder.	Excavation, 100,000 cu. yds.	Clearing Timber, 35 acres.	% discount for cash.	Total.
Grant Smith & Co., Mendota, Wis.	$0.31	$20.00	10	$31,700
Crescent Stone Co., Peoria, Ill...	.1548	39.00	15	16,485
" " " Peoria, Ill...	.1397	34.50	4	15.177
McArthur Bros. Co., Chicago, Ill..	.14	40.00	15	15,400
*A. V. Wills & Sons, Pittsfield, Ill.	.09	10.00	2	9,350

*Accepted.

DREDGING.—Newport, R. I.—Maj. D. W. Lockwood received the following bids Oct. 21 for dredging 35,000 cu. yds. in Newport Harbor, as advertised in Engineering News:

	Per cu. yd.
Hartford Dredging Co., Hartford, Conn. (accepted)	$0.37
R. G. Packard, New York	.57½
Columbia Dredging Co., Fall River, Mass.	.53½

ASPHALT PAVING.—Kansas City, Mo.—Four contracts for asphalt paving were awarded Oct. 14, three to the Barber Asphalt Paving Co., at $2.12, $2.15 and $2.30 a sq. yd, and one to the Gilson company, at $2 a sq. yd. for bituminous asphalt, according to a local paper.

LEVEE WORK.—New Orleans, La.—The state board of engineers has awarded the contract for 50,000 cu. yds. of enlargement work in Plaquemines parish and the Lake Borgne levee district to V. Adema, at 10 cts. a cu. yd.

LIGONIER BLOCK PAVING.—Allegheny, Pa.—A contract for paving Overlook St. has been awarded to A. V. Purnell, at 30 cts. a cu. yd., for 1,500 cu. yds. excavation, 55 cts. a sq. yd. for 830 sq. yds. brick sidewalks, $1.68 a sq. yd. for 1,450 sq. yds. Ligonier block paving, 50 cts. a lin. ft. for 1,000 lin. ft. curbing, 70 cts. a lin. for 300 lin. ft. granite crossings.

PIPE SEWERS.—Lincoln, Ill.—T. S. Davey, Cy. Engr., writes us that the contract for constructing the Brainard Branch sewers has been awarded to Aur & Co., and that for the South Kickapoo St. sewer to David Mitchell, the bids being as follows:

Bids Received at Lincoln, Ill., Oc

Bidder.	24-in. pipe, 2,532 f
J. P. Shannahan, Chicago, Ill	$1.25
James H. Roach, Chicago, Ill	1.24
Aur & Company, Lincoln, Ill	.93
E. P. Hodgkins, Chicago, Ill	1.10
F. S. Selley, Lincoln, Il	.95
H. D. Hallett, Aurora, Ill	1.05
Wm. Davidson, Mattoon, Ill.	1.03
A. Mayfield, Lincoln, Ill	1.00
David Mitchell, Lincoln, Ill	....

CAST-IRON PIPE.—Brooklyn, N. Y.—The following bids were received by Theo. B. Willis, Comr. Cy. Wks., Oct. 23, for furnishing 48-in. cast-iron pipe for main relief sewer along Clinton Ave. bulkhead wall: McNeal Pipe & Foundry Co., $20.95 per 2,240 lbs. for 48-in. pipe, and $2.25 per 100 lbs. for special casting; Warren Foundry & Machine Co., $19.90 and $2.20.

[illegible] $2.55 for cut nails.

SCRAP.—Car wheels, $10.50 to $11.50; wrought turnings, $8.50 to $9; cast borings, $7.25 to $7.75, all delivered at purchasers' works; hammered car axles, $16 to $17, delivered at New York; wrought pipe and tube, $7.50 to $8,

---

Improvement of Erie Canal, Midle Division—Contract No. 5.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superinendent of Public Works, Albany, N. Y., ctober 22d, 1896.

Pursuant to chapter 79, laws of 1895, nd chapter 794, laws of 1896, sealed proosals will be received by the Superintendnt of Public Works, at his office in Alany, N. Y.. until Tuesday, November 10th, 896, at 12 o'clock noon of that day, for he improvement of the Erie canal from 100 eet west of the center of Peru Road Bridge o 100 feet west of the lower hollow quoin of ock No. 51.

Plans, specifications, notices and form f contract may be seen from the date of ublication of this notice to the date fixed or the receipt of proposals, at the office f the Superintendent of Public Works in lbany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the ffice of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass he tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $7,050; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $49,350; the amount of bond for the faithful performance of contract, on execution of contract, $70,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposals for the improvement of the Erie canal, from 100 feet west of the center of Peru Road Bridge to 100 feet west of the lower hollow quoin of Lock No. 51." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Oswego Canal—Contract No. 6.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for building a stone apron to a portion of Phoenix dam and work connected therewith on the Oswego canal.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $650; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $4,500; the amount of bond for the faithful performance of contract, on execution of contract, $6,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for building a stone apron to a portion of Phoenix dam, and work connected therewith on the Oswego canal." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Oswego Canal—Contract No. 7.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $825; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $5,775; the amount of bond for the faithful performance of contract, on execution of contract, $8,250. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for improving Lock No. 46, Erie canal, and work connected therewith." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

of National Blower Works. They are prepared to manufacture steam hot blast apparatus for heating, ventilating and drying purposes. They furnish dry kiln work, planing mill exhausters, ventilating wheels, engines, etc. A finely illustrated catalogue has just been issued, which shows a variety of blowers and exhausters, suitable for all kinds of work in this line.

MR. H. SHEELER, 83 Washington St., Chicago., has the contract for moving a church for Athens College, Athens, O.; for a heavy job of shoring on the Union Station at Columbus, O., and has recently completed the raising of a large factory at Marietta, O. Mr. C. H. Rector, manager for Mr. Sheeler, advises us that he has several contracts on hand in Chicago, among them the overhauling and moving of all the buildings at Fisher's Garden; the raising of the J. W. Butler Co.'s paper house; a contract with the South Side St. Ry. Co., and several other contracts.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., will erect for the Union Traction Co., of Rutherford, N. J., a new power house and car barn. The buildings will be of brick, with steel frame-work, and the plant when completed will be up to date in all respects. The car barn is 97 × 100 ft., adjoining which will be the offices, storerooms and repair shop. The engine-room is 50 × 65 ft., and the boiler-room 40 × 65 ft. The roofs are supported on steel trusses, and the covering is to be corrugated iron throughout. The roof of the engine-house is lined with the Berlin Co.'s patent anti-condensation fireproof roof lining, which gives protection against fire and condensation.

MR. WILLIS SHAW, No. 506 New York Life Bldg., Chicago, reports having recently shipped a car load of hoisting engines to Watkins & Hardaway, at Anderson, S. C., and a pumping and hoisting plant to the Egypt Gold Mining Co., and G. W. Hess, of McDuffie county, Ga., Mr. W. E. Howley, of Pittsburg, who was recently awarded the boulevard contract there, has just contracted with Mr. Shaw for a narrow gage locomotive and a number of hoisting engines; and Mr. Jos. J. Duffy, of Chicago, is being supplied with an air compressing plant, boilers, rock drills, etc., for the construction of the new water tunnel. Other sales reported are: Hoisting outfits to the Ontario Gold Mines Co., of Seine River, Canada; Willard & Cornwell, at Louisville, Ky.; Benezette Williams, at Joliet, Ill.; Russell & Ravell, Terre Haute, Ind.; and the Southern California Mountain Water Co., at San Diego.

THE ARMINGTON & SIMS ENGINE CO., Providence, R. Improvement of Erie Canal, Middle Division—Contract No. 13.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for improving Lock No. 49, Erie canal, and work connected therewith.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $800; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $5,600; the amount of bond for the faithful performance of contract, on execution of contract, $8,000. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for improving Lock No. 49, Erie canal, and work connected therewith." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Erie Canal, Middle Division—Contract No. 14.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for improving Lock No. 50, Erie canal, and work connected therewith.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Improvement of Erie Canal, Eastern Division—Contract No. 2.

NEW YORK STATE CANALS — NOTICE to Contractors — Office of the Superintendent of Public Works, Albany, N. Y., October 17th, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Monday, November 2d, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from Lock No. 20 to Lock No. 21.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works, as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works, for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $2.900; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $20,300; the amount of bond for the faithful performance of contract, on execution of contract, $29,000. All proposals for the above work must be addressed to the Superintendent of Public Works, at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal, from Lock No. 20 to Lock No. 21." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

NEW YORK STATE CANALS — NOTICE to Contractors — Office of the Superintendent of Public Works, Albany, N. Y., October 17th, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Monday, November 2d, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from Lock No. 28 to Lock No. 29.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works, as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works, for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $1,650; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $11,550; the amount of bond for the faithful performance of contract, on execution of contract, $16,500. All proposals for the above work must be addressed to the Superintendent of Public Works, at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal from Lock No. 28 to Lock No. 29." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-2t Superintendent of Public Works.

Improvement of Erie Canal, Eastern Division—Contract No. 5.

NEW YORK STATE CANALS — NOTICE to Contractors — Office of the Superintendent of Public Works, Albany, N. Y., October 17th, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Monday, November 2d, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from Lock No. 32 to Lock No. 33.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works, as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works, for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $4,500; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $31,500; the amount of bond for the faithful performance of contract, on execution of contract, $45,000. All proposals for the above work must be addressed to the Superintendent of Public Works, at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal, from Lock No. 32 to Lock No. 33." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-2t Superintendent of Public Works.

PERSONALS.

Mr. Lemuel Rich, contractor of North Adams, Mass., died Oct. 24.

Mr. Jas. C. Danforth, contractor, of Bay City, Mich., died Oct. 31.

Mr. John F. Roller, at one time Deputy Commissioner of Public Works, of Syracuse, N. Y., died Oct. 22.

Mr. Oscar Arcand, civil engineer, of New York city, was married Oct. 28, to Miss Ella Cooke, of Montreal, Que.

Mr. M. H. Dooley has been appointed Superintendent of the Northeastern R. R., of Georgia, with office at Athens, Ga.

Mr. S. T. Smith has been elected President of the Florence & Cripple Creek R. R., with headquarters at Denver, Colo.

Mr. C. H. Patterson has been appointed Superintendent of the city power dam, water and electric light plant of Austin, Tex.

Lieut. P. J. Werlich, U. S. Navy, has been ordered on steel inspection duty at the works of the Bethlehem Iron Co., South Bethlehem, Pa.

Mr. E. A. Richards has been appointed General Manager of the North Eastern R. R., of Georgia, with headquarters at Athens, Ga.

Mr. H. F. Dowst has been appointed Superintendent of the Eastern Division of the Maine Central R. R., with headquarters at Bangor, Me.

Mr. A. M. Stark has been appointed Superintendent of the Pecos River R. R., with office at Pecos, Tex., to succeed Mr. C. E. Pollock, resigned.

Mr. H. T. Woods, Secretary of the Tabor & Northern Ry., has been elected General Manager and Master Mechanic, with headquarters at Tabor, Ia.

Mr. Matthew Roderick, civil engineer, of Seattle, Wash., was killed in a duel with a foreman of the Cariboo Mining Co., near Camp McIlney, B. C., Oct. 28.

Mr. Frank B. Durfey, contractor, of Norwich, Conn., died Oct. 25, aged 47. He was Superintendent of the Norwich Water Power Co. for several years.

Mr. James K. Lyons, Assoc. M. Am. Soc. C. E., of Pittsburg, Pa., has been appointed Chief Draftsman of the Bridge Department of the Carnegie Steel Co.

Lieut. Robt. E. Peary, Civil Engineer, U. S. N., whose leave of absence for arctic exploration has expired, has been ordered to duty at the New York Navy Yard.

Mr. Wm. H. McDoel, Vice-President and General Manager of the Louisville, New Albany & Chicago Ry., has been appointed Receiver, with office at Chicago, Ill.

Mr. David H. Darling, formerly connected with the New York Belting & Packing Co., of New York city, is now a Manager of the Mercer Rubber Co., of the same city.

Mr. William Patton Powell, civil engineer, of the City of Mexico, was married Oct. 22 to Miss Ethel Louise Alford, daughter of the Hon. Lore Alford, of Waterloo, Ia.

Mr. Oliver C. Smith, civil engineer, with O'Keefe & Orbison, paper-mill architects and builders, of Appleton, Wis., was married Oct. 21 to Miss Louise Reilly, of that city.

Mr. Henry Kistner has been appointed General Foreman of Motive Power and Car Departments of the Monterey Mexican Gulf R. R., with headquarters at Monterey, Mexico.

Mr. William A. Heindle, civil engineer and Superintendent of the Metropolitan Ry. Co., of Washington, D. C., was married Oct. 28, to Miss Mary Elizabeth Powell, of Baltimore, Md.

Mr. Stephen S. Gregory, Fellow in Civil Engineering, of Cornell University, Ithaca, N. Y., committed suicide Oct. 29. He was 21 years of age and was a graduate of the University of Texas.

Mr. Phineas W. Sprague, of Boston, Mass., has been appointed by the U. S. Circuit Court of that state as Temporary Receiver of the Blackstone Valley Street Ry. Co., of Blackstone, Mass.

Mr. W. W. Atterbury, Master Mechanic of the shops of the Pennsylvania Lines West of Pittsburg, at Fort Wayne, Ind., has been appointed Superintendent of Motive Power of the Pennsylvania R. R., at Altoona, Pa., to succeed Mr. J. M. Wallis, whose promotion to the office of General Superintendent was announced in our last issue.

Mr. E. R. Bossange, architect, of New York city, has been awarded the annual prize of the exhibition of the Society of Beaux Arts, held at the rooms of the Architectural League in that city.

Mr. Monroe Greenwood, President of the California Electrical Works, and Vice-President of the Sunset Telephone & Telegraph Co., of San Francisco, Cal., died at San Mateo, Cal., Oct. 11, aged 68.

Mr. M. E. Bates, of Chicago, Ill., for many years with the Edison Manufacturing Co. in the capacity of an electrical engineer, has accepted a position in charge of the electric lighting plant at Verde, Ariz.

Mr. R. G. Matthews, formerly General Superintendent of the Buffalo, Rochester & Pittsburg Ry., has accepted a position with the American Signal Co., of Baltimore, Md., with headquarters in Columbus, O.

Mr. Thomas J. Fay, formerly New York representative and General Manager of the C. & C. Electric Co., of New York city, has resigned and will open an office shortly as a consulting electrical engineer.

Mr. P. Ryan has been appointed Superintendent of the Montana Division of the Great Northern Ry. Line, with headquarters at Kalispell, Mont., to succeed Mr. W. Hale, whose resignation was noted last week.

Mr. L. J. W. Jones, Chief Chemist of the Omaha & Grant Smelting Co., of Omaha and Denver, Neb., has been appointed Professor of Analytical Chemistry at the Colorado State School of Mines, Golden, Colo.

Mr. Geo. H. Barrus, M. Am. Soc. M. E., has formed a partnership with Mr. W. S. Monroe, under the firm name of Barrus & Monroe, as mechanical and electrical engineers, with an office in The Rookery, Chicago.

Mr. W. W. Tomlinson has been appointed Chief Engineer of the New Orleans & Western R. R., with headquarters at New Orleans, La., to succeed Mr. C. B. Beasom, whose resignation was announced last week.

Mr. W. F. Durfee, M. Am. Soc. M. E., of New York city, will deliver a lecture Nov. 17 at the Colt Memorial Building, New Haven, Conn., on the subject: "Hero of Alexandria and the Arts and Mechanism of His Time."

Prof. Geo. C. Tilden, for many years Professor of Analytical Chemistry at the Colorado State School of Mines, Golden, Colo., has resigned to take charge of an important mining commission. He is at present in Aukland, New Zealand.

Mr. Samuel Campbell, civil engineer, of England, died Oct. 27, at Fair Haven Heights, Conn. He finished a professional engagement of eight months in the South, several weeks ago, and was visiting relatives preparatory to returning to England.

Mr. Henry K. McHarg, President of the Texas Central R. R., has been elected President of the Marietta & North Georgia Ry. This road has been purchased by a new company and will hereafter be known as the Atlanta, Knoxville & Northern Ry., and Mr. Eugene C. Spalding, Receiver of the old road, has been elected Vice-President.

Lieut. Col. Henry C. Stanley, M. Inst. C. E., Chief Engineer of Railways for Queensland, Australia, is in this country on a tour of inspection of American railway methods of construction and operation, and also methods of storing and shipping dressed meats in the interests of the Colonial Government. He will visit most of the large Western railways.

Mr. George H. Thomson, M. Am. Soc. C. E., and Mr. Virgil S. Bogue, M. Am. Soc. C. E., have been appointed respectively by Mayor Wurster, of Brooklyn, and Mayor Strong, of New York, as members of the board of experts which will report on the question of running the surface railway cars or elevated railway cars over the New York and Brooklyn Bridge. We noted the appointment of Mr. L. L. Buck, M. Am. Soc. C. E., as the other member of this board last week.

Gen. Joseph T. Torrence, at one time in the iron and steel business in Chicago, Ill., and a well-known figure in Chicago financial and railway circles, died Nov. 1, aged 53. He was born in Mercer county, Pa., and began active life as a blacksmith in a blast furnace at Sharpsburg, Pa. He became foreman of the shop at the age of 17 and at the outbreak of the war enlisted in an Ohio regiment. He accumulated a great fortune in business in Chicago, and during the latter years of his life devoted his energies to a comprehensive scheme for the economical handling of freight by the railways entering Chicago.

Mr. William A. Harris, manufacturer of the Harris-Corliss engine, of Providence, R. I., died Oct. 29, of cancer of the stomach. He was born in Woodstock, Conn., March 2, 1835, and went to Providence in 1838. From 1840 to 1846 he lived in North Adams, Mass. In 1855 he entered the employ of the Providence Forge & Nut Co., now known as the Rhode Island Tool Co., as a draftsman. In 1856 he entered the service of the Corliss Steam Engine Co., in the same capacity, and remained until Aug., 1864, when he began business on his own account. In 1883 he was a member of the Common Council and also a member of the lower house of the General Assembly.

ENGINEERS' CLUB OF PHILADELPHIA.
Nov. 7. "The Queen Lane Division of the Philadelphia Water Supply System," by Allen J. Fuller. Secy., L. F. Rondinella, 1122 Girard St.
ENGINEERS' CLUB OF KANSAS CITY.
Nov. 9. Secy., F. W. Tuttle, Baird Bldg.
DENVER SOCIETY OF CIVIL ENGINEERS.
Nov. 10. Secy., Walter Pearl, 36 Jacobson Bldg.
NORTHWEST RAILWAY CLUB.
Nov. 10. Secy., T. A. Foque, Soo Line, Minneapolis.
NORTHWESTERN SOCIETY OF ENGINEERS.
Nov. 10. Secy., D. W. McMorris, 635 Burke Block, Seattle, Wash.
RAILWAY SIGNALLING CLUB.
Nov. 10. Secy., Geo. M. Basford, The Rookery Bldg., Chicago.
ENGINEERS' SOC. OF WESTERN PENNSYLVANIA.
Nov. 10. Secy., Daniel Carhart, 410 Penn Ave., Pittsburg.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Nov. 10. "Structural Steel for Ships," by J. R. Oldham. Secy., F. A. Colburn, Case Library Bldg.
WISCONSIN POLYTECHNIC SOCIETY.
Nov. 10. Secy., W. K. Means, Loan and Trust Bldg., Milwaukee, Wis.
NEW ENGLAND RAILROAD CLUB.
Nov. 11. Secy., Edw. L. Jones, P. O. box 1158, Boston.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Nov. 12. Secy., James K. Zollinger, Norton Bldg., Louisville, Ky.
ENGINEERING ASSOCIATION OF THE SOUTH.
Nov. 12. Secy., L. P. Brown, Nashville, Tenn.
SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 12, 13 and 14.—The fourth general meeting to be held at No. 12 W. 31st St., New York city.
CENTRAL RAILWAY CLUB.
Nov. 13. Secy., H. D. Vought, Buffalo "Courier," Buffalo, N. Y.
MONTANA SOCIETY OF ENGINEERS.
Nov. 14. Secy., Forrest J. Smith, Denver Block, Helena.
INDIANAPOLIS ENGINEERING CLUB.
Nov. 14. Secy., C. C. Brown, Indianapolis, Ind.
ENGINEERS' CLUB OF MINNEAPOLIS.
Nov. 16. Secy., Elbert Nexsen, 1620 S. E. 4th St., Minneapolis, Minn.
WESTERN RAILWAY CLUB.
Nov. 17. Secy., W. D. Crossman, The Rookery, Chicago.
COLUMBIAN ENGINEERING SOCIETY.
Nov. 17. Secy., F. W. Hart, 15th and H Sts., N. W., Washington, D. C.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Nov. 18. Secy., F. Van Vleck, Los Angeles.
ASSOCIATION OF ENGINEERS OF VIRGINIA.
Nov. 18. Secy., J. A. Pilcher, Roanoke, Va.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Nov. 18. Secy., S. E. Tinkham, City Hall.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.
Nov. 18. Secy., R. W. Pope, 26 Cortlandt St., New York city.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Nov. 18. Secy., A. Sorge, Marquette Bldg., Chicago.
ENGINEERS' CLUB OF ST. LOUIS.
Nov. 18. "Steel Frame Construction of High Buildings," by Julius Baier. Secy., Wm. J. Bryan, Turner Bldg.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Nov. 18. Secy., C. W. Hunt, 127 E. 23d St., New York.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Nov. 19. Kimball House, Atlanta, Ga. Secy., F. A. Charpiot, Macon, Ga.
ENGINEERS' CLUB OF CINCINNATI.
Nov. 19. Secy., J. F. Wilson, P. O. box 333.
NEW YORK RAILROAD CLUB.
Nov. 19. "Compressed Air Motors in Railway Service." Secy., W. W. Wheatly, 168 Montague St., Brooklyn, N. Y.
CANADIAN SOCIETY OF CIVIL ENGINEERS.

TACOMA SOCIETY OF CIVIL ENGINEERS AND ARCHITECTS.
Nov. 20. Secy., 201 Washington Bldg., Tacoma, Wash.
ENGINEERS' CLUB OF COLUMBUS.
Nov. 21. Secy., M. S. Hopkins, 14½ N. High St., Columbus O.
AMERICAN SOCIETY OF MECHANICAL ENGINEERS.
Dec. 1, 2, 3, 4. Meeting to be held at the Society House, New York city. Secy., F. R. Hutton, 12 W. 31st St., New York city.
WESTERN SOCIETY OF ENGINEERS.
Dec. 2. Secy., N. L. Litton, Monadnock Block, Chicago.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Dec. 7. Secy., C. L. Annan, City Engineer's Office.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Dec. 7. Secy., Carleton Greene, Library Bldg., Buffalo.
NORTHWESTERN TRACK AND BRIDGE ASSOC.
Dec. 11. Secy., D. W. Meeker, St. Paul, Minn.
AMERICAN SOCIETY OF IRRIGATION ENGINEERS.
Dec. 11 and 12. Annual meeting to be held in Denver, Colo. Secy., John S. Titcomb, Room 36, Jacobson Bldg., Denver, Colo.
NATIONAL IRRIGATION CONGRESS.
Dec. 15, 16 and 17. Annual meeting to be held in Phoenix, Ariz. Secy., C. M. Heintz, Los Angeles, Cal.

WESTERN SOCIETY OF ENGINEERS.—On Oct. 16 and 17 a large number of the members visited the Bedford Stone Quarries in Indiana, the Louisville (Ky.) Cement Works and Louisville Water-Works.

DETROIT ENGINEERING SOCIETY.—At the meeting of Oct. 16, A. George Mattson, of the Detroit Drydock Co., read a paper on the progress in building marine engines on the Great Lakes. The question of economy in the consumption of fuel with decrease in speed and power was debated.

AMERICAN GAS LIGHT ASSOCIATION.—At the annual convention, which met in St. Louis, Oct. 27, 28 and 29, the following papers were presented: "A Discussion of the Methods Employed in Introducing Gas Stores," by Chas. H. Nettleton; "Some Experiments in Interior Illumination," C. H. Page, Jr.; "Inclined Retorts Up To Date," Frederick Egner; "A Modern Retort House," W. A. Miller; "The Separation of Water Gas Tar," A. S. Miller.

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—A meeting was held Tuesday evening, Oct. 27. Mr. Cecil L. Saunders read a paper on "Gas Producers and the Mechanical Handling of Fuel." The subject was presented under the following heads: A discussion of the various types, the necessity for attention to detail of construction, the relation of character of coal to type to be used, a possible field for future economy, coal handling from hoppers and unloading coal by mechanical devices. Messrs. E. A. Sperry, A. Mordecai, J. W. Seaver, C. M. Barber and John McGeorge engaged in the discussion.

F. A. Coburn, Secy.

WESTERN FOUNDRYMEN'S ASSOCIATION.—The regular monthly meeting of the Western Foundrymen's Association was held at the Great Northern Hotel, Oct. 21, 1896. The meeting was called to order by Wm. Ferguson, Vice-President. Applications for membership by the Ingersoll-Sergeant Drill Co. of New York for active, and Henry W. Carter, of Chicago, for associate membership, were acted upon and the applicants were duly elected. The Secretary then read the report of the committee on apprenticeship. After the reading of the report it was decided to postpone the formal discussion until a later meeting. The Secretary was instructed to write several interested people requesting them to present written discussions of this report. The meeting then adjourned.

FRANKLIN INSTITUTE.—At the meeting on Wednesday evening, Oct. 21, Mr. Walter Atlee read a paper on "The Improvement of the Channel of the Delaware River," which embraced an historical summary of what had been accomplished, a detailed statement of the plans at present being carried out by the government engineers, and the ultimate purpose of the channel improvement work. The speaker illustrated his paper with the aid of a large chart giving a section of the river bottom in mid-channel, from Philadelphia to deep water in the Bay, upon which was drawn, for comparison, the 26-ft. line at mean low water, the depth to be obtained by the present and prospective plans of the government engineers.

Among those taking part in the discussion were Messrs. Chas. H. Cramp, L. Y. Schermerhorn, L. M. Haupt and John C. Trautwine.

ENGINEERS' CLUB OF ST. LOUIS.—At the regular meeting of Oct. 21, Mr. Wm. H. Bryan, M. Am. Soc. C. E., read a paper on "Boiler Efficiency, Capacity and Smokelessness with Low Grade Fuel." The discussion among the mechanical engineers of this country regarding the best method of expressing the economic performance of boilers was explained, and the revision of the generally accepted code for making boiler trials shown to be necessary. The author advocated the statement of boiler efficiency in the percentage realized of the calorific value of the fuel, taking care that the coal used be carefully sampled, and its calorific power determined by the most accurate means possible. He presented a table giving the results of a large number of trials made to determine the efficiency and smokelessness of various types of boilers, with and without improved settings. The paper was accompanied also by a table of fuel analyses and calorific determinations covering all the common Southern Illinois coals. William H. Bryan, Secy.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.—At the meeting held on Sept. 20, Mr. Gustave Kaufman read a paper on "Hydraulic Power Transmission." After a brief history of the art of distributing hydraulic power from central stations to many consumers in cities in England, a short description of the plant of the London Hydraulic Power Co. was given. Formulas were presented to show the method of calculating the amount of power in any given quantity of high pressure water. The purpose of the paper was to show the application of a hydraulic system to the uses of Pittsburg, claiming that with this system a relief from the smoke nuisance could be obtained. A description of a plant suitable for the present requirements of Pittsburg was given in detail. The pressure at which the water was to be distributed was assumed at 750 lbs. per sq. in. The plant would deliver about 400 HP. continuously. Distributing mains each 6 ins. diameter were assumed, and a distributing system embracing the entire business part of the city. The estimated cost of the pumping station was $100,000; distributing system, $102,600; engineering and contingencies, $27,400; total, $230,000. The annual cost of operating, including interest on cost of plant, was estimated at $42,000.

The machinery to which the hydraulic power could be successfully applied was stated to be, hydraulic elevators, cranes, hydraulic intensifiers, fire hydrants and hydraulic engines. The principal use is for running hydraulic elevators. It was shown that an average of 51 HP. is furnished by the city of Pittsburg for 102 direct pressure elevators and that it would be cheaper for consumers to use high pressure water at the rates charged by the London Hydraulic Power Co., than to continue the present system. The advantages of the Greathead injector fire hydrants for the purpose of increasing the fire protection and doing away with the objection, on this score, to the modern sky-scrapers was dwelt upon. Estimates of the revenue from these sources show that the establishment of a hydraulic plant in Pittsburg could be made to be very lucrative. Individual steam plants in the various buildings could be dispensed with and in that way reduce the amount of smoke now polluting the atmosphere of Pittsburg. The speaker claimed that engineers specifically employed for the purpose, could readily clear Pittsburg of its smoke without hardship to anyone and that all that is required is for the authorities to pass and enforce rigid laws, making it necessary for manufacturers and business men to employ engineers and direct them to get rid of the smoke. Danl. Carhart, Secy.

NEW PUBLICATIONS.

LITERARY MAGAZINES.—The October English reviews give evidence that some echoes of our exciting Presidential campaign reached across the water. The "Nineteenth Century" has a paper by Mr. Geo. F. Parker, U. S. Consul at Birmingham, on "The Cry for Fraudulent Money in America;" Mr. F. H. Hardy, in the "Fortnightly," writes on "The Battle of the Ballots in America;" and in the "Contemporary" is a paper on "The Old Silver Dollar." Each of these papers discusses to some extent the antecedent causes which have brought about the rise of the silver party and the writer in the "Fortnightly" ventures a prediction whose accuracy or the reverse can probably be verified when this issue reaches our readers. We therefore quote it as follows:

1. The vote cast will exceed by at least 1,000,000 the vote cast in 1892.
2. Mr. Bryan's total vote in the Electorial College will be nearer 100 than 200. McKinley's vote nearer 300 than 250.
3. McKinley's popular vote will show a plurality exceeding 1,250,000 votes.
4. The combined popular vote for the Republican and the National Democratic tickets will be equal to 75% of the total votes cast.

In "The Contemporary" we find also a paper on the results of the inquiry of the recent Royal commission which investigated the subject of vaccination and the English compulsory laws respecting it. The writer reveals himself, however, as a strong partisan of the anti-vaccination side. The editorial on "Money and Investments" discusses financial affairs in the London money market in a most entertaining way. An article in the "Nineteenth Century" is of curious interest as revealing how far London is behind American cities in its hospital ambulance service. The horse-drawn ambulance, so familiar to American city dwellers, and the system by which it is so quickly summoned to succor the injured in an accident or one taken suddenly ill in the street or office, appears to be quite unknown in London.

In "Scribner's" for November we find an entertaining account of an exploration of the Yukon River, from source to mouth, by Mr. Frederick Funston, who made the journey on behalf of the U. S. Agricultural Department. "McClure's" has a paper by Cy. Warman describing in a very picturesque way the competitive trial of the Leslie and the Jull rotary snowplows which was made on the Alpine tunnel branch of the Union Pacific R. R. several years ago.

In "The Century" we find a valuable description of the city government of Birmingham, England, with the title "An Object Lesson in Municipal Government." It will be remembered that Mr. Joseph Chamberlain first won fame by his work when Mayor of this city in carrying out its great public works. In the "North American Review" we notice a paper on "High Buildings," from the pen of Mr. A. L. A. Himmelwright, C. E., who contends that the modern "sky-scraper," properly built, is safe against storm or fire, and that the defects of light and ventilation complained of, are not due alone to the height of buildings, since the older buildings of four or five stories are far inferior as respects light and ventilation to the newer and much higher structures. He opposes the plan of limiting the height of buildings by the width of the street on which they front, and suggests instead that the laws should limit the area of any lot which may be covered with buildings and should also prohibit the building on the entire frontage of a lot, a suggestion which is worth some consideration. In the same magazine is a paper by Col. Geo. E. Waring on "Government by Party," which though not on a topic commonly noted here, deserves mention here by reason of the personality of its author, who presents some facts which at least give food for thought.

The "Review of Reviews" is notable this month for its impartial discussion of the issues of the political campaign that has just closed. Many a thoughtful man in the midst of the heated discussions of the past few months must have wondered how the impartial historian of the future will write down the story of the political issues of 1896. We especially commend this number to those who may desire, now that the hot debate is over and the result is known, to make a calm and dispassionate study of the events and issues of the most notable Presidential election since the Civil War.

UNITED STATES GEOLOGICAL SURVEY.—Bulletin 131. Report of Progress of the Division of Hydrography for the Calendar Years 1893 and 1894. By F. H. Newell. 8vo.; paper; pp. 126. Pub. Doc.

This bulletin is mostly taken up with brief descriptions of stream gaging stations in the west and the results obtained during the years 1893 and 1894.

CALIFORNIA GAME.—Southern Pacific Co.; Passenger Department, San Francisco and New York city. Paper; 5⅛ × 6¾ ins.; pp. 64; illustrated.

This is a handy book of information as to the birds, beasts and fish to be found along different parts of the Southern Pacific Ry., and is distributed free to all who are interested in the matter. It is fully illustrated by excellent half-tone views of the game and of scenery along the line.

OHIO STATE BOARD OF HEALTH.—Report for 1895. C. O. Probst, M. D., Secretary, Columbus, O. 8vo.; cloth; pp., 410; illustrations. Adress the secretary.

The principal interest of this volume to engineers lies in a number of reports on proposed or actual sewerage and water supply systems by members of the board and others. All such improvements must now be submitted to the board for approval. The present report indicates that this is being done with great advantage to the local communities concerned.

LAKE ERIE AS A WATER SUPPLY FOR THE TOWNS ON ITS BORDERS.—By Geo. W. Rafter, M. Am. Soc. C. E., Rochester, N. Y. Reprinted from the Buffalo Medical Journal for August, 1896. 8vo.; paper; pp. 20. Address the author.

This is a very interesting discussion of the purity of water drawn from Lake Erie. It ends with the conclusion that such water should be purified by slow sand filtration. The water supplies of Liverpool and Zurich are described briefly as examples of the European practice of filtering surface water supplies, the quality of which would hardly be questioned here. Results of studies of the water supplies of Buffalo, N. Y., and Lorain, O., are then presented, and finally the conclusion stated above is given.

T-SQUARE CLUB OF PHILADELPHIA.—Report for 1895-6, with Excerpts from the Minutes of the Meetings Since the Club's Formation, President's Address and an Official Record of the Club. President, Albert Kelsey; Secretary, Adin B. Lacey, 77 Brown Bros. Building, 5 × 11 ins.; paper; pp. 32; illustrated.

This club seems to be carrying on a most excellent work in the way of competitive exhibitions of designs, lectures for members, co-operation with other art and allied organizations, and in general an attempt to give architecture its proper place before the public, especially as regards municipal buildings and public art. The activities of the club are indicated by the report under review. We would suggest that the addresses, as well as the names of the members of the club might well be given in the report.

THE MONEY QUESTION.—A Handbook for the Times, by Henry V. Poor, Author of "Money and Its Laws," "Resumption and the Silver Question," "Twenty-two Years of Protection," etc. New York: H. V. & H. W. Poor. Paper; 8vo.; pp. 103.

The author of this pamphlet is well known as the founder and publisher of "Poor's Manual of Railroads," and as a writer of ability and force on financial questions. The present pamphlet is taken from a larger work on "The Monetary History of the United States," which Mr. Poor has in preparation. The discussion is for the most part eminently sound, although in some respects the writer assumes as proved some things on which financial and economic writers are by no means agreed. Greater pains with the literary style and with the arrangement might have made the discussion easier to follow; but the book is one which deserves study by the unprejudiced student of the currency question.

COMMERCIAL RELATIONS OF THE UNITED STATES, 1894 AND 1895. 2 vols. Vol. I., Review, Africa, America, Asia, Australasia. Vol. II., Europe, Polynesia. Cloth; 8vo.; pp. 700, 646. Issued by the Department of State, Washington, D. C., 1896.

The general review of the foreign commerce of the United States, in Vol. I., is the first that has been published since 1881. In view of the many inquiries received by the Department of State for information as to trade conditions in foreign countries and the evident attempts of our manufacturers to increase the sale of their goods abroad, it was felt by the Department that a summary of the world's commerce, compiled from the most reliable sources, should be undertaken as specially valuable at this time in conjunction with the detailed reports from our consular representatives published in the monthly Consular Reports. The volumes will be useful to manufacturers and others interested in procuring statistical and other information in regard to foreign trade.

PROCEEDINGS OF THE ASSOCIATION OF ONTARIO LAND SURVEYORS.—Annual meeting held at Toronto, Feb. 25-27, 1896. A. J. Van Nostrand, Secretary-Treasurer, Toronto, Canada. 8vo; 237 pp.

In addition to committee reports and official transactions this publication contains the following papers and discussions upon them: "The Use of Concrete in Bridge Foundations," G. de Gurse; "Notes on Portland Cement Concrete," M. G. Butter; "Maintenance of a Separate System of Sewers," T. Harry Jones; "The Field of American Engineering," A. Ross Davis; "Notes on Some New Jersey Roads," T. B. Speight; "Road Metal," H. J. Bowman; "The Ditches and Water-courses Act, 1894," B. J. Saunders; "Ontario Boundaries," A. Niven; "Sectional Surveys," P. S. Gibson; "Crown Surveys," James Dickson; "Natural Boundaries," A. P. Walker; "A Road or Not a Road," M. Gaviller; "Through the Barren Lands," J. W. Tyrrell; "Field Testing of Minerals," W. H. Merritt. An appendix contains head notes of reported land cases, by H. L. Esten. With this volume is an exceedingly interesting map of the "Northern Polar Regions with Reference to Eastern Canada," prepared by Willis Chipman and L. B. Stewart to accompany a paper on the "Eightieth Meridian," published in the Proceedings of the Association for 1895.

FIFTEENTH ANNUAL REPORT OF THE UNITED STATES GEOLOGICAL SURVEY, 1893-94. By J. W. Powell, Director. Government Printing Office, Washington, D. C. 1895. Large 8vo.; pp. 755; 48 plates.

The first 250 pages of this volume are devoted to formal reports of the progress of work of the survey. The greater part of the work has been topographical. An outline map of the United States is given showing the areas that have been surveyed and mapped up to and including the fiscal year 1894. The remainder of the volume contains technical papers as follows: "Preliminary Report of the Geology of the Common Roads of the United States," by N. S. Shaler. "The Potomac Formation," by Lester Frank Ward. "Sketch of the Geology of the San Francisco Peninsula," by Andrew C. Lawson. "Preliminary Report on the Marquette Iron-Bearing District of Michigan," by Charles Richard Van Hise and William Shirley Bailey, with a "Chapter on the Republic Trough," by Henry Lloyd Smith. "The Origin and Relations of Central Maryland Granites," by Charles Rollin Keyes. "General Relations of the Granitic Rocks in the Middle Atlantic Piedmont Plateau," by George Huntington Williams. The volume is handsomely printed and many of the colored plates are excellent specimens of the engraver's art.

SIXTEENTH ANNUAL REPORT OF THE UNITED STATES GEOLOGICAL SURVEY, 1894-95. Charles D. Walcott, Director. In Four Parts. Part II, Papers of an Economic Character; 8vo.; pp. 598. Part III, Mineral Resources of the United States, 1894, Metallic Products; 8vo.; pp. 646. Part IV., Mineral Resources, 1894, Non-Metallic Products; 8vo.; pp. 735.

The "papers of an economic character" in Part II are: "Geology and Mining Industries of the Cripple Creek District, Colorado," by Whitman Cross and R. H. F. Penrose, Jr. "Geological Reconnaissance Across Idaho," by George H. Eldridge." "Economic Geology of the Mercur Mining District, Utah," by J. Edward Spurr. "The Public Lands and their Water Supply," by Frederick H. Newell. "Water Resources of a Portion of the Great Plains," by Robert Hay. Parts III and IV are the regular annual reports on Mineral Resources, edited by Dr. David T. Day, Chief of the Division of Mineral Resources, which were heretofore published by the Division itself, but are now, according to an act of Congress in 1895, published as parts of the report of the Geological Survey. The change in the method of publication has made the volumes much handsomer in appearance than they used to be, but we think that the extra thickness of paper and great width of margins are not only a waste of money, but make the volumes objectionable to many readers by causing them to occupy too much space in a library.

CUMULATIVE INDEX TO A SELECTED LIST OF PERIODICALS.—Published Monthly by the Public Library, Cleveland, O. $5 per annum.

The Cleveland Public Library has undertaken a novel work, the preparation and publication of a monthly index to current periodical literature, each number of which contains all the references of the number preceding, so that the subscriber has in each number a complete index to the current periodical literature which has been published since the beginning of the year. The periodicals indexed are the monthly literary magazines, the reviews, English and American, and such popular weeklies as "Harper's," "The Outlook," "The Nation," and others. The list of engineering journals includes only "Cassier's," "The Engineering Magazine," and the antediluvian "Scientific American Supplement," if that can be called an engineering journal.

The indexing appears to be carefully and faithfully done and the cross-references are numerous; but it appears to us a mistake to include all the short stories, poems, etc., in such an index. The readers of these do not take the trouble to consult indexes to find what they want. It is the articles of permanent value which deserve indexing, and if the Cleveland Library would confine its index to these and revise somewhat its list of periodicals, it would probably have better chances of success in its enterprise.

MITTHEILUNGEN AUS DEN KOENIGLICHEN TECHNISCHEN VERSUCHSANSTALTEN ZU BERLIN. (Notes from the technical testing stations at Berlin.) Vierzehnter Jahrgang: 1896. Volume I. and II.; pp. 132. Illustrations in text; 6 folding plates; 8vo.; paper. Berlin, 1896. Julius Springer.

Of these two pamphlets Vol. I. contains: "Results of Tests on Exploded Cylinders for Carrying Compressed Gas," "The Preparation of Paper for Microscopical Purposes," "Blotting Papers," "The Testing of Building Bricks," "Tests of Paper in France," and "Japanese Paper." Vol. II. contains: "Effect Upon the Microscopic Texture of Soft Steel Rails of Rolling at Different Temperatures," "Comparative Tests of German Building Sands," "Changes of Conditions Governing the Congealing of Mineral Oils," "Copying Paper, Strength of Paper; Paper Standard."

The extensive series of tests of iron tanks for the storage of hydrogen gas was undertaken at the instance of the German aeronautical department at Berlin, as a number of tanks in use by that department exploded and no cause could be found. The tests of building bricks comprised tests as to their hardness, specific weight, density, absorption of water, freezing and heat tests, their crushing strength, power of adhesion, tensile, bending and wearing qualities.

MITTHEILUNGEN AUS DEM OFFIZIELLEN BERICHT der im Franzoesischen Ministerium der Oeffentlichen Arbeiten gebildeten Commission des Methodes d'Essai des Materiaux de Construction. Band I, Allgemeine Grundlagen. Translated by P. Zizmann. Pp. 48; paper; 8vo. Berlin, 1896. Julius Springer.

This is a supplement to the publication just noted, presenting, in concise form, the definitions, units and standards which govern all tests of metals and materials of construction, conducted by the French Ministry of Public Works.

MASTER CAR BUILDERS' ASSOCIATION.—Secretary John W. Cloud, 974 Rookery Building, Chicago, Ill.

Lithograph copies of the drawings of Standards (Sheets 1 to 12, inclusive) and Recommended Practice (Sheets A to E, inclusive), illustrated on a reduced scale by 17 sheets in the "Report of Proceedings" for 1896, may be had on a similar number of sheets 30 × 38 ins. Blue prints can be taken from these sheets. The sheets will be sold at 25 cts. each, plus postage when sent by mail. If needed for blue printing, they should be shipped by express, and orders should specify by what express company they should be shipped. Blue print copies, 30 × 38 ins., of the drawings of Recommended Practice (Plates C, D, E, F and G in back of Proceedings for 1896), regarding axle and journal box and contained parts for cars of 80,000 lbs. capacity, may also be had. These blue prints will be sold at cost, which is now estimated at about 30 cts. each. Pamphlets containing the text of the Standards and Recommended Practice, as printed in the Proceedings of 1896, will be furnished at 25 cts. each. The lithographs, blue prints and pamphlets are now ready for delivery.

MASSACHUSETTS STATE BOARD OF HEALTH: Report for 1894.—S. W. Abbott, M. D., Secretary, Boston, Mass. 8vo.; cloth; pp. 892; many tables. Address the Secretary.

The most valuable matter in this volume is a historical and critical review of the work relating to sewage purification accomplished at the Lawrence Experiment Station in the seven years ending with 1894. The deductions drawn from this long series of careful experiments are of great value, both for the information given and because in many instances they will render it unnecessary to look through the earlier reports. Next in importance is the section on water purification, as studied at the same station. Both these sections were written by Mr. Geo. W. Fuller, who was at the time in charge of the station. As a supplement to the above, the report contains a paper by Mr. H. W. Clark, Chemist of the Station, on the "Physical and Chemical Properties of Sands, with Special Reference to the Filtration of Water."

Interesting papers are contributed on "The Composition of the Deep Wells in Boston and Vicinity," and "The Bacterial Contents of Certain Ground Waters, Including Deep Wells," by Dr. Thos. M. Drown and Prof. Wm. T. Sedgwick, respectively. The latter paper shows, contrary to views often expressed by other writers, that deep-seated waters often contain a notable number of bacteria. The investigations recounted, however, show nothing to shake the confidence with which well-protected ground waters are regarded as sources of public water supplies.

The papers and discussions named are accompanied with numerous tables of analyses. Many other such tables are given in the sections of the report relating to the examinations of sources of public water supply and the pollution of rivers.

A number of pages are occupied with advice to cities and towns regarding new water and sewerage systems and extensions to old works.

The volume is up to the standard set by previous yearly issues as an aid to the student of those branches of sanitation to which reference has been made.

It is only fair to the board and the public to state that the volume being noticed has been published for nearly a year and that doubtless the results obtained in sewage and water purification during 1895 will soon be available, greatly to the advantage of all interested in these vital questions.

THE JOURNAL OF THE AMERICAN FOUNDRYMEN'S ASSOCIATION.—Published monthly by the Association at 95 Griswold St., Detroit, Mich., John A. Penton, Secy. Vol. I., No. 1; July, 1896. Pamph.; 6 × 9 ins.; pp. 172. $5 per annum; 50 cts. each.

At a convention of foundrymen of the United States, held in Philadelphia, May 12, 13, and 14, 1896, attended by over 300 representatives of the foundry business, a national association was formed, whose objects, according to the constitution then adopted, are the advancement of the interests of foundry operators, to collect for the use of the Association all proper information connected with the foundry business, to interchange experience and encourage uniform customs and actions among foundrymen." One of the duties of the secretary is the publication of a monthly Journal, the first number of which is before us. It contains the proceedings of the convention, the constitution and list of members of the Association, and the following technical papers read at the convention: "Foundry Cranes, with the Different Methods of Driving Them," by A. E. Outerbridge, Jr.; "The Air Compressor for Use in the Foundry," by C. W. Shields; "The Chemistry of Iron, with Determinations and Their Value," by Charles James; "How to Turn Out Good Molders," by D. J. Matlack; "Utility and Advancement of Green, Dry and Loam Sand Molding," by Thos. D. West; "Physical Tests and Chemistry of Cast-Iron," by W. J. Keep; "Molding Machines and Their Applications," by Harris Tabor; "Cupolas and Cupola Practice Up to Date," by Dr. Edward Kirk; "The Sand Blast in the Foundry," by E. C. Brooksbank.

This number of the Journal also contains a paper by Mr. Thos. D. West, on "Power of Blast Penetration and Improvements in Center Blast," read at the monthly meeting of the Western Foundrymen's Association on June 17, and a paper by Mr. W. T. Rainey on "The Manufacture of Coke and Its Selection for the Foundry," read at the monthly meeting of the Philadelphia Foundrymen's Association on June 3. A feature of the Journal is a Review of the Foundry Literature for the Month, which it is intended to publish in each number. It will contain a brief review or mention of the original articles appearing in the columns of the engineering journals of the country having reference to the foundry business.

The Journal is well printed, but it is defective in containing neither a table of contents nor an index. We would also suggest that it might be improved by printing on the top of each right hand page the title of the paper or subject discussed on that page, instead of repeating on every page the name of the Journal.

TRADE PUBLICATIONS

STEAM VALVES, SAFETY VALVES, ETC.—Alex. Turnbull & Co., Bishopbriggs, Glasgow, Scotland.

A set of loose circulars illustrating the different forms of valve made by the firm, including "dead-weight" safety valves, which are commonly in use in Great Britain, but are unknown in this country, and accompanied by a handsomely printed pamphlet of 26 pages with half-tone illustrations, giving an interesting history of "The Iron and Steel and Allied Trades of Scotland," together with a description of the works owned by the firm and of its various products.

SLIDE-VALVE ENGINES AND STEAM BOILERS.—Houston, Stanwood & Gamble, Cincinnati, O. Pamph.; 8 × 10¾ ins.; pp. 32.

This catalogue illustrates a series of plain slide-valve engines with throttling governors, and with cylinders, single, double or cross-compound. The building of slide-valve throttling engines in these days may seem a retrogression to an ancient type, but the builders give some good reasons why, especially in the case of compound non-condensing engines, this type is preferable to the high speed automatic engine.

CHEMICAL AND PHYSICAL APPARATUS.—Henry Heil Chemical Co., St. Louis, Mo. Cloth; 7 × 10 ins.; pp. 447; illustrated.

This is one of the most complete and best arranged catalogues of chemists' and chemical laboratory supplies, chemicals and physical apparatus which has come to cur notice for some time. Although containing a vast variety of apparatus it is so arranged by reference numbers and an index that any item, however small, can be readily found, and generally each apparatus is explained by illustration as well as descriptive text. A valuable feature of the catalogue is a number of lists or outfits of apparatus designed for assayers, iron and steel analysis, agricultural experiment station work, colleges and schools, botanists, biologists, etc. Especial attention is also called by the catalogue to the facilities of the firm for manufacturing special apparatus according to drawings and specifications. The index covers 32 closely-printed pages.

RAILWAYS.

East of Chicago.

LAKE SUPERIOR & ISHPEMING.—The Marquette (Mich.) "Journal" says that this company is removing a number of dwellings, preparatory to an extension of its tracks. About four miles of track are to be put in. It is expected to have all work completed by the opening of navigation next spring. Work may begin inside of two weeks. Gen. Mgr., John M. Egan.

MIDLAND.—The Windsor, N. S., "Journal," says that the prospects for the construction of this railway are brighter than they have been for a long time, and it is possible that active work may begin next spring. A meeting in the interests of this railway was recently held at Halifax. There were present Messrs. Strong and Reid, of Montreal, and S. H. Holmes, of Halifax, of the Midland Ry. Co., Hon. H. M. Goudge, Dr. Allan Haley, and Arthur Drysdale. The meeting was held for the purpose of making arrangements with the local government for building a line from Truro to Windsor.

NORTHERN NEW YORK.—A press rumor says that it is proposed to extend the Northern New York R. R., from its southern terminus at Tupper Lake, 20 miles south to Long Lake, N. Y. The work on the extension will begin, it is hoped, before January. A connection will ultimately be made from Long Lake with the D. & H. at North Creek, Saratoga county. These extensions will open up all the lower part of the Adirondack Mountains.

PEMIGEWASSET VALLEY.—It is stated that Charles H. Burns, of Bridgeport, Conn.; Hall & Grey and F. S. Whitehouse, of Lincoln, N. H., have begun work on a railway through this valley, in New Hampshire, north from North Woodstock, on the Boston & Maine. The road is to be used at first to transport lumber and freight.

PITTSBURG & BROWNSVILLE.—This company noted in our issue of last week proposes to build a line fifteen miles long. Pres., Geo. S. Davidson, Pittsburg, Pa.; Directors: Wm. K. Wilkins, Joseph F. Kuntz, Allegheny, Pa.; L. G. Hohl, Chas. W. Davidson, Pittsburg, Pa.; Florian G. Ross, Dunkirk; James R. Elliott, Braddock, Pa.

QUEEN ANNE'S.—An arrangement is said to have been effected with the Pennsylvania R. R. in regard to the proposed crossing of the latter at Greenwood and Ellendale, Del. The Queen Anne's Co. will now build the remaining 25 miles of the railway to Lewis, Del. The contract will soon be awarded, and it is expected to have the whole line from Queenstown to Lewis ready for operation by April, 1897. Pres., W. H. Bosley, Baltimore, Md.

WHITE RIVER JUNCTION & ELY.—A press dispatch from Montpelier, Vt., states that Dr. W. Seward Webb is said to be one of the financial backers of a new railway line in the eastern part of the state, for which a charter will be asked of the Legislature now in session. The proposed line is from White River Junction, by way of the Pompanoosuc River Valley to Ely, and from there to Barre, by way of Chelsea. Along the line of the proposed railway are extensive and valuable copper mines, as well as extensive marble and granite quarries. These are now badly cramped for want of transportation facilities, and will be greatly enhanced in value by the completion of the road. The length of the proposed line of railway will be about 50 miles, and it will connect with the Boston & Maine and Central Vermont systems.

WILKES BARRE & NORTHERN.—A. H. Holbrook, Wilkes Barre, Pa., writes us that the projected length is 12 miles, touching Luzerne, Dallas and Harvey's Lake. The road is now completed from Luzerne to Dallas, six miles, and will be in operation by Dec. 1. The remainder of the road is now under construction. Pres., John B. Reynolds, Wilkes Barre, Pa.; Ch. Engr., Thos. Wright, Luzerne, Pa.

Southern.

ATLANTA & ALABAMA.—A. R. Littlejohn, New Orleans, La., is quoted as saying that this railway, noted in our issue of Oct. 8, as the Atlanta & Selma, is projected from Atlanta, Ga., via Selma, Ala., to New Orleans. R. M. Mitchell, of Atlanta, is president and general manager, and Eb. T. Williams, attorney. The line runs centrally between the Georgia Pacific and the Atlanta & West Point and Western of Alabama railways as far as Selma, and thence in a direct line to New Orleans. Its cost is estimated at $20,000 per mile. The territory through which it passes has valuable timber lands, many valuable water powers and minerals, and is practically undeveloped. Between all points east of Atlanta and west of New Orleans a distance of 169 miles will be saved.

CARRABELLE & APALACHICOLA.—It is stated that work was to have begun on this railway Oct. 22. It is projected between Apalachicola and Carrabelle, Fla.

CHATTANOOGA SOUTHERN.—It is reported that the Chattanooga Southern may be extended from Gadsden, Ala., its present terminus, to Birmingham, a distance of about 55 miles. Gen. Mgr., M. F. Bonzano, Chattanooga, Tenn.

GREENWOOD, ANDERSON & WESTERN.—W. B. Strang, Jr., & Co., of New York, who have the contract for building a 15-mile extension from Seivern to Batesburg, S. C., have petitioned for the appointment of a receiver. They claim that they have not been paid for the work done and ask that the lease of the Carolina Midland to the Greenwood, Anderson & Western be included as part of the property of the latter line. The Greenwood, Anderson & Western has leased the Carolina Midland, extending from Allendale to Seivern, S. C., 55 miles, and proposes to build from Seivern via Greenwood to Greenville, S. C., 115 miles. Twelve miles of this extension have been graded and six miles of track laid.

JACKSONVILLE, TAMPA & KEY WEST.—Judge James W. Locke, in the United States Court, has ordered a postponement of the sale of this railway until the first Monday in March, 1897. The sale was to have taken place Nov. 2, but the complainant, the Pennsylvania Co., for insurance on lines and granting annuities, petitioned for the change on account of the disordered condition of the money market.

PARIS MOUNTAIN & GREENVILLE.—The Paris Mountain Land Co., of Greenville, S. C., has asked for a charter. The company is to be capitalized at $10,000, and besides dealing in real estate, proposes to build a railway from Greenville to Paris Mountain. This may be either a steam or electric road. The incorporators are W. J. Thackston, H. C. Markley, O. B. Cagle, W. T. Thackston, J. F. Richardson, A. G. Furman, A. G. Gower, H. J. Haynesworth, Frank Hammond, of Greenville; S. M. Grist, Yorkville, and S. F. Trolobridge, of Piedmont.

NORFOLK & WESTERN.—This company is said to be considering the extension of its line to Huntington, from Kenova, W. Va., by building a branch three miles long. Gen. Mgr., J. H. Sands, Roanoke, Va.

ROANOKE & SOUTHERN.—This line is leased by the Norfolk & Western, extends from Winston, N. C., to Roanoke, Va., 102 miles, and will be sold under foreclosure Nov. 24. The upset price is to be $500,000, and it is probable that the Norfolk & Western will acquire the road.

SEABOARD AIR LINE.—This company has decided to extend its line from Cheraw to Columbia, S. C., via Kirshaw and Camden. Work is expected to begin soon.

SOUTH GEORGIA.—Chas. B. Dunn, Ch. Engr., Morven, Ga., writes us that rails are laid to Morven and prospects are favorable for completing the line at an early date. The line as finished, noted in our issue of Oct. 22, is six miles long. The projection is 22 miles long. Pres., J. W. Oglesby, Hartpine, Ga.

TENNESSEE, GEORGIA & ATLANTIC.—The Augusta, Ga., "Chronicle," says that some contracts for building this railway, noted in our issue of Oct. 22, have been let and that preliminary arrangements are being rapidly made.

VIRGINIAS.—A press dispatch from Huntington, W. Va., dated Oct. 30, says that Gen. Wm. G. Dacey, 1 Broadway, New York city, who is president of the Virginias Ry. Co., and for a year past has contemplated the construction of a road from Huntington, up Guyan River and on through the Virginias, where it will connect with a line leading to the seacoast, states that if McKinley is elected he will put 1,000 men at work on this new line of road inside of 60 days.

Northwest.

DES MOINES & KANSAS CITY.—A press dispatch says that the Des Moines & Kansas City will, on Nov. 1, have its narrow gage line completed to standard between Des Moines and Van Wert, Ia., a distance of 75 miles.

MARSHFIELD & SOUTHEASTERN.—It is reported that the Marshfield & Southeastern R. R. will be extended from Marshfield, Wis., to Princeton, a distance of 90 miles, early next spring. The completion will, by connecting ing with the Chicago & Nortwestern at Princeton, Wis., make the shortest line from Marshfield to Milwaukee. It is also stated that extensive machine shops are to be built and maintained at Marshfield, and that the town will probably be made a division point. Gen. Mgr., Chas. H. Grundy, Marshfield, Wis.

TRACK ELEVATION AT CHICAGO.—Alderman O'Neill, chairman of the special track-elevation committee, has secured the passage of two ordinances, which will tend to push to completion track elevation at the stock yards. The first order directs the mayor and commissioner of public works to require the Metropolitan and Lake St. Elevated railway companies to elevate the plane of their tracks at Rockwell St. to such a height as shall be necessary to enable the surface roads in Rockwell St. to elevate their tracks in accordance with the ordinance passed June 11, 1896. The second order instructs the mayor and the commissioner of public works to require the Lake Shore & Michigan Southern and the Chicago, Rock Island & Pacific railway companies to elevate their tracks between 37th and 47th Sts., in accordance with the ordinance passed July 9.

WISCONSIN CENTRAL.—A press dispatch from Neenah, Wis., says that this company will soon construct a solid roadbed at Neenah in place of nearly 1,500 ft. of trestle work. An average depth of 11 ft. of filling will be required to bring the roadbed up to the present elevated track and it is estimated that the improvement will require nearly 2,000 carloads of gravel.

Southwest.

ATCHISON, TOPEKA & SANTA FE.—This company is considering the building of an extension from Perry, Okla., to Stillwater, a distance of 25 miles. Work will probably be commenced next spring.

GULF, COLORADO & SANTA FE.—It is stated that the business men of Richmond, Tex., are raising a bonus to extend this railway into Richmond. A spur about two miles in length will be needed.

GULF & BRAZOS VALLEY.—A dispatch from Mineral Wells, Tex., quotes Pres. W. A. Squires as saying that all arrangements for the construction of this road from a connection with the Texas & Pacific Ry. to the Jack county line on the north, a distance of 25 miles, have been completed, and that work on the line has commenced. When the road reaches the Jack county line money will be obtained on its bonds, and after paying all liabilities there will be a surplus of fully $100,000 to be used in construction north to Henrietta and south to Velasco. Additional money will be received out of the company's bonds as sections of ten miles are completed. Connection will be made at Henrietta with the St. Louis, Oklahoma & Texas Air Line Ry., which is building to that point from Sapulpa, in the Indian Territory, the southwestern terminus of the St. Louis & San Francisco Ry. With this connection this road would be the short line to St. Louis for a populous and productive portion of Texas.

KANSAS CITY, PITTSBURG & GULF.—Robert Gillham, Ch. Engr., is quoted as saying that tracklaying is progressing at the rate of nearly one mile per day. Between Beaumont, Tex., and the Sabine River, the line is graded. This section is 30 miles in length. Track will be laid from the Sabine River to Lake Charles Junction, a distance of 20 miles, by Nov. 15. Between Horatio and Mena, Ark., a distance of 60 miles, 25 miles are graded, and tracklaying will begin in December.

LAREDO.—The business men of Laredo, Tex., are considering the building of a railway from Laredo to the Minerva Coal Mines. C. Millard is surveying the route. T. T. Brewster is interested.

NEW ORLEANS & SOUTHERN.—This railway which has been operated by the New Orleans & Western, has been sold, it is stated, to Patrick Campbell who is said to represent London capitalists. The purchase price was $51,500. The road is 66 miles long, standard gage, has six locomotives and 68 cars. Receiver, G. S. Taylor, New Orleans, La.

TEXAS & PACIFIC.—A report from New Orleans, La., says that this company has asked permission to build several terminal tracks and a viaduct inside the city limits. Gen. Mgr. L. S. Thorne, Dallas, Tex.

Rocky Mountain and Pacific.

ALAMEDA & SAN JOAQUIN.—Application has been made for a franchise to construct a railway from a point commencing at or near the coal mines of the San Francisco & San Joaquin Coal Co., in Alameda county, to a point near the city of Stockton, Cal.; notice is given that bids will be received by the council for said franchise until Nov. 9. J. M. McCall, Cy. Clk.

CHAMELA, GUADALAJARA & SAN LUIS POTOSI.—Arrangements are said to have been completed for the construction of the first section of this railway in Mexico. The plans from Guadalajara to Chamela, the Pacific coast terminus, a distance of about 250 miles, have been approved by the Mexican authorities. The plans from Guadalajara to San Luis Potosi, about 187 miles, are now being made, under the direction of Engineer Corona, of Guadalajara. It is expected to begin active work in December at Guadalajara on the Mexican Central.

RIO GRANDE WESTERN.—E. J. Yard, Ch. Engr., Salt Lake City, Utah, writes us that the statement under the head of this railway in our issue of Oct. 22, concerning the extension now building, is in error. The extension was given as 36 miles from Richfield to Belmont. It should have read 36 miles from Salina to Belknap, via Richfield and Elsinore.

STREET AND ELECTRIC RAILWAYS.

LEWISTON, ME.—The extension of the Lewiston & Auburn Electric R. R. to Minot and Mechanic Falls, and eventually to connect with the Norway & South Paris Electric Ry., is being considered.

MANCHESTER, N. H.—The Manchester St. Ry. Co. has begun work upon the extensions noted in our issue of last week.

BRIDGEWATER, MASS.—Meetings of citizens have recently been held to promote the building of an electric railway from Brocton to Bridgewater, noted in our issue of Oct. 22. It is proposed to capitalize the company to be formed at $10,000 per mile. I. N. Nutter, J. H. Strong, R. W. Nutter and J. S. Allen are interested.

GARDNER, MASS.—The "News" states that two companies are trying to secure a franchise to build an electric railway from Gardner to Fitchburg. F. S. Coolidge, E. F. Blodgett, D. C. Miles, and J. A. Stiles are interested.

SPRINGFIELD, MASS.—The selectmen of West Springfield have granted a franchise to the Springfield, Agawam & Suffield Electric Co.; the company is to pay $125,000 to assist in building a bridge between Springfield and West Springfield.

WALPOLE, MASS.—The franchise granted by the selectmen about a year ago to the Norfolk Central St. Ry. Co., has lapsed because of the failure of the company to get its road into operation before Oct. 1, as per agreement, and there is some question whether it will be regranted.

WICKFORD, MASS.—It is stated that the route for the new Seaview Ry. is being cleared and that grading is to begin at once. It is now stated that the proposed new road will start from the Wickford depot, on the Newport & Wickford Ry., thence run south to the village of Hamilton, and then practically follow the shore line to Narragansett Pier. The new road will open up a territory along the shore which is adapted to the building of summer residences.

ROCKVILLE, CONN.—The town council has reported favorably upon the application of the Rockville & Ellington St. Ry. Co. to lay tracks. The railway company is to pay to the city $1,000 a year and cars must be running by June, 1897.

WILLIMANTIC, CONN.—Persons representing a syndicate of capitalists are said to have been negotiating for the franchise of the Willimantic St. Ry. Co. The charter covers the principal highways and streets extending from the northerly end of the village of South Coventry through and about this city, Windham Center, South Windham and Franklin to Baltic. It is understood that negotiations are completed.

ONEONTA, N. Y.—The Oneonta St. R. R. Co., it is reported, will build a power-house and station on Mechanic St., at the foot of Chestnut St.

PATCHOGUE, N. Y.—The board of trustees will take action Nov. 11 upon the application of the Patchogue & Port Jefferson Traction Co. to build and operate a trolley road in Patchogue.

QUEENS, N. Y.—There is a probability that the Long Island Electric R. R. Co. will early in January have cars running from Queens to Brooklyn. The grading of the road is completed almost to Queens, and the rails have been laid as far as Hollis. The work of laying the tracks, keeps in advance of the macadamizing. The stone has been laid as far as the village line of Jamaica. The tracks, so far as laid, are complete, with the exception of pavement that will be laid between the rails. The work is progressing favorably.

CAMDEN, N. J.—A large force of men is reported to be at work along the River road in Stockton extending the line of the Camden & Suburban Ry. Co., from State St. to Cooper Ave.

ASHLAND, PA.—It is reported that an electric railway may be built to connect Centralia and Ashland.

BRADFORD, PA.—A trolley line is to be built from this place to Lewis Run in the near future.

BRISTOL, PA.—The Doylestown, Pa., "Intelligencer" says that the extension of the Newtown & Bristol Electric Ry. up the Newportville road to Fallsington and Morrisville will doubtless be under construction next spring. Joseph L. Lovett and M. V. Lynn, of Emilie, have secured right of way from property owners on the route almost without exception to Morrisville borough line.

DOYLESTOWN, PA.—The East Penn. Traction Co. proposes to build an electric railway to connect Doylestown, Centreville, Newtown, New Hope, Morrisville, and Bristol. The capital stock of the company is $350,000. A large number of names is published, of subscribers to the stock, among which are: Chas. F. Burger, Brooklyn, N. Y., Prest.; Robt. E. Pleive, Geo. H. Kelwig, New York city; Walter Brown, Samuel S. Harper, Jas. M. Rooney, Philadelphia; Malcomb A. Buckman, Newtown; James T. Fish, Fallsington.

PITTSBURG, PA.—Work on the Brownsville extension of the Pittsburg & Birmingham traction line is being pushed forward rapidly. Pres. Harry Moore is quoted as saying that a new route will circle the hill top, as now, taking in the principal points of Beltzhoover, Knoxville and Allentown, and when business justifies it, the company proposes to extend the line into Baldwin township. ——The Consolidated Traction Co. was to have begun on Oct. 26 to tear up its tracks on Penn Ave., from 34th to East Liberty St. It is expected that the work will take six weeks.

PITTSBURG, PA.—The Millvale & Etna St. Ry. Co. has been granted permission by the Millvale authorities to double track its line through that borough and for an extension to Bauerstown.

STEELTON, PA.—Consent has been given to the Citizen's Passenger Ry. Co. to make several extensions and rebuild portions of the road.

WILLOW GROVE, PA.—A trolley line will, it is said, be put in operation from Willow Grove, Pa., to Trenton, N. J. The company will be known as the East Penn Traction Co. A. D. Cadwallader, of Yardley, Pa., is president, and David Hanley Stone, of this city, secretary. Surveys have been made, and if possible the company will endeavor to have cars running before Jan. 1, 1897.

WILKESBARRE, PA.—Surveys are stated to have been made for a new trolley road from this city to Hazleton and the scheme of building the road and connecting the various electric systems from Carbondale to Hazleton promises to be realized. The new line will be about 24 miles between this city and Hazleton, and as the distance by steam roads is 49 miles, the trolley can readily compete with the existing roads for time, and at a much lower price. The Wyoming Valley and the Lehigh Traction companies are said to be interested.

WASHINGTON, D. C.—L. H. Hyer, Ch. Engr., 1216 F St., N. W., writes us that the projected length of the Washington, Annapolis & Chesapeake Electric R. R. is 27 miles, from Washington via Columbia Park, Mitchellville, Davidsonville, Hills Point, Bay Ridge, to Annapolis. Most of the right of way is secured; the survey is finished and estimates will soon be furnished to the directors.

CHARLESTON, S. C.—Chas. H. Deane and others, noted last week, propose to build at once an electric railway system in this city. The name of the company is the Charleston Electric Ry. Co. Capital stock not less than $300,000, nor more than $1,000,000. Application has been made to the city council for a franchise. The length will be 20 to 25 miles, and with equipment will cost more than $200,000, it is estimated. The company gives bonds to begin the work of construction within ten days after permit is granted. Address P. H. Gadsen.

GREENVILLE, S. C.—The secretary of state has issued a commission to the Paris Mountain Land Co. It proposes to build a railway through Greenville to Paris Mountain, to be operated by steam, horse or electric power. The capital stock is $10,000. The incorporators are S. F. Trowbridge, of Piedmont; Sam M. Grist, of Yorkville; W. J. and W. F. Thackston, H. C. Markley, O. B. Cagle, J. F. Richardson, A. G. Furman, A. G. Gower, H. J. Haynsworth and Frank Hammond, all of Greenville.

AUGUSTA, GA.—It is reported that a company is considering the building of an electric line from Augusta to Aiken, S. C., to pass through Langley, Graniteville and Bath. The road will be about 18 miles long.

NEW ORLEANS, LA.—The New Orleans & Western Co., it is stated, has determined to use trolley motors, in addition to the compressed air, for hauling freight cars in its yards at Port Chalmette. Six motors will be placed in service. Ch. Engr., W. W. Tomlinson.

COLUMBUS, O.—In addition to the $20,000 of the receiver's certificates recently authorized for running expenses, Receiver George H. Worthington has applied to the Court for permission to issue $200,000 in certificates to pay for building extensions of the Columbus Central St. Ry.

CLEVELAND, O.—The Cleveland & Southern Electric Ry. Co. has been incorporated by H. C. Mason, F. L. Taft, Alfred P. Biddle, A. M. Austin and C. H. Olds. The road will be for passenger, freight and mail service, and the route is designed for an entirely new field, passing through Cuyahoga, Medina, Summit and Stark counties. The termini will be Cleveland and Massilon.

DAYTON, O.—The Dayton & Miamisburg Traction Co. is said to be considering some extensions, one of which is to Hamilton.

HAMILTON, O.—The Cincinnati & Miami Valley Traction Co. has been incorporated with headquarters at Hamilton, to build and operate an electric railway from the southern border of Butler county, through Hamilton, Middletown, Trenton, Franklin, on across Butler county, the Edge of Warren and to the northern edge of Montgomery county. The capital stock is $100,000 divided into 1,000 shares of $100 each. The incorporators are Dennis Dwyer, William E. Mays, Albert Emanuel, John I. Tracy and Albert J. Dwyer.

IRONTON, O.—Henry Cook, contractor, is pushing the work of installing a new electric railway.

LIMA, O.—Receiver J. N. Hutchison has sold the Lima St. Ry. plant and franchise to E. W. Moore, of Cleveland, for $50,250. It is understood that the purchaser, E. W. Moore, represents the bondholders. The company intends to begin work of repairing and rebuilding the line at once. In addition, several miles of new track will be constructed, connecting different points, but just what additions will be made has not been fully determined.

AURORA, ILL.—The new electric car line between Aurora and Batavia, has been completed. The road is eight miles in length, substantially built throughout.

JOLIET, ILL.—The street railway company is said to be considering an extension from Lockport to Lemont.

MILWAUKEE, WIS.—Excavations for the Milwaukee & Waukesha Electric Ry. were begun Oct 22 at 1st and Lincoln Aves. While the operations are now on a small scale, it is said a large force is soon to be put to work.

ST. PAUL, MINN.—Local papers state that citizens are considering the building of a belt line street railway. Among those interested are: M. D. Munn, R. A. Kirk and J. W. Bishop.

BURLINGTON, IA.—Articles of incorporation of the Burlington Ry. & Light Co. have been filed by J. J. Ranson, G. H. Higbee, E. C. Walsh, A. E. Walsh and C. H. Walsh. The capital stock is $1,250,000. The object of the incorporation is the ownership and operation of steam and street railways, gas and electric light plants, power and steam heating plants, etc.

MASON CITY, IA.—A press report states that the contract for grading for the Mason City Electric Ry. line has been let to Cullin & Co., of Cedar Rapids; 8¼ miles are to be put in and the line is to be completed in 60 days.

SIOUX CITY, IA.—A. F. Call, Vice-Pres. Sioux City Traction Co., is quoted as saying that it had been decided to make an important extension of the company's West 7th St. line. The extension will be built from the end of the line for four blocks up Ross St.

ST. LOUIS, MO.—The St. Louis, Fenton & Southwestern Ry. Co., which has been granted a franchise to build an electric railway through St. Louis county, over a private right of way, from Carondelet to Big River, in Jefferson county, has petitioned the county for the privilege of changing its route and laying T-rails on road crossings. It also asks to be allowed to use electric automatic signal bells at all crossings. John Scullin is asked to extend his street railway 1½ miles, by citizens.

FAYETTEVILLE, ARK.—Local newspapers state that the first step towards preparing for the construction of the street railway has been taken and the work will be continued until fully accomplished.

LOS ANGELES, CAL.—The Mateo St. & Santa Fe Ave. St. Ry. Co. is asking that a franchise be advertised for sale for the construction and operation of a street car line.

SANTA MONICA, CAL.—The "Outlook," states that all deeds have been signed for right of way for the road to Calabasas district. Supervisor Hay says the cost of constructing the road will be in the neighborhood of $2,500.

SAN DIEGO, CAL.—The San Diego Electric Ry. Co. has been granted additional franchises for the extension of its road, and before the winter season is over several more miles of trackage will be added to this system.

VENTURA, CAL.—Application has been made to the board of supervisors asking that a franchise be granted to E. S. Thatcher, trustee, to construct and operate a steam or electric railroad in Ventura county, from San Buenaventura to the foot of the grade of the Upper Ojai Valley. The board will receive bids for said franchise until Nov. 23. A. S. Kenagy, Cy. Clk.

GUADALAJARA, MEX.—The street car company will shortly change the traction of its lines to either electricity or compressed air. Mr. Blake, the engineer, is engaged in investigating the subject and upon rendering his report work will be commenced.

MONTREAL, QUE.—The "Gazette" says that the Montreal St. Ry. Co. is pushing the construction of its Guy St. and Cote des Neiges line. The laying of the rails has commenced on the Point St. Charles end of the route, one track having already been built on Shearer, between Centre and William Sts.

DANVILLE, QUE.—It is stated that the Asbestos & Danville Ry. Co. will apply to the legislature for power to build and run an electric railway from Danville to Asbestos, Richmond county.

ELECTRIC LIGHT AND POWER.

PITTSFIELD, MASS.—The Pittsfield Electric Light Co., it is reported, will probably soon add new machinery to its plant, to cost about $5,000, as it is proposed to supply Dalton, Mass., with light. The company is considering the plan of utilizing water power.

WAKEFIELD, N. Y.—It is reported that the Eastchester Electric Light Co. has been refused permission to supply this place with light.

BROOKLYN, N. Y.—E. O. Matthews, chief of bureau of yards and docks, Washington, D. C., in his report, recently submitted, recommends an additional dynamo and engine for the light plant at the Brooklyn navy yard, at a cost of about $12,000.

BUFFALO, N. Y.—The council has voted to ask for bids for lighting the city with either gas or electricity. Councilmen Ash, Adam, Jipp or Klink can be addressed.

COXSACKIE, N. Y.—It is reported that a company is being organized to build an electric light plant in this town.

CORNING, N. Y.—The Corning Heat, Light & Power Co. has petitioned the council for a franchise for an electric light plant. A. D. Welsh, Engr., and Hosea A. Clark, Corning, are interested.

GENEVA, N. Y.—Bids are asked until Nov. 12 for electric lighting for five years, beginning May 7, 1897. About 100 arc lights will at least be wanted. S. D. Willard, Chn. Com.

HAMBURG, N. Y.—It is reported that the contract with the Hamburg Electric Light Co. expired Oct. 1, and the village board has completed arrangements by which the company is to furnish 2,000 c. p. lights for five years at $62.50 a lamp a year. This is somewhat lower than the former price.

MORRISVILLE, N. Y.—Press reports state that the Morrisville Electric Light Co.'s plant at Eagleville was destroyed by fire Oct. 26, causing a reported loss of about $4,000.

RICHMOND (S. I.), N. Y.—The Richmond County Electric Co., Pres., Erastus Wiman, and the Midland Electric Light, Heat & Power Co., in which Albert Reynaud is interested, have applied for franchises.

RICHMOND HILL (L. I.), N. Y.—At the meeting of the trustess Oct. 26, a proposition for lighting the village was received from the Jamaica Electric Light Co. The offer is to furnish arc lights of 1200 c. p. at $100 a light a year. The company will be ready to turn on the lights by Dec. 1. Incandescent lights will also be furnished to private houses. The company has just renewed its contract with Jamaica and is building a large plant between Richmond Hill and Jamaica, as noted in our issue of last week.

TROY, N. Y.—Bids are asked until Nov. 14 for electric light wiring, tubing, etc., for the new county court-house. Archs., M. F. Cummings & Son, 10 Times Bldg., Troy; F. P. Harder, Secy., Court House Comrs.; J. H. Peck, Chn.

RIDGEWOOD, N. J.—The Ridgewood Electric Light Co. has again been awarded the contract for lighting the village streets, its bid being the same as last year, $70 per arc light. Next year more lamps will be needed. The capacity of the present plant is 35 arc lights, and the contract calls for 40.

RIVERTON, N. J.—It is stated that after endeavoring for several years to gain admission into the borough of Riverton, the Beverly Electric Light Co., of Beverly, N.J., has succeeded in obtaining the sanction of council to run poles and wires through the town. The extension of the system from Beverly will require an enlargement of the plant to three times its present capacity, and probably its removal to Riverside.

PITTSBURG, PA.—Bids are asked until Nov. 7 for lighting the South Side Market House. E. M. Bigelow, Dir. Pub. Wks.

ROCHESTER, PA.—It is reported that the Rochester Electric Light Co. is about to double the capacity of its plant, by erecting an addition and putting in a new 150-HP. engine and two new boilers.

WELDON. N. C.—The Roanoke Navigation & Water Power Co. is reported to have been granted a franchise for an electric light plant in this place.

COLUMBIA, S. C.—An electric light plant, it is stated, will be added to the equipment of the new Granby Cotton Mfg. Co.'s mill at this place, which will begin operations Nov. 15. Other new mills noted under Manufacturing Plants will include electric plants in their equipment.

CUTHBERT, GA.—We are informed that the General Electric Co., 44 Broad St., New York, has been awarded the contract for a complete electric light plant, as advertised in Engineering News, at $6,192. Robt. L. Moye, Mayor.

COAL CREEK, TENN.—R. M. Edward & Co. are reported as contemplating the erection of a 15-arc and 200-incandescent light plant.

ATTICA, O.—It is stated that the question of constructing an electric light plant is being considered by the citizens.

BLANCHESTER, O.—The council on Oct. 20 awarded to the Fort Wayne Electrical Corporation, Fort Wayne. Ind., the contract for the machinery for the proposed plant at $6,300; the contract for the power house was awarded to Brooks Bros., of Jackson, Mich., at $3,100, and the contract for the engine was awarded to I. & E. Greenwald, Cincinnati, O., at $2,600; Engr., G. L. McKibben, Van Wert, O.; Owen Brown, Village Clk.

BLUFFTON, O.—The construction of an electric light plant is reported as being considered.

BRYAN, O.—Frank B. Rae, Elec. Engr., 910 Fort Dearborn Bldg., Chicago, writes us that the following bids were received for an electric light plant, delivered and erected:

One 125-HP. and one 60-HP. direct-connected engine; one 200-HP. heater; two separators; erection and pipe work:

McIntosh & Seymore, Auburn, N. Y. engines only	$2,450
Fischer Foundry & Machine Co., Pittsburg "	2,562
Ball Engine Co., Erie, Pa., complete	3,661
Russell & Co.,[1] 4-valve Russell engine	[2]3.272
Other items	[2]745
McEwen Eng. Co.,[3] complete	2,885

Two 60-light arc dynamos; 100 arc lamps; one 75 K-W. alternating dynamo and switchboard; 31 transformers, capacity 1,000 lights; meters for 1,000 lights; switchboard, etc.:

Fort Wayne Electric Corporation, Fort Wayne, Ind.	[2]$8,165
Western Electric Co., Chicago	8,218
General Electric Co., Cincinnati office	8,518

Pole line construction, circuits for 63 street and 40 commercial arc lights; primary circuits for 1,000 incandescent lights; erection of converters; arc lamp suspension, etc.:

Craighead Engineering Co., Cincinnati, O	$6,450
Chase Construction Co., Detroit, Mich	4,960
Bissell, Dodge & Erner Co., Toledo	[2]4,929
Adams, Green & Co., Morrison, Ill	5,985
Fort Wayne Electric Cor., Fort Wayne, Ind	6,153

---

[1] By Arbuckle-Ryan Co., Toledo; [2] awarded contracts; [3] by Bissell, Dodge & Erner Co., Toledo.

EAST PALESTINE, O.—Bids are asked until Nov. 7 for furnishing and constructing a complete electric light plant. J. H. Logan, Mayor; John Archibald, Clk.

LAKEWOOD, O.—Bids are asked until Nov. 20 for constructing an electric light plant at this place, according to reports. Wm. F. Closse, Clk.

LONDON, O.—It is stated that this place has sold $2,000 of 6% electric light bonds.

FENNVILLE, MICH.—Ira Hutchins has been granted a 15-year franchise for an electric light plant in this place, according to reports.

MARQUETTE, MICH.—The electric light and power commission has recommended to the council the construction of a new dam at the upper falls, steel or iron head gates, the purchase of transformers, etc., for an electric water-power plant estimated to cost about $52,950. J. R. Van Evera, Alfred Kidder and Sampson Bier compose the commission.

NEGAUNEE, MICH.—Bids are asked until Nov. 14 for constructing an electric light plant. F. B. Rae, Engr., 134 Monroe St., Chicago, Ill.; Mapor Kirkwood can be addressed.

CHICAGO, ILL.—It is reported that the Hyde Park Electric Light & Power Co. will meet Nov. 22 to authorize the issue of $200,000 in 6% bonds, half of which will be used for extending the plant and the remainder for a new mortgage.

LODI, WIS.—Thos. Hackel is reported to have been granted a ten-year franchise for an electric light plant in this city.

SOUTH MILWAUKEE, WIS.—Bids were asked until Nov. 4 for constructing an electric light plant, according to reports. T. McGovroy, Village Clk.

FALLS CITY, NEB.—It is reported that at an election held Oct. 6 it was voted to issue bonds for extending the electric light plant.

GUTHRIE, OKLA.—The council is stated as considering the question of constructing an electric light plant and water-works.

CAMERON, MO.—Bids are asked until Nov. 10 for the purchase of $12,000 of electric light bonds. Bids for the construction of the plant will be asked for soon after the bonds have been sold. Consult. Engr., A. L. McRae, 306 Oriel Bldg., St. Louis. Mo.

FORT WORTH, TEX.—Press reports state that M. R. Rosson proposes to purchase the electric light and power plants in this city for a syndicate of capitalists of Glasgow, Scotland. It is proposed to enlarge them and make a number of improvements.

AZUSA, CAL.—Bids are asked until Nov. 10 for constructing the power works on the San Gabriel River, as noted in our issue of Oct. 22. The specifications call for bids on 13 sections of work, seven are tunnels and the others wooden pipe, steel siphons, cement work, gate house and tunnel linings. There will be 28 tunnels, aggregating 17,100 ft. in length and of diameter sufficient to carry the entire summer flow of the river, about 5,000 ins.; 8,600 ft. of wooden pipe. The water wheels and dynamos will be located near the H. C. Robert's homestead or at the mouth of the canyon. The entire length of tunnels and ditches where wooden pipe is not used will be lined on the bottom and sides with concrete cement. There is an option in the bidding of 10,900 ft. of conduit in case no wooden pipe is used. Engr., E. C. Balch, 28 Baker Block, Los Angeles, Cal.

MODESTO, CAL.—The committee has submitted a report on the proposed electric light plant to cost about $16,000. It is probable that nothing will be done for the present. The plant proposed will have 30 arc and 750 incandescent lights. Messrs. Hewel, Harter and Hatton compose the committee.

NOGALES, ARIZ.—It is reported that Howell Hinds and associates have recently been granted concessions for lighting Hermosillo and Guaymas by electricity, and that within the next year extensive plants will be erected in both cities.

NEW COMPANIES.—Burlington Ry. & Light Co., Burlington, Ia.; $1,250,000; J. J. Ransom, G. H. Higby, E. C. Walsh, A. E. Alsh, C. H. Walsh. The object of the incorporation is the ownership and operation of steam and street railways, gas and electric light plants, power and steam heating plants, etc. The incorporation is to run 20 years.

Greater New York Electric Light & Power Co., New York, N. Y.; $50,000; Jacob Fleischhauer, Allan Lexow, Chas. K. Lexow.

Laguna Water & Power Co., San Diego, Cal.; $3,000,000, with $400,000 paid in; J. W. Thompson, Edwin Parker, Chas. D. Long, E. E. Shaffer and H. C. Gordon, all of San Diego.

Orient Electrical Co., Youngstown, O.; $25,000; Lucius E. Cochran, Geo. M. McKelvey, Wick C. Cans, Mason Evans, A. B. Mannix.

Brinkley Electric Light & Power Co., Brinkley, Ark.; $15,000; J. J. Ferrell, M. A. Ferrell, F. E. Sapp.

Aberdeen Gas & Electric Light Co., Aberdeen, S. Dak.; $75,000; Fred A. Bartholemew, John S. Bartholemew, Geo. B. Clifford, William Summers, Geo. W. Jenkins.

BRIDGES

HARTFORD, CONN.—The council has authorized the mayor to call a meeting of citizens to consider the question of appropriating money for building a 70-ft. masonry bridge over the Park River at a cost of $25,000, as petitioned for by the Pope Mfg. Co.

SYRACUSE, N. Y.—Bids are asked until Nov. 9 for constructing a foot bridge over the Erie Canal at West Genesee St. M. Z. Haven, Cy. Clk.

ARLINGTON, N. J.—The Erie R. R. Co. has awarded the contract for a new double-track steel girder bridge over the Passaic River between West Arlington and North Newark to the New Jersey Steel & Iron Co., of Trenton, N. J. The structure will have a 147 ft. draw and four spans of 95¾ ft. each in length.

BRADDOCK, PA.—Press reports state that the plans of the new bridge, which it is proposed to erect across the Monongahela River at Braddock, were received at the office of the United States engineer in Pittsburg Oct. 20. Secretary of War Lamont has approved of the alterations made in the plans, and the company is now at liberty to begin the work. The bridge is to be erected by the Union R. R. Co. at the foot of 13th st., Braddock, and will be a double structure. The driveway will be above the railway tracks, and the whole bridge is to be built of steel trusswork. The channel spans are 361 ft. long, and the bridge will be 56.66 ft. above low water mark.

PHILADELPHIA, PA.—Bids are asked until Nov. 10 for repairing bridges, etc. T. M. Thompson, Dir. Pub. Wks.

PITTSBURG, PA.—It is stated that Charles Jutte, Pittsburg, has sold the bridge charter over which the Braddock & Homestead Ry. will pass. The steel bridge will be built in West Braddock, and will cross the river at that point.

PITTSBURG, PA.—A resolution has been introduced into councils authorizing the department of public works to have plans prepared for re-building the bridges carrying Penn, Shady and Highland Aves., over the Pennsylvania R. R., at an estimated cost of $35,000. The Consolidated Traction Co. will use the bridges and proposes to pay two-thirds the expense.

WASHINGTON, D. C.—The district commissioners and the board of trade have decided in favor of a single viaduct at Kendall Green for the Baltimore & Ohio R. R. Co.

ALBANY, GA.—Bids are asked until Nov. 16 for constructing a double-track iron and steel bridge over Flint River, according to reports. The structure will have two spans of 140 ft. each. W. O. Watson, Comr. Bd. Roads.

BAY CITY, MICH.—Bids are asked until Nov. 9 for constructing a trestle approach to the 23d St. bridge. J. H. Bloomshield, Clk. Bridge Comrs.

KANSAS CITY, MO.—It is stated that the officials of the Missouri, Kansas & Texas system have decided to remove the wooden bridges along the road and place Howe truss steel bridges in their stead. The number of bridges between Texas Junction and Franklin Junction is 37. J. W. Petheram, Ch. Engr., Dallas, Tex.——The park board has decided to construct a stone and steel bridge over Anderson Ave., at Independence Boulevard. Engr., Robt. Gillham.

ST. LOUIS, MO.—The members of the North St. Louis Improvement Association have appointed Wm. Burden, J. K. Cummings and A. H. St. Clair a committee to solicit subscriptions for the formation of a new company to construct a third bridge over the Mississippi River at this city. Congressman Chas. F. Joy, of St. Louis, is reported as to support the matter in Congress.

ST. JOSEPH, MO.—Bids are asked until Nov. 7 for constructing a bridge in Bloomington township, according to reports. W. B. Hazen, County Surv., St. Joseph.

HOUSTON, TEX.—The city engineer has been authorized to prepare plans for a bridge over White Oak near Beauchamp Springs, to cost $6,384.

LOS ANGELES, CAL.—Bids are asked until Nov. 5 for constructing a 4-span pile bridge over the San Gabriel River on the Whittier Road. Address the county clerk. It is reported that the Southern California Ry. Co. is preparing to build a steel girder truss bridge across the Los Angeles River on the line to San Diego. This bridge will have two spans of 149 ft. each, and the grade line will be higher than the present trestle used at that point. A similar bridge is to be built at Rivera. That structure will have two spans of 100 ft. each. Gen. Mgr. K. H. Wade, Los Angeles; Ch. Engr., F. T. Perris, San Bernardino, Cal. The council received bids as follows for constructing a bridge over the Los Angeles River on the Los Felis Road. Ledbetter & Mercereau 130-ft. span and 160 ft. of pile trestle, $7,383; D. P. N. Little, $3,347 to $4,433; Gillard & Smith, $6,500, and Sawyer & Arthur, $4,225 to $5,337.

MADDINGTON FALLS, QUE.—The Dominion Bridge Co., Ltd., of Montreal, has been awarded the contract for building a new steel bridge at this place for the Drummond County Ry. Co. at a cost of about $26,000. Gen. Mgr. W. Mitchell, Drummondville, Que.

VANCOUVER, B. C.—It is reported that the council has voted to direct the engineer to prepare plans for a new bridge at Point Ellice. The structure will have three 217-ft. spans, and is estimated to cost about $150,000. T. H. Tracy, Cy. Engr.

CHARLOTTETOWN, P. E. I.—L. L. Beer, James Paton, H. C. McDonald, T. A. McLean and L. E. Prowse have been appointed a committee to consider the question of erecting an iron bridge over the Hillsboro River.

BUILDINGS

BOSTON, MASS.—Bids are asked until Nov. 13 for constructing two brick school buildings; bonds of $30,000 and $20,000 are required. Archs., T. M. Clark, 22 Congress St., and James Mulcahy, 43 Milk St., Boston; Edward H. Dunn, Chn. Com.

BROOKLYN, N. Y.—The Masons of this city are considering the question of constructing a Masonic hospital. A meeting was held last week at Aurora Grata Cathedral, Bedford Ave. and Madison St., to consider the subject.——V. G. Hall & Co. have sold for Mrs. Eugene Schieffelin, of New York, 10 lots on Second St., on which it is proposed to erect 5-story flats.——The joint committee on schoolhouses and sites of localities of the board of education at its last meeting decided to recommend the erection of several new schoolhouses. A meeting will be held Nov. 6 to consider the question.

BUFFALO, N. Y.—Wm. D. Koelsch will build a 3-story brick flat building to cost $20,000, on Chenango St. Archs., Eckel & Ackerman, 46 Niagara St.——Robert A. Wallace has prepared plans for a brick and stone residence for J. A. Munson to cost $10,000.——Ex-Mayor Philip Becker will build an iron frame, brick and terra cotta office building, at 470 Main St., to cost $60,000.——J. F. Burke and E. C. Coatsworth will build a 4-story brick flat building on Franklin St., to cost $20,000.

KINGS PARK, N. Y.—Bids are asked until Nov. 11 for constructing new steam supply pipes at the Long Island State Hospital, Kings Park, and for the plumbing, heating and ventilating of two buildings at the hospital, as stated in our advertising columns. I. G. Perry, State Arch., Albany; Dr. W. E. Sylvester, Gen. Supt.; J. G. Deubert, Pres. Bd. Mgrs., Arbuckle Bldg., Brooklyn.

NEW YORK, N. Y.—The board of education has appointed a committee to condemn property in different sections of the city for the erection of four school buildings. Commissioners Hubble, Montant and Taft compose the committee. Geo. S. Greene, Jr., Ch. Engr., Dept. of Docks, and Edward H. Kendall, Consult. Engr., have submitted plans to the board for a roof garden over the dock at the foot of East Third St.——Plans have been filed by Phillip Braender, 263 West 118th St., for 5-story brick flats on 118th St. to cost $80,000.——The lowest bid received Oct. 29 for the stone and brick work, roof cover, interior finish, etc., of the Appraisers' warehouse, in New York was that of D. H. Hayes, of Chicago, at $322,500.——The Central National Bank has awarded the contract to Blake & Williams, 362 West Broadway, for the heating apparatus for its new building, and to the Brooklyn Electrical Equipment Co., 164 Montague St., Brooklyn, for the electric work.

NEW YORK, N. Y.—Plans have been filed by Wm. W. Astor, 21 W. 26th St., for a 12-story office building at Broadway and Exchange Place; by the New York Life Insurance Co., 346 Broadway, for a 12-story building at 30 and 32 Elm St.; and by John R. Todd for a 6-story brick apartment house at Manhattan Ave. and 113th St., to cost $300,000.

NIAGARA FALLS, N. Y.—A schoolhouse will be built in each of the first and third wards. Plans are now being prepared and bids will be asked.

OGDENSBURG, N. Y.—Bids are asked until Nov. 9 for the erection of the 40th company armory building. I. G. Perry, State Arch., Albany and Binghamton, N. Y.; Edwin A. McAlpin, Adj.-Gen., Albany.

ATLANTIC CITY, N. J.—The contract for the new house for the Neptune Hose Co. has been awarded to E. S. Lee. The plans were made by Seymour Davis and provide for a 4-story structure of brick and iron, 47x80 ft., to cost about $25,000.

FORT HANCOCK, N. J.—Bids are asked until Nov. 30 for erecting 32 buildings at Fort Hancock, and for plumbing and heating the same, as stated in our advertising columns. Capt. C. A. Devo, Army Bldg.

ALLEGHENY, PA.—Galen C. Hartman, of Pittsburg, has offered to subscribe $1,000 to a fund of $1,000,000 for enlarging the Western University of Pennsylvania. W. J. Holland, Chancellor, Allegheny.

ALLEGHENY, PA.—F. C. Sauer, Hamilton Bldg., Pittsburg, is preparing designs for a stone and brick church, Fulton and Locust Sts., to cost about $40,000.

CARLISLE, PA.—It is reported that the Beetem Lumber & Mfg. Co., Carlisle, will erect a 2-story brick building 50x100 ft., to be used for its business.

LEBANON, PA.—This city will erect a large brick annex to the high school building. It is reported that desks, etc., are wanted.

LEBANON, PA.—John B. Miles, C. E., Philadelphia, has prepared plans for a new iron roundhouse for the Cornwall & Lebanon R. R. Co. R. T. Spotten, Master Mechanic, Lebanon.

PHILADELPHIA, PA.—The corner stone of the new building at Juniper and Walnut Sts. for the Presbyterian board of publication was laid Oct. 24. The structure will be 11 stories high and is estimated to cost $516,000. Arch., J. M. Huston, 604 Providence Bldg.; Pres., Robt. N. Willson; Vice-Pres., Rev. Wm. B. Greene, Jr.

PITTSBURG, PA.—Bids are asked until Nov. 10 for a hot blast and steam heating and ventilating apparatus for the 23rd ward school building. Arch., Edward Stotz, 349 Fifth Ave.; Dr. W. D. O'Brien, Chn.

PITTSBURG, PA.—McKee & Waughter, 108 Fourth Ave., have completed plans for dwellings for Mrs. Tesh, North Highland Ave., and Mr. Roebart, Evaline St.——Plans for the Pittsburg & Lake Erie R. R. depot have been finished and work will begin early next spring.

SCOTLAND, PA.—The Scotland Industrial School will erect a large brick addition to its building.

WASHINGTON, D. C.—The district commissioners have completed their estimates for the coming year and will ask Congress to appropriate $8,473,797 for district work. Of this amount it is proposed to use $100,000 to begin the construction of a municipal building, about $550,000 for additional school buildings and extensions, and about $80,000 for a hospital, fire enngine house, etc.——The following bids were received by the supervising architect Oct. 28 for the interior finish of the basement, first story, etc., of the post office building in this city:

		Time.
Joseph J. Churchyard, Buffalo, N. Y.	$197,778	8 mos.
Otto Duker & Co., Baltimore, Md.	274,900	......
Henry Shenk, Erie, Pa.	198,730	......
E. F. Gobel, Chicago, Ill.	181,167	8 mos.
Arthur Johnson & Bro., St. Louis	255,900	8 mos.
L. L. Leach & Son, Chicago, Ill.	183,883	8 mos.
Henry Smith & Son, Baltimore, Md.	196,700	8 mos.
John Pierce, New York	198,716	8 mos.
W. E. Spicer & Co., Washington	217,300	8 mos.
Daniel J. McCarthy, Washington	251,655	8 mos.
Richardson & Burgess, Washington	266,554	12 mos.
D. S. Hess & Co., New York	241,900	8 mos.

NEW BERNE, N. C.—The following bids were received by W. M. Aiken, Supervising Arch., Washington, Oct. 23, for the heating apparatus for the post office building:

		Time.
Joseph Jenkins, 8th and Orange Sts., Wilmington, Del.	$4,798	65 das.
Chafer & Becker, Cleveland, O.	3,797	60 das.
Hunnicutt & Bellingrath Co., Atlanta, Ga.	4,355	60 das.
S. I. Pope Co., Chicago	3,879	70 das.
E. H. Wehle, Louisville, Ky.	4,220	80 das.
Blake & Williams. New York	4,061	90 das.
E. Rutzler, New York	3,906	60 das.

JENNINGS, LA.—It is stated that the congregation of the Methodist Episcopal Church wishes plans for a college building to cost about $35,000. Rev. Chas. K. Woodson can be addressed.

NEW ORLEANS, LA.—It is reported that the Great Southern Telephone & Telegraph Co. is about to erect an office building and improve its plant at a cost of about $500,000.

MEMPHIS, TENN.—R. J. Allen, 1017 Chestnut St., Philadelphia, Pa., has prepared plans for a casino, 200 × 65 ft., for this city; estimated cost, $150,000.

HAMILTON, O.—Bids are asked until Nov. 10 for remodeling the county jail and adding 24 new cells, at a cost of $15,000. F. X. Duerr, County Audr.

WARREN, O.—It is stated that money has been subscribed to complete the Ohio Masonic home, at a cost of $170,000. Address J. M. Stull, Warren.

YOUNGSTOWN, O.—The Pittsburg & Lake Erie R. R. Co. is reported to have completed plans for a new station for this city.

IRON MOUNTAIN, MICH.—The round house of the Quanesec Logging R. R. Co., five miles from this city, was destroyed by fire Oct. 28, causing a reported loss of $15,000.

SAGINAW, MICH.—Bids are asked until Nov. 20 for erecting a post-office building in this city. W. M. Aiken, Supervising Arch., Washington.

CHICAGO, ILL.—It is stated that Jennie & Mundie, Home Insurance Building, are the architects for a $1,000,000 addition to the Fair Building at Adams St. and Maple Place.

ST. PAUL, MINN.—Bids are asked until Dec. 1 for the floor arches, etc., for the U. S. public building in this city, as stated in our advertising columns. Address Wm. M. Aiken, Supervising Arch., Washington, D. C.

TOWER, MINN.—Plans are to be prepared for a new Indian school at Sucker Point, to cost about $40,000.

FORT RILEY, KAN.—The following bids were received by Capt. Geo. Ruhlen, Assistant Q. M., U. S. A., for erecting buildings, etc.: (1) being for barracks, (2) officers quarters, (3) stable:

	(1)	(2)	(3)
V. A. Kelly, Leavenworth, Kan.	$20,480	$18,172	$4,975
Moses P. Keefe, Omaha, Neb.	20,700	21,400	7,375
M. S. Wright, Leavenworth, Kan.	20,953	23,184	7,875
Ulrich & Hulse, Manhattan, Kan.	22,380	23,446	8,435
Murdoch-Campbell Co., Chicago	22,864	25,728	9,220
Holmgreen & Oberg, Junction City, Kan.	26,420	21,396	8,345
W. G. Fuller, Leavenworth, Kan.	24,029	23,714	9,855
Henry J. Schell, Chicago	21,800	27,900	9,250
Fellows & Vansant, Topeka, Kan.	25,100	23,700	9,830
Ziegler & Dalton, Junction City.	23,849	26,507	9,981
Keesee, Mills & Clark, Topeka, Kan.	21,828	22,518	8,200

KANSAS CITY, MO.—The construction of a public building and auditorium in this city at a cost of about $300,000, is reported as under discussion. R. D. Kathrens is said to be interested.

ST. LOUIS, MO.—The matter of a union station in North St. Louis was discussed Oct. 21 by the North St. Louis Improvement Association, and the suggestion made that one be built at Main and North Market for the accommodation of the Burlington, the Missouri, Kansas & Texas, the Wabash and the Merchants' Bridge Terminal railways. G. H. Ten Broeck, C. H. Hannebrink and J. K. Cummings were appointed to confer with the interested roads as to making stops at the North Market St. crossing.

ST. LOUIS, MO.—Bids are asked until Nov. 6 for remodeling the Simmons school building and for furnishing a heating apparatus in two school buildings, etc. John Kissner, Chn. Com.

PITTSBURG, TEX.—Bids are asked until Nov. 9 for erecting a 2-story brick school building. F. H. Goodjohn, Mayor.

SAN ANDREAS, CAL.—Bids are asked until Dec. 10 for erecting a new hospital building in Caleveras county, according to reports. A. L. Wyllie, Clerk.

BERKELEY, CAL.—Press reports announce that about $4,500,000 is probably to be given to the University of California by a number of residents of this State. The money will be used chiefly in the erection of new buildings. Pres., Dr. Martin Kellogg. It is stated that Mrs. Phoebe A. Hearst, of San Francisco, besides giving a large amount of money, will contribute cash to obtain plans by international competition, and to pay Prof. B. R. Maybeck to explain the project to Eastern and European architects.

SANTA CRUZ, CAL.—Press reports state that F. E. Webb, of San Francisco, is making arrangements for the purchase of the Sea Beach Hotel and the Pacific Ocean House, for about $150,000. A new company will be organized to make repairs, erect a number of cottages on the grounds and otherwise make improvements to the property.

SANTA MONICA, CAL.—It is stated that an addition and repairs will be made to the Hotel Arcadia.

SAN FRANCISCO, CAL.—Baroness Hirsch is reported to have donated $50,000 toward the erection of a Jewish hospital in San Francisco. The project of a Jewish hospital in this city originated with Mrs. Fred L. Castle, but has never been carried out owing to the lack of funds.

MONTREAL, QUE.—Bruce Price, 150 Fifth Ave., New York, N. Y., has prepared plans for the proposed East End passenger station for the Canadian Pacific Ry. Co. The structure will be 300 × 66 ft., and is to be completed in about a year.

WATER-WORKS.

WATERBURY, VT.—C. L. Woodbury, of Burlington, has the contract for a water supply system for the state insane asylum at this place.

CAMBRIDGE, MASS.—An issue of $200,000 in 30-year 4% water bonds has been authorized.

HOLYOKE, MASS.—Bids are asked until Nov. 16 for furnishing 75 tons of pure soft lead for calking purposes, as stated in our advertising columns. J. C. Sullivan, Registrar.

BUFFALO, N. Y.—Rudolph Hering, of New York, has been employed to assist in locating the proposed new water plant and has recommended a location for an intake.

LANCASTER, N. Y.—The Depew & Lancaster Water-Works Co. has been granted permission to lay mains and place hydrants in this town.

SARATOGA SPRINGS, N. Y.—Bids are asked until Nov. 10 for constructing 12 and 18-in. water conduits. Jesse S. Mott, Village Engr.; James G. McNulty, Clk.

ASBURY PARK, N. J.—It is reported probable that $50,000 of additional water bonds will soon be issued.

TRENTON, N. J.—Charles A. Hague, 39 Courtlandt St., New York, has been engaged to design and superintend the construction of a 100,000,000-gallon reservoir of earth and stone construction, which will probably be constructed next year.

CORAOPOLIS, PA.—Bids are asked until Nov. 16 for the purchase of $22,000 in 4½% water bonds. John W. Arras, Pres. of Council; W. J. Neilson, Chn. Com.

PENNSBURG, PA.—The Pennsburg Water Co. was incorporated Nov. 2 with a capital stock of $25,000. Address Jonathan P. Hillegas, Pennsburg.

DELAWARE CITY, DEL.—The council is reported to have decided to accept the proposition of W. Taylor Leland and others, of Philadelphia, to construct works, as recently noted. It is expected that the construction will soon be commenced.

BALTIMORE, MD.—Bids are asked until Nov. 16 for furnishing 26,000 tons of cast-iron water pipe, as stated in our advertising columns. William L. Kenly, Engr.

PORT DEPOSIT, MD.—A water company has been organized at this place with a capital stock of $10,000, by Adam Peoples and J. M. Johnson, of this place, and others.

CHARLESTON, S. C.—Bids are asked until Nov. 30 for boring an artesian well on Sullivan Island, S. C., as stated in our advertising columns. Capt. Frederic V. Abbot, U. S. Engrs.

EATONTON, GA.—Bids are asked until Nov. 16 for constructing works, as stated in our advertising columns. Specifications may be examined at the New York and Chicago offices of Engineering News. Moore & McCrary, Engrs., Atlanta; C. M. Davis, Secy. Comrs.

ONEONTA, ALA.—Nothing definite has yet been done in regard to water-works, recently noted as proposed. E. C. Hall, Mayor.

HATTIESBURG, MISS.—It is stated that John A. Sutler, of Pass Christian, Miss., will construct works at this place.

BUCYRUS, O.—The Bucyrus Water Co. has had plans prepared by Geo. L. Wells, of Bay City, Mich., for a new reservoir; contracts will probably be awarded in the spring.

THREE OAKS, MICH.—The construction of water-works is again being discussed.

CHICAGO, ILL.—Bids are asked until Nov. 7 for laying water mains in four streets. Joseph Downey, Comr. Pub. Wks.

GILMAN, ILL.—It is hoped to commence the construction of municipal works soon; water supply will be pumped from artesian well to stand-pipe; estimated cost, $25,000.

ODELL, ILL.—A well is being sunk; it is now over 600 ft. deep.

OREGON, ILL.—Bids are asked until Nov. 6 for extending the water mains, according to reports. Address P. Dernier.

HARTLEY, IA.—S. A. Smith writes us that the well is now being drilled by the town; probable cost of works $5,000, if which $3,500 is secured.

KEOKUK, IA.—About two miles of new mains will probably be laid in the spring by the water company. D. W. Swartz, Supt.

DELANO, MINN.—The contract for constructing works has been awarded to C. W. Kerrick, according to reports.

DULUTH, MINN.—The D. Clint Prescott Co., of West Duluth, has been awarded the following contract: Pumps, $88,000; well pump, $450; electric plant, $1,300; overhead crane, $2,750. W. B. Patton, Cy. Engr.

MILACA, MINN.—The contract for constructing works has been awarded to A. Bryson, at $2,000. I. M. Balland, Village Recdr.

OMAHA, NEB.—The Fred Krug Brewing Co. is reported to have contracted with L. E. Nabergall to sink an artesian well 1,400 ft. deep at its brewery.

EL DORADO, ARK.—J. C. Wright, of this place, writes us that the question of water-works may be taken up again next spring and a plant constructed; probable cost $2,500.

GUTHRIE, OKLA.—The council is reported as considering the construction of water-works and an electric light plant,

ROSEBUD, S. DAK.—Bids are asked until Nov. 5 for constructing a water and sewer system for the boarding school plant now in course of construction at the Rosebud Agency. Charles E. McChesney, U. S. Indian Agent.

EL PASO, TEX.—The council is reported as in favor of accepting an offer of Z. T. White to furnish the city with a water supply from artesian wells, for $10,000.

VANCOUVER, WASH.—The Tirzalia Water Co. has been incorporated with a capital stock of $1,500, by L. Sohma and D. F. Schule.

MONMOUTH, ORE.—The Monmouth Water Co. proposes to construct works to cost $6,000. It is not known when contracts will be let. T. J. Beerz, Engr., Monmouth.

BERKELEY, CAL.—A. A. Richardson, of Lincoln, Neb., is said to be trying to organize a company to supply this city with water from artesian wells.

SAN DIEGO, CAL.—The validity of the $1,500,000 in bonds recently voted by the city for water-works has been decided in favor of the city by the courts; construction is now in progress.

SAN DIEGO, CAL.—The Laguna Water & Power Co. was incorporated Oct. 29 to supply water and electricity in San Diego county; ;capital stock, $3,000,000, commencing with $400,000; incorporators, J. W. Thompson, Edwin Parker, Chas. D. Long, E. E. Shaffer and H. C. Gordon, of San Diego.

SANGER, CAL.—Geo. P. Low, lessee Sanger Electric Light Co., intends to construct a $1,500 water-works plant in the spring. The water supply will be pumped from artesian wells to tank; steam plant and pumps already secured. Geo. P. Low, Engr., 421 Market St., San Francisco.

COWANSVILLE, QUE.—The council is reported as considering the construction of water-works. Councillor Mackinnon is interested.

LACHUTE, QUE.—The Lachute Aqueduct Co. intends next spring to put in a new system, using cast-iron pipe throughout. James W. Raitt, Secy.-Treas., writes us that several efforts have been made to secure municipal works, but the taxpayers have each time defeated the project.

GRIMSBY, ONT.—The by-law for the construction of water-works was defeated at the recent election.

VANCOUVER, B. C.—It is reported that the council is considering a by-law to borrow $60,000 for the extension and improvement of the water-works.

IRRIGATION.

QUINCY, FLA.—It is reported that the Owl Cigar Co. wants information in regard to the construction of an irrigation plant.

DENVER, COLO.—Press reports state as follows: Montezuma Valley Irrigation Co.'s ditches, laterals, tunnels, franchises, reservoir sites, etc., were sold at auction Oct. 20 for $60,000. Adding to this the taxes and penalties, the property stands the new owners about $80,000. Ex-Gov. James B. Grant was the trustee in whose name the property was bid in by F. L. Kimball, of the Colorado State Bank. The new owners will place the property on a business basis, and as the United States government will be forced to contract for water in perpetuity for the Ute Indians it necessarily enlists an expense of some $60,000 in way of enlarging ditches, completing reservoirs and running laterals. Senator H. M. Teller has looked the ground over thoroughly and will take charge of the appropriation bill in the senate. To this sum must be added an additional one for ditches in the Ute reserve, and jointly it means an expenditure of about $100,000 in Montezuma county and sections tributary.

EL PASO, TEX.—Denver, Colo., papers of Oct. 27 state as follows: Local advices from New Mexico state that at the recent meeting of the Rio Grande Land & Irrigation Co. a contract was let by Chief Engineer Campbell to W. C. Bradbury & Co., of Denver, who constructed the canals of the Pecos Valley and built some of the dams. The firm states that it will be ready to begin work as soon as the outfit can be shipped and the cement now on the way from London, Eng., arrives. This contract calls for the building of a weir dam at Selden, above Les Cruces, 500 ft. long and 10 ft. high above the surface. This work and certain canal work is to be completed within 120 days, at an estimated cost of $75,000. The company contemplates other dams at Elephant Butte and elsewhere. The canal system in connection with this dam will be 50 miles long, with a fall of 1 ft. in 5,000 ft. The first section is 12 miles long, reaching down the east side of the river, where there is to be a division, one branch being taken across the river bed by a heavy pipe. The main canal bottom will be 34 ft. wide and carry 5 ft. of water. The acreage to be irrigated will be 100,000 acres. At Elephant Butte, the dam will be 96 ft. high, 300 ft. long at the bottom and 600 ft. on the top, and will store 250,000 acre-ft. W. A. Hawkins, Gen. Attorney, Silver City, Colo.

FAIRHAVEN, WASH.—Bids are asked until Nov. 6 for cleaning, grubbing and ditching to be done for ditch No. 6. C. N. Adams, County Surv.; Ashabel Dillon, Clk.

SEWERAGE.

DEXTER, ME.—It is reported that this place is soon to build a sewer system.

BOSTON, MASS.—The apportionment commissioners under the Metropolitan sewerage acts have rendered their report to the supreme judicial court, distributing the apportionment of the five years ending 1900. They find in effect that the North Metropolitan system will cost $5,030,000; the Charles River system $800,000; and that both of these systems have been practically completed; that the Neponset River system has just commenced under an act which provides for a state loan of $500,000. Edmund E. Bennett, John E. Sanford and Everett C. Bumpus compose the committee.——The following bids were received Oct. 29 for constructing sewers in Columbus Ave.: Craig & Trumbull, $7,442; T. H. Connelly, $5,592; Thomas O'Leary, $5,196; H. A. Hanscom & Co., $7,265; John C. Coleman, $7,445; James Dolan, $6,664; J. P. O'Connell, $7,618; Charles Linnehan, $9,665; Daniel E. Lynch, $9,115. B. W. Wells, Supt. of Streets.

CAMBRIDGE, MASS.—The council has authorized the issue of $491,000 in 4% bonds, $75,000 of which is for the sewer department and $137,000 for the street department. L. M. Hastings, Cy. Engr.

WAKEFIELD, MASS.—The sewer committee has submitted its report on the proposed system. It is recommended that the filtration system of sewage disposal be adopted. The committee is composed of Louis E. Hawes, chairman; Henry H. Savage, F. A. Gowen, W. G. Strong, W. H. McCausland and E. A. Carlisle.

PEEKSKILL, N. Y.—Press reports from Albany state as follows: An investigation of the sanitary condition of the state camp at Peekskill has been completed by the state engineer and surveyor's department. As a result of this inquiry, a map is to be prepared showing all the main sewers and water-pipes running underneath the camp grounds. Using this map as a basis, the department will formulate an improved system of drainage for the camp. C. W. Adams, State Engr., Albany.

SYRACUSE, N. Y.—Bids are asked until Nov. 9 for constructing 15 and 12-in. pipe sewers in two streets. M. Z. Haven, Cy. Clk.——The council has decided to construct 48 × 32-in. brick and 15-in. pipe sewers in two streets.

BALTIMORE, MD.—Bids are asked until Nov. 9 for furnishing and delivering cast-iron pipe and special castings for the Druid Hill Ave. sewer. Janon Fisher, Cy. Comr.——The council has passed an ordinance appropriating $40,000 for sewers in Lanvale and Gilmor Sts.——The East End Improvement Association, at its meeting in the Casino, Patterson Park, Oct. 23, appointed as a committee Wm. A. Eisenbrandt, Joseph Schute, Chas. Milske and Thos. E. Sweeney to confer with the city commissioners with regard to constructing a sewer in the rear of the park.——The following bids were received Oct. 29 for constructing sewers in three streets, all bidders residents of Baltimore:

	Charles St. 893 ft. 36x 30-in. cast-iron pipe.	Camden St. 388 ft. 18-in. terra cotta pipe.	Henrietta St. 408 ft. 18-in. terra cotta pipe.
Croak, Horner & Co.	$5,279	$921	$1,060
Jas. P. McGovern	4,991	849	890
P. Flanigan & Co.	4,834	698	874
P. Reddington	*4,353	...	...
P. Keelty	4,887	*490	*645
P. J. Morton	...	780	940

*Awarded contract.

WASHINGTON, D. C.—The district commissioners have decided to ask Congress for an appropriation of $1,300,000 for constructing sewers during the coming year.

WASHINGTON, D. C.—Bids are asked by the district commissioners until Nov. 16 for constructing sewers, as stated in our advertising columns.

COLUMBUS, O.—The construction of sewers or the extension of the trunk sewer in Glenwood Ave. to relieve Skidmore and Mound Sts. is being considered. Josiah Kinnear, Cy. Engr.

MIDDLETOWN, O.—Bids are asked until Nov. 18 for constructing 7,943 ft. of brick and 2,651 ft. of lateral sewers. Lilbern Martin, Secy. Bd. Sewer Comrs.

CRAWFORDSVILLE, IND.—Alvord & Shields, 1140 The Rookery, Chicago, Ill., have been engaged to make a survey and to prepare plans and specifications for a sewer system. Preliminary surveys are well under way and it is expected that the design will be completed this fall. F. Hoffman, Cy. Engr.; J. C. Hutton, Chn. Com.; Wm. McCampbell, B. F. Hutchings, Com.

HOLLAND, MICH.—It is reported that plans will probably soon be completed for a system for this place. C. J. De Roo, Pres. Pub. Wks.

CHAMPAIGN, ILL.—The council has passed an ordinance authorizing an issue of $15,000 in sewer bonds. The contract for constructing this sewer system, as advertised in Engineering News, was awarded Aug. 4 to Todd & Murphy, of Wabash, Ind, at $42,748. The itemized bids were published in our issue of Aug. 13. Joseph O'Brien, Cy. Engr.; C. J. Strahle, Cy. Clk.

MADISON, WIS.—Bids are asked until Nov. 13 for laying 1,200 ft. of 24-in. cast-iron sewer invert from 10 to 11 ft. below water level, as stated in our advertising columns. McClellan Dodge, Cy. Engr.; O. S. Norsman, Cy. Clk.

KANSAS CITY, MO.—Daniel O'Flaherty, Kansas City, has prepared plans for turning the course of the O. K. Creek into a channel to be built on 25th St. It is proposed to make better use of this creek in draining a portion of the city.

ST. LOUIS, MO.—The board of public improvements has decided to build a 24-in. pipe sewer in the Des Peres district; estimated cost, $9,400.

DENVER, COLO.—The chief engineer has been directed to prepare plans for a new sewer in 16th St. to cost about $3,000. T. J. Milner, Ch. Engr. Bd. Pub. Wks.

SAN FRANCISCO, CAL.—The presidents of Holly Park and Mission districts have petitioned the supervisors to build a sewer system in that section of the city lying south of 30th St. to the county line. N. C. Weinholz, of the Holly Park Improvement Club, 33d and Mission Sts., and Joseph Tuohey, of the Fairmount Club, are interested.

SAN FRANCISCO, CAL.—The associated improvement clubs is discussing the question of issuing bonds for building sewers. Secretary Frend can be addressed.

UKIAH, CAL.—Bids are asked until Nov. 6 for constructing a sewer in State St. W. E. Deering, Cy. Clk.

SALT LAKE CITY, UTAH.—Bids are asked until Nov. 20 for constructing sewers to connect the sewer system in Fort Douglas with the system of this city. Maj. E. B. Atwood, Ch. Q. M., Salt Lake City.

STREETS AND ROADS.

BOSTON, MASS.—Bids are asked until Nov. 9 for 6,700 sq. yds. of macadam paving in Geneva Road, with 3,800 lin. ft. of edgestone, about 5,000 sq. yds. of gravel sidewalks, granite gutters, etc. Benj. W. Wells, Supt. of Streets.——Next spring the metropolitan park commission will decide upon the continuation of the Parkway, so as to enter the State Fells reservation. It is probable that the boulevard will pass over the hillside at a point between Washington and Mount Vernon Sts., though a strong argument has been presented to the commission in an effort to induce it to consider the feasibility of continuing the boulevard to Woburn. A bill will be presented to the legislature to carry forward this plan.

GLASTONBURY, CONN.—Marcus H. Holcomb, of Southington, Conn, C. W. Cowles, of Manchester, Conn., and S. W. Robbins, of Wetherfield, Conn., the committee appointed by superior court recently to lay out two roads in this place, have submitted their report.

ALBANY, N. Y.—The question of paving First St. from Judson to Quail Sts. with asphalt blocks is being discussed.——The finance board has passed a resolution authorizing the issue of $373,000 in 4% bonds for street improvements and $30,000 in 3½% sewer bonds. Horace Andrews, Cy. Engr.; Chamberlain Haskell can be addressed.

BROOKLYN, N. Y.—Bids are asked until Nov. 12 for Belgian block paving in 41st St.; surety, $2,500. Theo. B. Willis, Comr. Pub. Wks.

BROOKLYN, N. Y.—Bids are asked until Nov. 25 for macadamizing about two miles of the new shore road, as stated in our advertising columns. Edwin C. Sweezey, Engr., 3d Ave. and 39th St.

LONG ISLAND CITY, N. Y.—H. C. Johnson, Jr., J. W. Lee, Thos. Collum and John Maley have been appointed a committee by the general improvement commission to canvass certain streets in Ward No. 3 for signatures for improving the streets. Owen Woods, Comr.

NEW YORK, N. Y.—The Sicilian Asphalt Paving Co., Times Bldg., has been awarded the contract by the park department for asphalting the circle at 59th St. and 8th Ave. at a cost of about $30,000.

SYRACUSE, N. Y.—Bids are asked until Nov. 9 for grading a portion of Cannon St., and for constructing sidewalks on both sides of the streets. M. Z. Haven, Cy. Clk.

WHITESTONE (L. I.), N. Y.—The election held in this village Oct. 30 resulted in favor of issuing $50,000 in bonds for macadamizing the principal streets. Dr. A. C. Griffin can be addressed.

WILTON, N. J.—The county commissioners are considering routes for a road from Berlin to Hammonton.

CRAFTON, PA.—Bids are asked until Nov. 5 for grading, paving and curbing Bonnet St. F. R. C. Perrin, Clk.

PHILADELPHIA, PA.—The highway committee is considering the question of opening Comly St. through the Cornelius property for a distance of 1,000 ft. J. M. Adams, Chn. Com.

SCRANTON, PA.—Bids will probably be opened Nov. 5 for paving a portion of Mulberry St. with asphalt, but the contract is not likely to be let before December. J. P. Phillips, Cy. Engr.

WASHINGTON, D. C.—The district commissioners have completed estimates for next year's paving, which will cost about $275,000.

MIAMI, FLA.—It is reported that the Bricknells are to have a 25-ft. road built for a mile along the bay front property. Other improvements to the property are now being made.

ST AUGUSTINE, FLA.—The council has agreed with the property owners on St. George St. with regard to repaving the street at once. The city will pay one-third and the owners two-thirds of the cost. A. J. Watts, Alderman; B. Genovar and C. F. Sulgner are interested.

NEW ORLEANS, LA.—The city engineer estimates the cost of paving Claiborne St., from Canal to Toulouse Sts., with brick, at about $50,500. A. C. Bell, Cy. Engr.

NEW ORLEANS, LA.—The city engineer has been directed to prepare plans and specifications for paving Jackson Ave.

CINCINNATI, O.—Bids are asked until Nov. 10 for brick paving in two streets, and until Nov. 24 for brick paving also in two streets. Aug. Herrmann, Pres.; A. P. Butterfield, Clk. Bd. Administration.——The board has rejected the bids for brick sidewalks, and have asked for new bids.

CLEVELAND, O.—The park board has awarded to Brennan & De Celle the contract for improving Doan Brook boulevard, between Superior St. and Wade Park Ave., at $35,000.

SALEM, O.—The following bids were received Oct. 20 for 7,555 sq. yds. of brick paving. F. W. Allison, Cy. Clk.

Samuel Buell, Salem, O. (accepted)	$11,489
John Hadley, Canton, O.	14,576
Landers Bros., Wooster, O.	12,776
Liphart & Winterhalter, Detroit, Mich.	13,229

HELENA, MONT.—The county commissioners received the following bids Oct. 24 for grading the approaches to the proposed bridge over the north fork of the Dearborn River:

	Rock.	Earth.	Total.
M. Conniff	$3,440	$1,380	$4,820
John Duffy	2,494	776	3,220
*Kirkendall & Son	2,537	644	3,181
Lind & Franklin	2,356	848	3,204
C. J. Lundin	2,468	855	3,303
B. J. Townsend	2,683	690	3,373
Louis Johnson	2,365	1,012	3,377
**J. H. Carmichael	2,016	182	2,198

*Awarded contract. ** Informal.

KANSAS CITY, MO.—The Parker-Washington Paving Co. has been awarded the contract for asphalt paving in Broadway, and also for granitoid paving. H. A. Wise. Cy. Engr.

SPRINGFIELD, MO.—The property owners are considering the question of brick paving in South St. E. P. Johnson, Cy. Engr.

VELASCO, TEX.—It is reported that the citizens of this place are raising money to aid in the construction of a shell road from this place to Oyster Creek.

SACRAMENTO, CAL.—The city trustees are considering the question of improving a portion of J St.

MANUFACTURING PLANTS.

BOSTON, MASS.—Press reports state that a 5-story building will soon be erected at Beach and Utica Sts. by the American Tool & Machine Co.

NEW HAVEN, CONN.—Brown & Von Beren, Archs., have completed plans for the rebuilding of the Forsyth dye works in Westville. The engine house is to be rebuilt and extensive improvements made. J. N. Leonard has been awarded the contract.

BUTLER, PA.—A board of trade is being organized at this place to further the industrial interests. It is stated that several large manufacturing plants will locate in the near future.

MILLVILLE, N. J.—A meeting of the trustees of the building and loan associations was recently held to consider the advisability of advancing $30,000 to erect a window light factory. Bennett & Co., glass manufacturers of Spring City, Pa., desired to settle in this city and this amount is needed to start the plant. While nothing definite was settled, it is thought that the loan will be granted.

HARRISBURG, PA.—The Boll Bros. Mfg. Co. will erect a 5-story brick addition, 40 × 80 ft., for the manufacture of brass and iron bedsteads, and it is reported will purchase new machinery.

NEW CASTLE, PA.—It is stated that the New Castle Street Car Co. has purchased additional ground and will soon begin the erection of a large car barn and machine shop. The building is to be 160 × 70 ft., built of iron and pressed brick. Improvements are also being made in the electric light plant.

PHILADELPHIA, PA.—It is understood that extensive improvements are contemplated at the John T. Lewis & Bros.' white lead works, to cost $125,000. Two large buildings, one four stories in height, 140 × 45 ft., and another three stories, 60 × 60 ft. will be erected. A new 500-HP. engine will give a combined force of 1,200-HP. New machinery will also be introduced.——A. J. Balfour has taken out a permit to make repairs to the American Wood Paper Mills, on River Road, above Washington St., Manayunk, which he has recently acquired. He will build a two-story brick boiler house, 46 × 65 ft.——Wm. H. Odenatt, 3534 North 18th St., is preparing plans for a boiler house for John Hamilton, to be 37 × 28 ft., and built of brick, with a tin or slag roof.

PITTSBURG, PA.—The American Food & Oil Co. has been incorporated with a capital stock of $60,000, of which $7,000 is paid in. The company intends to build a factory for extracting oil from peanuts and converting the residue into food. Incorporators: Lawrence Dilworth, Samuel D. Ache, John K. McKee, Robert Mortland and Michael J. Alexander, of Pittsburg, and Thos. R. Mackey and Wilson E. Weatherly, of Allegheny.

HUNTINGTON, W. VA.—It is stated that the shops of the Ohio River R. R., at Central City, two miles west of this place, will be moved to Kenova in the near future. This will also change the end of the division from Central City to Kenova.

GARYSBURG, N. C.—The large saw and planing mills of the Garysburg Lumber Co., destroyed by fire last week, will be rebuilt and equipped at once.

HAW RIVER, N. C.—The Cora Mfg. Co., of this place, will double the capacity of its cotton mill plant at an early day, including an electric plant for lighting.

GREENWOOD, S. C.—The new cotton mill building being erected at this place by D. A. P. Jordan and associates will be ready to receive its machinery between Jan. 1 and March 1. An electric light plant, as well as some of the mill machinery, it yet to be purchased.

LAURENS, S. C.—J. H. Kennedy and associates will build a cotton mill of about 5,000 spindles capacity, to cost $60,000 to $75,000; work on same to begin within 60 days. It will be equipped with the latest improved machinery, including an electric light plant.

MACON, GA.—The Georgia Southern & Florida R. R. will build at this place a new freight and passenger depot; also, new railway machine shops. The plans have already been drawn and accepted, and work will begin at once.

ATHENS, GA.—A movement is on foot to erect a cotton mill at this place. J. J. C. McMahon, James Caruthers and W. S. Hollman are interested. A $150,000 plant is proposed, to be operated by electricity.

EASTMAN, GA.—A representative of a Northern syndicate which intends building a 10,000-spindle spinning and weaving cotton mill in this vicinity, has decided upon a location at this place, according to reports.

CLEVELAND, O.—The Cleveland Steel Co. has commenced work on the erection of an open hearth plant, and will be able to furnish slabs for its sheet and plate mills. The main building will be of iron construction, 70 × 250 ft. Two 15-ton furnaces will be built for the manufacture of high grade acid open hearth steel. Under patents taken out by John A. Potter, Supt., it is stated that these slabs, which will be 3 × 24 × 24 ins., will be cast in the absence of air and a uniform fibrous steel secured, avoiding piping, segregation and other defects. This company recently commenced rolling copper sheets and plates and orders have been taken for 50,000 to 60,000 lbs. of material. The company is prepared to furnish plates and sheets in copper from 1-in. down to 20 gage.

CHICAGO, ILL.—It is reported that plans are being prepared by Julius H. Huber for a large addition to the McGuire Mfg. Co.'s workshops at Sangamon, Morgan and Kinzie Sts. The new addition will be 164 × 116 ft., and six stories high. The estimated cost is $90,000.

CHICAGO, ILL.—Bids are asked until Nov. 13, for furnishing all labor and material to complete the masonry, carpentry, cut stone, and concrete work for the repair shops to be built on Ashland Ave.,south of 22d St. Joseph Downey, Comr. Pub. Wks.

EAST MOLINE, ILL.—The Brown & Hayward Co., of St. Paul, with a warehouse at Davenport, Ia., is figuring on building a glass factory at East Moline, Ill., to cost $60,000, and to employ 100 men.

SAN DIEGO, CAL.—Bids are asked by the San Diego Brewing Co., for one ice factory and one bottling house, according to reports. Bids to be in lump sum; terms of payment, half brewery stock, half cash.

GAS PLANTS

JAMAICA PLAIN, MASS.—The Jamaica Plain Gaslight Co. has purchased additional land opposite its works.

PROVIDENCE, R. I.—Bids are asked until Nov. 7 for furnishing and caring for about 1,400 gasoline lamps for three years. H. K. Blanchard, Chn. Com.; Oliver E. Greene, Supt. of Lights, City Hall, Providence.

JAMAICA (L. I.), N. Y.—The Jamaica Gaslight Co. petitioned the town board for a 50-year franchise for laying pipes in all parts of the town of Jamaica. Justice Wood and Town Clerk McCook were appointed a committee Oct. 31, to investigate as to the powers of the town board and highway commissioners in the premises.

RICHMOND HILL, N. Y.—The Richmond Hill & Queens County Gas Co. was recently given until Nov. 15 in which to complete the laying of its mains in this village and the commencement of the work was noted last week. A writ of attachment has since been issued against the pipes, tools, etc., of the concern and these were advertised to be sold at auction, Nov. 4. It is reported probable that the village will now grant an electric light franchise.

MONTCLAIR, N. J.—The contract for street lighting has been awarded to the Montclair Gas Co. A newspaper report states that the opposition of the new electric light company has brought down the gas company's charge materially. During last year the town paid for its street lights $18 for each lamp burning up to 1 a. m., and $21 for each lamp burning all night, and the town provided its own lamp posts. Next year the town will pay only $17 for lamps burning all night, and the company will provide fixtures. The electric company submitted an offer at $16 per lamp, but was unable to guarantee that it would provide poles unless the council rescinded or modified its recent electric light ordinance.

PATERSON, N. J.—The new contract with the United Gas Improvement Co. is at $19 a year for each of the 413 street gas lamps now in use and $18 a lamp a year whenever the number shall exceed 500. The price heretofore has been $20 a lamp a year.

TIFFIN, O.—The trustees of the gas works and city council have received bids for the sale of the city's natural gas plant, and the indications are that the sale will be effected. R. G. Curlin and Patrick Dowling bid $70,000 and James P. Davis $85,000. The plant, including leases, gas wells and pumping machinery, is said to have cost the city over $180,000, and has been in operation since 1887.

YOUNGSTOWN, O.—The Mahoning Gas Fuel Co. has commenced work on the construction of its new gas line from Youngstown into Pennsylvania, where it will connect with the main of the Oil City Supply Co. near West Middlesex.. An official of the company is quoted as saying that the line will be laid without delay in order that it may be connected and gas turned in before cold weather so that the company will have it in case the present supply should run short.

SIOUX CITY, IA.—The Sioux City Gas Light Co. has completed its season's work as far as laying mains is concerned. The company had expended about $40,000 in improvements in this city this season, and has put down over six miles of mains. Over two miles of new mains now on hand will be laid at the opening of next season. L. L. Kellogg, Supt.

ABERDEEN, S. DAK.—The Aberdeen Gas & Electric Light Co. was incorporated Oct. 27 with a capital stock of $75,000, by Fred A. Bartholomew, J. S. Bartholomew, Geo. B. Clifford and others.

SACRAMENTO, CAL.—Bids are asked until Nov. 23 for a franchise to lay mains and furnish illuminating and fuel gas in any and all the streets of this city for 25 years. The Pacific Gas Light & Fuel Co. has petitioned for such a franchise. Chas. E. Leonard, Pres. Trustees.

MISCELLANEOUS CONTRACTS.

DITCH.—Rose, Minn.—Bids are asked until Nov. 16 for constructing a ditch in Rose. D. M. Sullivan, County Audr.

LEVEE WORK.—Port Allen, La.—Bids are asked until Nov. 9 for the enlargement of Bayou Goula levee, 16,000 cu. yds. A. D. Barrow, Secy. Bd.

BATTERY.—Baltimore, Md.—Bids are asked until Nov. 27 for building a gun battery at Hawkins Point. Col. Peter C. Hains, U. S. Engrs., 9 Pleasant St., Baltimore.

TELEPHONE FRANCHISE.—Amherst, Mass.—The Northfield Telephone Co. has begun work on its proposed system in this city, a franchise for which was recently granted.

CRIB BULKHEAD.—Brooklyn, N. Y.—Bids are asked until Nov. 12 for building a crib bulkhead on piles at the foot of Amity St., East River; surety, $1,500; T. B. Willis, Comr. Cy. Wks.

PIER WORK.—Milwaukee, Wis.—Bids are asked until Nov. 27 for constructing crib and pile pier extensions, as described in our advertising columns. Capt. Geo. A. Zinn, U. S. Engrs.

BATTERY.—Newport, R. I.—Bids are asked until Nov. 24, for constructing a gun battery on Dutch Island, R. I., as stated in our advertising columns. Maj. D. W. Lockwood, U. S. Engrs.

BREAKWATER.—Philadelphia, Pa.—Bids are asked until Dec. 10 for constructing stone breakwater in Delaware Bay, Del., as stated in our advertising columns. Maj. C. W. Raymond, U. S. Engrs.

SHORE PROTECTION.—Bids are asked until Nov. 14 for constructing 3,000 ft. of shore protection on Raritan Bay, N. J., as stated in our advertising columns. N. F. Barrett, 50 Wall St., New York city.

BATTERIES.—St. Augustine, Fla.—Bids are asked until Nov. 24 for building gun and mortar batteries at Key West Fla., as stated in our advertising columns. Lt. Col. W. H. H. Benyuard, U .S. Engrs.

BATTERY.—Charleston, S. C.—Bids are asked until Nov. 30 for furnishing material and constructing battery at Sullivan Island, S. C., as stated in our advertising columns. Capt. Frederic V. Abbott, U. S. Engrs.

BOILERS, ETC.—San Francisco, Cal.—Bids are asked until Nov. 23 for furnishing two steel fog-signal boilers and two sets of steel doors for same. Maj. Chas. E. L. B. Davis, U. S. Engr., 89 Flood Bldg., San Francisco.

FERRY APPROACH.—Galveston, Tex.—The county commissioners awarded a contract to L. P. Featherstone to build the approaches to the proposed Bolivar ferry, at $53,900. The ferry is to be used jointly by the county and the Gulf & Interstate R. R. Co.

DOCK AND DREDGING.—Menominee, Mich.—It is reported that the United States Leather Co. is receiving bids for constructing 1,850 lin. ft. of dock and for dredging 1,930 lin. ft. of channel in the Menominee River 8 ft. deep and 60 ft. wide; estimated cost, $12,000.

TELEPHONE FRANCHISE.—Seneca Falls, N. Y.—The board of trustees is considering the question of granting a franchise to a telephone company which proposes to connect this place with Auburn, Waterloo, Geneva, Canandagua and other places. P. W. Bailey, Pres.

NAVAL SUPPLIES.—Washington, D. C.—Bids are asked until Nov. 10 for furnishing pulleys, screws, lathe chucks, brick, steel shafting, forgings, etc., for the Washington, New York and Norfolk navy yards; and until Nov. 24 for supplies for the Mare Island, Cal., navy yard. Edwin Stewart, Paymaster Gen., Washington, D. C.

DREDGING.—Wilmington, Del.—Bids are asked until noon, Dec. 2, for dredging in Rock Hall Harbor and inner harbor of Rock Hall, Queenstown harbor, Choptank, Chester, Manokin, Wicomico, Pocomoke and Warwick Rivers, Md.; Broad Creek, Del.; and Nanticoke River, Del. and Md. Wm. F. Smith, U. S. Agent, Wilmington.

WHARF.—San Francisco, Cal.—Fontana & Co. have made a contract with Warren & Malley for improvements to the woolen mill property near the foot of Van Ness Ave., purchased a few months ago. These will consist in the building of a wharf 150 ft. long, the construction of a bulkhead and the filling in of two 50-vara lots. Work will be commenced at once, and will cost about $15,000.

GUN FORGINGS.—Washington, D. C.—Bids are asked until Nov. 14 for furnishing the Department the following material: Rough bored and turned forgings for breech-loading rifles, viz.: 1 set 12-in.; 14 sets 13-in. For forms of proposal, information concerning shapes and weights of the gun forgings, the specifications governing the manufacture and the test for the acceptance of the same, and for all other particulars, apply to the chief of the bureau of ordnance, Navy Department, Washington. H. A. Herbert, Secy.

MORTAR BATTERY.—North Point, Md.—The following bids were received by Col. Peter C. Hains, Baltimore, Oct. 26, for constructing a mortar battery at North Point:

Isaac S. Filbert, Baltimore, Md.	$111,972
Owen Patterson, Baltimore, Md.	119,949
Henry Smith & Sons, Baltimore, Md.	108,597
Nardin & Anderson, McDonogh, Balt. county	102,757
Sanford & Brooks, Baltimore, Md.	91,513
James M. Douglas, 45 Builders' Exch., Baltimore.	71,482

REMOVAL OF PIERS.—New York, N. Y.—The contract for the removal of piers at 12th, Jane and Horatio Sts., North River, was awarded Oct. 30 to P. Sanford Ross, the bids being as folows; Geo. S. Terry, Secy. Dept. of Docks:

P. Sanford Ross, 277 Washington St., Jersey City	$775
Andrew A. Bouker, 110 Wall St. New York city	974
Spearin & Preston, 87 W. 4th St., Bayonne, N. J.	1,200
Bernard Rolf, Oakland pl., Tremont, N. Y.	1,233
R. G. & J. S. Packard, 130 Pearl St., New York	1,445

LEVEE WORK.—New Orleans, La.—Bids are asked until Nov. 12 for the following levee work: Abattoir, 790 cu. yds.; Roy, 8,840 cu. yds.; New Home, 3,300 cu. yds.; Story, 500 cu. yds.; Irving, 2,150 cu. yds.; Marritt, 3,150 cu. yds.; Caernarvon, upper, 3,160 cu. yds.; Caernarvon, 5,325 cu. yds.; Orange Grove, 2,340 cu. yds.; Company canal, section 1, 19,250, and section 2, 19,750 cu. yds. The total allotment of work amounts to 72,575 cu. yds., and until Nov. 13 for work amounting to 78,390 cu. yds., as follows: St. Clair, Mon Plaisir, Greenwood, Bertrandville, Woodlawn, Belair, Fairview, Bon Sojour, Harlem, St. Sophie to Harlem, Gotzinger to Bell, Oakville and Magnolia, NAVY YARD IMPROVEMENTS.—Philadelphia, Pa.—Naval Constructor Feaster has asked the navy department for $408,000 for improveing the buildings in the navy yard. It is recommended that a new boat shop be built at a cost of $130,000, and that $40,000 worth of tools, such as lathes, planers, drill presses, etc., be bought. It is proposed also to install an electrical traveling crane of 20 tons capacity to cost, with its accessories, $22,500. Mr. Feaster has made plans also for two smitheries, which will cost $310,000. One building will be used for heavy forging and angle smithery; the other for general shipsmith work. The aggregate of cost of the improvements recommended is $408,571.

FIRE ENGINE, ETC.—Hazleton, Pa.—Bids are asked until Nov. 20 for furnishing a fourth-class steam fire engine with rotary pump and a pumping capacity of 500 gallons a minute, an approximate weight of 4,800 lbs., and with platform springs; also a chemical fire engine with two 60-gallon horizontal tanks, and 200 ft. best 4-ply chemical hose, one 16-ft. ladder, pike poles, fire axes, etc.; also one hand extension ladder truck, provided with one 60-ft. extension ladder, one 40-ft. extension ladder, one 30-ft., one 25-ft., one 20-ft., and one 16-ft. single ladder, two 14-ft. roof ladders, one 12-ft., one 14-ft. and one 16-ft. scaling ladders, two life belts, pike poles, crow bars, lanterns, etc. John W. Klinger, Cy. Clk.

FORTRESS IMPROVEMENTS. — Washington, D. C. — Press reports state as follows: Under the head of fortifications in his annual report Gen. Wm. P. Craighill, Ch. of Engrs., says that detailed projects have been approved for the artillery defense of Portland, Me.; Portsmouth, N. H.; Boston, Narragansett Bay, eastern entrance to Long Island Sound (partial), New York, Philadelphia, Baltimore, Washington, Hampton Roads, Wilmington, N. C.; Charleston, Savannah, Key West, Pensacola, Mobile, New Orleans, Galveston, San Diego, San Francisco, mouth of Columbia River, and Puget Sound. In these projects use is made of the existing old type fortifications which are either strengthened and given in part modern armament or utilized as an adjunct of the newer and stronger works. Gen. Craighill urgently recommends an appropriation of $100,000 for the preservation and repair of fortifications, saying that as a result of the failure of Congress to make proper provision in the past for their care, the ungarrisoned fortifications and reservations are now in a deplorable state, with the perishable portions now almost worthless, and the heavy masonry work slowly being destroyed.

NAVY YARD IMPROVEMENTS.—Brooklyn, N. Y.—The annual report of Commodore E. O. Matthews, chief of the bureau of yards and docks, contains the following recommendations for improvements at the Brooklyn Navy yard: For the enlargement of the berthing capacity of the wall at the entrance to the new drydock, No. 3, which will require the dredging of all the upper part of the Wallabout channel, $75,000; for a piece of retaining wall between the new dock and the old bridge, $20,000; completion of the causeway between the mainland and the Cob Dock, according to the plans calling for the larger number of culverts, $25,000; completion of the eastern quay wall of the Whitney basin to within 180 ft. of the causeway, $18,000; a building for the storage of ship steel, $20,000; coal shed, $5,000; to grade the ground between drydock No. 3 and Clinton Ave., $10,000; six sanitary latrines, $38,000; additional dynamo and engine, $12,000; an erecting shop to be built on as a wing to the main building, No. 28, $65,000. The temporary structure used for this purpose has burned down once, resulting in a large loss. The presence of the electrician is required in the yard at night, and it is suggested that a suitable house be erected for his accommodation, to cost $5,000. Commodore Matthews also outlines a scheme for the combining of the steam generators of the yard into one central group. In order to do this a new boiler-house will be necessary, which can be constructed for $22,542, and $31,500 is also recommended for the building of ten new boilers and piping for the yard.

CANAL WORK.—Albany, N. Y.—Geo. W. Aldridge, Supt. Pub. Wks., awarded four contracts Oct. 29 for canal work, as advertised in Engineering News, the bids being as follows: Contracts No. 1, for improving Erie Canal, from Ferry St., Buffalo, to Commercial Slip, and Slips 1, 2 and 3, and Commercial Slip, in Buffalo; No. 2, for improving Erie Canal, from McDonald culvert to Ferry St., Buffalo, a distance of 18 miles; No. 3, for improving Erie Canal, from head of Lockport locks to McDonald's culvert, a distance of 5 miles; No. 4, for building the Cartersville waste weir and spillway:

Contract No. 1, Western Division:	
Barber Asphalt Paving Co., New York	$417,160
*Donnelly Contracting Co., Buffalo, N. Y.	394,955
Michael J. Dady, Brooklyn, N. Y.	505,085
McNaughton & Bapst, Buffalo, N. Y.	438,200
Contract No. 2, Western Division:	
*Buffalo Dredging Co., Buffalo, N. Y.	$291,686
Barber Asphalt Paving Co., New York	293,278
Michael J. Dady, Brooklyn	345,109
Hingston & Woods, Buffalo, N. Y.	777,930
Contract No. 3, Western Division:	
Dawson & Lymmes, St. Catherine's, Ont.	$298,540
Lauer & Hagaman, Rochester, N. Y.	276,055
Hughes Bros. & Bangs, Syracuse, N. Y.	298,691
Michael J. Dady, Brooklyn, N. Y.	528,354
Chas. A. Danolds, Eagle Harbor, N. Y.	822,775
John Miller, Buffalo, N. Y.	289,274

*Awarded contract.

CONTRACT PRICES.

BREAKWATERS.—New London, Conn.—Capt. Smith S. Leach received the following bids Oct. 28 for constructing breakwaters, as advertised in Engineering News:

At New Haven, 100,000 tons:	Per ton.
Hughes Bros. & Bangs, Syracuse, N. Y.	$0.88
S. & E. S. Belden, Hartford, Conn.	1.07
J. J. Shipman, 1310 Q St., Washington	1.08
At Duck Island, 25,000 tons:	
J. Frank Quinn, 149 Broad St., New York	.65
S. & E. S. Belden, Hartford	.93
John J. Shipman, Washington	1.40

JETTY AND LEVEE.—San Diego, Cal.—Maj. Chas. E. L. B. Davis, U. S. Engrs., San Francisco, received the following bids Oct. 22 for constructing jetty and repairing levee at San Diego harbor:

Bids for Constructing Jetty and Repairing Levee, San Diego, Cal.

Bidder.	Trestle wrk with dble trck railway.	Per lin. ft. of trestle. Repair wrk, 1-7th of a pile. Price, per pile.	1-7 pile.	Brush mattress, 2 cu.yds. Per cu. yd.	Stone, 24 tons, per ton.	Total cost, lin. ft.
Jetty:						
Waldo S. Waterman, San Diego	$5.00	$10.00	$1.43	$2.50	$2.20	$64.23
California Construction Co., San Francisco	6.50	10.00	1.43	1.90	2.35	68.13
William H. Healy, San Francisco	6.50	12.00	1.71	2.40	2.28	67.73
Cotton Bros. & Co., Oakland	7.40	12.00	1.71	2.98	2.86	83.71

Levee:	Earth filling, 2,680 cu. yds.	Cobble-stn, 400 cu. yds.	Revet-m't, 600 cu. yds.	Total.
William Osburn[1]	$0.23	$1.40	$3.95	$3,546
Simpson & Pirnie[1]	.65	2.10	5.20	5,702
Goodbody & Roesner[1]	.18	1.45	3.48	3,150
John Englebret[1]	.38	.71	4.48	3,990
William S. Healy[2]	.20	1.68	4.28	3,776
Cotton Bros. & Co.[3]	.23	1.90	4.80	4,256

[1]San Diego. [2]San Francisco. [3]Oakland.

RETAINING WALL.—Youngstown, O.—D. N. Simpkins, Secy. Water Bd., writes us that the contract for constructing a retaining wall of stone masonry on the river bank at the pumping station has been awarded to Christ. Manser, at $4 a perch; Thos. Lightbody bid $6.50; Geo. A. Thornton, $4.05; and Frank McMasters, $4.95 a perch, and Chas. H. Connell, $5.50 a cu. yd.; all local bidders.

PIPE SEWERS.—Allegheny, Pa.—The contract for a lateral sewer in Perrysville Ave. and Riverview Park has been awarded to Harvey Sloan, at the following prices: 18-in. pipe, 2,300 ft., 85 cts. a ft.; 15-in., 6,800 ft., 85 cts.; 16-in., iron pipe, 300 ft., $1.65; manhole shafts, 40, $15 each; total, $8,830. Chas. Geyer, Mayor.

BRIDGE.—Cleveland, O.—The lowest bid for constructing the Willow St. bridge was that of the King Bridge Co., at $28,801, the itemized bids being as follows; D. E. Wright, Dir. Pub. Wks.; M. E. Rawson, Cy. Engr.; Jas. T. Pardee, Engr. Bridges:

Bids for Willow St. Bridge, Cleveland, O., Oct. 29.

BRICK PAVING.—Marietta, O.—W. P. Mason, Cy. Engr., writes us that the contract for brick paving in Fourth St. has been awarded to Wm. J. Berry, of Dilles Bottom, O., the bids being received Oct. 26 as follows:

	Paving.	Curb.
Wm. J. Berry, Dilles Bottom, O.	$0.70	$0.33
T. B. Townsend Co., Zanesville, O.	.69	.35
J. H. Kelley, Portsmouth, O.	.78	.44
John Wilking, Marietta, O.	.69	.33

LEVEE WORK.—New Orleans, La.—The state board of engineers has awarded the contract for the construction of 120,000 cu. yds. of levee work; 40,000 cu. yds. of which is in the enlargement and rebuilding of the cut-off bayou to Ashton levee, on Red River, and in Rapides parish, to Jordan Bros., at 7 cts. a cu. yd. The Overton levee, also on the Red River, will be enlarged and rebuilt to the extent of some 75,000 cu. yds., and the bid of M. L. Linnan, 8.73 cts. a cu. yd. was the lowest.

METAL MARKET PRICES.

FOUNDRY PIG IRON.—New York: $10.75 to $12.50. Pittsburg: $10.25 to $12. Chicago: $10.75 to $11.50.

LEAD.—New York: 2.85 to 2.9 cts. Chicago: 2.6 cts. St. Louis: 2.65 to 2.7 cts.

BARB WIRE.—Pittsburg: $1.75 to $1.80 for galvanized and $1.55 and $1.65 for painted in carload and less than carload lots at mill.

NAILS.—Pittsburg: $2.55 per keg for carload lots and $2.65 for less than carload lots of wire nails at mill; $2.30 and $2.40 for cut nails at mill. Chicago: $2.70 and $2.80 for wire nails, $2.45 and $2.55 for cut nails. New York: $2.70 and $2.80 for wire nails and $2.45 and $2.55 for cut nails.

SCRAP.—Car wheels, $10.50 to $11.50; wrought turnings, $8.50 to $9; cast borings, $7.25 to $7.75, all delivered at purchasers' works; hammered car axles, $16 to $17, delivered at New York; wrought pipe and tube, $7.50 to $8, delivered at New York; No. 1 railway wrought, $10.50 to $11.50; cast machinery, $11 to $11.50 at mill.

TRACK MATERIAL.—New York: angle bars, 1.2 to 1.3 cts.; spikes, 1.6 to 1.65 cts.; track bolts, 1.85 to 1.95 cts. with square and 1.95 to 2.05 cts. with hexagon nuts. Chicago: angle bars, 1.4 to 1.45 cts.; spikes, 1.65 to 1.75 cts.; track bolts, 1.95 to 2 cts. with square, and 2.05 to 2.1 cts. with hexagon nuts.

RAILS.—New York: $28 at eastern mills and $28.75 at tidewater; old rails, $12.50 to $13.50 for iron, and $11 to $12 for steel; light rails, $29; girder rails, $28 up to 7-in., and $30 for over 7-in. rails. Pittsburg: $28 for standard sections of 45 lbs. and over; old rails, $15 to $16 for iron, and $12 to $13 for steel. Chicago: $29 to $31 for standard sections, $28 for light sections; old rails, $13 for iron and $8 to $8.50 for steel.

IRON AND STEEL.—The "Iron Age" reports that prospects are encouraging for a marked revival in trade and a rise in prices. There has been more movement, notably in Bessemer pig, in the central West, and considerable business has been done at advancing prices. The rebate on bars has induced more purchasing. Some orders for structural material have been placed in Chicago, and more are in sight there and in other large towns. There have also been more inquiries for plates, with some sales, which have put the mills into better shape. In Chicago the outlook has improved considerably. Inquiries for large quantities of bridge material have been made, and large contracts for bridge and structural material are pending. At Pittsburg, pig iron has been active and prices have been rising, but the steel market is dull. There have been some small lots of sheet and tin-plate bars sold at pool prices, but very few orders are received for billets. The orders indicate that buyers are expecting higher prices in pig iron and structural material, and many mills are refusing to sell orders for next year at present prices. It is estimated that building work aggregating $60,000,000 in value is being figured on, for which a large amount of metal work will be required. Large orders for rails are expected in 1897, and a reduction in prices for rails is talked of.

LEAD, COPPER, AND TIN PLATE.—There has been a sharp advance in prices of lead, and the market is regarded as firm. Copper has been very irregular in price, and no very large orders have been made. The low prices for tin plate, due to the fight between steel works in and out of the pool, have led American mills to invade the Pacific Coast market, which was supposed to be open only to the Welsh works. Considerable blocks of tin-plate have already been shipped around Cape Horn and others are to follow.

INDUSTRIAL NOTES.

THE LACONIA CAR CO., Laconia, N. H., was recently placed in the hands of a receiver. The resources are stated to be $407,000 and the liabilities $617,000.

THE SEWICKLEY BRICK & STONE WORKS, West Newton, Pa., has been sold to Grantham & Humphries, Scottdale, Pa., for $15,000; the works will resume operations soon.

JAMES H. SWINDELL, Room 708 Publication Bldg., Pittsburg, Pa., designer and builder of furnaces and continuous water seal and drop gate gas producers, has opened an office.

THE POTTSVILLE IRON & STEEL CO., Pottsville, Pa., has successfully erected in one piece a stack 105 ft. high. It is intended to increase the output of the open-hearth steel furnaces.

JULES BERTERO, Granite Building, St. Louis, Mo., has recently completed the sinking of two artesian wells at Blue Island, Cook county, Ill., 1,400 ft. deep each, which give a supply of 600,000 gallons of water daily.

THE BETHLEHEM IRON CO., Bethlehem, Pa., on Oct. 28 made a shipment of armor plate for the Russian battle-ship "Rostislav." The plate will be tested in Russia. A big invoice of 13-in. gun material was also shipped to the Washington Navy Yard.

THE PUSEY & JONES CO., of Wilmington, Del., has contracted to build for the Hudson River Paper Mills Co., of Palmer's Falls, N. Y., a machine capable of producing paper 147 ins. in width. The Pusey & Jones Co. has just completed the shipment of a large paper machine to Glens Falls, N. Y., and has in course of construction a 145-in. machine.

P. KNUDSON & SON, 874 N, Washtenaw Ave., Chicago, have completed the laying of the 2,000 ft. of 16-in. water-works intake main into Lake Michigan for the U. S. Government at Fort Sheridan, Ill. Capt. F. P. Jones, U. S. A., was the engineer in charge.

THE HARBISON & WALKER CO., Pittsburg, Pa., is said to have received a contract to furnish all the high-grade material to be used in the construction of the new open-hearth plant of the Nicopol-Mariopol Mining & Metallurgical Co., of Russia, amounting to about 75 carloads.

THE BUFFALO STEAM PUMP CO.'S plant, North Tonawanda, N. Y., has been sold by the receiver, W. A. Joyce, to F. C. M. Lautz, of Buffalo. The sale is to be confirmed by the Supreme Court. It is understood that the shop will be run about the same as heretofore when the proper arrangements have been made.

THE DIAMOND MACHINE & TOOL CO., Toronto, Ont., has accepted a contract, it is said, for building all the machinery for a new nail plant in Ontario, west of Toronto. It has completed a new improved diamond nail machine, and is at work on the other machines. The one completed is built of cast steel parts and will turn out 350 3-in. nails per minute.

THE GILLETTE-HERZOG MFG. CO., Minneapolis, Minn., has recently completed the construction of a new engine and boiler house, 60 × 266 ft., to contain a battery of 30 boilers, for the Anaconda Smelting Co., of Anaconda, Mont. This is one of the four steel buildings which this firm has designed and built for the Anaconda Company. The entire structure is said to have been designed, built and erected in 90 days.

THE BERLIN IRON BRIDGE CO., of East Berlin, Conn., has a contract for a car barn and shop building for an electric road at Port au Prince, Hayti. These buildings will be of steel throughout, having a steel skeleton frame work covered on the sides and roof with corrugated iron. The shop is 33 × 70 ft. and the car barn 40 × 160 ft. This building is one of the many which have been turned out by this company for export to foreign countries during the past few months.

THE SOUTH PITTSBURG PIPE WORKS. South Pittsburg, Tenn., has been awarded a contract for furnishing several miles of cast-iron water pipe to the city of Honolulu, Hawaiian Islands. This order was secured in a competition with a number of American as well as Belgium and English foundries. The company has just completed an export order of 1,600 tons of cast-iron water pipe to Costa Rica, Central America. Among other orders recently secured are contracts for furnishing pipe for water-works at Cherry Valley, N. Y.; Los Angeles, Cal.; Corry, Pa.; Stockton, Lena and Warren, Ill., and Elkader, Iowa.

THE BETHLEHEM IRON CO., Bethlehem, Pa., exhibited at the American Street Railway Association convention at St. Louis, one of its hollow forged, fluid, compressed open hearth steel shafts made for the Chicago St. Ry. Co. This is one of 12 shafts now being furnished to that corporation. It is 28 ins. in diameter in body; 22 ins. diameter in journals;; 11-in. hole; 22 ft. 6-in. long; weigh, 15 tons. Mr. H. F. J. Porter, M. Am. Soc. M. E., Manager of the western department, with office in the Marquette Bldg., Chicago, was in charge of the exhibit and delivered a lecture at the convention, illustrated with stereoptican views.

MR. CHARLES WARD, Charleston, W. Va., is said to be building eight large boilers each having 62½ sq. ft. grate and 2,515 sq. ft. heating surface, for the new line of ferryboats for the Pennsylvania R. R., to ply from Jersey City to 23d St., New York city. The boilers are said to be unlike anything heretofore built of the tubular type and were designed specially for this duty. It is expected that a third boat will be built shortly. Mr. Ward has recently rebuilt the two Thornycroft boilers of the United States torpedo boat "Cushing," having entirely retubed them and made other repairs. He has recently

Improvement of Erie Canal, Middle Division—Contract No. 1.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from the east line of Oneida county to a point 100 feet below the lower hollow quoin of Lock No. 46.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the [illegible] provided they satisfactorily pass

direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $6,800; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of coneract, $47,600; the amount of bond for the faithful performance of contract, on execution of contract, $68,000. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope. "Proposal for the improvement of **the Erie canal, from the east line of Oneida county to a point 100 feet below the lower hollow quoin of Lock No. 46."** The right is **reserved** to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Erie Canal, Middle Division—Contract No. 2.

EW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from a point 100 feet below the hollow quoin of Lock No. 49 to a point 100 feet below the lower hollow quoin of Lock No. 50.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass
the specifications.

The amount of deposit with bid for the same will be $9,250; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $64,750; the amount of bond for the faithful performance of contract, on execution of contract, $92,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal, from a point 100 feet below the lower hollow quoin of Lock No. 49 to a point 100 feet below the lower hollow quoin of Lock No. 50." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Erie Canal, Middle Division—Contract No. 3.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from a point 100 feet west of the upper hollow quoin of Lock No. 50 to 100 feet west of the center of Camillus Road Bridge.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $6,350; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $44,450; the amount of bond for the faithful performance of contract, on execution of contract, $63,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for the improvement of the Erie canal, from a point 100 feet west of the upper hollow quoin of Lock No. 50 to 100 feet west of the center of Camillus Road Bridge." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Erie Canal, Middle Division—Contract No. 4.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from 100 feet west of the center of Camillus Road "113" to 100 feet west of the center of Peru Road Bridge.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

shipped a 500-HP. water-tube boiler to Seattle, Wash., for the new revenue cutter "Golden Gate," being built by Moran Bros., of that city, it being the fifth boiler of this type which he has furnished for revenue cutters.

THE FRANK B. RAE ENGINEERING CO. has been formed in Chicago, with a capital stock of $2,500; the incorporators are: Frank B. Rae, W. H. Jones and Leslie A. Gilmore. Mr. Rae is an electrical and mechanical engineer located at 910 Fort Dearborn Bldg., Chicago.

THE BROWN HOISTING & CONVEYING MACHINE CO., of Cleveland, O., Chicago Office, Marquette Bldg., has sold one hand power jib crane to the Boston & Montana Consolidated Copper & Silver Mining Co., Great Falls, Mont.; also one 10-ton trolley for hand power traveling crane to the same firm. The company has also just completed the installation of four of Brown's latest improved rapid coal handling machines at Clybourne Ave. Docks, Chicago, for Coxe Bros. & Co.

THE ROSSIE IRON WORKS, New York city, has had Joseph P. Curtis appointed receiver. The company has mines at Rossie, St. Lawrence county, N. Y. Mr. Curtis is the treasurer of the company, and Anthony J. Thomas president. It was incorporated Nov. 23, 1894, and has a capital stock of $390,000, chiefly held in London. The manufacture of iron was abandoned in 1868, and mining ore in July, 1893, since which time the mines have been closed. The trouble was due to low prices of iron and iron ores, in consequence of destructive competition of Western ores. The liabilities are $17,275, and assets $16,242.

THE SHIFFLER BRIDGE CO., Pittsburg, Pa., is said to have received a contract for the iron work for five buildings to be erected by the Mariopol-Nicopol Mining & Metallurgical Co., Mariopol, Russia, as follows: Blacksmith shop 60 × 100 ft., of brick and iron; machine shop, main span, 45 ft. wide, two side sheds each 24 ft., the building to be 240 ft. long and equipped with an electric traveling crane; foundry building, 123 × 166 ft.; tube welding building, 80 × 250 ft.; open-hearth building, 90 × 210 ft., with 40-ton electric traveling crane; rolling mill building, 180 × 300 ft. The company has a contract for the erection of a blacksmith shop for the Boston & Montana Consolidated Copper & Silver Mining Co., at Great Falls, Mont.; also a contract for the iron frame work building for the Pintsch Compression Co., of Pittsburg, and a kiln house for the Pennsylvania Salt Mfg. Co., Natrona, Pa. A contract recently secured is for a brick and iron building 100 × 900 ft., to contain the open-hearth furnaces, soaking pits and rolling mills of the Buhl Steel Co., at Sharon, Pa.

NEW COMPANIES.—Rankin Prospecting & Developing Co., Fort Madison, Ia.; to prospect for oil, gas and minerals; $100,000, all paid in; W. H. McCune, N. J. Wambold.

Eagle Mfg. Co., Kansas City, Mo.; to manufacture farming implements; $100,000, commencing with $50,000; Hiram F. Devol, George H. Devol, Samuel B. Stockley.

Baron Mfg. Co., New York city; to manufacture and deal in metals, alloys, and compounds of metals; $50,000; Aime Baron, of Paris, France; Robert A. Cheseborough, William R. Garrison, Paul Fuller, New York city.

Lancaster Machine & Knife Co., Lancaster, N. Y.; to manufacture machines and machine knives; $25,000; Andrew Cant, William C. Hodge, R. J. Cant, of Buffalo.

Salt Lake Electric Supply Co., Salt Lake City, Utah; $20,000; R. W. Nicol, E. Mill, S. J. Weisel.

Webster Car Fender Co., Jersey City, N. J.; $100,000, commencing with $30,020; Jas. A. Nichols, 32 Nassau St., New York city; Nathaniel M. Nichols, 60 Arlington St., Haverhill, Mass.; Geo. W. Harrison, Jersey City, N. J.

Variety Machine Works, Cripple Creek, Colo.; $5,000; W. Newell Smith, Edwin A. Emery, and Alice T. Smith.

Boston Contract Co., Boston, Mass.; to construct railways, canals, telephone lines, etc.; $1,000,000, commencing with $1,000; Henry O. Reed, Boston, Mass.; Freeman Hunt, Cambridge, Mass.; Isaac S. Parsons, Newton, Mass.

Terry Mfg. Co., Chicago; to manufacture cooper's supplies; $25,000; George S. Terry, John C. Farwell, and F. A. Rogers.

American Carbide Co., New York city; to manufacture calcium carbide; $1,500,000, commencing with $100; Chas. C. Adams, Arthur W. Toberg, Benj. H. Moore, Philadelphia, Pa.

United States Bolt & Rivet Co., Jersey City, N. J.; to manufacture railway supplies; $125,000, commencing with $10,000; Geo. W. Hunt and Geo. W. Barmore, New York city; Edward Devlin, Jersey City, N. J.

Etna Chemical Co., New York city; $10,000; Adam Cook, Allen H. Still, Geo. Conrad Cook, of New York city.

Cold Storage Co., Locke, N. Y.; $5,500; J. L. White, Chas. B. King, I. J. Main, of Locke.

C. M. Warner Malting Co., Syracuse, N. Y.; to manufacture and sell malt; $100,000; Charles M. Warner, Grove E. Warner, Willard H. Losee, Cornelius M. Emerick.

The Comstock Telephone Co., Truthville, N. Y.; to connect Truthville, North Granville, Comstock and West Granville, Washington county, by telephone; $500; J. V. Baker, Jr., Geo. C. Baker, Charles K. Baker.

Fireproof Apartment Construction & Realty Co., of New York city; $25,000; Sigmund B. Steinman, Julius Bonner, of New York city, and Eugene Cohn, of Brooklyn.

Taber Pump Co., of Buffalo, N. Y.; $25,000; B. C. Taber, M. E. Taber and G. H. Dunston, of Buffalo.

Laurence Harbor Land & Improvement Co., Jersey City, N. J.; to construct water-works, gas-works, electric light and power plants; $5,000, all paid in; Laurence Lamb, Memphis, Tenn.; Francis Faxon, Madison, N. J.; Edward Cecil Mosby, New York city.

Clizbe Bros. Mfg. Co., Chicago; to manufacture machinery; $25,000; Adelbert R. Clizbe.

Circle Cycle Co., New York city; $500,000, commencing with $500; Benj. P. Ryder, Henry W. Brooks, Geo. W. Burnham, New York city.

South Branch Brick Co., Springfield, W. Va.; $100,000, commencing with $100; N. B. Guthrie, J. T. Wudson, S. C. Milleson.

South Amboy Marginal Ry., Dock & Ferry Co., South Amboy, N. J.; to operate a ferry between Perth Amboy,

Improvement of Erie Canal, Middle Division—Contract No. 5.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y. until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for the improvement of the Erie canal from 100 feet west of the center of Peru Road Bridge to 100 feet west of the lower hollow quoin of Lock No. 51.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $7,050; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $49,350; the amount of bond for the faithful performance of contract, on execution of contract, $70,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposals for the improvement of the Erie canal, from 100 feet west of the center of Peru Road Bridge to 100 feet west of the lower hollow quoin of Lock No. 51." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,

43-3t Superintendent of Public Works.

Improvement of Oswego Canal—Contract No. 6.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for building a stone apron to a portion of Phoenix dam and work connected therewith on the Oswego canal.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $650; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $4,500; the amount of bond for the faithful performance of contract, on execution of contract, $6,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for building a stone apron to a portion of Phoenix dam, and work connected therewith on the Oswego canal." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,

43-3t Superintendent of Public Works.

Improvement of Oswego Canal—Contract No. 7.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for raising Braddock's dam on the Oswego canal, and work connected therewith.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $550; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $3,850; the amount of bond for the faithful performance of contract, on execution of contract, $5,500. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for raising Braddock's dam on the Oswego canal, and work connected therewith." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,

43-3t Superintendent of Public Works.

Improvement of Oswego Canal—Contract No. 8.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for raising Minnetto dam on the Oswego canal, and work connected therewith.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

Bell Electric Co., New York city; to deal in electrical appliances; $150,000; Clifford E. Potter, Frank M. Bell, John R. Kein, of New York city.

Chattanooga Coupler & Supply Co., Chattanooga, Tenn.; George H. Pierce, M. T. Freeman, C. S. Wilkins.

Shaft Ventilation Stone Co., Chicago; to manufacture building material; $50,000; R. Schroeder, Robert Kliche and William Franke.

Arena & Union Grove Telephone Co., Arena, N. Y.; to maintain a telephone line 24 miles long, from Arkville, Delaware county, to Arena, Union Grove, Downsville, etc.; $2,000; W. S. Dickson, B. A. Miner and E. H. Dickson, of Arena and others.

WILL YOU HELP?

Suppose each of 10,000 readers of Engineering News who are not now sending items were to send us one good Construction News item in a year (one item in 52 weeks) we would be obliged to add two pages to our Supplement each week; if only 400 more of our subscribers will send us monthly reports of projected work of which they may hear and will also keep us informed in regard to all such work in which they are interested, the same result will be attained.

If more items are sent we shall print them and all our readers will share in the benefits to be derived from the increase in the amount of news. Also, the publication of your name in our news columns, stating either that you are making surveys, preparing specifications or have the contract for some proposed new work may result in much good to you. We ask you to send us all the desirable news items that you can.

Improvement of Oswego Canal—Contract No. 9.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for raising High Dam on the Oswego canal, and work connected therewith.

Plans, specifications, notices and form of contract may be seen from the date of publication of this notice to the date fixed for the receipt of proposals, at the office of the Superintendent of Public Works in Albany, N. Y., and at the office of Thomas Wheeler, Assistant Superintendent of Public Works, in Syracuse, N. Y., and at the office of R. G. Lay, Assistant Superintendent of Public Works, in Rochester, N. Y.

REQUIREMENTS — In the selection of cements to be used in the said work, those manufactured in this state will be given the preference, provided they satisfactorily pass the tests called for by the specifications.

In case any questions shall arise in relation to the accuracy of the cement tests as provided in the specifications for this work, the Superintendent of Public Works may require that said tests shall be repeated in the presence of and under the supervision of agents or experts employed by him to enable him to settle the questions thus raised.

The Superintendent of Public Works will require that all prices which shall be agreed upon between the contractor and resident engineer as compensation for materials and work furnished and done and for which no prices are fixed in the contract, shall be submitted to him for approval or rejection. The location and extent of all borrow pits and spoil banks, proposed to be appropriated outside of the present canal appropriation lines, must be determined by the Superintendent of Public Works before the resident engineer shall direct that materials shall be taken therefrom or deposited thereon.

The delivery of all materials and all other work must progress in such order, at such times and at such rates of speed as shall be satisfactory to the Superintendent of Public Works as is contemplated by chapter 794 of the laws of 1896.

The Superintendent of Public Works will employ inspectors to represent his department in and during the prosecution of the said work, and the orders and requirements of said inspectors must be observed by the contractor, and said inspectors must be furnished with every needed or required facility for the inspection of all materials and work under the contract.

This notice will be publicly exhibited at the letting of said work, and will be attached to and become a part of any contract which may be executed by the Superintendent of Public Works for said work, and shall have the same binding effect as any other part or portion thereof.

Every proposal for said work must be accompanied by a draft or certified check upon some good banking institution, of the city of New York or Albany, issued by a national or state bank in good credit within the state, payable at sight to the Superintendent of Public Works for the amount expressed below as required to be deposited with bid for the proposed work. The amount of deposit with bid for the same will be $900; and will be retained as a part of the security until the completion of the work; the amount of labor bond required on execution of contract, $6,300; the amount of bond for the faithful performance of contract, on execution of contract, $9,000. All proposals for the above work must be addressed to the Superintendent of Public Works at Albany, N. Y., and must be endorsed on envelope, "Proposal for raising High Dam on the Oswego canal, and work connected therewith." The right is reserved to reject any or all bids.

GEO. W. ALDRIDGE,
43-3t Superintendent of Public Works.

Improvement of Oswego Canal—Contract No. 10.

NEW YORK STATE CANALS — NOTICE to Contractors—Office of the Superintendent of Public Works, Albany, N. Y., October 22d, 1896.

Pursuant to chapter 79, laws of 1895, and chapter 794, laws of 1896, sealed proposals will be received by the Superintendent of Public Works, at his office in Albany, N. Y., until Tuesday, November 10th, 1896, at 12 o'clock noon of that day, for raising Oswego dam on the Oswego canal, and work connected therewith.

Mr. John T. Page has been appointed a member of the Board of Electric Light and Water Commissioners at Lansing, Mich.

Mr. Wm. T. Hart, formerly President of the New York & New England R. R., died in Boston, Mass., Nov. 17, at the age of 79.

Mr. John E. Jackson, civil engineer, in the employ of the Southern Pacific Ry., died of heart trouble, Nov. 7, at Los Angeles, Cal.

Mr. H. B. Mitchell, Engineer of the Fort Hall Indian Reservation, Idaho, died Oct. 27. He was at one time City Engineer of Topeka, Kan.

Mr. W. M. Brehm has been appointed Master Mechanic of the Missouri, Kansas & Texas Ry. lines north of Denison, with office at Parsons, Kan.

Mr. John Wigton, has been appointed Master Car Builder of the Missouri, Kansas & Texas Ry. lines north of Denison, with office at Sedalia, Mo.

Mr. John R. Murphy, Water Commissioner of Boston, Mass., gave an address on "Modern Progress in Large Cities," at Dorchester, Mass., Nov. 9.

Mr. A. F. Brown, Chief Engineer of the Carnegie Steel Co., Pittsburg, Pa., has resigned and Mr. F. H. Kindl has been appointed to fill the vacancy.

Mr. Joseph H. Hampson, President of the Mexico, Cuernavaca & Pacific Ry., was married Nov. 11, at Washington, D. C., to Miss Blanche Wilson.

Mr. W. P. Robinson, Jr., General Manager of the St. Joseph & Grand Island R. R., has been made General Manager also of the Kansas City & Omaha R. R.

Mr. W. B. Worral, civil engineer, in the employ of the Chicago, Rock Island & Pacific Ry., was married Nov. 11, at Davenport, Ia., to Miss Martha Neuhaus.

Mr. T. H. Russom has been appointed General Car Foreman of the shops of the Baltimore & Ohio R. R., at Mt. Clare, Md., succeeding Mr. C. H. Williams, resigned.

Mr. Gustave Michelet, President of the Permanent International Tramway Union, died at Brussels, Belgium, Nov. 4, at the age of 59, after a long and painful illness.

Mr. Arthur R. Sweet, Superintendent of Sewers at Woonsocket, R. I., will retire from that position on Dec. 1, and the work will be looked after by the city engineering department.

Mr. J. T. Odell has resigned his position as Second Vice-President of the New England R. R., and will devote his entire time to his duties as President of the Butler & Pittsburg R. R.

Mr. Charles S. Price has been elected President of the Johnstown Water Co., of Johnstown, Pa., to succeed the late Mr. James McMullen. Mr. Cyrus Elder succeeds Mr. Price as Vice-President.

Mr. Hakon Hammer, civil engineer, engaged on the work of the extension of the wheel pit of the power plant at Niagara Falls, N. Y., was killed Nov. 13 by a dynamite explosion on the works.

Mr. Wm. G. Swan, who was Superintendent of the Niagara Railway Suspension Bridge Co., at Niagara Falls, from 1865 to 1893, died Nov. 10 at Albion, N. Y. He was born at Galway, N. Y., in 1822.

Mr. E. H. Hinton, General Agent of the Panama R. R., at San Francisco, Cal., has been appointed a member of the Board of Administration of the Southwestern Traffic Association, to succeed the late Mr. Waldo.

Mr. C. H. Jenks, Superintendent of the Northern Division of the Great Northern Ry., has been granted leave of absence on account of ill health, and Mr. C. T. Kittredge will have charge of the operation of the division.

Mr. A. Langstaff Johnston has resigned his position as engineer of construction for the Richmond Traction Co., of Richmond, Va., and will remove to Philadelphia. He was tendered a dinner by the officers of the company on Nov. 9.

Mr. George A. Johnson has opened an office as civil engineer in the Derby Street Ry. Co. Building, Derby, Conn. He was with Hull & Palmer, of Bridgeport, for six years, and with the Ousatonic Water Co. for four years.

Mr. George Hornung, M. Am. Soc. M. E., has been appointed Superintendent of Water-Works at Newport, Ky., to succeed Mr. John Surran. He held that position from 1872 until it was consolidated with the position of City Engineer.

Mr. F. C. Cleaver, Master Mechanic of the Terre Haute & Indianapolis R. R., at Terre Haute, Ind., has been appointed Master Mechanic of the Louisville, Evansville & St. Louis Ry., with headquarters at Princeton, Ind., to succeed Mr. J. F. Sechler, resigned.

Capt. Alfred T. Mahan, U. S. N., has been placed on the retired list at his own request, after 40 years' service. He is well known as a writer on naval matters, his most important work being "The Influence of Sea Power on History." He entered the naval academy at Annapolis, Md., in 1856, and served through the civil war.

Messrs. William G. Deshler, of Columbus; John Tod, of Cleveland; Paul J. Sorg, of Middletown, and Thomas B. Paxton, of Cincinnati, have been appointed by Governor Asa Bushnell, of Ohio, a commission to have charge of the improvements of the state capitol, estimated to cost about $1,000,000. The plans of Yost & Packard, of Columbus, O., have been accepted for the work, as noted last week under Buildings.

Mr. William F. Brown has been appointed Superintendent of Public Works of Chatham county, Ga. He will assume the duties heretofore in charge of Mr. W. A. Dayton, County Engineer (this position having been abolished by the county commissioners), and Mr. Robert J. Wade, Superintendent of Public Roads. He will also be in charge of the convict gang employed on the roads. His office is at Savannah, Ga.

Mr. J. E. Spurrier, Superintendent of the Baltimore Division of the Baltimore & Ohio R. R., has been given charge of the First Division, including Brunswick Yard, the Curtis Bay, Washington, Alexandria, Metropolitan and Frederick branches, and the Washington County R. R. Mr. F. A. Husted has been appointed Superintendent of the Second and Third Divisions, including the Berkeley Springs and Potomac & South Branch railways, which will hereafter be known as the Middle Division. Mr. R. M. Sheats, Superintendent of the Parkersburg and Wheeling Division, will have charge of the Fourth and Fifth Divisions, including the Grafton Yard and the Grafton and Bellington Division.

Mr. J. Waldo, Vice-Chairman of the Southwestern Traffic Association, died at St. Louis, Mo., Nov. 7. He was born at Osceola, Mo., in 1839, and in 1866 he entered the service of the Houston & Texas Central Ry. as a freight clerk, rising to the position of General Passenger and Freight Agent in 1873. He was Traffic Manager from 1881 to 1883; Vice-President to 1885, and General Manager to 1889, being also Commissioner of the Texas Traffic Association from 1885 to 1889. From 1889 to 1891 he was General Traffic Manager of the Missouri, Kansas & Texas Ry., and 1892 to 1893 was Vice-President of the road. In December, 1894, he became President of the Galveston, La Porte & Houston Ry., and from January, 1896, to his death was general agent for the receivers of that road. During 1896 he has been Vice-Chairman of the board of administration of the Southwestern Traffic Association.

◆

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

TACOMA SOCIETY OF CIVIL ENGINEERS AND ARCHITECTS.
Nov. 20. Secy., 201 Washington Bldg., Tacoma, Wash.

CHICAGO ELECTRICAL ASSOCIATION.
Nov. 20. "Daily Problems in Long Distance Telephoning," by C. L. Andrews. Secy., J. R. Cravath, 810 Old Colony Bldg.

ENGINEERS' CLUB OF COLUMBUS.
Nov. 21. Secy., M. S. Hopkins, 14½ N. High St., Columbus O.

ENGINEERS' CLUB OF PHILADELPHIA.
Nov. 21. "Professional Ethics Among Engineers," by Chas. Piez. Secy., L. F. Rondinella, 1122 Girard St.

WISCONSIN POLYTECHNIC SOCIETY.
Nov. 24. Secy., W. K. Means, Loan and Trust Bldg., Milwaukee, Wis.

ENGINEERING ASSOCIATION OF THE SOUTH.
Nov. 26. Secy., L. P. Brown, Nashville, Tenn.

INDIANAPOLIS ENGINEERING CLUB.
Nov. 28. Secy., C. C. Brown, Indianapolis, Ind.

COLUMBIAN ENGINEERING SOCIETY.
Dec. 1. Secy., F. W. Hart, 15th and H Sts., N. W., Washington, D. C.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS.
Dec. 1, 2, 3, 4. At the Society House, New York. Secy., F. R. Hutton, 12 W. 31st St., New York city.

WESTERN SOCIETY OF ENGINEERS.
Dec. 2. Secy., N. L. Litton, Monadnock Block, Chicago.

ENGINEERS' CLUB OF ST. LOUIS.
Dec. 2. Secy., Wm. H. Bryan, Turner Bldg.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Dec. 2. Secy., C. W. Hunt, 127 E. 23d St., New York.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Dec. 4. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Dec. 7. Secy., C. L. Annan, City Engineer's Office.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Dec. 7. Secy., Carleton Greene, Library Bldg., Buffalo.

DENVER SOCIETY OF CIVIL ENGINEERS.
Dec. 8. Secy., Walter Pearl, 36 Jacobson Bldg.

NORTHWEST RAILWAY CLUB.
Dec. 8. Secy., T. A. Foque, Soo Line, Minneapolis.

NORTHWESTERN SOCIETY OF ENGINEERS.
Dec. 8. Secy., D. W. McMorris, 635 Burke Block, Seattle, Wash.

NEW ENGLAND RAILROAD CLUB.
Dec. 9. Secy., Edwd. L. Jones, P. O. box 1158, Boston.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Dec. 10. Secy., James K. Zollinger, Norton Bldg.

NORTHWESTERN TRACK AND BRIDGE ASSOC.
Dec. 11. Secy., D. W. Meeker, St. Paul, Minn.

AMERICAN SOCIETY OF IRRIGATION ENGINEERS.
Dec. 11 and 12. Annual meeting in Denver. Secy., John S. Titcomb, Room 36, Jacobson Bldg., Denver, Colo.

MONTANA SOCIETY OF ENGINEERS.
Dec. 12. Secy., Forrest J. Smith, Denver Block, Helena.

ENGINEERS' CLUB OF KANSAS CITY.
Dec. 14. Secy., F. W. Tuttle, Baird Bldg.

NATIONAL IRRIGATION CONGRESS.
Dec. 15, 16 and 17. Annual meeting at Phoenix, Ariz. Secy., C. M. Heintz, Los Angeles, Cal.

ENGINEERS' SOC. OF WESTERN PENNSYLVANIA.
Dec. 15. Secy., Daniel Carhart, 410 Penn Ave., Pittsburg.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 16. Secy., F. Van Vleck, Los Angeles, Cal.

ASSOCIATION OF ENGINEERS OF VIRGINIA.
Dec. 16. Secy., J. A. Pilcher, Roanoke, Va.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Dec. 16. Secy., S. E Tinkham, City Hall.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.
Dec. 16. Secy., R. W. Pope, 26 Cortlandt St., New York city.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Dec. 16. Secy., A. Sorge, Marquette Bldg., Chicago.

WESTERN RAILWAY CLUB.
Dec. 17. Secy., W. D. Crossman, The Rookery, Chicago.

ENGINEERS' CLUB OF CINCINNATI.
Dec. 17. Secy., J. F. Wilson, P. O. box 333.

NEW YORK RAILROAD CLUB.
Dec. 17. "The Relation of Track to Traffic on American and Foreign Railways," by E. E. Russell Tratman. Secy., W. W. Wheatly, 168 Montague St., Brooklyn.

ENGINEERS' CLUB OF MINNEAPOLIS.
Dec. 21. Secy., Elbert Nexsen, 1620 S. E. 4th St., Minneapolis, Minn.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Jan. 21. Kimball House, Atlanta, Ga. Secy., F. A. Charpiot, Macon, Ga.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Dec. 31. Secy., C. H. McLeod, Montreal, Can.

CENTRAL RAILWAY CLUB.
Jan. 8. Secy., H. D. Vought, Buffalo "Courier," Buffalo, N. Y.

RAILWAY SIGNALLING CLUB.
Jan. 12. Secy., Geo. M. Basford, The Rookery Bldg., Chicago.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Jan. 12. "Some Problems in Street Railroading," by C. H. Short. Secy., F. A. Colburn, Case Library Bldg.

LIVERPOOL ENGINEERING SOCIETY.—At the opening meeting of the season, the President, Mr. S. B. Cottrell, delivered the inaugural address, which dealt with the progress in steam and electric railways, and the possibilities of electric traction for the future.

ST. LOUIS RAILWAY CLUB.—At the meeting of Nov. 13, two papers were presented: "Increasing Locomotive Mileage by Lengthening of Runs," C. W. Eckerson; "The Mechanical Properties of Wrought Iron and Steel as Shown by Actual Tests," Prof. J. B. Johnson.

CENTRAL RAILWAY CLUB.—At the meeting of Nov. 13 reports were submitted on the following subjects: "What is the Best Method to Bring About the Adoption of M. C. B. Standards by Railroads?" "Apprentice Boys in Railway Shops," "Shall the Cubic Capacity of Ordinary Box-Cars be Increased; If so, What Shall be the Maximum Limit?"

WESTERN RAILWAY CLUB.—At the regular monthly meeting of the club held Nov. 17, the discussion was continued regarding the committee report upon "Some Difficulties Which Have Arisen Under the New M. C. B. Interchange Rules." A paper on "Some of the Uses and Advantages of Compressed Air" was read by Mr. J. H. McConnell, Snuperintendent Motive Power, Union Pacific Ry., and committee reports were presented on "Recent Developments in M. C. B. Couplers" and "Recent Developments in the Tonnage System of Rating Locomotives."

ENGINEERS' CLUB OF PHILADELPHIA.—At the meeting of Nov. 7 Mr. Allen J. Fuller presented a paper on the "Queen Lane Division of the Philadelphia Water Supply System." He stated that the per capita consumption per day in Philadelphia is 160 gallons, and this for 1,250,000 inhabitants means an enormous supply. The greatest average pumpage during any one month is 240,000,000 gallons per day, and this quantity may be better appreciated by the statement that if it were extended in a straight line through a pipe 1 sq. ft. in cross-section, it would reach from Philadelphia to California and half way back again. Prof. L. F. Rondinella read a paper on "Rapid Methods in Instrumental Drawing."

L. F. Rondinella, Secy.

WESTERN FOUNDRYMEN'S ASSOCIATION.—At the meeting held Nov. 18 the report of the Committee on Apprenticeship was taken up for discussion. There was also discussion on the following of the association's series of topical questions: (1) What is the proper amount of air, and pressure of same, to melt iron in a cupola, and what are the effects of too little and too much air? (2) Is it economical to ventilate a foundry artificially? What has been your experience? (3) What is the best method of lighting a foundry of modern design? (4) Have any members of this association had any experience with Thurston's Autographic Torsion Machine? If so, does it possess any merit over other forms of machines now in use for testing cast-iron? (5) In order to overcome the variation in size of test bars incident to molding, is machining down to size to be recommended? (6) What is your experience as to the effect upon coke of exposing same freely outdoors? (7) What is your experience as to the utility and efficiency of flexible shafting for use with grinders on heavy and intricate castings?

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—At the November meeting Mr. Joseph R. Oldham read a paper on "Structural Strength of Ships and Improved Arrangements for Repairing without Diminution of Strength," which treated the subject under the following heads: Progression by steps in engineering, Increase in steel lake tonnage, Bending moment and shearing stress, Strength of beams and girders, Straining of ships, Improved hatches, Useful weak ships, Joggling and lapping, Flush bottoms, Heavy ships, Light ships, A perfect mechanical structure. Messrs. Newman, Searles and Head followed in an interesting discussion.

F. A. Coburn, Secy.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.—The annual meeting was held in New York, Nov. 12 and 13. Twelve papers were read, as follows: "Test of an Experimental Turret of the United States Battleship "Massachusetts," Capt. W. T. Sampson; "Steel Canal Boats," Lewis Nixon; "Naval Practice in Ship Rivets and Riveting," J. H. Linnard; "American Fireboats," H. De B. Parsons; "Corn Pith Cellulose," Henry W. Cramp; "The New Battleships," Philip Hichborn; "Speed Trials of Screw Propelled Ferry Boats," F. L. Du Bosque; "125-Ton Hydraulic Shear Legs," Frank B. King; "A Method of Calculating the Stability of Ships Adapted to the Use of Standard Curves of Stability," Hugo Hammar; "Stability of a Ship in a Damaged Condition," James Swan; "Damaged Conditions of a Battleship as Affecting its Stability and Fighting Efficiency," T. F. Ruhm; "Screw Propellers," Geo. R. McDermott. The following officers were elected for the ensuing year: Pres., Clement A. Griscom; Vice-Pres., Charles H. Cramp, Philip Hichborn, Charles H. Loring, Richard W. Meade, William H. Webb, George W. Melville, George W. Quintard, Irving M. Scott, Francis A. Walker, and Frank S. Fernald; Secy. and Treas., Francis T. Bowles. On Friday evening the society held its annual banquet at Delmonico's, with Secretary Herbert as its guest.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS.—At the meeting to be held in New York city Dec. 1 to 4, the following papers will be read: "The Progress in the Manufacture of Iron and Steel in America, and the Relations of the Engineer to it," John Fritz, Pres.; "An Historical and Technical Sketch of the Origin of the Bessemer Process," Sir Henry Bessemer; "Ancient Pompeian Boilers," Wm. T. Bonner; "The Moment of Resistance," C. V. Kerr; "Work Done Daily by a Refrigerating Plant and Its Cost," Francis H. Boyer; "Promise and Potency of High Pressure Steam," R. H. Thurston; "Experimental Investigation of the Cutting of Bevel Gears with Rotary Cutters," F. R. Jones and A. L. Goddard; "The Calibration of a Worthington Water Meter," J. A. Laird; "Contraction and Deflection of Iron Castings," Francis Schuman; "A 200-Ft. Gantry Crane," John W. Seaver; "Washing of Bituminous Coal by the Luhrig Process," J. V. Schaefer; "Friction, Horse-Power in Factories," C. H. Benjamin; "Some Special Forms of Mechanical Computers," Frederick A. Halsey; "Rustless Coatings for Iron and Steel," M. P. Wood; "A Method of Shop Accounting to Determine Cost," H. M. Lane; "The Efficiency of the Boiler Grate,' W. W. Christie; "Efficiency of Boiler Heating Surface," R. S. Hale; "Paper Friction Wheels," W. F. M. Goss; "Steam Engine Governors," Frank H. Ball; "Metric vs. the Duodecimal System," George W. Colles, Jr.; "Aluminum Bronze Seamless Tubing," and "The Photographing of Machinery," Leonard Waldo. Arrangements have been made for visiting the following places: Morgan & Quintard Iron Works, North River Iron Works, Pond Machine Tool Works, Stevens Institute of Technology, Columbia College—School of Arts, Law, Mines; Columbia College—School of Medicine (College of Physicians and Surgeons), Pratt Institute, Washington Bridge, Ship Yards and Works: S. L. Moore & Sons Co., "World" Building, Equitable Building, Metropolitan Museum of Art, Museum of Natural History, Power house, The United Electric Light and Power Co., 28th and 29th St. stations; Power house, Broadway Cable Road; Eastern Power house, Brooklyn City R. R.

NEW PUBLICATIONS.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENTS. Second Annual Convention, Held at Cincinnati, Ohio, Sept. 11, 12, and 13, 1895. 8vo.; 142 pp. 25 cts.

This pamphlet contains the new constitution of the society, the business proceedings of the meeting and the following papers and discussions upon them: "Specifications for Vitrified Brick Pavement," by W. G. Wilkins; "Quality of Public Water Supply," by John W. Hill; "Water Supply of Newark, N. J.," by Henry E. Bailey; "Street and Sewer Work of Indianapolis," by W. B. Holton; "Collection and Disposal of Garbage," by Thomas D. de Yilbiss; "Street Paving in Newark, N. J.," by Harrison Van Duyne; "School Hygiene," by Dr. Mary E. Donahue; "Street Cleaning in Newark, N. J.," by Henry W. Bailey; "Electrolysis Prevention," by Harold P. Brown; "Street Cleaning, Street-Watering, Scavenging, etc.," by John Jones. Copies of the pamphlet can be secured by addressing the Secretary, Mr. D. L. Fulton, Allegheny, Pa.

Since the above was in type we learn that the proceedings of the third annual convention, held at Chicago, last month, are soon to be printed, and the price has been set at $1, which covers only the actual cost. The edition, however, is to be limited to the number of copies required for the members of the Association, and those who order copies in advance. A report of the proceedings of the convention was published in our issue of Oct. 22. Any of our readers not members of the Association, who desire to procure a copy of the official report, should remit $1 to Hon. August Herrmann, the President of the Association, Cincinnati, Ohio.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

Bids to be opened.	Work. Place.	See Eng. News.
Nov. 19.	Bridge, etc., Buffalo, N. Y.	Nov. 12

RAILWAYS.

East of Chicago.

ANN ARBOR.—A report from Frankfort, Mich., says that leases have been made for the right of way over the water front to the large warehouses of Woodward Bros. by the Ann Arbor Ry., which will lay a double track to the warehouse for bulk freight. The company will put on two more large steamers for its winter route between Kewaunee and Manitowoc, Wis., and this place. The harbor here, with 600 ft. of piers out into Lake Michigan, has just been completed by the government., with a depth of 18 ft.

BELLEFONTE CENTRAL.—It is stated that this railway is completed to within one mile of Pine Grove Mills, Center county, Pa., and is rapidly being pushed into the town. A large number of men and teams are now employed in grading; the road will be finished in a short time.

BUTLER & PITTSBURG.—Bids for the grading and masonry for the 12 miles between the rivers were received Saturday, Nov. 14. The steel work for the 14 bridges will be furnished by the Carnegie Steel Co. The bridge across the Allegheny River will be 3,000 ft. long.

COAST RY. OF NOVA SCOTIA.—S. H. Wheaton, Ch. Engr., Yarmouth, N. S., writes us that the projected length is 97 miles, touching Yarmouth, Tusket, Argyle, Pubnico, Barrington, Clyde, Shelburne and Lockport. Line surveyed and all right of way granted by towns and municipalities. Capital is all secured and the road is being built by the Nova Scotia Development Co., composed of Philadelphia capitalists; John A. Brill, Pres.; G. Martin Brill, Vice-Pres.; Geo. A. Fletcher, Treas. Fourteen miles are fully completed and equipped for operation; 16 miles additional are completed ready for tracklaying and ballasting, for which 1,700 tons of rails are now on the way. The steel bridges are supplied by the Central Bridge Co., of Peterboro, Ont.; grading, masonry and fencing are sub-let to H. J. Townsend & Co., of New Glasgow, N. S.

DETROIT & MACKINAC.—The Bay City, Mich., "Tribune" says that contractors Kennedy & Campbell have begun figuring on the work of grading an extension from Rogers City to Cheboygan and will submit their bids the latter part of the month. The election of Mr. McKinley settled the question of completing the road. It is now only a question of time when the line will be put through and trains running from this city to Cheboygan via the shore route. Ch. Engr., D. J. Casey, Bay City, Mich.

GOSHEN & WABASH.—A press dispatch from Ligonier, Ind., states that this company has passed into the control of F. G. Hubbell, C. W. Miller, Alfred Lowry and J. A. Beane, of Elkhardt county. A special election was to be held in Goshen, Nov. 17, for the purpose of voting on the proposition of extending aid equal to one-half of 1% on the assessed valuation of property for the construction of the proposed road.

PATTEN & SHERMAN.—P. C. Newbegin, Ch. Engr., Patten, Me., writes us that the projected length is 9 miles, connecting Patten, Crystal and Sherman. The entire line has been surveyed and 5¾ miles constructed and now under operation. The remainder of the line will probably be constructed next summer. Pres., A. A. Burleigh, Haselton, Me.

QUEEN ANNES.—The contract for building the line between Greenwood and Ellendale, Del., a distance of 10 miles, is said to have been awarded to Wade, Burns & Co., of Baltimore, Md. This firm has been building the road from Queenstown, Md., to Greenwood, and will probably secure the contract to complete it from Ellendale to the terminus at Lewes, on the Atlantic Coast, a distance of 15 miles. The road is now finished to within a mile of Denton. Pres. W. H. Bosley, Baltimore, Md. Another contract of 15 miles remains to be awarded. Ch. Engr., T. W. Troxel, Queenstown, Md.

WELLSVILLE & BUFFALO.—F. A. Goodyear, of Buffalo, N. Y., accompanied by James Rafferty, of Java, and Beckley Howes, of Bliss, are said to have made a tour of inspection, regarding the proposed railroad from Wellsville to Buffalo. The road, if built, will be an extension of a line running to Williamsport, Pa., and will be a shorter route to New York city.

Southern.

BELINGTON & ROARING CREEK.—A report from Elkins, W. Va., states that Caldwell & Dayton, Grafton, W. Va., the contractors, have begun work on the last five miles of this road along the Roaring Creek valley in West Virginia, and which connects with the Baltimore & Ohio and West Virginia Central & Pittsburg. A force of 150 men is employed. The work was stopped last July owing to a lack of money. The road opens up a 14-ft. vein of coal for 20 miles and 500,000 acres of timber land that lie on Roaring Creek. It is of standard gage.

BATH COUNTY IRON CO.—A report from Olympia, Ky., says that this company may construct a railway to its mines in the vicinity of Olympia.

MOBILE, JACKSON & KANSAS CITY.—A press dispatch from Mobile, Ala., says that this enterprise, begun nearly 30 years ago, and which first was brought to the point of construction last spring, will be put through without delay. Pres., F. B. Merrill, New York city, is quoted as saying that the construction will be pushed to completion.——Bids are asked until Nov. 20 for furnishing 50,000 cross ties. The road is to be 183 miles long. The immediate outlay in this section will be $1,800,000. For information address the Gulf City Construction Co., 62 St. Francis St., Mobile, Ala.

CHESTER & LENOIR.—A report from Chester, S. C., says that this railway has been sold to the bondholders represented by W. A. Clarke, of Columbia, S. C. The road may be extended from Newton to Hickory, N. C., by the present owners. The distance is 20 miles.

NORFOLK & WESTERN.—A press dispatch says that this company has secured the right of way to build from Kenova to Huntington, W. Va., and will soon commence the construction of a three-mile branch. Ch. Engr., W. W. Coe, Roanoke, Va.

SOUTHERN.—Condon & Henderson, of Knoxville, Tenn., have secured the contract to build a spur of the Southern Ry., from Spartanburg, S. C., to Beaumont, and have begun work.

Northwest.

OMAHA BRIDGE & TERMINAL.—It is stated that this company will proceed to make the improvements contemplated and conditionally contracted for some time since. They will involve approximately the expenditure of $500,000 and will include connections with all roads entering Omaha, South Omaha, and Council Bluffs, the building of freight depots, etc. The largest single improvement will be the construction of a connecting line with the Missouri Pacific.

Southwest.

PITTSBURG, WEIR & COLUMBUS.—This company has been incorporated at Crawford, Kan., wth a capital stock of $200,000 to build a railway. Incorporators; R. Simons, West Chester, Pa.; J. A. Nuttman, J. M. Lupman, J. Randolph and Saml. Barrett, Pittsburg, Kan.

Rocky Mountain and Pacific.

CRYSTAL RIVER.—A press report from Aspen, Colo., says that the roadbed, right of way and five miles of track of the Crystal River Ry. Co. have been sold to Orman & Crook, judgment creditors. The road is to tap a mineral section in both Pitkin and Garfield counties, and when completed will have a total length of 28 miles.

CRIPPLE CREEK.—A press dispatch from Colorado Springs, Colo., says that another short line railway to Cripple Creek is being projected and it is understood that active steps for its construction will be taken within a few days. The new road is to be nearly 60 miles long. The maximum grade is 3 ft. in 100. It has been given out that there will be about 35 tunnels, three or four of which will be of considerable length, and the remaining ones short. The estimated cost of the road is about $1,500,000.

SIERRA PACIFIC.—A press report from Stockton Cal., says that the directors of the Sierra Pacific R. R. met in San Francisco Nov. 6, to consider the issuance of $1,800,000 in bonds to be used in the construction of the line. Mr. Boggs, Supt. of Constn., has started over the line and on his return will make a report to the officers of the county and get matters in shape for the preliminary surveys.

Foreign.

CUERNAVACA & PACIFIC.—It is stated that 12½ miles south of Puente de Ixtla are in readiness for operation, and construction is being vigorously prosecuted to Buena Vista, 6¼ miles southward. It is the intention of the company to reach Buena Vista by Nov. 15. Two thousand men are employed beyond Puente Ixtla and 1,000 below Tres Marias towards Cuernavaca. Work is being crowded on this last section.

NICARAGUA.—A press dispatch from Managua, Nicaragua, says that President Zelaya has decided to grant a charter for a railway from Lake Nicaragua to the Caribbean Sea, a distance of about 70 miles, to two citizens of New York. This road is looked upon as certain to lead to a prompt development of the interior of the republic and should be of considerable assistance in the work of building the Nicaragua Canal.

STREET AND ELECTRIC RAILWAYS.

NORTH WATERFORD, ME.—Amos F. Gerald, Fairfield, Me., is said to be interested in a proposed electric railway to Norway. The distance is 15 miles. There are good powers at either end. It will cost about $10,000 per mile to construct the road.

BENNINGTON, VT.—It is stated that there seems to be but little doubt that work on the Bennington electric railroad will be begun in the coming spring. The charter for the road was obtained two years ago and already about $6,000 has been expended in preliminary work. The road will be nine miles long if built according to the terms of the charter, and at Walloomsac will connect with the Hoosick Falls road. A. E. Powers, of Lansingburgh, N. Y., is interested. The survey for the road was completed several weeks ago, and in several instances land damages were agreed upon.

BELLOWS FALLS, VT.—Representative Hadley, of Rockingham, Vt., has asked the Vermont legislature to amend the charter of the Bellows Falls & Saxtons River St. Ry. Co. so that the route may be changed. This company was incorporated two years ago to build a railway five miles long, but no work has yet been done.

CHARLESTON, VT.—Representative Prouty, of Newport, Vt., has introduced a bill in the Vermont legislature for the incorporation of the Clyde River Electric Ry. to operate in Newport, Derby, Charleston and Brighton, Vt. The capital stock is to be $150,000. Among those interested are C. S. Magoon, P. J. Farrel, G. H. Prouty, J. E. Farrell, Seymour Lane, C. C. Davis and C. A. Prouty.

POULTNEY, VT.—Representative Platt, of this city, has asked the Vermont legislature to incorporate the Western Vermont St. Ry. Co., with a capital stock of $100,000, to operate a street railway in the towns of Middletown Springs, Poultney, Fair Haven, West Haven, Benson, Castleton, Ira and West Rutland, in the State of Vermont. Incorporators: Leonidas Gray, A. Y. Gray, A. A. Greene, A. H. Varney, J. B. Beaman, E. H. Phelps and Jerome B. Bromley.

RICHFORD, VT.—Silas P. Carpenter, L. C. Leavens, W. S. Foster, A. K. Brown, F. W. Mitchell and J. N. Powell, of Richford, and J. M. Cobb, H J. Rublee, O. N. Kelton, C. T. Hall, J. C. Hutchins and H. O. Rowley, of Montgomery, have asked the Vermont legislature to be incorporated as the Richford & Montgomery Electric Ry. Co., with a capital stock of $75,000, to operate a street railway in the towns of Richford and Montgomery.

DOUGLAS, MASS.—Dr. Silas P. Holbrook informs us that the proposed Sutton & Douglas Electric St. Ry. is to commence in the town of Douglas, near the East Douglas station on the New England R. R., and to extend through the village of East Douglas to the village of Manchaug in the town of Sutton. Its length will be about five miles. The capital stock shall be $50,000. The incorporators are: Silas P. Holbrook, W. R. Wallis, Stillman Russell, Douglas, Mass.; Geo. D. Moore, C. L. West, Worcester, Mass.

FITCHBURG, MASS.—The Gardner, Westminster & Fitchburg Co. has been given a franchise. The line is to extend from this city to Gardner, through the town of Westminster, and will connect with the Fitchburg and Leominster and Gardner lines.

RANDOLPH, MASS.—The Randolph, Holbrook & Nantasket Beach St. Ry. Co. has been incororpated with a capital stock of $13,800 to build a railway 5½ miles long.

NEWTON, MASS.—F. G. L. Henderson, Supt., writes us that the Newton St. Ry. Co. is projecting additions 2½ miles long, right of way is granted, but no capital is yet secured for construction. Contracts will probably be let by the latter part of the winter. Pres., Winthrop Coffin, 620 Atlantic Ave., Boston.

NORWICH, CONN.—It is stated that a petition will be presented to the next legislature for permission to construct an electric railway between Norwich and Jewett City, passing through Preston. The road is to be built by an independent company, but at Norwich it will connect with the tracks of the Norwich St. Ry. Co. The money for construction, it is understood, will be forthcoming whenever the charter is granted.

BUFFALO, N. Y.—It is announced that the Buffalo Traction Co. will begin the construction of its road early next spring.

SYRACUSE, N. Y.—The State Railroad Commission has granted the application of the Onondaga Lake Ry. Co. to construct an electric railway from Syracuse to Onondaga Lake.

NIAGARA FALLS, N. Y.—The State Railroad Commission has granted permission to construct a street railway to the Niagara Falls St. Ry. Co.

KEARNEY, N. J.—The Consolidated Traction Co. has made application for permission to extend its present line up Kearney Ave. to the Belleville Turnpike, a distance of about a mile, and from Elm St. to the Harrison line, a distance of about 1½ miles.

ASHLAND, PA.—G. M. Smith, Pres., Shamokin & Mount Carmel Electric Ry. Co., is quoted as saying that the company will build an electric railway between Ashland and Centralia, and thus form a connecting link between the Shamokin-Mount Carmel Electric Ry., at Centralia, and the Schuylkill Traction Ry. at Ashland, and that the work of construction would be under way soon. Surveys are now in progress.

BRADDOCK, PA.—The council of Braddock has declared the rights of the Braddock Electric Ry. Co. to occupy Talbot Ave., between 2d and 13th Sts., forfeited. This is said to be for the purpose of allowing the Braddock & Homestead St. Ry. Co., which is to bridge the Monongahela River at Rankin, the privilege of getting through the town over this thoroughfare; it will have to pay the borough the sum of $5,000.

HELLERTON, PA.—Citizens are attempting to secure an extension of the South Bethlehem Electric Ry. to this place.

BALTIMORE, MD.—The Maryland & Columbia Ry. Co. between Baltimore and Washington, may be reorganized. This done the line will be completed. The company is in the hands of receivers. An issue of $75,000 of receivers' certificates to complete the Washington end of the line has been authorized. The motive power proposed is compressed air for Washington and overhead trolley for the other part of the line. James Bond and W. K. Schoepf are receivers.

HAGERSTOWN, MD. — The Hagerstown Electric Ry. Co. is said to be making active preparations to extend the street railway to the Crawford Bicycle Works. The railway company has secured from Robert S. Crawford, the necessary right of way. The extension will be about 2,000 ft. long. The company in the spring expects to build the Funkstown extension, about a mile long.

PARKERSBURG, W. VA.—The "State Journal" says that the projectors of an electric street railway are now purchasing materials. Mr. Wolf is interested.

CHARLESTON, S. C.—The Enterprise St. Ry. Co. will make an important extension of its line along East Bay, Broad and Meeting Sts.; Pres. Passailayne states that work will begin within a week. The newly chartered City Electric Ry., in which several New York capitalists are interested, and which will put in a system of overhead trolley, costing $200,000 or more, will begin work on its line in a few days.

CHATTANOOGA, TENN.—An electric railway is soon to be built from Chattanooga up Walden's Ridge, 13 miles, to the coal beds. It will cost about $200,000, and will carry both passengers and freight. Sixty-pound rails will be used. T. J. Nicholl has instructed Mr. Dietz, Ch. Engr., to resume the survey for the proposed railway.

COVINGTON, KY. — The "Commonwealth" says that the extension of the C., N. & C. St. Ry. lines over Banklick St., from Pike to 13th St., will be commenced upon the opening of spring. Mr. Jenkins, Supt., is quoted as saying that the long talked of extension of the road out the Lexington pike to Erlanger will come later.

AKRON, O.—The County Commissioners have granted a franchise to the Cleveland & Southern Electric Co. for an electric road from here, via Richfield and Bath, thence to Cleveland. The line will be in operation within a year.

CINCINNATI, O.—Citizens of Wyoming and Lockland are anxious to have the Main St. Electric Ry. extended to these villages. It is probable that the citizens of these villages will agree to raise a bonus of $2,500 for the extension, provided they are given a 10-cent fare.

CLEVELAND, O.—Jos. Roof, of Cleveland, and E. V. Hard, of Wooster, are projecting the Cleveland, Medina & Wooster Electric Ry. The company has contracted to pay the county an annual tax for 25 years of $50 a mile. This means $850 a year to the county, when the line is completed. The estimated cost of the road is $750,000. It will run from South Brooklyn, through Parma, Middleburg, Strongsville, Brunswick, Medina and Wooster. Work must be begun by March, 1897, and the road must be completed by 1898.

SANDUSKY, O.—Clark Rude, one of the projectors of the Sandusky, Bellevue, Monroeville & Norwalk Electric Ry. is quoted as saying that he has secured the right of way to Bellevue and North Monroeville, and also from Monroeville to Norwalk. He is still negotiating for the right of way between this place and North Monroeville.

TIFFIN, O.—New York capitalists have been in the city for the past few days, and it is said that the uncompleted Fostoria & Tiffin Electric R. R., on which no work has been done since 1892, will be transferred from the present owner, S. B. Sneath, to the Eastern capitalists, and work is to be resumed. The road was all graded and tracks laid for about three miles of the fourteen. From this city, it is hoped to continue the road to Fremont, and the men now considering its purchase are favorable to its extension.

BENTON HARBOR, MICH.—Mr. Dean, Vice-Pres. of the proposed Benton Harbor & Eastern Electric Ry., is quoted as asying that the construction of the line will commence at once. The projected road is to run from Benton Harbor to Decatur and thence to Allegan, by way of Paw Paw. The right of way has been secured to the latter place and the engineers have established the grade lines from Benton Harbor to Decatur. It is expected to complete the grading of the line during the coming winter.

BAY CITY, MICH.—A press dispatch states that a company has been formed in New York city for the purpose of building an electric railway from Bay City east to Fairgrove, in Tuscola county, with diverging branches from that place, one going north to Sebewaing and Unionville, and the other southeast to Cairo. The third rail system will be used.

MONROE, MICH.—A company has asked the city council for a franchise to operate a street railway in Monroe. The company is represented by Wm. C. Johnson and P. N. Jacobson. The council has referred the matter to the judiciary committee and city attorney.

PEORIA, ILL.—The Glen Oaks & Prospect Heights Ry. Co. has petitioned for privilege to extend its lines.

DES MOINES, IA.—The street railway company is understood to be figuring on some extensive improvements in the way of extensions for next year, among them being the construction of a line to Valley Junction. G. B. Hippe, Mgr.

LOS ANGELES, CAL.—The Pasadena & Pacific Ry. Co. has been incorporated to build a double-track electric railway 35 miles long, from Altadena to Santa Monica; capital stock, $500,000, commencing with $35,000; incorporators: E. P. Clark, W. D. Larrabee, M. H. Sherman, M. E. Hammond, T. C. Paxton, all of Los Angeles.——A press dispatch states that the directors of the Ventura & Ojai Valley R. R. Co. took initial steps Nov. 9 for the issuance of bonds to the amount of $100,000 to be used in construction.

NAPA, CAL.—A press dispatch says that a mass meeting recently held was addressed by the promoters of the Clear Lake Electric Power Co. The men at the head of this company have capital to build an electric railway from Napa to Lakeport and to develop electric power for Napa Valley and Vallejo. Their plans are contingent upon written promises of support after the plant is in operation.

RED BLUFF, CAL.—The Northern California Electric Ry. & Improvement Co. has filed a petition with the county clerk of Tehama county for a franchise over the county road from Red Bluff north to the county line for purpose of establishing an electric railway to be continued to the coast. The petition is filed by Frederick Eden, who engineered the Folsom scheme and who represents the company, which awaits action by the board of supervisors.

SAN FRANCISCO, CAL.—The Market St. Ry. Co. expects to begin work before long on the extension of the Mission St. electric system to the county line. About 1½ miles of double track will have to be laid south from Onondago Ave. to reach San Mateo county. A short extension will also be built on Sickels Ave. from Mission St. into Ocean View. It is the ultimate intention of the Market St. Ry. to extend the Mission St. system to the cemeteries in San Mateo county.

SANTA ROSA, CAL.—The board of supervisors has granted a 50-year franchise to N. W. Griswold, of Kenwood, for the construction of the Santa Rosa & Sonoma Electric Ry. Mr. Griswold's bid was for $250. Within the next 60 days a company will be incorporated and the work of building the road will commence at the Embarcadero landing on the Napa River. From there the line will be constructed to Sonoma, and from there, by way of Glen Ellen, Agua Caliente, Kenwood and Melita, to Santa Rosa.

SACRAMENTO, CAL.—It is stated that word has been received that the projectors of the Sacramento & Orangevale R. R. have determined to commence work immediately. The projectors of the road are Gen. J. F. Thompson, of Forest City, Ia.; Geo. Parker, Hastings, Minn., and W. J. Bonwell, of St. Paul. The road will have electricity as a motive power, and will tap the American River district. About $400,000 will be expended in the work.

ELECTRIC LIGHT AND POWER.

NEW HAVEN, CONN.—It is reported that the board of trustees of Yale University is considering plans for an electric light plant for the grounds and buildings.

BALLSTON, N. Y.—It is said that the Ballston Electric Light & Power Co. has decided to double the capacity of its plant. There will be added a 200-HP. boiler and engine and a 2,000-light dynamo.

BUFFALO, N. Y.—Bids are asked until Dec. 5 for electric wiring the new infirmary buildings of the Buffalo State Hospital. I. G. Perry, State Arch., Albany; F. W. Brown, Res. Supt., 1326 Guaranty Bldg., Buffalo; J. P. Dudley, Treas., 110 Franklin St.

JAMAICA, N. Y.—Bids are asked by the town board until Nov. 27 for lighting the Woodhaven lighting district with 1,200 c. p. arc lights, and 20 and 70 c. p. gas and naphtha lamps. The lights are to be ready by Jan. 1.

NEW YORK, N. Y.—The following bids were received by the treasury department at Washington, D. C., Nov. 9, for an electric light and power plant in the post office building in this city; (1) being for boilers, (2) dynamos and engines, (3) switchboard, (4) for entire plant, (5) removal of old boilers:

Burhorn & Granger, 136 Liberty St., New York: (1) $37,167, (2) $26,550, (5) $375.

Westinghouse Electric & Mfg. Co., Pittsburg, Pa.: (1) $47,250, (2) $29,690, (3) $34,125, (4) $111,065.

New York Electric Equipment Co., Duane and Elm Sts., New York: (1) $36,000, (2) $28,062, (3) $29,990, (4) $92,052, (5) $1,000.

Walworth Construction & Supply Co., 100 Pearl St., Boston: (1) $39,364, (1 and 2 combined) $64,333.

S. I. Pope Co., 207 Medinah Temple Bldg., Chicago: (1) $23,760.

Fisher Electrical Mfg. Co., Detroit, Mich.: (2) $24,690.

Westinghouse, Church, Kerr & Co., 26 Cortlandt St., New York: (1) $45,000, (2) $28,275, (3) $32,600, (4) $105,875.

Wallace & Cary, 131 4th Ave., New York: (1) $33,953.

Frank McSwegan & Son, 98 Liberty St., New York: (4) $89,000, (5) $300 and old boilers.

Ideal Electric Corporation, 36th and Houston Sts., New York: (1) $37,700, (2) $25,200, (3) $28,300, (4) $91,070.

Baker, Smith & Co., 5th Ave and Houston St., New York: (1) $35,575, (5) $1,000 and old material.

E. Keeler Co., Williamsport, Pa.: (1) $25,500.

McCay-Howard Engineering Co., 106 E. German St., Baltimore, Md.: (1) $33,800, (2) $28,225, (3) $20,745, (4) $81,995.

Campbell & Zell, Equitable Bldg., Baltimore, Md.: (1) $20,401.

Southern Electric Co., Hoen Bldg., Baltimore, Md.: (3) $18,834, (4) $90,109.

Commercial Construction Co., New York: (1) $45,000, (2) $28,275, (3) $28,290, (4) $101,987.

The Ball Engine Co., Erie, Pa.: $16,586 for engines only,

E. Rutzler, 178 Centre St., New York: (1) $36,361, (5) $1,000 and old material.

W. R. Fleming & Co., 203 Broadway, New York: (1) $37,070. (2) $24,543, (3) $31,000, (4) $91,113, (5) $736.

Triumph Electric Co., Cincinnati, O.: $15,394 for engines.

J. P. Hall, 143 Liberty St., New York: (1) $35,500, (2) $28,000, (3) $30,000, (4) $103,000, (5) $1,000 and old boilers.

Western Electric Co., Chicago, Ill.: (2) $26,508, (3) $27,000.

Coatesville Boiler Works, Coatesville, Pa.: (1) $46,365, (2) $27,175, (3) $33,309, (4) $105,803.

CAMDEN, N. J.—It is reported that the Camden Lighting & Heating Co. is receiving estimates for a new power plant through its architect, Henry D. Dagit, 706 Walnut St., Philadelphia. The plant will consist of a boiler-house, engine-house and generator room, located at 17th St. and Cooper Creek, Camden. The boiler-house will be 36 × 50 ft., and will contain four 200-HP. Fowden water-tube boilers connected to a steel stack 150 ft. high. The engine-house will be 40 × 160 ft., and will be 50 ft. high, with iron roof trusses. A ventilating monitor, 40 × 50 ft., and 8 ft. high, is designed to carry off the heat from the engines. This room will eventually contain 3,000 HP., but at present only 800 is being installed. The generator room wil be 60 × 180 ft. The entire work will be under the supervision of H. D. Dagit, and the power and electrical installation under Mr. Fowden, the company's engineer.

BEAVER FALLS, PA.—The Valley Power & Light Co., Beaver Falls, which was recently incorporated with a capital stock of $3,000, will purchase some new machinery in the near future. W. A. McCool and H. W. Reeves are interested.

YORK, PA.—Press reports state as follows: One of the largest electric plants in this country will soon be established at York Haven, at the cost of about $3,000,000. The capacity will be about 20,000 HP. It will be under the supervision of H. L. Carter, present owner of the York Haven paper mill, of Philadelphia, and Mr. Severy and Mr. Einstein, of New York. The plant will distribute electricity throughout the nearby towns, such as Harrisburg, Lancaster, York, Manchester and all the towns within a radius of 30 or 40 miles. It is said that the plant will be the means of the establishment of three or four large mills at this place. Early in the spring about 1,000 men will be put on the work in order to hasten its completion. It is thought that it will take about three years to complete the plant.

WASHINGTON, D. C.—The United States Electric Light Co. has voted to receive estimates for remodeling and improving the B St. and 13½ St. station. It is stated that about $300,000 will be spent in extending and improving the machinery of the different plants. Pres., A. A. Thomas; Secy., S. W. Tulloch; Treas., A. F. Marsh.

WESTERNPORT, MD.—It is stated that this place proposes to erect an electric light plant.

CHARLESTON, S. C.—The court has granted the Charleston Electric Light Co. permission to purchase a 150-K-W. machine, to cost $2,500.

NEW ORLEANS, LA.—Receivers Badger and Whitney, on Nov. 9, in the United States Circuit Court, filed an application for permission to issue receiver's certificates for the purpose of placing additional machinery and apparatus in the Louisiana electric light plant. Judge Pardee granted the application.

COAL CREEK, TENN.—R. M. Edward & Co. are reported as interested in a projected electric light plant for this place.

CLEVELAND, O.—Bids are asked until Dec. 9 for lighting the streets, alleys, etc., with 500 arc lights, for one year from Jan. 1, and also for 4,650 gasoline lights, etc. D. E. Wright, Dir. Pub. Wks.

LAKEWOOD, O.—Bids were opened Nov. 18 for the purchase of $20,000 of 6% bonds for erecting an electric light plant. Wm. F. Closse, Clk.

YOUNGSTOWN, O.—The board of water-works trustees has decided to add an electric light plant to the waterworks. The plant will furnish 6 arc and 25 incandescent lights. J. H. Morris is a trustee.

FRANKFORT, IND.—Bids are asked until Dec. 18 for constructing an electric light system or a Welsbach gas system, as described in our advertising columns. Alonzo J. Hammond, Cy. Engr.

HARTFORD, WIS.—Portz Bros. and J. B. Hahn of this city are reported as considering the advisability of putting in an electric light plant in Hartford. They are now getting estimates and a sufficient guarantee from the council and the citizens, and if everything is found satisfactory, the city will soon be lighted by electricity.

OCONTO, WIS.—It is reported that the council has voted to have plans prepared for a new electric light plant.

MINNEAPOLIS, MINN.—Press reports state that in about 20 days specifications for the electric power plant for the St. Anthony Falls Power Co. will be prepared and then bids for the dynamos and switchboards will be received. The plant, the dam for which will be located below St. Anthony Falls, will furnish over 10,000 HP. It is said that about 60 carloads of machinery will be needed. Ch. Engr., Wm. de la Barre, Minneapolis; Asst. Engrs., Foree Bain, Monadnock Bldg., Chicago, and Chas. Armstrong, Chicago, Ill.——A building permit has been taken out by the St. Anthony Falls Water Power Co., for a 100 × 207-ft. two-story power station, to cost $110,000.

CENTRALIA, MO.—We are informed that J. K. Fyfer, of Columbus, Mo., has been granted a franchise for an electric light plant. A 750-light alternating plant will be installed by Jan. 1. Plans were prepared by A. L. McRae, 309 Oriel Bldg., St. Louis, Mo.

ST. JOSEPH, MO.—The St. Joseph Ry., Light, Heat & Power Co. will soon make improvements to its light plant. W. T. Van Brunt, Gen. Mgr.

MODESTO, CAL.—Judge A. Hewel, W. H. Hatton and W. A. Harter have submitted a report of their investigation upon the proposition to install an electric light plant in this city. They recommend that Hassen & Hunt be employed to visit this city and make surveys for a plant and submit a report.

SACRAMENTO, CAL.—Bids for the electric motor, power pump and electricity to furnish 70 lights for the county hospital were opened Nov. 18 by the supervisors.

MEXICO, MEX.—Plans and specifications are reported as about completed for furnishing this city with electric power by way of the Tequixquiac Tunnel. It is said that about $8,000 HP. will be furnished the city. Thos. W. Orbison, Ch. Engr. Electric & Irrigation Co., and Francisco Espinoza, 1038 Third Calle Colon.

NEW COMPANIES.—Sunapee Electric Light & Power Co., Sunapee, N. H.; $4,000; A. F. Stocker, William C. Stocker, C. E. Trow, W. W. Trow, Joseph Russell.

Standard Light & Power Co., Fort Worth, Tex.; $100,000; John C. Harrison, Wm. B. Harrison, George E. White, R. J. White.

Cheney Water, Light & Land Co., Cheney, Wash.; $100,000; Knox Johnston, C. B. Hopkins and others.

Barre Electric Light & Power Co., Barre, Vt.; $150,000; Frank G. Howland, H. K. Bush, W. A. Perry, Geo. J. Reynolds.

BRIDGES

PROVIDENCE, R. I.—We are informed that the following bids were received Nov. 5 for constructing a steel superstructure for the Manton Ave. bridge over the Woonasquatucket River, as advertised in Engineering News; Robt. E. Smith, Comr. Pub. Wks.:

Bidder.	Steel work, complt.	Addit'n'l for stl. sidewlk beams.	Extra steel work, per lb.	Total.
Toledo Bridge Co.	$2,570	$175.00	$0.0341	$2,745
Wr't Iron Bridge Co.	2,495	190.00	.035	2,685
King Bridge Co.	2,440	200.00	.035	2,640
R. F. Hawkins	2,748	198.00	.0365	2,946
N. J. Steel & Iron Co.	2,748	148.00	.036	2,896
Edge Moor Bdg. Wks.	2,500	175.00	.035	2,675
Youngst'n Bridge Co.	2,860	300.00	.03	3,160
F. R. Long, New York	2,600	170.00	.0375	2,770
Springfield Cnst'n Co.	2,383	153.00	.034	2,536
Berlin Iron Brdg Co.	2,500	180.00	.038	2,680
Vermont Const'n Co.*	3,240	140.00	.0237	3,380

*St. Albans.

WOONSOCKET, R. I.—The Youngstown Bridge Co., Youngstown, O., has been awarded the contract for constructing a steel bridge over the river, as advertised in Engineering News. There were 14 bids, ranging from about $12,000 to about $16,500. Frank H. Mills, Cy. Engr.

NEW HAVEN, CONN.—The city has been ordered to build at once the proposed bridge at East Chapel St. over the tracks of the New York, New Haven & Hartford R. R. The order for the building of the bridge, which now stands with slight modification, was passed by the Railroad Commissioners in June, 1886, and approved by the superior court in July of the same year. It provides that the city shall build the bridge, the embankments and abutments. The bridge is to be 15 ft. above the tracks, which the railway company must lower 20 ins. The damage assessed to property owners will be paid by the city and the railway, jointly.

HARTFORD, CONN.—The New York, New Haven & Hartford R. R. Co. has been directed to rebuild its bridge over its tracks at Broad St. at once.

ALBANY, N. Y.—Bids are asked until Nov. 25 for constructing a steel swing bridge over the Black River at Lowville, and also for rebuilding the bridge over Black River at Glendale. Thos. Wheeler, Asst. Supt., Syracuse, N. Y.; Geo. W. Aldridge, Supt. Pub. Works.

BUFFALO, N. Y.—Bids are asked until Dec. 2 for constructing the superstructure and postbents of the Chicago St. viaduct, between north line of Carroll St. and south abutment of the Hamburg Canal, also the ramp approach in Exchange St. connecting with the viaduct; prices required for each span and approach separately and for sum total. Edward B. Guthrie, Ch. Engr. Bureau of Engineering; Geo. E. Mann, Eng. Grade Crossing Comrs., Municipal Bldg.; R. B. Adam, Chn.

BUFFALO, N. Y.—The contract for the substructure for the Chicago St. grade crossing viaduct has been awarded to Christopher Smith at $78,000.

WATERTOWN, N. Y.—Press reports state that the citizens of Lmye have petitioned the secretary of war for an order compelling the New York Central R. R. Co. to construct a draw in its bridge across Chaumont Creek, so that the stream will be navigable to Depauville. Maj. W. S. Stanton, U. S. Engr., Oswego, N. Y., is said to have been taking evidence.

JERSEY CITY, N. J.—Bids are asked until Nov. 25 for the purchase of $110,000 of 4% bridge bonds. Hugh Dugan, County Collector, 317 Grove St., Jersey City; John Boyd. Clk.

COLUMBIA, PA.—Press reports state as follows: Information from a reliable authority has been received here that the Western Maryland R. R. Co. has decided to bridge the Susquehanna River at Chickies, two miles west of Columbia, connecting with the Reading & Columbia branch of the Philadelphia & Reading R. R. at Columbia, the terminus of the branch line. J. M. Hood, Pres. and Gen. Mgr., Baltimore, Md.

PITTSBURG, PA.—The steelwork for the 14 bridges on the new Butler & Pittsburg Ry. will be furnished by the Carnegie Steel Co. This includes the Allegheny River bridge, 3,000 ft. long, and all bridges between it and Butler, Pa. J. H. Reed, Chn. Bd; F. E. House, Ch. Engr., Pittsburg.

YORK, PA.—The city officials and the Northern Central Ry. Co. are considering the question of constructing a bridge over the tracks at College Ave. H. E. Passmore, Supervisor, York; J. G. Durbin, Cy. Engr.

BERKLEY SPRING, W. VA.—It is reported that the question of erecting an iron bridge over the Cacapon River, near Great Cacapon, at a cost of $12,000, was defeated at the election on Nov. 3.

ASHLAND, KY.—Press reports state that the plans submitted by the Chesapeake & Ohio Ry. Co.'s engineers for the proposed railway bridge over the Ohio River at this point, have been adversely reported by the United States engineers, and new plans with a larger channel span as recommended by the Pittsburg rivermen will be prepared at once. With this change the engineers will doubtlessly accept them without objections. Gen. Mgr., G. W. Stevens, Richmond, Va.; E. M. Hoardley, Asst. Engr., Ashland.

CINCINNATI, O.—The county commissioners' board of control and engineer have decided that either a bridge or culvert must be built at Cincinnati Ave. and North Bend.

DAYTON, O.—Frank C. Osborn, Hickox Bldg., Cleveland, O., has recommended the construction of a new steel bridge at Third St. A new bridge is also proposed at Main St.

HAMILTON, O.—The commissioners of Butler county, O., and of Franklin county, Ind., are considering the question of building a new superstructure to the bridge at Scipio. S. A. Dillon, County Surv., Hamilton.

MARIETTA, O.—It is stated that F. Folkel, Consult. Engr., of Pittsburg, is making estimates for a bridge across the Ohio River at this point, the original survey of which was made three years ago. The bridge will cost about $3,000,000, and will be for railway, vehicle and foot travel. William Jutte, 247 Water St., Pittsburg, Pa., is said to be interested in the enterprise.

CHICAGO, ILL.—Alderman Knudson has introduced an ordinance authorizing the construction of a bridge over the Chicago River at North Carpenter St.

GREEN BAY, WIS.—Bids are asked until Dec. 4 (postponement from Nov. 27) for constructing the 182½-ft. steel swing span of the Main St. bridge, as stated in our issue of last week. Engr., E. L. Shaw, Marinette, Wis.; J. F. Rothe, Chn. Com.

LISBON, N. DAK.—Bids are asked until Dec. 7 for building a 60-ft. combination iron and wood bridge over the Sheyenne River at Owego, according to reports. Thos. J. Harris, County Audr.

DENVER, COLO.—Local papers state that the board of public works has decided to advertise for objections in regard to the construction of the 14th St. viaduct. T. J. Milner, Ch. Engr.

LOS ANGELES, CAL.—The Los Felis bridge (to be built over the Los Angeles River) matter is still held by the bridge committee of the council, and probably will not be brought up again. The total bids were published in our issue of Nov. 5.

MONTREAL, QUE.—It is reported that at a meeting of the board of trade, held Nov. 10, it was resolved to petition the council to ask Parliament to authorize the city to issue bonds not to exceed $1,000,000 as a subsidy for the Quebec Bridge Co.

OTTAWA, ONT.—Press reports state that work will be begun on the proposed bridge between this city and Hull at once, as at least $50,000 worth of work must be done before Jan. 1.

BUILDINGS

BAR HARBOR, ME.—J. E. Clark is reported to have been awarded the contract for constructing a $30,000 addition to the Chatwold, the residence of Joseph Pulitzer, of New York, N. Y. The construction of a $25,000 stable is also being considered by Mr. Pulitzer.

NEW BEDFORD, MASS. — Francis Hopkinson Smith, of New York, is reported to have been awarded the contract for constructing the light-house at Butler Flat. The bids received Nov. 9 by Maj. W. R. Livermore, U. S. Engr., Boston, were as follows:

Francis H. Smith, New York	$34,000
John L Grim, Philadelphia, Pa.	39,200
C. H. Houston, Philadelphia, Pa.	35,475
G. A. Lancaster, Boston	75,710
Glover & Spear, Rockland. Me.	36,400
Stewart & McDermott, New York	35,650
Sooysmith & Co., New York	37,900
Charles E. Davis, New Bedford	35,890
Arthur J. Brennan, Boston	50,710

SOMERVILLE, MASS. — The council has directed Architect Gould to prepare plans for a new city armory to cost about $55,000. Councilman Burroughs can be addressed.

HARTFORD, CONN.—The council is considering an ordinance for erecting an addition to the high school building and also a new structure.

BROOKLYN, N. Y.—Bids are asked until Nov. 27 for erecting a training stable on Canton St., near Bolivar St.; surety, $15,000. Wm. C. Bryant, Comr. Dept. of Fire.——It is reported that bids are being received by James Burke, 189 Montague St, for erecting a 4-story apartment house on De Kalb Ave.; estimated cost, $30,000. Arch., J. L. Young, 1239 Bedford Ave.

BUFFALO, N. Y.—The following bids were received Nov. 5 for the masonry work for an 8-room school building on Fays Ave., all the bidders being from Buffalo. R. G. Parsons, Secy.:

Rohde Brothers, 52 Berlin St.	$21,300
Henry Rumrill, Jr., & Co., Builders' Exchange.	21,619
Watson & McGinness	22,014
John Lannen, 32 Builders' Exchange	22,049
John L. Frank, Jr.	22,474
Henry Schaefer's Sons, 578 Elm St.	22,710
George Kempf, 99 Locust St.	22,812
Mosler & Fitzpatrick, 1266 Seneca St.	23,200
Hildebrandt & Frank	23,275
W. M. Savage	24,000
J. H. Tilden, 14 Henry St.	25,519

BUFFALO, N. Y.—It is reported that the New York Central & Hudson River R. R. Co. is to spend $50,000 on improving its passenger station in this city. John M. Toucey, Gen. Mgr., New York.

KINGS PARK, N. Y.—P. J. Carlin & Co., Brooklyn, have been awarded the contract for constructing the new group of buildings for the Long Island state hospital at $311,323. Wm. M. Tobin, of Syracuse, N. Y., who was reported to have been awarded the contract for heating, ventilating, plumbing, sewer, steam pipes, etc., as advertised in Engineering News, at $19,209 we are informed, has withdrawn. The lowest bidders were James Harley, 288 Flatland Ave., Brooklyn, plumbing, at $4,242; E. Rutzter, 178 Centre St., New York, steam pipes, at $17,920; and Gaylord & Eitopence, Binghamton, N. Y., at $8,040. The group of buildings consists of an administration building, seven cottages, a dining-room and dormitory building, kitchen building containing necessary rooms, a general bathing apartment, sun-rooms, connecting corridors, etc. W. E. Sylvester, Gen. Supt., Brooklyn.

NEW BRIGHTON, N. Y.—The taxpayers voted Nov. 11 to erect a new school building to cost $75,000. Spire Pitou, John L. Dobson and John Irving are on the committee to secure plans.

NEW YORK, N. Y.—It is reported that arrangements are being made for erecting an armory, to cost $120,000, for the First Battery, which is commanded by Louis Wendel, 280 Broadway.——Plans have been filed by Weil & Mayer, 227 East 60th St., for four 6-story brick stores and tenements, at 246 to 254 Mott St., to cost $100,000.——Jardine, Kent & Jardine, 1262 Broadway, have been directed to prepare plans for remodeling the building at Broadway, Canal and Lispenard Sts.——J. C. Lyons, a builder, 81 East 125th St., is reported to have decided to erect a 10-story office building at 596 Broadway.——Henry McNally, 287 4th Ave., is reported to have received the contract for erecting the Trinity Ave. school building at $126,900.——D. H. Hayes, of Chicago, Ill., is reported to have been awarded the contract for the stone and brick work, roof covering, interior finish, etc., of the appraiser's warehouse at $322,500.

NEW YORK, N. Y.—Plans have been filed for the following buildings: Two 5-story brick flats on 123d St., for the Equitable Savings Society; Arch., F. T. Camp, 114 Nassau St.; cost, $50,000. Four 5-story brick flats, on 123d St.; owner and architect as above; cost $100,000. Six 2-story dormitories on Blackwell's Island for the city of New York; John W. Marshall, architect, 111 Broadway; cost, $165,000. Four 5-story brick flats on 117th St., for William H. Hall, Jr.; Neville & Bagge, architects, 217 West 125th St.; cost. $92,000. Five-story brick school building on St. Nicholas' Ave., for the city of New York, to cost $250,000, and a 3-story brick theatre, office and hall, at 116th and 120th Sts. and Amsterdam Ave., for the Columbia University. The structure will be 260 × 175 ft., and the first three stories are estimated to cost $600,000. Four additional stories are to be added, plans for which have not yet been prepared. Archs., McKim, Mead & White, 5th Ave.; Norcross Bros., 160 5th Ave., are reported to have been awarded the contract.

OGDENSBURG, N. Y.—It is reported that the state armory commission will soon ask for new bids for constructing the state armory in this city, to cost $40,000.

NEW CASTLE, PA.—The treasurer of the board of education is selling $40,000 in bonds for a new school building, according to reports.

PHILADELPHIA, PA.—Wilson Bros. & Co., Drexel Bldg., have submitted plans for the Philadelphia Dental College, prepared by them, to the building inspection bureau. The structure will cost about $90,000. Geo. F. Payne & Co. are the general contractors.

PITTSBURG, PA.—Plans have been completed for six branch library buildings of the Carnegie Library. W. N. Frew, Pres.

PITTSBURG, PA.—It is understood that the National Bank of Western Pennsylvania has accepted plans for the building to be started early next spring, corner of Penn Ave. and 9th St.

LANCASTER, PA.—H. N. Breneman & Son are reported to have been awarded the contract for constructing an annex to the county court house, as advertised in Engineering News, at about $62,000. W. W. Greist, Clk. County Comrs.

WASHINGTON, D. C.—The district commissioners in their annual report have urged the construction of a new municipal building.

AIKEN, S. C.—The following bids were received Nov. 5 by the county commissioners for putting in 16 iron and steel cells in the jail:

Hall's Safe & Lock Co., of Cincinnati, O.	$7,978
Detroit Safe Co., Detroit, Mich.	8,000
Van Dorn Iron Works, Cleveland, O.	7,947
Pauly Jail Mfg. Co., St. Louis, Mo.	8,775
E. T. Barnum, Detroit, Mich.	7,400
Diebold Safe & Lock Co., Canton, O.	7,400
Mosler, Bahmann & Co., Cincinnati, O.	6,815
Stewart Iron Works, Cincinnati, O. (accepted)	5,946

CLARKSBURG, W. VA.—It is reported that the Baltimore & Ohio R. R. Co. has decided to erect an $18,000 passenger station at this place.

PARKERSBURG, W. VA.—It is stated that Senator J. N. Camden has made his plans to build a $30,000 hotel at Webster Springs, to be in readiness for guests next spring.

FRANKFORT, KY.—Bids are asked until Nov. 20 for erecting a building for the institution for the feeble-minded, according to reports. Samuel R. Smith, Chn.

CLEVELAND, O.—The cornerstone of the proposed west wing of the St. Alexis Hospital was laid Nov. 9; estimated cost of extension $100,000. Arch., J. H. Harks, New England, Cleveland; M. J. Kelley has the contract for the masonry work.

COLUMBUS, O.—We are informed that Yost & Packard, Archs., Capitol Square, East Columbus, O., will not be ready to advertise for bids for constructing an addition to the capitol building until about March 1. The Governor on Nov. 9 appointed the following as a committee to superintend the improvements: Wm. G. Deshler, Columbus; John Tod, Cleveland, O.; Paul J. Soy, Middletown, O., and Thos. B. Paxton, Cincinnati.

HAMILTON, O.—The Pauly Jail Building & Mfg. Co., St. Louis, Mo., and the Herring-Hall-Marvin Co., New York, N. Y., are reported as the lowest bidders, at $11,059 and $11,700, respectively, for putting in the cells in the Butler county jail.

INDIANAPOLIS, IND.—Plans are being prepared for a 9-story building for the Odd Fellows' Lodge; estimated cost, $200,000.

ST. JOSEPH, IND.—Bids are asked until Nov. 25 for the purchase of $273,000 of 4½% county gold bonds, to pay for the construction of a county court-house. W. H. Oren, Treas.

DETROIT, MICH.—Bids are asked until Nov. 21 for furnishing a heating apparatus for the county jail, etc. Archs., John Scott & Co., 67 Moffat Block; Wm. Rickert, Chn. Com.

DETROIT, MICH.—Frank H. Bamlet has decided to erect a 5-story building at Grand River Ave. and Rowland St., at a cost of $35,000. Archs., Spier & Rohns, 115 Chamber of Commerce.

PORT HURON, MICH.—Aldermen Cooley and Moore and Frank Beard, F. J. Haynes and A. D. Bennett have been appointed to secure plans for a $20,000 auditorium, according to reports.

CHICAGO, ILL.—The Geo. A. Fuller Construction Co., Chicago, has been awarded the contract for erecting a $1,000,000 addition to the Fair. Work will be commenced on one section Jan. 1.——Work will probably soon be begun on a $100,000 building on Plymouth Place for R. R. Donnelly & Sons. Archs., Howard V. Shaw, 115 Monroe St., and S. A. Treat, 58 Wabash Ave.——Neils Buck, Watson Bldg., has prepared plans for a $40,000 flat building at Perry St. and Belle Plaine Ave.

MILWAUKEE, WIS.—It is reported that the trustees of the J. B. Martin estate will erect a 6-story brick and stone building at East Water and Wisconsin Sts., to cost about $250,000, plans for which have already been prepared. Archs., Crane & Barkhausen, 89 Wisconsin St.——Bids will probably soon be asked by the public library and museum building committee for the purchase of $200,000 building bonds.

IOWA CITY, IA.—Bids are asked until Jan. 14 for constructing buildings for the State University of Iowa in this city; estimated cost, $50,000. Archs., Josselyn & Taylor, Cedar Rapids, Ia.; Pres., C. A. Schaeffer.

DES MOINES, IA.—It is stated that the announcement was made Nov. 11 that a contract has been closed between the Des Moines Union R. R. and the Chicago, Great Western & Wabash, Chicago & Northwestern, Des Moines Northern, and Chicago, Milwaukee & St. Paul roads, by which the local company is to build a $200,000 union station on Cherry St., between Fifth and Seventh Sts., next spring. The Des Moines Union will also build extensive shops, and the Great Western will build a big freight depot, to cost $50,000.

ST. LOUIS, MO.—Link & Rosenheim, Union Trust Bldg., have prepared plans for a $75,000 Y. M. C. A. building to be erected on the property of the Terminal Railroad Association. Plans are also being prepared for a building in East St. Louis, Ill. Bids for the first structure will probably soon be asked. Geo. T. Coxhead, Gen. Secy., Y. M. C. A., St. Louis.

ST. LOUIS, MO.—Bids are asked until Nov. 20 for remodeling the Simmons school building. John Kissner, Chn.

GALVESTON, TEX.—We are informed that the county court contemplates adding an addition to its jail and an addition to its court house, but plans and specifications have not yet been prepared. A ferry and railway approach on the Bolivar peninsular is under construction by the county at a cost of $53,900, as stated under Miscellaneous Contracts in our issue of Nov. 5. Wm. B. Lockhart, County Judge; address Geo. H. Low, Jr., County Clk.

PORT TOWNSEND, WASH.—Bids are asked until Dec. 22 for the heating apparatus and power boiler for the U. S. marine hospital building at Port Townsend. Wm. Martin Aiken, Supervising Arch., Washington, D. C.

SEATTLE, WASH.—The Northern Pacific Ry. Co. has purchased property at Madison and Columbia Sts., on which it is proposed to erect a new passenger station.

MADERA, CAL.—It is reported that this county will soon vote on the question of issuing $50,000 in bonds for a jail.

SACRAMENTO, CAL.—The board of supervisors has accepted the plans of G. A. West for the new cells of the county jail, and the clerk has been instructed to advertise for bids for the work.

SANTA BARBARA, CAL.—Joel A. Fithian and others intend to erect a $100,000 theatre in this city in the near future, adjoining the Fithian Block.

SAN JOSE, CAL.—Curtis M. Barker, Cy. Engr., writes us that at the election Oct. 30 it was voted to issue $75,000 in bonds for erecting a new high school building. The bonds will be sold as soon as possible and the work pushed to completion.

WINNIPEG, MAN.—It is reported that Geo. W. Gouinlock, 53 King St., Toronto, Ont., has prepared plans for improving the building at Notre Dame and Main Sts. at a cost of $40,000. T. G. Cox, of Toronto, is interested.

WATER-WORKS.

AUBURN, ME.—The water commissioners are considering the construction of a new reservoir on Merrill Hill, at an estimated cost of $10,000.

BANGOR, ME.—The Cumberland Mfg. Co., 220 Devonshire St., Boston, Mass., has been awarded the contract by the water board for a new filter.

DEERING, ME.—At a meeting Nov. 13 the mayor appointed a committee of eight to consider the advisability and, if practicable, to apply for a charter for a water supply from Duck Pond, six miles distant. I. W. Barbour, Cy. Engr.

NEW CASTLE, ME.—At the election Oct. 28 action was postponed on the proposed uniting with Damariscotta in the construction of water-works It is stated that enough private takers have been secured, however, and that the Twin Village Water Co. has already purchased materials for the extensions in this village.

WINTER HARBOR, ME.—A press report states that enough subscribers have been obtained to warrant the construction of works this fall.

MANCHESTER, N. H.—The council has voted to issue $100,000 in 20-year 4% refunding water bonds.

CASTLETON, VT.—A bill has been introduced in the state legislature empowering Fire District No. 1, in Castleton, to construct dams, reservoirs, lay pipes, etc., to bring water into said district, and to issue bonds for the expense thereof.

ISLAND POND, VT.—Z. M. Mansur, E. M. Bartlett, and others, have petitioned the legislature for a charter for the Brighton Aqueduct Co.; capital stock, $40,000.

NORWICH, VT.—A bill to incorporate the Norwich Aqueduct Co. is reported to have passed both branches of the legislature.

ROCHESTER, VT.—Representative Martin, of Rochester, has introduced a bill in the legislature authorizing this place to issue bonds for a water supply.

HOLYOKE, MASS.—It is stated that the plans and specifications for the new pipe line and system will not be completed before spring.

MELROSE, MASS.—The town has voted to issue $12,000 in additional water bonds.

REVERE, MASS.—A local paper states that the questions of water and street lighting continue to agitate the citizens.

SHEFFIELD, MASS.—It is expected that works to cost $20,000 will be constructed in the spring by the Sheffield Water Co. Pres., H. S. Andrews; Secy., T. C. Wickwire.

SOUTH BRAINTREE, MASS.—The New York Hydraulic Co. has sunk three wells to increase the water supply, but it is reported probable that the experiment will not prove a success.

WALTHAM, MASS.—The board of aldermen has voted to issue $24,000 in water bonds, of which $19,000 will be used to purchase the 6,000,000-gallon Worthington pumping engine used at the Atlanta Exposition.

BOONVILLE, N. Y.—The question of water-works has not yet been submitted to a vote of the people, but probably will be soon.

CALEDONIA, N. Y.—The citizens have voted to issue $20,000 in bonds for municipal work; supply from wells; plant will include stand-pipe, gas engine for daily use and steam pump for emergencies; contracts to be let this winter and construction commenced in the spring; no engineer had been engaged Nov. 14; population, 1,000. James C. Foote is a member of the committee.

LANSINGBURG, N. Y.—A test well has been driven to a depth of 245 ft. and only a small amount of water has yet been secured. There is talk of abandoning the idea of increasing the supply from artesian wells.

TARRYTOWN, N. Y.—A New York city paper states that the water commissioners are receiving bids for a large reservoir at East View, to cost nearly $100,000.

ROCHESTER, N. Y.—No new work of consequence is contemplated at present. During the winter the mains now laid under the Erie Canal at several streets will have to be lowered in anticipation of the proposed deepening of the canal. Work for next season is not yet decided upon. E. Kuichling, Ch. Engr.; Thomas J. Neville, Clk. Executive Bd.

SHERBURNE, N. Y.—This city intends to take up 4-in. mains and replace with larger pipe. W. E. Davis, Supt.

EGG HARBOR CITY, N. J.—The Egg Harbor City Water Co. has been granted a charter; capital stock, $50,000; incorporators, R. F. Smith, T. J. Kraft, Geo. Pfeiffer, Jr., of Camden, N. J., and others. Mr. Pfeiffer has the franchise for works at this place, as noted some time ago.

ASBURY PARK, N. J.—It is reported that an election will be held this week to vote on the question of issuing $48,000 in additional water bonds. for new machinery, a well 1,000 ft. deep, purchase of additional land, etc. R. I. Sloan, Water Comr.

CAMDEN, N. J.—George Leathwhite has been awarded the contract for erecting a pumping plant at the county buildings, at $3,400.

FRANKLIN, N. J.—The township committee is reported as considering the adoption of the meter system.

NEW CASTLE, PA.—A local paper states that a 10-year franchise has been granted to a new company organized by County Commissioner Stewart Thompson, Henry Wettich, John Hays and Isaac D. Hughes. A plant will be constructed to supply West New Castle with water from the Mahoning River.

ROCKAWAY, N. J.—This borough will probably construct works to cost $25,000 in the spring. J. C. McGrath, Clk.

WOODBRIDGE, N. J.—J. B. Newhall, of Stapleton, S. I., and others have talked of constructing works to supply this place and Carteret; supply from the South Branch of the Rahway River. It is hoped to take up the matter in the spring and construct the works.

AVOCA, PA.—Works to cost $3,500 will probably be built in the spring. A. Reese, Engr., Parsons, Pa.

COATESVILLE, PA.—The borough council is reported to have decided to submit the question of borrowing $20,000 for increasing the water supply to a vote of the people next month.

DALTON, PA.—The North Abington Water Co. will probably commence the construction of gravity works to cost $8,000 in May 1897; the franchise is for sale. F. M. Francis, Secy.

MAHAFFEY, PA.—Miles Wrigley writes us that the proposed $15,000 water-works has been postponed on account of the hard times; question will be taken up later on.

PATTON, PA.—The Patton Water Co. is reported to have been awarded a contract for fire protection at $20 a year for each hydrant. Twelve hydrants will be put in.

DELAWARE CITY, DEL.—George B. Money, Mayor, writes us that arrangements for works have not yet been completed. The plant will be built by a company. Water supply will be pumped from wells to a stand-pipe; population, 1,200. C. Taylor Leland, Engr. and Mgr., Quakertown, Pa.; David Stillman, Cy. Clk.

BROOKLYN, MD.—A company will probably be organized to construct works this winter. John H. Glis can give information.

ROCKVILLE, MD.—Bids are asked until Dec. 9 for the purchase of $20.000 in 20-year 4% water bonds. John L. Brunett, Cy. Clk.; Geo. Cadogan Morgan, Engr., Chicago.

PORT DEPOSIT, MD.—A press report states that M. M. Dreibelbis, Engr., has completed surveys for the proposed water-works and will have charge of the construction.

ABBEVILLE, S. C.—The $25,000 in bonds, noted last week, will be issued Jan. 1. Contracts will be awarded as soon as bonds are sold. Pownall & Minshall, Engrs., St. Louis; B. S. Barnwell, R. W. Cannon and J. F. Lyon are the commissioners. The water supply will be from wells; population, 3,000.

COLUMBIA, S. C.—W. A. Neal, Supt., writes us that an independent water supply for the state penitentiary will not be attempted until next year; nothing definite yet decided upon.

JACKSONVILLE, FLA.—Bids are asked until Dec. 1 for hauling and laying 60,000 ft. of 12 to 4-in. cast-iron water pipe, setting valves and hydrants, etc. R. N. Ellis, Engr.; B. F. Dillon, Chn. Bd.

SPRINGFIELD, FLA.—A press report states that work on the new artesian well has been progressing nearly a year and the well is not yet completed.

DOTHEN, ALA.—Bids are asked until Dec. 15, according to reports, for constructing works to cost $10,000.

COVINGTON, KY.—A 30-in. water main burst Nov. 7.

CLEVELAND, O.—Bids are asked until Dec. 11 for furnishing all material and constructing and placing in position in Lake Erie a wooden protection crib. D. E. Wright, Dir. Pub. Wks.

ELKHART, IND.—The water company is said to be about to spend $30,000 for improvements and extensions estimated to increase the supply 5,000,000 gallons daily.

ALPENA, MICH.—The intake pipe of the Alpena City Water Co. is to be extended 1,000 ft. into Thunder Bay, according to reports; there is some talk of municipal works. J. S. Canfield, Recdr.

BURLINGTON, MICH.—An artesian well has been sunk at Crapo Park to a depth of 1,050 ft., but the desired flow of water has not been secured.

MUSKEGON, MICH.—The city proposes to repair the crib next year. John McCullom, Supt.

THREE OAKS, MICH.—E. K. Warren, Recdr., writes us that material has been all purchased and construction of works is in progress; water supply from wells.

CHICAGO, ILL.—The mayor has reported that there is imperative need of additional pumping machinery at the Lake View works; the present supply from this station is inadequate for the territory dependent upon it; bids for additional pumping machinery for the station will probably soon be asked.——A local paper states that the secretary of war has granted the city authority to maintain a temporary crib for three years in the lake three miles out from the foot of Oak St., to be used in building the new northwest tunnel.

HENNEPIN, ILL.—The Challenge Wind Mill & Feed Mill Co., of Batavia, has been awarded the contract for works at this place.

MILFORD, ILL.—Contracts were awarded Nov. 10 as follows. for work advertised in Engineering News: H. D. Hallett, Aurora, Ill., pipe and specials, $6,194, and laying mains $3,465, less 8% for cash; Rensselaer Mfg. Co., Troy, N. Y., hydrants, $665, and valves and boxes, $335, cash price. Jacob A. Harman, Engr., Peoria, Ill.

KAUKAUNA, WIS.—The supreme court has decided void the franchise granted about two years ago to Wells, Reichert & Co. for water-works, on the ground that indebtedness to exceed 5% of its valuation was being incurred by the city. It is stated that the city is in need of water-works.

ROSEBUD, S. DAK.—B. P. Egan, of Nebraska City, Neb., has been awarded the contract for constructing water-works and sewers at the Rosebud Indian Agency; plant will include a 12 × 60-ft. steel stand-pipe, boiler, pump, feed pump and a filter.

MINNEAPOLIS, MINN.—The proposed issue of $400,000 in bonds to complete the new reservoir was carried at the recent election.

KANSAS CITY, MO.—Bids are asked until Dec. 15 for constructing and delivering a 12,000,000-gallon pumping engine, as described in our advertising columns. R. M. Godfrey, Secy. Bd. Pub. Wks.

UNIONVILLE, MO.—This city proposes to construct works to cost $15,000; water supply will be pumped from deep well to stand-pipe. Stephen Hall, Engr., Kirksville, Mo.; Lorenzo Jones, Mayor.

WHARTON, TEX.—H. Kleim, Mgr., writes us that it is proposed to lay 7,000 or 8,000 ft. of additional mains and erect hydrants as soon as the legislature meets and a new city charter is secured; about 2½ miles of mains are now in use.

BUTTE, MONT.—A press report states that the water supply is unfit for domestic use and that the council has voted to prohibit the water company from collecting water rents for the supply now being furnished.

PUEBLO, COLO.—The contract for building the new pumping station was awarded Nov. 6 to C. S. McCarthy, at $19,250: contract for pump to the Frank P. Lannon Foundry Co. at $26,000. It is reported that bids will soon be asked for reservoir work. E. W. Hathaway, Cy. Engr.

SANTA BARBARA, CAL.—The council has adopted an ordinance providing for the issuance of $50,000 in water bonds, as voted in September.

PERTH, ONT.—Bids are asked until Dec. 1, according to reports, for a water-works franchise. John A. Kerr, Town Clk.

RENFREW, ONT.—It is reported that the question of constructing water-works will be voted upon in January.

WINDSOR, ONT.—A local paper states that Macdougall Sons & Co., of Montreal, have been awarded a contract for a polarite filtering system to cost $20,000.

SEWERAGE.

LOWELL, MASS.—The sewer committee has been petitioned to construct sewers in a number of streets. Geo. Bowers, Cy. Engr.

WORCESTER, MASS. — The committee has voted to construct sewers in five streets.

HARTFORD, CONN.—Bids are asked until Nov. 23 for the purchase of $250,000 of 3½% 25-year gold sewer bonds. These bonds are to pay for the construction of an intercepting sewer in the valley of the Park River and its branches. C. C. Strong, Cy. Treas.

BROOKLYN, N. Y.—Bids are asked until Dec. 1 for constructing sewers in Lott St., Ward No. 29. T. B. Willis, Comr. Cy. Wks.

JAMESTOWN, N. Y.—An election will probably soon be held to vote on the question of extending the sewers at a cost of about $50,000. This question was submitted to the voters last summer but was defeated. There is some talk of constructing sewage disposal works at the city limits. Aldermen Sessions and Cooper can be addressed. J. E. Conway, Chn. Bd. Pub. Wks.

NIAGARA FALLS, N. Y.—Bids for eight sewer contracts, amounting to 14,696 ft. of pipe were opened Nov. 16. Ritzman & Miller, of Buffalo, bid lowest on contracts amounting to $11,000; Ryan & Spillman, of Tonawanda, $5,000, and John Harrer, of Buffalo, $3,324.

ROCHESTER, N. Y.—It is proposed to construct a sewer in Park Ave. to cost $10,500. Edwin A. Fisher, Cy. Engr.

ROCHESTER, N. Y.—Bids are asked until Nov. 20 for constructing sewers in two streets. Thos. J. Neville, Clk.

HOBOKEN, N. J.—Work will probably soon be begun on the proposed Ravine Road sewer. Thos. McCann, Engr., Hoboken.

NEWARK, N. J.—Bids are asked until Nov. 19 for constructing about 3,200 ft. of 15 to 6-in. pipe sewers. J. C. Mundy, Gen. Supt. of Wks.

LANSDOWNE, PA.—Bids were opened Nov. 18 for the purchase of $13,000 of 4% sewer bonds. H. L. Warren, Secy.

SHARPSBURG, PA.—Bids are asked until Nov. 28 for the purchase of $62,000 of 4% sewer bonds. Geo. L. Walter, Chn. Finance Com.

JACKSONVILLE, FLA.—Bids are asked until Dec. 1 for hauling and laying about 117,000 ft. of 24 to 6-in. terra cotta sewer pipe and about 5,000 ft. of 16 to 8-in. cast-iron sewer pipe; check, $2,500. R. N. Ellis, C. E., Supt.; B. F. Dillon, Chn.

AKRON, O.—Sewer Commissioner Stife is quoted as stating that there is likely to be more than $10,000 worth of sewer pipe used within the next year, as there are two trunk sewers to be constructed—the one in South Akron, for which legislation has already been provided, and the East Akron sewer, which is to extend from the East Market St. bridge near Case Ave., northerly to the Old Forge. The legislation for that sewer is to begin soon. Last year the city used a trifle more than $5,000 worth of pipe. Within the next two years it is likely that the cost will exceed $20,000. The bids received for sewer pipe are given under Contract Prices. S. W. Parshall, Cy. Engr.

WHEATON, ILL.—Plans are being prepared for additions to the sewerage system to cost about $6,000. Contracts will be let early in the spring. J. S. Pierrornett, Mayor.

MADISON, WIS.—We are informed that the following bids were received Nov. 13 for laying 1,200 ft. of cast-iron sewer pipe. O. S. Norsman, Cy. Clk.; Nicholas Quinn, Madison, Wis., $4,267, and Fetter & Crosby, La Crosse, Wis., $4,437. The contract was not awarded Nov. 13.

SAN DIEGO, CAL.—We are informed that this city voted Oct. 30 to issue $40,000 in bonds for extending the main outlet sewer to the Bay. The extension will be a 5-ft. brick circular sewer 1½ miles long. The bonds will be sold as soon as possible and the work pushed to completion. Curtis M. Barker, Cy. Engr.

ROSSLAND, B. C.—It is proposed to construct a terra cotta pipe sewer through the main business portion of Rossland to a point about 800 ft. south of the town. Sanitary Inspector Phillipps Wooley can be addressed.

GARBAGE DISPOSAL—STREET CLEANING.

ALBANY, N. Y.—The board of health has inserted an item in the annual budget of $15,000 for a garbage crematory. The question of garbage disposal has been debated for several years by the board. Dr. Curtis is chairman of the committee on garbage.

BROOKLYN, N. Y.—The contract for the removal and disposal of garbage during the five years beginning Jan. 1, 1897, was awarded on Nov. 17 to the Brooklyn Sanitary Co., of which F. D. Cranford is president and W. J. Cranford, secretary and treasurer. The garbage will be disposed of by the Arnold system of garbage reduction; plant to be erected on Barren Island, where an Arnold plant is now being erected for the garbage of New York city. The bids received by the city of Brooklyn for this work were published in our issue of Oct. 8. T. B. Willis, Comr. Cy. Wks.

LOCKPORT, N. Y.—The lowest bid received Nov. 9 for sprinkling and cleaning improved streets during 1897 was that of C. N. Stainthorpe, at $3,489. All bids were rejected and the work will be done by the superintendent of streets, as was done some years ago, unless the mayor vetoes the action of the council.

PHILADELPHIA, PA.—Bids are asked until Nov. 25 for cleaning streets and the removal and disposal of garbage, etc., during 1897. Thos. M. Thompson, Dir. Pub. Wks.

STREETS AND ROADS.

PLYMOUTH, MASS.—Bids are asked until Nov. 19 for grading a road in this town. There will be about 16,000 cu. yds. of excavation. T. C. Mendenhall, Pres. Massachusetts Highway Comn., Worcester, Mass.; Chas. Mills, Ch. Engr., 4 Mount Vernon St., Boston.

BROOKLYN, N. Y.—T. B. Willis, Comr. Cy. Wks., is reported as about to begin work on macadamizing and otherwise improving a number of streets in Gravesend. A contract for work in this section amounting to about $15,000 has been awarded to Theo. S. Jenkins, of the 31st Ward. Geo. W. Tillson, Asst. Engr. Street Construction, recently submitted a report on the proposed improvements.

JOHNSTOWN, N. Y.—Bids are asked until Dec. 7 for asphalt paving, as stated in our advertising columns. John T. Morrison, Cy. Clk.; J. W. Miller, Cy. Engr.

NIAGARA FALLS, N. Y.—The council has declared its intention to pave two streets with asphalt, at an estimated cost of $125,000. Plans are being prepared and bids will be asked for some time this winter. The work is to be done next spring. W. W. Read, Cy. Engr.

PALMYRA, N. Y.—The bicyclists of this place, Avon, Geneseo and Mount Morris are reported as discussing the question of constructing side-paths in this part of the state. It is said that the wheelmen of Newark, Lyons, Clyde and other places are having plans prepared.

WHITESTONE, N. Y.—This place is said to be considering the question of submitting to the voters the proposition to issue $16,000 in bonds for street improvements. This will be in addition to the $50,000 of street bonds voted for recently. G. A. Roullier, Engr.

CAMDEN, N. J.—The Camden and Stockton cycle clubs have organized the good roads committee of Camden. The committee is advocating the bonding of the city for street improvements, and also has recommended the paving and repairing of six streets with asphalt.

TRENTON, N. J.—It is stated that this county will soon be ready to sell $100,000 of 4% 10-year road bonds.

EASTON, PA.—Press reports state that Edward H. Laubach, J. S. Rodebaugh, Baxter B. McClure and W. M. Applegate, the committee to which was referred by the county commissioners the selection of suitable locations on which sample roads, looking towards permanent road making, should be given a trial, reported Nov. 13. They recommended that half-mile roads be built in Hanover, Lower Nazareth, East Allen, Forks, Palmer and Bethlehem townships. They also filed a supplemental report in which they suggested that no more than $1,500 a mile be expended on the improvement.——Councilman Magee has introduced an ordinance authorizing the committee to submit to the people at the election in February the question of issuing $155,000 in bonds for paving. Of this amount it is proposed to use about $93,000 for brick paving and the remainder for macadamizing and grading. H. R. Fehr, Cy. Engr.

JOHNSTOWN, PA.—Subscriptions are being secured to begin the construction of the proposed road for the Johnstown & Cramer Turnpike Co. John Fulton, Pres.; Dr. W. E. Matthews, Vice-Pres.

PITTSBURG, PA.—The county commissioners are about to make surveys for the proposed roads. Beginning with 1897 the county will spend $225,000 annually on road improvements. Chas. Davis, County Engr.

WASHINGTON, D. C.—Bids are asked by the district commissioners until Nov. 25 for grading certain streets.

BALTIMORE, MD.—The property owners on 23d St. are reported as about to petition the city commissioner to pave that street from Oak St. to York Road with asphalt. Janon Fisher, Cy. Comr.

SAVANNAH, GA.—The council has voted to advertise for new bids for sheet asphalt paving in South Broad St., and for maintaining the streets paved with asphalt.

ST. AUGUSTINE, FLA.—Bids are asked until Nov. 25 for brick paving in St. George St.; estimated cost, $8,000. Chas. Sperry, Acting Cy. Engr.

SHREVEPORT, LA.—Local papers state that Martin & Smith, of Memphis, Tenn., have been awarded the contract for brick paving in Jordan St. Kidder & McDonald, of St. Louis, Mo., were the lowest bidders for the work, but their bid was rejected. Maj. Paul Lowenthal, Chn. Com. Councilmen Wimbish and Quigles and Walter B. Jacobs, J. W. Soady and E. R. Herndon are members.

CINCINNATI, O.—The county commissioners have asked for bids for the purchase of $25,000 of road bonds. Frank Krug, Engr.

CINCINNATI, O.—Gus. Schmidt submitted the lowest bid received by the county commissioners Nov. 14 for repairing a portion of the Madisonville Pike at $8,228, and A. J. Henkel that for furnishing crushed stone at $12,066.

BEDFORD, IND.—G. C. Houston, County Engr., and V. V. Williams and A. B. Tresslar, Viewers, have submitted a report on macadamizing six sections, or 59,840 lin. ft. of road in Shawswick county, at an estimated cost of about $24,000. John B. Malott, County Audr.

MONTICELLO, IND.—Jarvis Duryea and Perry Godlove, Viewers, submitted a report Nov. 10 for the following county road work in Princeton township: About 5,000 ft. of 24 to 4-in. sewer pipe, to cost $285; 30.8 cu. yds. of rubble stone masonry, $243; three iron bridges of 14 ft. roadway—span 10 ft., $270; one iron bridge of 24 ft. roadway—span 10 ft., $140; 12,152 cu. yds. of crushed stone, first course, $15,191: 3,472 cu. yds. limestone screenings, $3,646; 4,792 cu. yds. of excavation, $336; 4,792 cu. yds. embankment, $336; 2,211 cu. yds. of excavation, $331; rolling ballast at $35 per mile, $311; total cost of road, $21,075. The election to vote on the question is to be held Dec. 15. M. J. Holtzman, County Audr.; W. P. Bushnell, County Surv.

MACKINAC ISLAND, MICH.—It is reported that the contract for constructing the first mile of the proposed boulevard has been awarded. The road will be about six miles long. John J. Roberts, of Grand Rapids, Mich., made the surveys.

CHICAGO, ILL.—A petition was filed Nov. 9 in the county court by the town of North Chicago for the improvement of the west half of the Lake Shore drive from North Ave. to Oak St., at an estimated cost of $14,000. The petition is the result of an arrangement with the Lincoln Park commissioners, who have agreed to pay for the improvement of the east half, the total cost of the work to be $22,658. The improvements are to consist of concrete walks and drives. J. M. Willard, Ch. Engr.

GRAND FORKS, N. DAK.—It is reported that the city auditor has asked for bids for paving portions of 11 streets. The work is to be begun in the spring.

KANSAS CITY, MO.—It is stated that the board of public works is considering the question of stone block paving in West 6th St., at a cost of $7,000. H. A. Wise, Cy. Engr.

ST. CHARLES, MO.—The city engineer has submitted plans and specifications for improving Third and Fourth Sts.

DENVER, COLO.—Local papers state that the board of public works has decided to at once grade and curb Capitol Hill district No. 1, at a cost of $159,702. T. J. Milner, Ch. Engr. Bd. Pub. Wks.

MANUFACTURING PLANTS.

LYNN, MASS.—The Lynn Incandescent Lamp Co. is increasing its plant. The extensions contemplate a plant with a capacity of 10,000 lamps per day.

BRIDGEPORT, CONN.—The firm of Hartley & Graham, who control the Remington Arms Co., the Union Metallic Cartridge Co., and the Bridgeport Gun Implement Co., is contemplating the removal of the plant of the Remington Arms Co., at Ilion, N. Y., to Bridgeport, Conn. The Remington Arms Co. manufactures bicycles, sewing machines and arms, employing 1,500 persons.

BRISTOL, CONN.—The E. Ingraham Co., it is stated, has decided to begin the manufacture of marine clocks. It will erect a new factory, 80 × 40 ft., two stories high. The contract has been let to William Linstead.

BINGHAMTON, N. Y.—Smith, Kearney & Co. are reported as preparing to build a new 5-story brick factory building.

CORNWALL LANDING, N. Y.—On Nov. 15 the paint shop of Mead & Taft, New York contractors and builders, at Cornwall Landing, was damaged by fire to the extent of $12,000.

LYONS, N. Y.—It is stated that a flouring mill and a glove factory are to be erected here.

NIAGARA FALLS, N. Y.—J. A. Francis & Co., paint manufacturers of Toronto, Ont., it is reported, have purchased a site on Bath Ave. and will build a factory.

NYACK, N. Y.—Fire destroyed the New Tompkins Cement Works, in the upper part of Rockland county, on Nov. 11. Loss, $12,000; insurance, $5,000.

PLAINFIELD, N. J.—The "Daily Press" says that the Standard Oil Co. will soon commence the work of doubling the refining capacity of its plant at Constable Point, N. J., and will spend $1,700,000 in the work.

EGYPT, PA.—The American Cement Co. is reported to have broken ground for its fourth mill, which will involve an expenditure of $200,000, and which will have a capacity of from 800 to 1,000 barrels of cement a day. Employment will be given to 150 hands.

HARRISBURG, PA.—The Boll Bros.' Mfg. Co. will erect a 5-story brick building, 50 × 100 ft., for the manufacture of brass and iron bedsteads, etc., according to reports.

OIL CITY, PA.—A meeting of the stockholders and directors of the Oil City Desk & Furniture factory was held recently at which it was decided to rebuild the factory, recently destroyed by fire. The plant will be erected near Oil City, and will consist of a main building, 60 × 100 ft.; storage house, 60 × 60 ft.; and boiler house, 20 × 30 ft. A 25-HP. gas engine will be installed, also a steam heating system.

STEELTON, PA.—The Steelton Brick Co. will increase its plant in the near future and purchase new machinery.

PARKERSBURG, W. VA.—J. N. Camden, of this city, representing a syndicate of capitalists, is said to have closed arrangements for the erection of pulp mills and other woodworking plants near Gauley; about $1,000,000 will be expended on the enterprise.

SPILMAN, W. VA.—On Nov. 13 ground was broken on the Ohio River R. R. by the Camden Clay Co. for a new brick and tile works. Senator J. N. Camden is at the head of the concern. The plant when finished will cost $30,000.

BALTIMORE, MD.—It is reported that the Baltimore & Ohio R. R. Co.'s improvements at the Mount Clare shops will include a locomotive repair shop, equipped with two 50-ton electric cranes and other new machinery.

ORANGEBURG, S. C.—It is reported that the directors of the Enterprise Cotton Mill have closed contracts for materials for the building of a new mill. Capt. D. W. Ayers will superintend the building. The ground will be broken soon, and the work will be rapidly pushed.

CONCORD, N. C.—W. C. Coleman, the chief promoter of the scheme to build a cotton mill at this place to be run by negro operators, states that $41,000 of the proposed $50,000 have been subscribed towards the capital stock, and that the building will be erected and equipped at an early date.

AUGUSTA GA.—The "Herald" states that the Union Point knitting mill will be rebuilt at once. The capital which was formerly $16,000 will be increased to $20,000.

BESSEMER, ALA.—It is reported that the Marvel City Machine & Foundry Co. will rebuild its burned works and put in equipment of new machinery.

CHATTANOOGA, TENN.—Fire damaged the Eagle Brass Works at 400 Boyce St., to the amount of $4,500 on Nov. 8. No insurance.

RALEIGH, TENN.—R. J. Griffin and associates will build and equip a cotton-batting mill at this place.

FINDLAY, O.—The Kellogg Weldless Tube Works are to be enlarged by the addition of $50,000 worth of new machinery, according to reports. The company expects to manufacture seamless tubes to be used in the construction of compressed air street cars, which are now being built at Worcester, Mass.

YOUNGSTOWN, O.—I. F. Taylor, Treas., writes us that the Brown-Bonnell Iron Co. has not definitely decided to build the reported new steel plant.

HOLLAND, MICH.—Citizens have raised $6,000 to aid in rebuilding the factory of Geo. P. Hummer, which was burned a few weeks ago, entailing a loss of $150,000.

NEW ALBANY, IND.—The Architectural Iron Works will soon begin the erection of a new factory, it is reported,

DES MOINES, IA.—A press report says that the Des Moines Union Ry. will build extensive shops, and the Great Western Ry. will build a large freight depot, to cost $50,000.

BLACK RIVER FALLS, WIS.—A dispatch states that James L. Gates, of Milwaukee, makes the proposition to build a $150,000 sugar factory, which will consume the product of 4,000 acres of beets, in consideration of a bonus of 2,500 acres of land.

SAN FRANCISCO, CAL.—The California Stone Brick Co. proposes, it is said, to expend $50,000 in the purchase of a site and the erection of buildings for the manufacture of brick from sand.

VANCOUVER, B. C.—The "News-Advertiser" says that H. Peck, who has been manager of the Reed & Currie Iron Works, has acquired the plant and will at once erect a new building, which will be heated with steam and lighted with electricity.

BERLIN, ONT.—D. Hibner & Co.'s furniture factory was burned Nov. 12; reported loss, over $75,000. About 150 hands are thrown out of employment.

ORIZABA, MEX.—A press report from the city of Mexico, says that a new cotton factory is about to be erected at a cost of more than $3,000,000, furnished by European capitalists.

GAS PLANTS

CHICOPEE, MASS.—The Chicopee Gas Co. will, early next spring, lay a new gas main from its plant to the corner of Springfield and Exchange Sts.

WALTHAM, MASS.—The council is negotiating with the gas company for the purchase of the gas plant.

WOBURN, MASS.—A press report states that the principal owners in Woburn of the stock of the Woburn Gaslight Co. have sold their stock to the gas combination of which R. J. Monks is treasurer.

FLATBUSH, N. Y.—The Flatbush Gas Co. has filed a certificate with the secretary of state by virtue of which it is said to be the intention of the company to extend its business to the city of Brooklyn and throughout Queens county.

JAMAICA, N. Y.—It is expected that the application of the Jamaica Gaslight Co. for a 50-year franchise, noted in our issue of Nov. 5, will be acted upon at the regular business meeting in December.——The town board is reported as to open bids Nov. 27 for lighting the new district of Woodhaven.

RICHMOND HILL, N. Y.—The franchise of the Richmond Hill & Queens County Gas Co., noted Nov. 5, will probably be revoked this week. The Brooklyn Gas & Construction Co. has petitioned for a franchise. Press reports state that the new company proposes to begin work within one week after signing the contract, and promises to finish its plant and furnish gas within 90 working days. The prices are to be not more than $1.25 per 1,000 cu. ft. for domestic use, and $1 for public use; street lamps to be not more than $18.50 a year; or, if Welsbach burners are used, not more than $21. The franchise to extend for 50 years, and contracts for street lighting to be made for five year periods. The village treasury is to receive 1½% of the gross receipts of the company. A sliding scale of prices is provided for, by which the price of gas will be lowered as the consumption increases.

KITTANNING, PA.—The Armstrong Natural Gas Co. was incorporated Nov. 16 with a capital stock of $10,000; Treas., John D. Reynolds, Kittanning.

NORFOLK, VA.—An ordinance has been introduced in the council granting the E. J. Acker Construction Co. an extension of time from Dec. 6, 1896, to Sept. 6, 1897, in which to construct gas works and an electric light plant.

GRAFTON, W. VA.—The Grafton Oil Co. was incorporated Nov. 7 with a capital stock of $50,000, commencing with $700, to bore for oil, gas, etc., and to construct and operate lines for transporting same; incorporators, John T. Graw, Albert J. Yoke, C. R. Durbin, and others.

CLEVELAND, O.—Bids are asked until Dec. 9 for furnishing and keeping in repair for one year 4,650 vapor, gasoline or oil lamps and all street gas lamps of the city. D. E. Wright, Dir. Pub. Wks.

NORWALK, O.—A local paper states that it is reliably reported that negotiations are about completed between a local company of capitalists and the Northwestern Ohio Natural Gas Co. for the purchase of the gas pipes in the ground in this city, lately used as a natural gas plant. The purpose is to erect a plant and make fuel gas by a new process which has been tested enough so that it is a success. The gas is to be made from crude oil and is to be furnished for both light and heat at a price low enough to insure its use by many consumers.

TIFFIN, O.—Other bids have been received by the council for the city gas plant, in addition to those previously noted; Hatcher & Yeager, of Tiffin, bid $85,000, but they offer no proposition as to furnishing gas for the consumers through the winter or after that time; Terrence McManus, of Tiffin, offers $87,500 and the bidder agrees to furnish gas in sufficient quantities in as short a time as it is possible to drill for more gas; in the event of his being unsuccessful, he will erect an artificial plant.

TOLEDO, O.—T. P. Brown, of Toledo, has submitted a proposition to the natural gas trustees of the city to lease the plant of the city for not less than 25 years. Mr. Brown offers to manufacture and furnish artificial gas enough to make a daily supply of at least 5,000,000 cu. ft. and will sell the same by meter measurement at 25 cts. per 1,000 cu. ft.; city to receive 10% of all gross earnings, which would bring the city $46,625 a year on a daily consumption of 5,000,000 cu. ft. or $91,250 if 10,000,000 cu. ft. could be disposed of daily. The natural gas plant of the city has cost the city over $1,000,000.

FRANKFORT, IND.—Bids are asked until Dec. 18 for lighting the streets of the city for three or five years by Welsbach gas lamps, or by electric lights, as described in our advertising columns. Alonzo J. Hammond, Cy. Engr.

PORTLAND, IND.—A press report from this city states that within the last week contracts for drilling new wells aggregating $25,000, have been let in the Indiana oil field. The Standard Oil Co., the Rowland Zeigler Co., W. S. Morton and others are at work. The Salamonie Natural Gas Co., which furnishes the city of Fort Wayne, is drilling 15 wells in the vicinity of Mill Grove.

CHICAGO, ILL.—The Chicago Acetylene Gas & Carbide Co. has been incorporated; capital stock, $2,500; incorporators, Howard M. Carter, Robert C. Chapman and William Garnett, Jr.

HOUSTON, TEX.—The Fuel Gas Co. has petitioned for a franchise. The "Post" states that action upon the application has been deferred until the mayor can advise himself upon the subject as to what concessions are accorded like companies in other cities and the benefits accruing from the use of the output of similar plants.

SALT LAKE CITY, UTAH.—The natural gas supply of the New American Gas & Fuel Co., which furnishes the Salt Lake & Ogden Gas & Electric Light Co. with its supply for this city, is said to be on the decrease. The mains of the electric light company are also said to leak badly.

SAN LEANDRO, CAL.—The recently organized San Leandro Gas & Electric Lighting Co. is said to have a new patent on manufacturing gas. A plant will probably be constructed.

MISCELLANEOUS CONTRACTS.

BONDS.—Newark, Del.—Bids are asked until Nov. 25 for the purchase of $37,000 of 4% refunding bonds. Geo. Williams, Secy. and Treas.

CEMENT.—New York, N. Y.—Bids are asked until Nov. 24 for furnishing about 4,000 bbls. of Portland cement. Geo, S. Terry, Secy. Dept. of Docks, Pier A.

STREET SIGNS.—Woonsocket, R. I.—F. H. Mills, Cy. Engr., has submitted estimates, etc., for 500 street signs to cost $1.15 to $1.75 each, according to design.

IRON WORK.—Charleston, W. Va.—Bids are asked until Dec. 1 for the iron work for lock gates on the Great Kanawha River. Col. Peter C. Hains, U. S. Engr.

DREDGING.—New London, Conn.—Bids are asked until Dec. 17 for dredging in six harbors, as stated in our advertising columns. Capt. Smith S. Leach, U. S. Engrs.

GUN BATTERY.—San Diego, Cal.—Bids are asked until Nov. 30 for constructing a gun battery near San Diego. Maj. Chas. E. L. B. Davis, U. S. Engr., Flood Bldg., San Francisco.

DIKE WORK.—Evansville, Ind.—Bids are asked until Dec. 11 for constructing dikes and bank protection in the Ohio River at and near this city. Maj. W. H. Heuer, Custom House, Cincinnati, O.

SURVEY.—Pleasantville, N. Y.—It is reported that at a recent meeting of the Pleasantville Library Association a committee was appointed to have a preliminary survey made with a view to incorporation.

MORTAR BATTERY.—Galveston, Tex.—Bids are asked until Nov. 30 for building a mortar battery at Fort Point Galveston, as stated in our advertising columns. Maj. A. M. Miller, U. S. Engr., Telephone Bldg., Galveston.

FIRE ENGINE AND HOSE.—Jersey City, N. J.—Bids are asked until Nov. 24 for furnishing one third-size steam fire engine, complete, and 4,000 ft. of 2½-in. rubber lined fire hose. Chas. Esterbrook, Clk. Fire Comrs., 244 Bay St.

BONDS.—Baltimore, Md.—Bids are asked until Nov. 30 for the purchase of 10 first mortgage gold bonds of the Best Telephone Mfg. Co., of $1,000 each. James Russell, Treas., Best Telephone Co., 159 to 179 Stockholm St.

HIRE OF DREDGING PLANT.—Mobile, Ala.—Bids are asked until Dec. 19 for hire of dredging plant to be operated on dredged channel of Mobile River and Mobile Bay, as stated in our advertising columns. Maj. Wm. T. Rossell, U. S. Engrs.

LEVEE WORK.—Memphis, Tenn.—Bids are asked until Nov. 23 for constructing levees in the 3d district of the Mississippi River improvement, containing 2,736,000 cu. yds. of work. Lt. H. C. Newcomer, U. S. Engr., 202 Union St., Memphis.

BONDS.—Boston, Mass.—Bids are asked until Nov. 23 for the purchase of $8,225,000 of state park, water, highway, state house, grade crossing and other 3½% gold bonds. E. P. Shaw, Treas. and Receiver Gen., Treasury Dept., State House, Boston.

COAL BREAKER.—Tuscarora, Pa.—It is reported that a 10-ft. vein of coal has been discovered at Tuscarora, near Pottsville, by prospectors in the employ of the Bell Colliery and that it will be necessary to erect a new breaker to prepare the coal.

UNDERGROUND CABLES.—Cincinnati, O.—Bids are asked until Nov. 20 for the manufacture, delivery and installation of underground cables for the electric and telephone circuits of the fire department. J. A. Cabot, Cy. Electrician; D. W. Shedd, Secy.

OIL WELLS.—Monmouth, Ill.—A press report announces that oil wells will be sunk on the farm of Zan Rankin, near Media, a $100,000 stock company having been organized for that purpose. A good flow has already been obtained from a well 500 ft. deep.

STAIRWAYS AND COVERINGS.—Boston, Mass.—Bids are asked until Nov. 23 for the erection and completion of eight stairways and coverings on Boston Common for the subway. Wheelwright & Haven, architects, 1129 Tremont Bldg.; B. L. Beal, Secy. Comn., 20 Beacon St.

CANAL IMPROVEMENT.—Fulton, N. Y.—It is reported that plans for canal improvement from Fulton guard lock, Oswego Canal, 2½ miles north, have been completed by the state engineer. The work will be advertised and let by the superintendent the coming winter; estimated cost, $70,000. Geo. W. Aldridge, Supt. Pub. Wks., Albany.

MAPS.—Brooklyn, N. Y.—Bids are asked until Dec. 1 for furnishing the Department of Assessment with maps for the 32d Ward, late the town of Flatlands, to be made in accordance with the block and lot number system as used in said department, and from official surveys, recorded deeds and maps on file to date. T. B. Willis, Comr. Cy. Wks.

DAMS.—San Francisco, Cal.—At the weekly meeting of the state debris commission, Nov. 2, permits for constructing dams were granted the Deer Creek mine, Wild Cat Mine, Nevada county; Quincy mine, Plumas county; and Jack's Ranch mine, Plumas county. The Dutch mine in Kern county was given permission to raise its present dam 20 ft.

PARKS.—Jersey City, N. J.—The 11th and 12th Wards of Jersey City are to have two parks. One will be located in Ogden Ave., between Liberty and Bower Sts., and will embrace about three acres. The other will contain 7 1-5 acres, and will be in Hudson St., between Germania and Manhattan Aves. Options have been secured on both properties and the bonds necessary to raise the money will be floated soon.

TELEPHONE SYSTEM.—Ellicott City, Md.—A press report from this city announces that a company is being organized to establish a telephone system in this county, to connect Gaither's, Hood's Mill, Cooksville, Glenwood, Gary, Roxbury Mills and Sunshine and ultimately to reach Lisbon, Poplar Springs, Mt. Airy, Long Corner, Florence, Daisy, Glenelg, Dayton, Highland, Clarksville, Guilford, Columbia, Ellicott City, Mayfield, Pine Orchard, West Friendship, Alpha, Mount View, Sykesville and other points. It is the intention to charge not to exceed 5 cts. for messages. The shares of stock will be $5, and persons securing a telephone will be required to take not less than three shares of stock.

CANAL IMPROVEMENTS.—Albany, N. Y.—Bids are asked until Nov. 25 for the following work in connection with the state canal improvements: Rebuilding east pier of Belgium bridge over Seneca River; rebuilding lock No. 49, Black River Canal; constructing a 36-in. cast iron pipe culvert under the Genesee River feeder, Rochester; for repairs to breakwater, piers, dam No. 1 and gates; also removing bars at Owasco Lake outlet; repairing and reconstructing slopes and banks the channel of Falls Creek, with grading, etc., Mountain Falls; protecting west bank of the Chemung River, Chemung, and for repairing culvert under the Oswego Canal, Oswego. Thos. Wheeler, Syracuse, and R. G. Lay, Rochester, Asst. Supts.; Geo. W. Aldridge, Supt. Pub. Wks., Albany.

CRIB WORK.—New York, N. Y.—Bids are asked by the department of docks until Nov. 24, for preparing for and building a crib-bulkhead in Sherman's Creek, on the Harlem River. Crib-bulkhead complete, containing about the following quantities: 576,113 cu. ft. of cribwork, complete, including fenders, mooring-posts and backing-logs, and measured from the under side of the backing-logs; piles to be driven in the rear bents of the cribwork, about 91 (it is expected that these piles will be from about 40 ft. to 70 ft. in length to meet the requirements of the specifications); rip-rap foundation for rubble-wall, 73 cu. yds.; dry rubble or large rip-rap wall, 1,195 cu. ft.; materials for painting, oiling, and tarring; labor of every description for about 767 lin. ft. of cribwork. Geo. S. Terry, Secy., Battery Place.

LIGHTHOUSE VESSELS.—Washington, D. C.—It is stated that in a short time the plans and specifications for three composite light vessels and two steel tenders for the lighthouse service will be ready for bidders, and will be sent by the secretary of the lighthouse board to all shipbuilders in the country, together with blank forms for bids. One of the light vessels will be located on Diamond Shoals, Cape Hatteras; another at Fire Island, New York, and a third at San Francisco bar. One of the tenders will be put into service in the second district, with headquarters at Boston, and the other will have headquarters at Key West, Fla. All of these vessels will be modern and first-class in every particular, with powerful masthead electric lights visible for 15 miles. There was appropriated $80,000 for each of the light vessels and $75,000 each for the tenders.

CANAL.—Boston, Mass.—Preparations are being made by the promoters of the Massachusetts Maritime Canal Co. to deposit $200,000 with the state treasurer to secure the right to construct the Cape Cod Canal. Press reports announce that the preliminary plans have been prepared and approved by the joint boards of railway and harbor and land commissioners, and the locations and other specifications prepared for presentation to the Barnstable county commissioners as soon as the deposit has been made with the state treasurer. The canal is to begin at some point in Buzzard's Bay, running through the towns of Bourne and Sandwich, or either of them, to some convenient point in Cape Cod or Barnstable Bay. It is to have a depth of not less than 25 ft. at mean high water, and a width of not less than 100 ft. at the bottom, with suitable slopes, and with a surface width of not less than 200 ft. Engr., Elmer L. Corthell, 71 Broadway, New York; Wendell G. Corthell, of Boston, is interested.

CONTRACT PRICES.

RAILWAY TRESTLE.—Sandy Hook, N. J.—Col. James M. Moore, Asst. Q. M., New York, received the following bids Nov. 14 for the construction of about 600 ft. of railway trestle at Sandy Hook, N. J.:

	Per lin. ft.
P. Sanford Ross, Jersey City, N. J.	$6.90
J. M. Briggs, New York city	8.92
Spearin & Preston, Bayonne, N. J.	7.45
W. W. Ryan, New York city	11.375
Hugh Hart, Long Island City	9.75
E. D. Ruggles, New York city	8.50
Aetna Construction Co., Brooklyn, N. Y.	5.90

SEWER PIPE.—Akron, O.—Bids for furnishing the city with sewer pipe for the next two years have been received as follows, the bid being the per cent. discount from list price for first-class and second-class pipe, respectively; price paid for the last two years was 78 and 88% discount, respectively, for the two classes:

	First class. %.	Second class. %.
Hill company	80	85
Robinson Bros. company	79½	83½
Harry Thompson	78	83
Buckeye company	79	84
Summit company	79	84

DREDGING.—New York, N. Y.—The contract for 85,000 cu. yds. of mud and sand dredging in Sherman Creek, Harlem River, was awarded Nov. 10, to the Morris & Cumings Dredging Co., 22 State St., New York, at 19.44 cts. a cu. yd.; P. Sanford Ross, 277 Washington St., Jersey City, bid 24 cts. Geo. S. Terry, Secy. Dock Dept.

DAMS AND SHORE PROTECTIONS.—Rock Island, Ill. —The following bids were received by Lieut.-Col. W. R. King, Nov. 10, for constructing dams and shore protections on Mississippi River, as advertised in Engineering News, price being per cubic yard for material in place:

Between Read's Landing, Minn., and Trempealeau, Wis.:

Bidder.	Rock, 25,000 cu.yds.	Brush, 75,000 cu.yds.	Total.
Fetter & Crosby, La Crosse, Wis.	$0.97	$0.17	*$37,000
J. Richtman, Fountain City, Wis.	1.00	.35	51,250
A. Kirchner, Fountain City. Wis.	.94	.19	37,750

Between Dubuque and Clinton Ia.:

Bidder.	Rock, 30,000 cu.yds.	Brush, 25,000 cu.yds.	Total.
A. Kirchner, Fountain City, Wis.	$0.90	$0.17	*$31,250
A. J. Whitney, Rock Island, Ill.	.94	.20	33,200
J. Richtman, Fountain City, Wis.	1.00	.50	42,500
Patterson Bros., Keokuk, Ia.	1.00	.20	35,000

Between Rock Island, Ill., and Muscatine, Ia.:

Bidder.	Rock, 25,000 cu.yds.	Brush, 25,000 cu.yds.	Total.
A. Kirchner, Fountain City, Wis.	$1.00	$0.19	$29,750
A. J. Whitney, Rock Island, Ill.	1.00	.20	30,000
Patterson Bros., Keokuk, Ia.	.84	.23	*26,750
James Short, St. Charles, Mo.	1.05	.35	35,000
J. Richtman, Fountain City, Wis.	1.10	.40	37,500

Between Keithsburg, Ill., and Nashville, Ia.:

Bidder.	Rock, 25,000 cu.yds.	Brush, 25,000 cu.yds.	Total.
A. Kirchner, Fountain City, Wis.	$1.00	$0.19	*$29,750
A. J. Whitney, Rock Island, Ill.	1.50	.30	45,000
Patterson Bros., Keokuk, Ia.	1.25	.25	37,500
James Short, St. Charles, Mo.	.95	.32	31,750
J. Richtman, Fountain City, Wis.	1.10	.40	37,500

Between Hamburg, Ill., and the mouth of the Illinois River:

Bidder.	Rock, 35,000 cu.yds.	Brush, 55,000 cu.yds.	Total.
A. Kirchner, Fountain City, Wis.	$1.00	$0.30	*$51,500
Thompson & Gray, St. Louis, Mo.	.80	.44	52,200
James Short, St. Charles, Mo.	1.10	.40	60,500
Golike & Rust, Alton, Ill.	1.04	.46	61,700
J. Richtman, Fountain City, Wis.	1.00	.40	57,000

---

*Recommended for acceptance.

PAVING BRICK AND GRANITE CROSSINGS.—Nashville, Tenn.—The contract for furnishing paving brick, as advertised in Engineering News, has been awarded to the Evansville Pressed Brick Co., Evansville, Ind., at $15 per 1,000, f. o. b. Nashville; contract for granite crossings was awarded to John Bradley, Atlanta, Ga., at 46⅓ cts. a lin. ft., f. o. b., Nashville. J. A. Jowett, Cy. Engr.

BRICK AND ASPHALT BLOCK PAVING.—Savannah, Ga.—The following bids have been received for paving South Broad St.: Tennessee Paving Co., Chattanooga, $1.67 a sq. yd. for brick pavement, including all cost except curbing, with 5-year guarantee and offer to maintain pavement for 20 years after expiration of the 5 years at 3 cts. a sq. yd. a year; Virginia Paving Brick Co., Lynchburg, Va., $1.65 a sq. yd. for brick, with maintenance for 20 years at 3 cts. a sq. yd. a year; Hastings Pavement Co., 66 Broad St., New York, $67.50 per 1,000 for asphalt blocks, with 5-year guarantee.

CAST-IRON PIPE.—Springfield, Mass.—The water commissioners are reported to have contracted for 8 to 4-in. pipe for use next year, at $20.38 a gross ton.

RESERVOIR, ETC.—Morris Plains, N. J.—The following bids were received Nov. 12 for constructing a 5,000,000-gallon storage reservoir, with filter basins, etc., at the state hospital at this place; Geo. W. Howell, Engr.; Chas. H. Green, Secy. Bd., 21 Washington St., Morristown, N. J.:

Bids Opened at Morris Plains, N. J., Nov. 12, 1896, for a Dam and Filter Beds for the State Hospital.

Bidder.	Clay puddle, cu.yd.	Earth excav't'n, cu.yd.	Con-crete, cu.yd.	Rubble mas'ry, cu.yd.	Brick mas'ry, cu.yd.	Material, filter bed, cu.yd.	Drain tile, lin.ft.	Rip-rap, cu.yd.	Total.
Chas. A. Simms & Co.	$1.48	$0.59	$4.95	$4.70	$10.50	$1.95	$0.23	$1.00	$34,074
S. M. Neff	2.00	.47	5.15	4.00	10.00	2.00	.40	.85	30,068
L. Batte	1.00	.50	4.75	4.50	7.50	3.00	.25	.75	29,663
Thos. Malley and Paul F. Dunn	1.00	.43	3.90	2.50	7.00	2.20	.12	1.25	28,373
George M. Rusling	1.50	.35	5.00	5.00	10.00	2.00	.15	1.00	26,825
D. Cuozzo	.73	.36	6.00	4.50	11.00	2.25	.35	.60	24,981

SEWERS.—Washington, D. C.—The following bids were received by the district commissioners Nov. 16 for constructing sewers, as advertised in Engineering News:

Quantities.		A. McCandlish, Washington, D.C.	Guiney & Coyle, Washington, D.C.	E. G. Gummel, Eckington, D.C.
21-in. pipe,	610 ft.	$1.15	$1.30	$1.22
Manholes	3...	20.00	14.00	25.00
24-in. pipe	570 ft.	1.75	1.74	1.70
Manholes	3...	30.00	20.00	30.00
12-in. pipe	1,100 ft.	.75	.90	.81
Manholes	7...	20.00	14.00	25.00
Total		$2,814	$2,975	$2,944

PIG LEAD.—Detroit, Mich.—The water board has purchased 50 tons of pig lead, at 2.8 cts. a lb., according to local papers.

◆

INDUSTRIAL NOTES.

THE CLONBROCK STEAM BOILER CO., Brooklyn, N. Y., reports work as very brisk, and the future bright.

THE J. H. McEWEN MFG. CO., Ridgeway, Pa., has made an assignment, without preference, for the benefit of its creditors.

THE PITTSBURG LOCOMOTIVE WORKS, Pittsburg, Pa., is delivering several consolidation engines to the Baltimore & Ohio R. R.

THE DEAN BROS. STEAM PUMP WORKS, Indianapolis, Ind., is furnishing a compound duplex pumping engine for the water-works at Charleston, Ill.; capacity, 2,000,000 gallons per day.

THE JUTTE & FOLEY CO., Pittsburg, Pa., has closed a contract with the West Braddock Bridge Co. to build the bridge across the Monongahela River at Braddock, Pa.

THE BARNEY & SMITH CAR CO., of Dayton, O., has delivered to the Baltimore & Ohio R. R. 10 combination baggage and passenger cars, 60 ft. long. They are of the latest design, lighted by gas and heated by steam.

THE VAN DORN IRON WORKS CO., of Cleveland, O., is introducing a steel hanger for floor beams or joists. The hanger is a stirrup support with top flanges which can be built into a wall or supported upon a steel or wooden header beam.

THE VULCAN IRON WORKS CO., Toledo, O., has recently received orders for a steam shovel to go to Buffalo, N. Y.; a car load of furnaces to go to Denver, Colo., and a car load of railway castings for the central part of the state. The company looks forward to active trade.

THE CRANE CO., Chicago, has lately closed contracts for high pressure valves, fittings and pipe for five gold mines at Johannesburg, South Africa, the Chicago City Ry., for an electric power station at Yokohama, Japan, the McCormick Harvester Machine Co., Chicago, and for the Western Wheel Works, Chicago.

THE PROBST CONSTRUCTION CO., 160 5th Ave., New York city, has had its office taken possession of by the sheriff on an attachment from Phillips & Avery for $26,383 for balance claimed to be due on contract and extra work done by the Empire Fire Proofing Co., for the above-named company on the Siegel-Cooper Co. building. The total contract was $130,000 and the extras amounted to $7,311.

MR. JULES BERTERO, Granite Bldg., St. Louis, Mo., has recently completed the sinking of an artesian well at Morgan Park, Ill., 1,400 ft. deep, which has a daily flow of 600,000 gallons. He has also recently sunk a well 1,659 ft. deep at Astoria, Ill., which has a daily capacity of 200,000 gallons; and one for Mr. H. A. Alfrey's factory, at Poplar Bluff, Mo., 535 ft. deep, with a capacity of 100,000 gallons daily.

THE CLAYTON AIR COMPRESSOR WORKS, Havemeyer Bldg., New York city, has received a contract for 25 air compressors and 25 air receivers, of medium and small sizes, from one company, delivery of the entire order to be made within six months from date. It also reports sales of five air compressors of standard pattern during the first week in November, and the indications point to a decided revival of trade in air compressors.

MESSRS. S. D. PRICE, J. POTTER CLARK AND D. H. LEVAN, Mount Carmel, Pa., have formed a partnership for the purpose of engaging in the business of building breakers. Mr. Levan built the Midvalley breaker at Mount Carmel and has had extensive experience in breaker building.

THE YOUNGSTOWN BRIDGE CO., Youngstown, O., recently closed contracts for several bridges on the Erie Ry., and four buildings for a smelting plant in Arizona, consisting of convertor house, engine house and two boiler houses; also for two spans with paved floor at Woonsocket, R. I., and for the Fort Ave. bridge for the B. & O. R. R., consisting of four double track spans 105 ft. each, together with other work for the same company.

THE GILLETTE-HERZOG MFG. CO., of Minneapolis, Minn., has just completed the construction and erection of a large coal handling plant for the Tamarack Mining Co., of Dollar Bay, Mich. The main building has a storage capacity of 50,000 tons, and is an all steel structure 428 × 175 ft. The contract included the furnishing and erection of all machinery and towers necessary for unloading coal from boats and placing it in the building. The company has also recently completed for the same firm, the construction and erection of a steel boiler house and steel stamp mill. Among other contracts on hand are the manufacture of some steel flumes 12 ft. in diameter for the Helena Water & Electric Power Co., for its new plant at Canyon Ferry, Mont., and the stele work for the St. Anthony Falls Water Power Co., at Minneapolis, which includes the power house, bear trap dam, etc. The contract has just been closed for a 100 ft. water tower and steel tank for the Rice Milling Co., of New Orleans, La.

THE TERRY & TENCH CONSTRUCTION CO., Railroad Ave. and 135th St., New York city, has just completed the erection of the steel frame of the Central Syndicate Building, corner Pearl St. and Broadway, New York city; the three top floors and roof were put up in nine days. The firm has just secured the contract from Messrs. A. & P. Roberts Co., of the Pencoyd Iron Works, for the erection of the new Sherry Building, at the corner of 5th Ave. and 44th St., which will contain between 3,500 and 4,000 tons of steel.

THE LIDGERWOOD MFG. CO., of New York city, reports that it has been passing through a year which has been full of experiments, and that considerable development has been reached on account of these many experiments. The longest single span Lidgerwood cableways in existence is that at Holyoke, 1,650 ft. span, and the company has also made one with a span of over 1,300 ft. with one tower traveling, for use in connection with the Croton dam. This latter cableway is guaranteed to handle 10 tons and the head tower is mounted upon a car with the engines. The anchorage is moveable sidewise, radially, the center of the circle being the tail tower, over 1,300 ft. distant. A new form of scoop bucket,, adapted for working in the stiffest fire-clay has also been designed. Another interesting plant built during the year was that used by F. S. Pearson & Son, for use on the Mexican drainage canal of the city of Mexico. It was constructed after the manner of the Chicago drainage canal cableways, with traveling towers and carrying a Hayward bucket, of 1½ cu. yds. capacity. This cableway with its self-filling bucket was used for digging out the bottom of the canal which had been washed in after the work of the dredge had been done.

THE SNOW STEAM PUMP WORKS, Buffalo, N. Y., has just finished the work of erecting a four-cylinder triple-expansion crank and flywheel pumping engine for the Calumet & Hecla Mining Co., E. D. Leavitt, Consult. Engr., at its water-works plant at Calumet, Mich. The engine is pumping against a head of 1,000 ft. It has just finished the work of erecting a 3,000,000-gallon horizontal cross compound crank and flywheel engine for the city of Jackson, Tenn. It is putting on the finishing touches to the erection of a 3,000,000-gallon vertical duplex compound direct acting pumping engine, built for the East Pittsburg Water Co., at its plant at Port Perry, Pa. The work of erecting a 20,000,000-gallon vertical triple expansion crank and flywheel pumping engine for the Indianapolis Water Co., of Indianapolis, Ind., is progressing rapidly and it is expected to have the work completed and the engine under steam the fore part of the coming month. The performance of this engine will be watched with considerable interest by engineers. The company has just shipped two horizontal six-cylinder mine pumps to the Argentum & Juniata Mining Co., of Aspen, Colo.; these pumps are to work against a pressure of 440 lbs. It is constructing two engines of the same type, but of a little smaller size for the Rebecca Gold Mining Co., of Cripple Creek, Colo., to work against a head of 900 ft.; Mr. C. E. Palmer, of Colorado Springs, Colo., is consulting engineer for both of these companies. The company is now constructing three large oil line pressure pumps for the Indiana Pipe Line & Refining Co., of Chicago. It has just completed and is erecting three pressure pumps for the Fox Pressed Steel Co., of Pittsburg, Pa.; these pumps are to work against a pressure of 1,000 lbs. Recent contracts are for one large duplex compound water pump for the Andrews Bros. Co., Youngstown, O.: for a complete outfit of pumps for an oil refinery for export consisting of nine duplex pumps of considerable size.

NEW YORK VALVE AND HYDRANT EXHIBITION.—An exhibition of valves, hydrants and accessories was held under the auspices of the Department of Public Works, of New York city, at the Corporation Yard, 437 East 24th St., this week. Gen. Chas. H. T. Collis is Commissioner of Public Works, and Mr. Alonso S. Gear is General Foreman of Corporation Yards. The articles exhibited, with the names and addresses of the exhibitors, were as follows, some of the articles being shown by New York city:

Hydrants.

New York Case, New York city.
Double Nozzle "A," New York city.
Jonson, Jonson Engineering & Foundry Co., foot of East 118th St., New York city.
Engel, George Engel, Buffalo, N. Y.
Mathews, R. D. Wood & Co., Philadelphia.
Frost's, J. O. Frost's Sons Mfg. Co., Towanda, Pa.
Chapman Gate, Chapman Valve Mfg. Co., 15 Gold St., New York, and Indian Orchard, Mass.
Beaumont Gate, Richard Beaumont, Kankakee, Ill.
Mellert Compression, Reading (Pa.) Foundry Co.
Eley Post, Philip Eley, Bayonne, N. J.
Eley Flush and Connections, Philip Eley, Bayonne, N. J.
Tylers' Flush, A. J. Tyler, Passaic, N. J.
Shedd, J. H. Shedd, Providence, R. I.
Eddy Post, and Eddy Flush, with Box, Eddy Valve Co., Waterford, N. Y.
Rensselaer Flush and Box, and Rensselaer Post, Rensselaer Mfg. Co., Troy, N. Y.
Coulter & McKenzie Gate, Coulter & McKenzie Machine Co., Bridgeport, Conn.
Coffin, Coffin Valve Co., Neponset, Mass.
Kennedy Gate, and Kennedy Double Valve, Kennedy Valve Mfg. Co., 75 John St., New York city.
Holyoke Gate, Norwood Engineering Co., Florence, Mass.
Ludlow Gate, and Ludlow Flush, Adam & Smith, 62 Gold St., New York city; Ludlow Valve Mfg. Co., Troy.
Thompson Compression, J. Thompson & Co., Philadelphia.
Motley, Thornton N. Motley & Co., 43 John St., New York city.

Hydrants, Models Only.

Brentano's, S. Brentano, Union Square, New York city.
Gear; no address.
Fox, J. J. Fox, 1890 Washington Ave., New York city.

Indicator Posts.

Kennedy, Kennedy Valve Mfg. Co., 75 John St., New York city.
Ludlow, Adam & Smith, 62 Gold St., New York city; Ludlow Valve Mfg. Co., Troy, N. Y.
Wood, R. D. Wood & Co., Philadelphia.

Sprinkling Cart Attachment.

Wood, R. D. Wood & Co., Philadelphia.

Gates or Valves.

Motley, Inside Screw and Motley Outside Screw, T. N. Motley & Co., 43 John St., New York.
New York, Inside Screw, New York city.
Rensselaer, Inside Screw, Rensselaer Mfg. Co., Troy.
Ludlow, Inside and Outside Screw, Adam & Smith, 62 Gold St., New York city.
Chapman, Inside Screw, Chapman Valve Mfg. Co., 15 Gold St., New York city, and Indian Orchard, Mass.
Reading, Inside Screw, Reading (Pa.) Foundry Co.
Eddy, Inside Screw, Eddy Valve Co., Waterford, N. Y.
Kennedy, Outside Screw, and Kennedy Inside Screw, Kennedy Valve Mfg. Co., 75 John St., New York city.
Dart's Self-Lubricating Gear, E. M. Dart Mfg. Co., Providence, R. I.
McLean, Inside Screw, John McLean, 298 Monroe St., New York city.
Eley, Inside Screw, Philip Eley, Bayonne, N. J.
Coffin, Inside Screw, Coffin Valve Co., Neponset, Mass.
R. D. Wood, Inside Screw, R. D. Wood & Co., Philadelphia, Pa.
Walworth, Outside, and Walworth Inside Screw, Walworth Mfg. Co., 14 Oliver St., Boston, Mass.
J. O. Frost's, Inside Screw, J. O. Frost's Sons Mfg. Co., Towanda, Pa.
Thompson, Inside Screw, J. Thompson & Co., Philadelphia, Pa.
New York, with Metallic Packing, Union Metallic Rod & Flange Packing Co., 62 Sudbury St., Boston.
New York, Outside Screw, New York city.
Eddy, 30-in. Gate, and By Pass and Gearing, Eddy Valve Co., Troy, N. Y.
New York, 36-in. Gate and Gearing, New York city.

Hydraulic Power Gate.

T. N. Motley & Co., 43 John St., New York city.

Pipe Tapping Machines.

Smith's (small) and 36-in., with Gate, Sleeve and Accessories, A. P. Smith Mfg. Co., Newark, N. J.
Hall, Walworth Mfg. Co., 14 Oliver St., Boston.
Eley's, Philip Eley, Bayonne, N. J.

Steam Calking Machine.

O'Neil, A. P. Smith Mfg. Co., Newark, N. J.

Pipe Cutting Machines.

Walworth, Walworth Mfg. Co., 14 Oliver St., Boston.
French, B. C. Smith, New York city.

Cutting-in-Specials.

R. D. Wood & Co., Philadelphia.
Builder's Iron Foundry, Providence, R. I.

Lead Furnaces.

A. P. Smith Mfg. Co., Newark, N. J.
John McLean, 298 Monroe St., New York city.

Metallic Flange Packing.

Union Metallic Rod & Flange Packing Co., 62 Sudbury St., Boston, Mass.

Sectional Stop-Cock Box.

Reading Foundry & Machine Co., Reading, Pa.

Service Pipe.

Cast Iron, M. J. Drummond, 192 Broadway, New York city.
Lead-lined, Lead-Lined Iron Pipe Co., Wakefield, Mass.

Globe Special Castings.

Builders Iron Foundry, Providence, R. I., shown by M. J. Drummond, 192 Broadway, New York city.

The Donaldson Iron Co., Emaus, Pa., manufacturer of iron pipes and other goods, also entered as an exhibitor, but the character of its exhibit was not stated on the official records.

NOTICE.

As Thursday, Nov. 26, is Thanksgiving Day, Engineering News of that date will be printed and mailed on Wednesday. Tuesday, noon, is the latest at which any matter can be received for publication in this issue.

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering News

PERSONALS.

Mr. Benjamin Wood, contractor, of Jackson, Mich., died Dec. 10.

Mr. Joseph McNanugher, contractor, of Pittsburg, Pa., died at Allegheny, Pa., Dec. 6, at the age of 60.

Mr. B. Schreiner has resigned his position as assistant in the office of the City Engineer of Des Moines, Ia.

Mr. George Z. Heuston, City Engineer of Winona, Minn., was married to Miss Bessie Hill, of that city, on Dec. 2.

Mr. Carroll S. Knapp, Superintendent of the gas works at Marblehead, Mass., will retire from that position on Jan. 1.

Mr. R. Willard Ware, M. Am. Soc. C. E., of Plainfield, N. J., was married Dec. 10 to Mrs. Ella Belle Ridley, of that city.

Mr. Herbert Wilcox has been appointed City Engineer of Aspen, Colo., succeeding Mr. Edward Higenbotham, resigned.

Mr. J. Carl Duke has been appointed General Agent of the Gettysburg & Harrisburg Ry., with headquarters at Carlisle, Pa.

Mr. J. H. Nelson has opened an office in the Larimer County Bank Building, Loveland, Colo., for practice as a civil and hydraulic engineer.

Mr. John A. Tilley has been appointed Assistant Engineer for the new East River bridge, New York, succeeding Mr. Hooper, who has resigned.

Mr. W. H. Maddock, mechanical engineer, and Superintendent for the James Rees & Sons Co., boat and engine builders, Pittsburg, Pa., died Dec. 7.

Mr. C. L. Mayne, Division Superintendent of the Fitchburg R. R., has been appointed Assistant General Superintendent, with offices at Fitchburg, Mass.

Mr. Charles Stewart Smith has been appointed a member of the Rapid Transit Commission of New York city, to fill the vacancy left by the death of Mr. Wm. Steinway.

Mr. Herman Webber, an engineer in the employ of Denver Tramway Co., Denver, Colo., has been appointed to a position with the Mexico, Cuernavaca & Pacific Ry.

Mr. W. S. Rudge has been appointed by the Board of Water-Works Trustees of Youngstown, O., as Inspector of Water Waste, to examine hydrants, house fixtures, etc.

Mr. A. J. McCabe, Division Superintendent of the Great Northern Ry., has been appointed Superintendent of the Butte, Anaconda & Pacific Ry., with offices at Butte, Mont.

Mr. R. Oshima, M. E., Chief Mining Engineer of the Hokkaido Colliery & Railway Co., Sapporo, Japan, is visiting the United States to inspect railways and mining plants.

Mr. Edward H. Hickey, until recently chief draftsman of the Union Bridge Works, Athens, Pa., died Dec. 7. He had been connected with the Athens works for about 25 years.

Mr. Wm. W. Taylor, who died at Kennett Square, Pa., Nov. 27, was one of the contractors on the old Western Maryland R. R., and also built the water-works of Westminster, Va.

Prof. A. D. F. Hamlin, of Columbia College, New York city, delivered a lecture on "The Architecture of London," at a meeting of the Brooklyn Institute, Brooklyn, N. Y., Dec. 10.

Mr. Kingsley L. Martin, Jun. Am. Soc. C. E., formerly an assistant engineer on the Brooklyn Bridge, has been put in charge of the construction of the caissons for the new East River bridge.

Mr. Charles O. Shields, M. Am. Inst. M. E., mining engineer, of Denver, Colo., died recently in Bolivia, South America, where he was engaged on work for the American Development Co., of New York city.

Mr. Andros B. Stone, who died in New York city Dec. 15, was President of the A. B. Stone Construction Co., and a director in the Henning Rapid Transit Co. and the New York & Jersey City Ry. Co.

Mr. John D. Parsons has been elected Vice-President and General Manager of the Union Traction Co., at Philadelphia, Pa. He now holds a similar position with the West Side Street Ry. Co., of Chicago.

Mr. Arthur Pew, M. Am. Soc. C. E., M. Inst. C. E., has just returned from Tumaco, Colombia, South America, where he has been for the past year as General Manager of the Playa de Oro Mining Co., of Ecuador.

Mr. Oliver Eldredge McClellan, formerly Superintendent of the Middle Division of the Pennsylvania R. R., with headquarters at Harrisburg, died at Germantown, Pa., Dec. 9. He retired from railway service some years ago.

Mr. J. W. Ledoux, M. Am. Soc. C. E., of Philadelphia, Pa., has returned from Mexico, where he was sent by several Philadelphia capitalists to report upon a river improvement concession, water-works and other projects.

Mr. F. S. Gannon, General Superintendent of the Baltimore & Ohio R. R., and General Manager of the Staten Island Rapid Transit R. R., has been appointed Third Vice-President and General Manager of the Southern Ry.

Mr. John F. O'Rourke, M. Am. Soc. C. E., is Chief Engineer for the Pneumatic Mail & Transportation Co., which has a contract for laying a pipe line across the Brooklyn Bridge, connecting the central post offices of New York and Brooklyn.

Mr. R. G. Mathews, formerly General Superintendent of the Buffalo, Rochester & Pittsburg Ry., has accepted the position of General Sales Manager for the block and train-order signal equipment of the Mozier Safety Signal Co., of Cleveland, O.

Mr. Michael Rickard, a member of the New York State Board of Railroad Commissioners, died of heart disease at Albany, N. Y., Dec. 12. He was about 65 years of age. Previous to his appointment he was an engineman on the New York Central R. R.

Mr. John T. Bishop, contractor, of Baltimore, Md., died Dec. 6, at the age of 83. He was born at Columbia, N. H., and went to Maryland when 21 years of age. He was contractor for several tunnels on the Baltimore & Ohio R. R., and afterwards erected a number of public buildings in Baltimore.

Messrs. George M. Hawes and E. I. Marvel have opened an office as civil and mechanical engineers, at 81 Bedford St., Fall River, Mass. Mr. Hawes has been employed on the Boston Subway, and Mr. Marvel has been employed by the Metropolitan Sewerage Commission, and as assistant civil engineer of Somerville, Mass.

Mr. Andrew J. Gavett, engineer of the sewerage system of Plainfield, N.J., has completed his work for the Sewer Commissioners, and will open an office in the Codington Building, 152 Park Ave., Plainfield, N. J., for practice as a civil engineer. A description of the sewerage and sewage disposal system of that city, written by Mr. Gavett, appeared in our issue of Sept. 10, 1896.

Mr. W. E. Howley, of the contracting firm of W. E. Howley & Co., Pittsburg, Pa., was seriously injured at the work of grading Marshall Ave., Allegheny, Pa., Dec. 11. The construction cars are hauled up a trestle by a cable, and on the trestle there is a curve. While a train was being hauled up the cable came off the guide pulleys, striking Mr. Howley and throwing him against some cars standing on a side track.

Mr. Kennedy Park has accepted a position with the Aultman & Taylor Machinery Co., of Mansfield, O., to take charge of the erecting department for Cahall vertical and Cahall-Babcock & Wilcox boilers in New England. He was for ten years in the erecting department of the Babcock & Wilcox Co., of New York, and for the past five years has been superintendent of the New England erecting department for that company.

Mr. L. T. Brown, formerly Superintendent of the Upper Union Mills, of the Carnegie Steel Co., Pittsburg, Pa., has been appointed General Superintendent of both Upper anl Lower Union Mills. Mr. Joseph Schwab, who was superintendent of the blooming mill at the Homestead Steel Works, has been appointed to succeed Mr. Brown at the Upper Union Mills, and Mr. J. G. Hunter has been appointed Superintendent of the Lower Union Mills to succeed Mr. Joseph Wrigley, resigned.

Mr. Henry Jacobs, formerly Master Mason of the Philadelphia & Reading R. R., died at West Manayunk, Pa., Dec. 9. He was born in 1817, and after learning the trade of stone mason, he entered the employ of the P. & R. R. R. He was Master Mason of the upper section until 1856, when, after the death of Mr. Christian Swartz, he was given charge of the entire line. He built the Peacock bridge, above Reading, and the Schuylkill Haven bridge, and helped to construct the Flat Rock tunnel. He invented a brace derrick or crane, which soon became extensively used. He also built the stonework of the Flat Rock and Conshohocken dams for the Schuylkill Navigation Co.

Mr. Alfred Nobel, the manufacturer of explosives, and the first to attempt the practical use of nitro-glycerine, died at San Remo, Italy, Dec. 9. His first experiments began in 1863, but they were only partly successful until he employed the plan first used by Gen. Pictet in 1854 for developing the force of gunpowder in the most rapid manner, by means of an initiative detonation. The liquid nature of the substance constituted the serious obstacle to its safe transport and it was not until Nobel had hit upon the expedient of mixing it with absorbent material that the future of nitro-glycerine as a blasting agent was assured. He first used charcoal as an absorbent, but finally selected the siliceous earth known as "kieselguhr."

Mr. J. R. Kendrick, Third Vice-President of the New York, New Haven & Hartford R. R., died suddenly at Boston, on Dec. 11. He was born at Lebanon, N. H., in June, 1852. He began railway work in the office of the Superintendent of the Sullivan R. R., at Charlestown, N. H., and shortly after this he went to the Vermont Central R. R. as Paymaster. In 1854 he accepted a position on the Concord Railroad, at Concord, N. H., and was successively Paymaster, General Ticket Agent, Chief Clerk or Auditor, Master of Transportation, General Freight Agent and Assistant Superintendent—up to June, 1865. Then his services were secured by the Boston & Lowell R. R. as General Freight Agent and Freight Agent at Boston. In June, 1866, he returned to Concord, N. H., as General Superintendent of the Concord R. R. In 1870 he went south to take charge of the reconstruction of the line between Mobile and New Orleans. After finishing that he returned north, and in 1871 was made Superintendent of the Old Colony R. R. One of the shrewdest of its operations was securing a controlling interest in the steamers between Fall River, Newport and New York, and placing the management of the same within the control of its own board. In 1893, when the Old Colony R. R. and the New York & New Haven R. R. were consolidated, Mr. Kendrick was made Vice-President of the consolidated lines, having charge of the Boston end of the line, including the boat service.

Mr. David Leonard Barnes, Mechanical Editor of the "Railroad Gazette," died in New York city, Dec. 15, after an illness of many months. He was born at Smithfield, near Providence, R. I., Aug. 23, 1858, and was a student at Brown University, from which in later years he received the degree of Master of Arts, and at the Massachussets Institute of Technology. From 1879 to 1882 he was engaged in the machine shops and drawing rooms of the Hinckley Locomotive Works at Boston and the Rhode Island Locomotive Works at Providence, and his advancement was so rapid that in 1882 he became Chief Draftsman at the latter works. He remained at these works as Chief Draftsman and Mechanical Engineer until 1887, with the exception of a short time when he held the same position at the New York Locomotive Works, at Rome, N. Y. During this time he also carried on more or less work as a consulting engineer, and in 1887 he resigned his position to give his entire time to this work. In December, 1888, he became connected with the editorial staff of the "Railroad Gazette," having special charge of the department of mechanical engineering. He carried on at the same time his private consulting practice with offices in New York and Chicago, and devoted his attention especially to the subject of railway rolling stock. Among the important works with which he was connected was Chicago's first elevated railway, the "Alley" road, of which he was consulting engineer. When an agreement was formulated a year or more ago, between the Westinghouse Electric Co. and the Baldwin Locomotive Works, for the construction of large locomotives for electric railway service, Mr. Barnes was selected by the two companies as consulting engineer for the work. His most important labors, however, were in the field of technical literature. It is safe to say that no one during the past half-dozen years has made such valuable contributions to technical literature upon the subjects of railway rolling stock and locomotive engineering as has Mr. Barnes. He was too busy a man to find time for the writing of treatises and text-books, although he edited and was joint author of a treatise on compound locomotives, but as a contributor to the transactions of the numerous engineering societies of which he was a member, his pen was a most prolific one, and his papers of this class as well as his editorial articles in the "Gazette" were of uniformly high character. We can take space to mention but one of his writings, a paper contributed to the Civil Engineering Section of the International Engineering Congress of 1893, on "The Distinctive Features and Advantages of American Locomotive Practice," and this we allude to merely as an example of one of his best pieces of work. His services on the committees of the Master Mechanics' and Master Car Builders' Association deserve also the highest commendation. The list of technical societies of which Mr. Barnes was a prominent member, includes, besides the two just named, the Western Society of Engineers and Western Railway Club, the American Society of Mechanical Engineers, the American Society of Civil Engineers, and the Institution of Civil Engineers of Great Britain. He was also a member of the Union League Club of Chicago, the Manufacturers' Club of Philadelphia, and the Engineer's Club of New York.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

TACOMA SOCIETY OF CIVIL ENGINEERS AND ARCHITECTS.
Dec. 18. Secy., 201 Washington Bldg., Tacoma, Wash.
CHICAGO ELECTRICAL ASSOCIATION.
Dec. 18. "Decorative Lighting," by E. J. Jenness. Secy., J. R. Cravath, 810 Old Colony Bldg.
ENGINEERS' CLUB OF COLUMBUS.
Dec. 19. Secy., M. S. Hopkins, 14½ N. High St., Columbus, O.
ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 19. Secy., L. F. Rondinella, 1122 Girard St.
ENGINEERS' CLUB OF MINNEAPOLIS.
Dec. 21. Secy., Elbert Nexsen, 1620 S. E. 4th St., Minneapolis, Minn.
WISCONSIN POLYTECHNIC SOCIETY.
Dec 22. Secy., W. K. Means, Loan and Trust Bldg., Milwaukee, Wis.
ENGINEERING ASSOCIATION OF THE SOUTH.
Dec. 24. Secy., L. P. Brown, Nashville, Tenn.
INDIANAPOLIS ENGINEERING CLUB.
Dec. 26. Secy., C. C. Brown, Indianapolis, Ind.
CANADIAN SOCIETY OF CIVIL ENGINEERS.
Dec. 31. Annual meeting, Jan. 12, in Montreal. Secy., C. H. McLeod, Montreal, Can.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 1. Secy., O Von Geldern, 819 Market St, San Francisco, Cal.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Jan. 4. Secy., C. L. Annan, City Engineer's Office.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Jan. 4. Secy., Carleton Greene, Library Bldg., Buffalo.
COLUMBIAN ENGINEERING SOCIETY.
Jan. 5. Secy., F. W. Hart, 15th and H Sts., N. W., Washington, D. C.
WESTERN SOCIETY OF ENGINEERS.
Jan. 6. Secy., N. L. Litton, Monadnock Block, Chicago.
ENGINEERS' CLUB OF ST. LOUIS.
Jan. 6. Secy., Wm. H. Bryan, Turner Bldg.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Jan. 6. Annual meeting, Jan. 20, 21, in New York city. Secy., C. W. Hunt, 127 E. 23d St., New York.
BROOKLYN ENGINEERS' CLUB.
Jan. 7. Secy., A. J. Provost, Jr., 149 Pierrepont St., Brooklyn, N. Y.
CENTRAL RAILWAY CLUB.
Jan. 8. Secy., H. D. Vought, Buffalo "Courier," Buffalo. N. Y.
MONTANA SOCIETY OF ENGINEERS.
Jan. 9. Secy., Forrest J. Smith, Denver Block, Helena.
ENGINEERS' CLUB OF KANSAS CITY.
Jan. 11. Secy., F. W. Tuttle, Baird Bldg.
RAILWAY SIGNALING CLUB.
Jan. 12. Secy., Geo. M. Basford, The Rookery Bldg., Chicago.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Jan. 12. "Some Problems in Street Railroading," by C. H. Short. Secy., F. A. Colburn, Case Library Bldg.
DENVER SOCIETY OF CIVIL ENGINEERS.
Jan. 12. Secy., Walter Pearl, 36 Jacobson Bldg.
NORTHWEST RAILWAY CLUB.
Jan. 12. Secy., T. A. Foque, Soo Line, Minneapolis.
NEW ENGLAND RAILROAD CLUB.
Jan. 13. Secy., Edwd. L. Jones, P. O. box 1158, Boston.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Jan. 14. Secy., James K. Zollinger, Norton Bldg.
ENGINEERS' SOC. OF WESTERN PENNSYLVANIA.
Jan. 19. Secy., Daniel Carhart, 410 Penn Ave., Pittsburg.
WESTERN RAILWAY CLUB.
Jan. 19. Secy., W. D. Crossman, The Rookery, Chicago.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Jan. 20. Secy., F. Van Vleck, Los Angeles, Cal.
ASSOCIATION OF ENGINEERS OF VIRGINIA.
Jan. 20. Secy., J. A. Pilcher, Roanoke, Va.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Jan. 20. Secy., S. E. Tinkham, City Hall.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.
Jan. 20. Secy., R. W. Pope, 26 Cortlandt St., New York city.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Jan. 20. Secy., A. Sorge, Marquette Bldg., Chicago.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Jan. 21. Kimball House, Atlanta, Ga. Secy., F. A. Charpiot, Macon, Ga.
ENGINEERS' CLUB OF CINCINNATI.
Jan. 21. Secy., J. F. Wilson, P. O. box 333.
NEW YORK RAILROAD CLUB.
Jan. 21. Secy., W. W. Wheatly, 168 Montague St., Brooklyn.
NATIONAL ASSOCIATION OF MANUFACTURERS.
Jan. 26, 27, 28. Annual meeting in Philadelphia. Secy., E. P. Wilson, Cincinnati, O.
AMERICAN INSTITUTE OF MINING ENGINEERS.
Feb. 16. Annual meeting at Chicago, Ill. Secy., R. W. Raymond, 13 Burling Slip, New York city.
NORTHWESTERN TRACK AND BRIDGE ASSOC.
Mar. 12. Secy., D. W. Meeker, St. Paul, Minn.

CIVIL ENGINEERS' CLUB OF CLEVELAND.—At the meeting of Dec. 8, Mr. Jos. W. Willard read a paper on "Explosives." He gave a brief history of explosives, their adaptation to the arts and to engineering and the possible future use in warfare of the so-called high explosives.

WESTERN FOUNDRYMEN'S ASSOCIATION. — The regular monthly meeting of the association was held at the Great Northern Hotel, Dec. 16, and the reports of the committees on "Apprenticeship" and "Cores" were discussed at some length. There was also discussion on a number of topical questions relating to foundry practice.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.—At the regular meeting held Dec. 7, Messrs. Wm. Danforth and C. A. Forbes asked the co-operation of the society with the Minnesota Association of Surveyors and Engineers, the Minneapolis Engineers' Club and the Engineering Department of the State University, in the endeavor to secure legislation in the matter of licensing land surveyors. Mr. Max Toltz read a paper on "Paint Tests at the Great Northern Railway Laboratory." The result of the experiments pointed to graphite paints as best adapted for preservation of iron and steel structures.

C. L. Annan, Secy.

WESTERN RAILWAY CLUB.—The regular monthly meeting of the club was held Dec. 15, at the Auditorium Hotel, Chicago. The paper presented at the November meeting by Mr. J. H. McConnell, entitled "Some of the Uses and Advantages of Compressed Air," was discussed and there were also topical discussions on the questions: "What Can be Done to Further the Use of Correct M. C. B. Standards?" and "What Additional Parts of Cars is it Wise and Feasible to Standardize?" The paper presented for discussion at the January meeting was by Mr. A. M. Waitt, and was entitled "Suggestions on Specifications for the Construction and Inspection of New Rolling Stock." Owing to the continued illness of Mr. W. D. Crossman, the Secretary of the Club, Mr. G. M. Basford, has been appointed Acting Secretary.

NEW JERSEY SANITARY ASSOCIATION. — The twenty-second annual meeting of the association was held at Lakewood, N. J., Dec. 11 and 12. We give below a report of those portions of the proceedings most interesting to engineers.

The fallacy of the idea so often advanced that the spread of diphtheria is caused by sewerage systems, defective or otherwise, was brought out by Dr. Samuel H. Durgin, Health Officer of Boston, in a paper entitled, "Influence of Schools on the Spread of Diphtheria." The Boston Health Board has investigated all cases of diphtheria which have occurred in that city since 1878. Negative results have followed attempts to connect diphtheria with filth. The influence of public schools on the spread of the disease is marked.

An interesting address was made by Col. Geo. E. Waring, Jr., on "The Influence of Clean Streets on Health," in which some of the benefits resulting from the change from dirty to clean streets in New York city were described. The change has been greatest in the crowded districts of the city, where the streets had been shamefully neglected. More than half of these streets were well asphalted, but that fact was not evident to the eye, except when rain washed off the heavy coating of mud. These streets are now largely used by children at play, and during the summer evenings almost their whole space is taken up with children and grown people seeking fresh air.

Owing to the inability of Mr. J. C. Smock, State Geologist of New Jersey, to be present, the paper on the programme, entitled, "Improvement of the Newark Meadows," was presented by Mr. C. C. Vermuele, Engineer of the Geological Survey. These meadows extend along the Hackensack River from Newark Bay some distance to the north, comprising an area of 27,000 acres. They are made up of 7 to 15 ft. of peat and blue clay, beneath which is a hard bottom of red sandstone and drift. This low, marshy land is thought to be productive of malaria and is known to produce mosquitoes. Similar land has been reclaimed in other parts of the state, 15,000 acres in Salem Co. and 6,000 in Warren Co.

East of the Orange Mountains and adjacent to or not far from these meadows is a population of some 900,000 people, and 12 railways cross the meadows, carrying large numbers of commuters. All these people, the paper urged, would be benefited by the improvement of the meadows. Filling in would be too expensive as a means of reclamation, the estimated cost of filling 6 ft. being $2,500 an acre. Drainage by ditches and pumping was recommended. The land reclaimed could be used for grazing purposes and market gardens, and might subsequently be built upon.

It is a fact not generally known that the Hackensack River affords a fine waterway for 18 miles from its mouth, besides having a number of navigable branches. With a little dredging, the main channel could be given a depth of 15 ft. In connection with meadow improvement, manufacturing establishments might be placed on the banks. Water frontage will soon be needed in this section. In fact, Jersey City already suffers from lack of it. Embankments 300 to 400 ft. wide and 4 ft. above mean high tide were suggested, under the ownership of the several municipalities, to be leased to private parties.

The meadow improvement should be carried out as a public undertaking, and as a whole, and not by sections, in order that the interest of none be neglected. If left to private enterprise, all but the most favorable portions of the work would be carried out, leaving untouched some sections most in need of improvement, especially from a sanitary standpoint.

The objection to simple drainage, without pumping, is that the meadow lands shrink with drainage, a condition to which pumping can be easily accommodated. Meadow land drained 27 years ago is 3 ft. lower now than it was then.

It was suggested that the work be done by a drainage commission, and that the reclaimed land be sold in small plots at auction. The estimated interest charges and operating expenses attendant on the improvement was put at $6 to $7 per acre.

The remaining paper to be noticed was on "River Pollution," by Dr. E. J. Marsh, of Paterson. Dr. Marsh is chairman of the commission appointed last spring to investigate the pollution of the Passaic River, and a large part of his paper was devoted to the Passaic River problem. The stream is divided into two parts, so far as pollution is concerned. The portion above Little Falls, which place is not far from Paterson, is little contaminated as yet, but at some points the population is increasing so that it needs to be watched to prevent the upper portion from gradually approaching the lower in character. Below Little Falls the river receives so large an amount of sewage as to render it a nuisance. Above Little Falls an effort should be made to keep the river pure enough so the water may be used for domestic purposes. Below this point the effort should be to prevent pollution giving offence to the eye and nose. This means that all sewage must be either excluded from the river, or purified before going into it, the preferable method at any point depending upon local conditions. As a general proposition, Dr. Marsh considered disposal into tide water the best means of disposal, where feasible. The idea that sewage has a manurial value is exploded, he said. River pollution problems should be delegated by the state to either an existing or a new commission, and not left to the separate municipalities. Rivers like the Passaic should, perhaps, have special guardians, but all streams should be protected from pollution by some centralized power, backed by proper legislation.

The committee on the protection of public water supplies, consisting of Messrs. J. L. Leal, M. D., Health Officer of Paterson; James Owen, M. Am. Soc. C. E., of Montclair, and Henry Mitchell, Secretary of the New Jersey State Board of Health, reported a resolution recommending that the necessary powers to prevent stream pollution be conferred on the State Board of Health, and on local boards.

The principal officers elected for the ensuing year were: Mr. James Owen, M. Am. Soc. C. E., President; Mr. John C. Smock, First Vice-President; Mr. W. G. Hoopes, Atlantic City, Corresponding Secretary; and Mr. Geo. P. Olcutt, Treasurer.

RAILWAYS.

East of Chicago.

BRIDGTON & SACO RIVER.—This company has completed a preliminary survey of the extension from Bridgton to Harrison, Me., and later from Harrison to Norway. Pres., W. F. Perry, Bridgton, Me. A party of capitalists has been over the same route for an electric road.

CHICAGO, BLUFFTON & CINCINNATI.—It is stated that the proposed route for this railway is from Union City, Ind., to a point on the Baltimore & Ohio, near Milford Junction, traversing Blackford, Wells, Jay, Randolph, Huntington, Whitley, and Kosciusko counties. It is practically the same line as the old Cincinnati, Union City & Chicago. Hugh Dougherty and A. L. Sharpe, Bluffton, Ind., and Judge N. W. Bliss and F. W. Short, of Chicago, are said to be interested.

CHESTER COUNTY CENTRAL.—This company has been incorporated to operate a railway between Philadelphia and West Chester, Pa., with branches, in all 23 miles long. The capital stock of the company is $600,000, commencing with $60,000; incorporators: Pres., Wm. S. Kirk, West Chester, Pa.; John S. Dove, Jr.; Archibald R. Denney, Fred W. Rush, Joseph B. Willitts, George H. Fetter, Philadelphia.

DAYTON NORTHERN.—This railway, the incorporation of which was noted in our issue of last week, is projected to extend from Franklin to Lima, O., a distance of 125 to 150 miles; incorporators, James B. Townsend, W. B. Richie, C. N. Haskell, Edward R. Thomas, W. C. Brown and J. R. Megrue; capital stock, $10,000,000.

GRAND TRUNK.—It is reported that this company is considering the building of a branch from Norway to Bridgton, Me. Ch. Engr., Jos. Hobson, Montreal, Que.

HUDSON RIVER & BERKSHIRE.—It is stated that this company proposes to build from the New York state line to Springfield, Mass., via Mount Washington, Egremont, Great Barrington, Monterey, Otis and Sandisfield, in Berkshire county, and Tolland, Granville, Blandford, Russell, Southwick, Westfield and West Springfield, in Hampden county. Ch. Engr., H. F. Keith.

LAKE SHORE & MICHIGAN SOUTHERN. — The Youngstown, O., "Telegram" says that this company has decided to establish a new yard at that place. Ch. Engr., E. A. Handy, Cleveland, O.

LAKE SUPERIOR & ISHPEMING.—A press dispatch from Ishpeming, Mich., says that this company has decided to begin the extension of its line to the Ishpeming mines immediately after the holidays. Over five miles of track, including sidings, will be put in. Pres., Wm. G. Mather, Cleveland, O.

LEHIGH VALLEY.—It is reported that this company will in the spring construct a branch, beginning at Quakake, Pa., and running through the valley to East Mahanoy Junction; thence to Tamaqua, Pa. Ch. Engr., C. E. Webster, South Bethlehem, Pa.

MASSILLON & WOOSTER.—It is reported that a railway from Wooster to Massillon, O., a distance of 40 miles, will probably be built in the spring. It will tap extensive coal fields. W. J. Mullins, Wooster, is said to be interested.

MONONGAHELA CONNECTING.—It is stated that this railway, at McKeesport, Pa., is to be extended. It now connects with the Pennsylvania and extends through the plants of the W. Dewees Wood Co. The extension will not be made until next spring. It will be extended by the National Tube Works. Horace Crosby, Asst. Gen. Mgr. of the tube works, is president of the railway company.

MONTREAL & OTTAWA.—P. A. Peterson, Ch. Engr., Montreal, Que., writes us that this railway is projected through Rigaud, St. Eugene, Vankleek Hill, Caledonia Springs and Alfred. The line has been graded and track laid from Rigaud to Alfred, a distance of 27 miles, during 1896. The portion from Vandreuil to Rigaud, a distance of 17 miles, has been operated for five years. A line is projected and under survey from Alfred to Ottawa, a distance of about 50 miles. Construction has been done by day's work under supervision of the chief engineer. Pres., W. C. Van Horne, Montreal, Que.

ONTARIO & PACIFIC.—A press dispatch from Cornwall, Ont., says that the town council has decided to submit a bylaw to the taxpayers granting $35,000 as a bonus to the Ontario & Pacific Ry. for the construction of its road from Ottawa to Cornwall to connect with the Northern New York Ry. on the American side, the company to build its repair shop in Cornwall and build a freight shed and station in the town limits.

PEMIGEWASSET VALLEY.—The supreme court of New Hampshire has granted the petition of this company for permission to extend its line from Lincoln to a point one mile north of the Flume House. Work on the extension has been commenced, and it is the intention to have it completed and in operation in the early spring.

PENNSYLVANIA.—It is said that this company proposes to build a line from Mount Carmel to Shenandoah, Pa. Ch. Engr., W. H. Brown, Philadelphia, Pa.

PHILADELPHIA, BUSTLETON & TRENTON.—Jos. Crawford, Ch. Engr., Broad St. Station, Philadelphia, writes us that this line will extend from North Penn Junction to Bustleton, Pa., a distance of eight miles. Work will be finished in a few days on the first 3½ miles. Chas. M. Fadden, 122 Arch St., Philadelphia, contractor. Pres., Samuel Rea, Broad St. Station, Philadelphia.

PITTSBURG & LAKE ERIE.—Reports from Pittsburg state that negotiations are pending which may result in the Pittsburg & Lake Erie building a branch from its main line across Neville Island. The estimated cost of the road is $150,000. It would be seven miles long. Two bridges would have to be built. Ch. Engr., J. A. Atwood, Pittsburg, Pa.

PITTSBURG, BESSEMER & LAKE ERIE.—It is announced that Andrew Carnegie's consolidated lines are to be called by his name, indicating the terminals of the road and emphasizing the fact that the system is essentially an ore line. The work on the Butler & Pittsburg is being pushed rapidly, as noted Dec. 10, and it is thought that tracklaying will begin next month. The Carnegie Steel Co. is now filling the first order of 2,500 tons of 100-lb. steel rails. The tracklaying will commence at the Butler end of the road, from which point there is a larger amount of trestling which is nearly completed. The initial tracklaying will consist of a single track from Butler to the first large culvert, and it will be used for hauling the heavy material for viaducts. This tracklaying will be done by workmen of the Pittsburg, Shenango & Lake Erie. As fast as the viaducts are completed it is the intention of the company to continue the tracklaying until the Allegheny river is reached. It is estimated that 1,600 tons of rails will be used in laying the first 10 miles; the remainder of the 2,500-ton order will be used for terminal facilities at Butler.

QUAKERTOWN & EASTERN.—It is said that the stockholders intend to issue bonds for $180,000, with which to finish the new road, now in the course of construction. The line leaves the Reading Ry. at Quakertown, Pa., and connects with the Lehigh & Hudson River Ry. at Easton, Pa.

SOUTH HAVEN & EASTERN.—A report from South Haven, Mich., says that there is rumor to the effect that the management will put in a standard gage in the spring and extend the line to Holland. Pres., R. B. Dodson, New York city.

Southern.

BIG MOUNTAIN.—This company was incorporated Dec. 14 to build a railway from Cedar Grove, W. Va., up Kelley Creek and the Kanawha River to a connection with the Chesapeake & Ohio. Incorporators: G. S. Couch, C. B. Couch, L. W. Couch, R. T. Carmichael, S. L. Flourinoy, all of Charleston, W. Va.

BOWLING GREEN NORTHERN.—M. H. Crump, Lynden, Ky., is quoted as saying that the Illinois Central may become interested in this scheme to build a railway from Litchfield, Ky., to Bowling Green and Nashville, Tenn., a distance of 100 miles. Surveys have been completed from Bowling Green to a connection with the Illinois Central, and most of the right of way secured.

DURHAM & CHARLOTTE.—It is stated that work has been resumed on the five-mile extension to Charlotte. About 50 men are at work. Ch. Engr., J. T. Tull, Glendon, N. C.

FLORIDA WESTERN.—Reports state that the work of building from Apalachicola to Carrabelle, Fla., is being pushed as rapidly as possible. Three miles of the road have been graded. Contracts will soon be let for rails, also for bridging Crooked River, and building five miles of trestling across Apalachicola Bay. Two drawbridges will be required in the latter. Hopkins & Damond are the contractors. Pres., R. S. Burnett, Tallahassee, Fla.

KENTUCKY NORTHERN.—This company, it is reported, expects to construct a 28-mile extension during the coming year. The road is completed to a point 7¼ miles from its terminus. Ch. Engr., A. J. Thurber, Rodbourn, Ky.

MOBILE, JACKSON & KANSAS CITY.—Frank B. Merrill, Pres., Mobile, Ala., writes us that the projected length is 186 miles from Mobile via Hattiesburg, Miss., to Jackson. Entire line surveyed and right of way and terminals purchased; syndicate organized to take securities; contracts for entire line let to Gulf City Construction Co., Mobile, as noted in our issue of Dec. 10; work on grading began Dec. 1 and five miles of rail will be laid by Jan. 1; about 20 miles now under grading and right of way cleared 50 miles. Ch. Engr., J. H. Collins, Mobile, Ala.

NEW ROADS.—Melton Bros., E. C. Beardsley, and J. M. Guffey, Pittsburg, Pa., and White, Drake & Stratton, the projectors of the Cheat River R. R., which it is proposed to build from Point Marion, in Fayette county, W. Va., to a point in Preston county, W. Va., who recently closed a deal for the purchase of 50,000 acres of coal land in Preston county, W. Va., will, it is stated, build a railway into and through their tract, connecting probably with the Cheat River Ry., at an early date.

NORFOLK & SOUTHERN.—A press dispatch from Raleigh, N. C., says that this railway will soon be extended. At present it extends from Norfolk to Elizabeth City, N. C., 113 miles, and the proposed extension will be from Elizabeth City and Edenton south, possibly to Newbern, Wilmington and Washington, N. C. Pres., W. B. Dickerman, New York, N. Y.

NORTH CAROLINA LUMBER.—A press report from Weldon, N. C., states that J. F. Wrenn, of Richmond, Va., has secured the contract to build seven miles of standard gage railway for the North Carolina Lumber Co. at Tillery. Work will begin at once with a large force of hands.

TUSCOMBIA.—It is reported that T. A. Clark, Tuscombia, Ala., wants contractors to build a short railway.

WINDSOR & SKOSKIE.—The Browning Mfg., R. R. & Lumber Co., it is stated, will build a railway from Windsor to Skoskie, N. C., 15 miles, where connection will be made with the Atlantic Coast Line.

WEST VIRGINIA & PITTSBURG.—It is reported that work on an extension from Pickens to Addison, W. Va., 12 miles, will be commenced within two weeks. Webster county subscribed $15,000 to the road, provided operations were under way by Jan. 30. Pres., J. N. Camden, Parkersburg, W. Va.

Northwest.

CHICAGO, MONTELLO & NORTHWESTERN.—This company is said to have made a proposition to build a line from Princeton to Montello, Wis., and it is expected that it will be constructed in the spring.

CHICAGO & NORTHWESTERN.—The second track between Baraboo and Madison, Wis., 37 miles, has been completed by Winston Bros., contractors, Minneapolis. The work was begun about a year ago and has cost over $1,000,000.

DULUTH & SOUTHWESTERN.—A press dispatch from Duluth, Minn., says that this company has decided to ask St. Louis county for $250,000 to aid in extending the line from Red Wing to Duluth, and that the chamber of commerce of Duluth has considered the proposition favorably. The Duluth & Southwestern is planned to run from Duluth southwest to the Iowa line, connecting with the Duluth, Red Wing & Southern, and using that road's tracks for part of its line. Associated with the Duluth parties who are in the deal is ex-Governor Hubbard, of Red Wing. Engr., W. Danforth, Red Wing, Minn.

GREAT NORTHERN.—A press report from Grand Rapids, Minn., says that a preliminary survey is being made from Deer River to Hibbing Mines. Ch. Engr., J. F. Stevens, St. Paul, Minn.

EMERALD & SPRING VALLEY.—A report states that D. M. Sabin and E. D. Buffington, of Stillwater, Minn., are incorporators of a railway to be built from Emerald, St. Croix county, to Spring Valley, Pierce county, Wis., about 26 miles. The capital stock is $55,000.

LAKE MANITOBA RAILWAY & CANAL.—This company has completed its railway for 100 miles in a northerly direction, fully equipped; it was to have commenced operating about Dec. 15. The company has secured running powers for 50 years from the Manitoba & Northwestern Ry. between Portage la Prairie and Gladstone, Gladstone being the point of junction. It will therefore operate from Portage la Prairie to the end of the Dauphin Road, a distance of 136 miles. The contractors were Messrs. Mackenzie, Mann & Co., Gladstone, Manitoba; Ch. Engr., T. H. White, Gladstone, Manitoba; Pres., F. Nichols, Toronto, Ont.

QUINCY, OMAHA & KANSAS CITY.—It is stated that the contract for the construction of a railway between Trenton and Pattonsburg, Mo., 34 miles, which means the connection between the Quincy, Omaha & Kansas City Ry. and the Omaha & St. Louis, has been let to M. S. Cartter & Co., St. Louis. The preliminary survey of the road was made last spring. It is asserted that the work has begun, and will be completed within the next 60 days. Ch. Engr., C. M. Collins, Quincy, Ill. Theo. Gilman, 62 Cedar St., New York city, is president of the Quincy, Omaha & Kansas City Ry. Co.

SUBURBAN.—A press dispatch from Chicago says that a mortgage for $3,000,000 has been given on all its property, real and personal, by the Suburban R. R. Co., to the Chicago Title & Trust Co., in insure an issue of that amount of bonds to be dated Mar. 2, 1893, and to run for 20 years. The instrument provides for an immediate issue of $1,250,000 worth of bonds for construction of lines already begun or projected, while the remaining $1,750,000 will be used for the extension of the company's lines and feeders. It is the intention of the suburban company, after the lines now under construction have been completed, to extend the road as far as Western Springs and Hinsdale.

Southwest.

ATCHISON, TOPEKA & SANTA FE.—A press dispatch from Stillwater, Okla., says that the people of this city have secured the right of way and raised the $30,000 cash bonus asked by the company to build a branch line from Arnettville, six miles north of Perry, to this place. The work will begin on construction before Jan. 1, and trains be running by spring. Ch. Engr., J. Dun, Topeka, Kan.

GULF & BRAZOS VALLEY.—A press dispatch from Fredericksburg, Tex., says that this company may run a line immediately from the Texas & Pacific R. R. to Granby, Hamilton, Lampasas, Llano, Fredericksburg and Comfort on the Aransas Pass R. R.

GULF & SHIP ISLAND.—A branch of about four miles from Gulfport, on the coast, to Handsboro, Miss., has been finished. Herman Clark and John R. Westbrook, contractors, of New York city, are said to be considering contracts on the proposed extension of the road north to Pontotoc, Miss. Pres., J. T. Jones, Bradford, Pa.

KANSAS CITY, PITTSBURG & GULF.—It is reported that this company will build 16 miles of line between Dearborn & Smithville, Mo., and that the Winner bridge across the Missouri River is to be completed for railway purposes. Ch. Engr., R. Gillham, Kansas City, Mo.

ST. JOSEPH & GRAND ISLAND.—It is rumored that the St. Joseph & Grand Island Ry. will extend its line to Kansas City, Mo., and that the plan is to buy the Kansas City & Atlantic R. R., which extends from Kansas City to Smithville, and then extend the line to a connection with the St. Joseph & Grand Island in St. Joseph, Mo. Pres., S. H. H. Clark, Omaha, Neb.

Rocky Mountain and Pacific.

BEAR LAKE.—A press report says that this company has been granted a franchise in Idaho for railway tracks between Georgetown and Montpelier, and from the latter place through Paris, Bloomington and other places to the south line of Bear Lake county, on the west side of Bear Lake. The road is intended to continue into Rich county, Utah.

CUYAMACA.—The San Diego, Cal., "Sun" says that farmers living along the route propose to grade the roadbed of an extension of this railway from a point about midway between Santee and Lakeside, up through Sycamore canyon to Ramona, a distance of 17 miles. This route was discovered to be very feasible, being of easy grade, the heaviest only 2½%. It is expected to have the work completed by Sept., 1897. C. P. Fisher and Chester Gunn are interested.

COLORADO SPRINGS, PIKE'S PEAK & CRIPPLE CREEK.—This railway is projected from Colorado Springs, Colo., in a westerly direction up Bear Creek 3½ miles into Crystal Park, reaching the park in 13 miles, then passing Gog and Magog, one of the scenic points on the Cog road, and past the Seven Lakes, reaching this resort in 21 miles from Colorado Springs; through Gillett, Big Trachyte Mountain and thence into Cripple Creek This route places Gillett 35 miles from Colorado Springs and Cripple Creek 40 miles. It will be a scenic route, traversing beautiful scenery. The preliminary survey is completed as far as Crystal Park. Work is expected to begin about Jan. 1, and the line will be completed about Oct. 1. The company is having no difficulty in placing bonds. The grade will not exceed 4%. Ch. Engr., Eugene L. Robinson, Gillett, Colo.

GOLDEN CIRCLE.—Colorado papers announce that this road is to be extended immediately from Victor, Colo., through the Cripple Creek mining region, about 10 miles. This will give the line and its controlling company, the Florence & Cripple Creek, a connection with practically every important mine in the Cripple Creek District. Engr., R. D. Stewart, Florence, Colo.

MEXICO.—A San Diego, Cal., dispatch says that the government has annulled the concession given to Albert R. Owen and the Topolobampo Colony, in Sinaloa, which was granted six years ago. The concession gave about 1,000,000 acres on Rio Fuerte to Owen and his colony for a nominal sum, with the proviso that they build a railway and certain irrigating canals. Only a small remnant of the original colonists are now at Topolobampo, and they are too poor to move away.

REDDING & EUREKA.—The statement is made that the Iron Mountain Mining Co., an English organization, with local headquarters at Redding, Cal., has undertaken the work of building a railway between these towns in California.

SALMON CREEK R. R. EXTENSION.—This company was incorporated Dec. 3 to build a railway from Salmon Creek, Mendocino county, Cal., to a point seven miles north. The capital stock is $100,000, commencing with $10,000. Incorporators: W. H. White, Elk; J. H. Tate, San Francisco; James Townsend, N. W. Hall and J. M. Robinson, Oakland, Cal.

SILVER CITY & NORTHERN.—The Silver City, N. Mex., "Enterprise" says it is rumored that the Silver City & Northern R. R., together with the iron mines, owned and operated by the same company, and about 36,000 acres of patented coal lands, at the north end of the San Augustine plains, have been sold to a syndicate which represents the Atchison, Topeka & Santa Fe R. R. interests. The purchase price is said to be $1,000,000. It is said to be the intention to reconstruct the road. Pres., Silver City & Northern, C. L. Perkins, 66 Beaver St., New York city.

SALT LAKE & OGDEN.—This company has been incorporated as a reorganization of the Great Salt Lake & Hot Springs Ry., which was recently sold under foreclosure. The road, it is said, will be extended to Ogden, Colo., and operated by steam until the plant of the Pioneer Electric Power Co. is completed, when it will be equipped with electricity. Pres., C. K. Bannister; Vice-Pres. and Gen. Mgr., Simon Bamberger; Treas., E. W. Duncan.

Foreign.

NORWAY.—Plans for railway terminals at Christiana, Norway, are invited, and prizes of $2,500, $1,000, $500 and 250 are offered by the government for the best plans, all plans to be submitted by March 31, 1897. Address Railway Office, Dept. Pub. Wks., 6 Victoria Terrace, Christiana, Norway.

STREET AND ELECTRIC RAILWAYS.

ALBANY, ME.—An electric railway is projected connecting Norway with Stoneham, Waterford, Albany, and Harrison, 28 miles long. It will be principally a freight route, but will also have cars for passengers, mail and express.

BANGOR, ME.—The Penobscot Electric Ry. Co. has been formed to build from Bangor, up the Kenduskeag valley to the towns of that section, which now depend upon stages for communication. The road will pass through the towns of Glenburn, Kenduskeag, Levant, Corinth, Exeter, Charlestown and Garland. The capital stock is $250,000. E. O. Beal, of Bangor; I. C. Libby, of Waterville; A. F. Gerald, of Fairfield; Harrison F. Gould, of Kenduskeag; and C. E. Edmunds, of Corinth, are interested.

ATTLEBORO, MASS.—The Consolidated Ry. Corporation it is reported will adopt electricity on its lines. Vice-Pres., J. R. Kendrick.

MANSFIELD, MASS.—Articles of association for the Foxboro Union St. Ry., to connect the villages of Foxboro and Mansfield have been signed by subscribers to about $25,000 of stock; the capital stock is to be $60,000.

NORTHAMPTON, MASS.—W. D. Winter, Springfield, Mass., writes us that the Northampton St. Ry. Co. has applied for two miles of right of way. No capital has as yet been secured; it is expected, however, to let contracts in the spring. Pres., J. Olmsted, Springfield.

WAREHAM, MASS.—It is reported that a company has been organized and the route surveyed for an electric railway connecting the extremity of Cape Cod with Chatham, Harwich, Dennisport, Hyannis, Yarmouth and Falmouth. Then the contemplated line runs north to Buzzard's Bay, connecting with the trolley road to New Bedford, via Mattapoisett and Marion.

BERLIN, CONN.—It is said that contracts have been signed for the construction of an elecertic power station at Berlin. The new plant will, from a central point, operate the Berlin and Middletown branches and the New England tracks from New Britain to Hartford, of the New York, New Haven & Hartford Ry. It will also operate the electric system in Meriden and light all the railway stations, including the one at Hartford.

HARTFORD, CONN.—The Hartford St. Ry. Co. will apply soon for privilege to extend its lines.

MERIDEN, CONN.—Gilbert E. Norton, Charles F. Hamlin, Wheaton S. Plumb, Augustus M. Lewis and others will apply to the next legislature for a charter for a trolley line from Meriden to Southington and Plainville.

WINSTED, CONN.—A. B. Hill, Engr., Benedict Bldg., New Haven, writes us that several prominent citizens in Torrington and Winsted have petitioned the legislature for a charter for an electric railway in the principal streets of the two boroughs and for connecting them. They are about ten miles apart and the total length asked for is about 20 miles. The company is not organized yet. O. R. Fyler, of Torrington, is the chief promoter.

WATERTOWN, CONN.—A line of electric railway is projected from Watertown, the terminus of the Watertown branch of the New York, New Haven & Hartford R. R., to Bantam Lake and Litchfield, a distance of about 12 miles. A line is also proposed from Litchfield, through Goshen to Norfolk, a distance of about 16 miles. Surveys, it is said, are being made by T. H McKenzie, Hartford. Ex-Senator O. N. Pierce is interested.

WESTVILLE, CONN.—Surveys are said to have been made for a trolley road from Westville to Naugatuck, running via Woodbridge and Seymour, a distance of 15 miles. The cost of the proposed line is estimated at $200,000. The enterprise is backed by Morris F. Tyler, Dr. Thomas H. Russell, Dwight N. Clark, Robert Payne, Stiles Williams, Charles F. Walker, Rollin C. Newton and Nathan P. Merwin.

ELMIRA, N. Y.—C. H. Baldwin, Gen. Mgr., writes us that the projected length of the Elmira & Seneca Lake Ry. is 16 miles from Elmira, via Horsehead, Millport and Havana, to Watkins. The surveys are completed and right of way secured; capital not fully secured; contracts will probably be let in the spring. Pres., John E. Mulford, Havana, N. Y.

GREENWICH, N. Y.—The state railroad commission has granted the application of the Greenwich & Schuylerville Electric R. R. Co. for permission to construct its road.

GARDINER, N. Y.—It is said that Charles E. Johnston, 43 John St., Kingston, N. Y., is looking over the ground between Pancake Hollow and Jenkintown with a view of building a trolley line. The road will run through Gahow, Tuttletown, Ireland Corners, connecting the above places. He expects to form a stock company and would have contractors correspond with him.

BRISTOL, PA.—The town council has granted the Langhorne Trolley Co. the right to build a trolley belt line about the town.

CHESTER, PA.—John B. Robinson, House of Representatives, Washington, D. C., writes us that the projected length of the Media, Middletown, Aston & Chester Electric Ry. is 16 miles, connecting the towns named. About $6,000 has been subscribed to secure franchises and right of way. John E. Burnby and S. L. Kent have been appointed a committee to finance the road. Ch. Engr., Geo. D. Howell, Chester, Pa.

PHILADELPHIA, PA.—An ordinance has been passed granting the Holmesburg, Tacony & Frankford Electric Ry. Co. the right to equip its lines with electricity.

WASHINGTON, D. C.—Work on the division of the Columbia & Maryland Ry., from Washington to the District of Columbia line, has been resumed. The contract for the completion of the division has been awarded to Maurice Tolty, of Washington. The work is commenced under an order of the court of the District of Columbia authorizing the issuing of $75,000 in receivers' certificates. The section of track to be finished includes about six miles and, by the charter, must be ready for operation by March 2 next.——It is reported that the construction of a recently surveyed electric railway from Washington to Gettysburg, by way of Frederick, Md., will be begun next spring, or probably this winter, if the weather will permit. The company is working under a charter known as the Baltimore & Washington Transit Co., and under this it has the right to construct and operate throughout the State of Maryland. Its capital stock is $1,000,000, commencing with $110,000. The route, as surveyed from Washington, is via Tacoma Park, Sandy Springs, Olney, Laytonsville, Frederick City, Hansonville, across the ridge to Thurmont, Emmittsburg, and State Line to Gettysburg. Gen. Mgr., Frank C. Draue, Tacoma Park, D. C.

BALTIMORE, MD.—An ordinance has been introduced in the city council to authorize the City & Suburban Ry. Co. to agree with the City Passenger Ry. Co. for the joint use of the latter's tracks on Broadway, between Eastern Ave. and Thames St., or to lay rails inside and outside the City Passenger tracks in case of failure to come to an agreement. The line is to be an electric one and authority is given for the erection of poles and stringing of wires.

GEORGETOWN, MD,—It is rumored that the Georgetown & Tenallytown Electric Ry. will be extended to Rockville in the spring.

CHATTANOOGA, TENN.—The power house and station of the Lookout Mountain & Lulu Lake Incline Ry. Co., located on the eastern brow of Lookout Mountain, was completely destroyed by fire Dec. 12. The loss will reach $25,000; insurance, $15,000. The cable holding the upper car snapped in the midst of the excitement and the car, a mass of flames, bounded down the steep incline. The road is operated by electricity, and was completed last April at an outlay of $100,000. This incline is a straight track over a mile in length, and near the summit a climb is made at an angle of 68°.

ASHLEY, O.—A. S. Shoemaker is said to be interested in projecting an electric railway to connect Mount Vernon, Ashley, Prospect and Richwood. Subscriptions are being taken to defray the expenses of a survey.

EAST LIVERPOOL, O.—It is stated that preliminary lines have been run for a street railway from East Liverpool to Smith's Ferry, Pa., five miles east. Agents are at work securing the right of way, and negotiations have begun for the purchase by the syndicate of Columbiana Park, a pleasure resort.

LOCKLAND, O.—The Main Street Electric Ry. of Cincinnati will, it is said, be extended to this place. The cost of the extension will be about $10,000.

MARIETTA, O.—The Marietta St. Ry. Co., it is said, will build five miles of additional track to be operated by electricity.

PIQUA, O.—Work on the Piqua, Sidney & St. Mary's Electric R. R. is being pushed. The second assessment is being paid, and a complete survey of the line is being made.

MASON CITY, IA.—L. H. Ong, Ch. Engr., writes us that the projected length of the Mason City Clear Lake Traction Co.'s lines is 16½ miles to connect Mason City and Clear Lake. Survey made and right of way secured; 55% of the capital advanced by the promoter; will cost, when completed, $210,000; grading and pole setting is being rapidly pushed; it is expected that cars will be running by June 1, 1897. Equipment will be bought within a few days. Pres., W. E. Brice.

KANSAS CITY, MO.—The Northeast Electric Ry. Co. has filed a certificate of incorporation.

NEW ORLEANS, LA.—Robert R. Zell and others are said to be considering the construction of an electric line in Jefferson parish. It is to extend to Lake Pontchartrain.

SONORA, CAL.—J. Q. App and others have been granted the privilege to erect and maintain an electric system along public roads in this county.

SACRAMENTO, CAL.—The Sacramento Electric Gas & Ry. Co. has been incorporated with J. W. Hall, L. T. Hatfield, Albert Gallatin, Jr., L. P. Drexler and Charles R. Lloyd as directors.

ELECTRIC LIGHT AND POWER.

CONCORD, N. H.—The council voted Dec. 8 to appropriate $1,000 for the purchase of a storage battery plant for the fire department. W. B. Howe, Cy. Engr.

PROVIDENCE, R. I.—Bids are asked until Dec. 28 for the electric wiring of two school buildings. Lewis & Claftin, Elec. Engrs., 146 Westminster St., Providence; B. E. Perkins, Chn. Com., City Hall.

CAMBRIDGE, MASS.—The aldermen have voted to appropriate $3,000 for an electric light plant for the city hall. Aldermen Bleiler, Rourke, Saunders, Geogins and Chaplin can be addressed.

MARION, MASS.—It is stated that Benj. Waters, of Brockton, Mass., will build an electric light plant in this city to be completed by May 1.

SANDWICH, MASS.—The construction of an electric light plant is proposed for this place by E. C. Bourne, according to reports.

TAUNTON, MASS.—The city has voted in favor of constructing a municipal electric light plant. J. W. Fish, Mayor.

ANGELICA, N. Y.—The construction of a city electric light plant is being discussed, according to reports.

MASSENA, N. Y.—Press reports state that work will probably soon be begun on a proposed power plant between the St. Lawrence and the Grass Rivers in this town. The St. Lawrence is to be tapped two miles below the southern end of Long Sault Island, and the canal will run over a comparatively level plateau till it reaches a drop of about 40 ft. at Massena, on the Grass River. Here the turbines will be put in, and an electric plant will be erected. The canal will be about four miles long, 300 ft. wide and 25 ft. deep, if it is decided to obtain only 100,000 HP. John Bogert, Consult. Engr., 50 Wall St., N. Y., is said to estimate the cost of such a waterway at $1,000,000. Stewart & Co., 40 Wall St., New York, have bought about 1,800 acres of land through which the canal will run, and will manage the enterprise. Lieut. James Patton is designing the electrical plant.

MOHAWK, N. Y.—The court has granted a temporary injunction restraining Albert M. Day and other members of the water and light commission from constructing the proposed electric light plant, according to reports.

MORRISVILLE, N. Y.—It is stated that work will be begun at once on the reconstruction of the electric light plant, destroyed by fire in October. M. E. Pulver, of the Westinghouse Electric & Mfg. Co., Bastable Bldg., Syracuse, N. Y., is said to be the owner. He has secured a lighting franchise for this place.

TROY, N. Y.—It is reported that the Troy Electric Light Co. is making arrangements for the immediate extension of its plant. John F. Cahill, Gen. Supt.

ATLANTIC CITY, N. J.—The Atlantic Electric Light & Power Co. has been granted a franchise for constructing conduits, pipes, etc., for supplying the city with light, power and heat; bond, $25,000. The work is to be completed in a year. F. P. Stoy, Mayor; J. D. Southwick, Pres. Council.

CAMDEN, N. J.—Phillips Anns, of Woodbury, N. J., has been awarded the contract for erecting a boiler and engine house for the Camden Lighting & Heating Co., to cost $30,000. Arch., H. D. Dagit, 706 Walnut St., Philadelphia.

BOILING SPRINGS, PA.—The Carlisle Electric Light, Heat & Power Co., Boiling Springs, will commence work on the erection of a plant about Jan. 1, and expect to have it in operation by April 1. This company was recently granted a charter. Treas., M. P. Quinn, Pottsville, Pa.

PITTSBURG, PA.—The following bids were received Dec. 9, by J. O. Brown, Dir. Pub. Safety, for constructing an electric light plant for the public safety building: Fisher Foundry & Machine Co., to supply the Westinghouse system, $14,950; Western Electric company system, $14,500; Triumph Electric company system, $13,500. Westinghouse Electric Co., Pittsburg, for its own entire system, $13,173. Westinghouse, Church, Kerr & Co., 26 Cortlandt St., New York (awarded contract), for their own system, $12,845.

CUMBERLAND, MD.—The council is considering the question of submitting the question of issuing $20,000 of 4% bonds, for an electric light plant, to the voters at the election in May.

CAPE CHARLES, VA.—It is stated that the construction of an electric light plant for this place is proposed.

LENOIR, N. C.—The construction of an electric light plant, water-works, etc., for this place is being considered by the board of trade, according to reports. S. T. Pender, Secy.

WASHINGTON, N. C.—This town will probably soon put in an electric light plant. Stephen C. Bragaw, Chn. Water-Works and Electric Light Com.

WELDON, N. C.—The construction of a power plant on the canal of the Roanoke Navigation & Water Power Co. is proposed, according to reports.

BAINBRIDGE, GA.—The construction of an electric light plant by a company is proposed, according to reports.

ORLANDO, FLA.—Mr. Hugbert, of Zellwood, Fla., is said to be making arrangements for the construction of an electric light plant for this city.

THIBODAUX, LA.—We are informed that this city is projecting a system of electric lights, but nothing has been done as yet. Address R. J. Naquin, Thibodaux.

GREENUP, KY.—An electric light franchise is reported to have been granted to Wilson Bros. of this place.

EAST PALESTINE, O.—The council is reported to have rejected all the bids received recently for constructing an electric light plant and has decided to ask for new ones.

MARTIN'S FERRY, O.—The council is reported to have decided, Dec. 5, to advertise for bids for operating the electric light plant.

XENIA, O.—An electric light company has been organized to build an electric light plant. John P. Martin, Pres., Xenia.

ANDERSON, IND.—The county commissioners are considering the cost of an electric light plant for the jail and courthouse, according to reports.

NORTH LIBERTY, IND.—A citizens' committee has been appointed to secure estimates for an electric plant of 10 arc and 200 incandescent lights.

BELLEVILLE, ILL.—Adam Gintz, of Belleville, is reported as proposing to build an electric light plant here.

SAGINAW, MICH.—Bids are asked until Dec. 31 for lighting the streets and parks with electricity for three and five years from Sept. 30, 1897. The plant will need 13 towers of four lights each, and 146 pole and mast-arm lights. Arthur F. Lewis, Controller.

CHICAGO, ILL.—The village trustees of Cicero have rejected bids recently received for lighting Oak Park and Ridgeland with incandescent lights, and have asked for new bids on arc lighting.

CORRECTIONVILLE, IA.—An election was held Dec. 14 to vote on the question of constructing an electric light plant and water-works.

ROCK RAPIDS, IA.—We are informed that bids will soon be asked for constructing an electric light plant in this city. J. K. Medberry, Recorder.

MINNEAPOLIS, MINN.—The Stilwell-Bierce & Smith-Vaile Co., Dayton, O., is reported to have been awarded the contract for 14 pairs of horizontal waterwheels for the new power plant of the St. Anthony Falls Water Power Co., at about $40,000. It is hoped to complete the dam by July 1. Engr., Wm. de la Barre, Minneapolis.

GRAND FORKS, N. DAK.—The question of granting a franchise for lighting the streets is under discussion.

EMPIRE, COLO.—The construction of an electric light plant for this place is being considered. Frank L. Peck, Mayor.

MANITOU, COLO.—F. L. M. Smith, owner of the Hiawatha Club House, has decided to put in a complete electric light plant, with a capacity for 300 incandescent and five arc lights, to cost about $7,000.

OPHIR, COLO.—Press reports state that an electric light plant is to be established here. Surveys have already been made. Power will be brought from the Nunn power plant at Ames, which supplies the power for the surrounding country and the Telluride district. It is the intention also to supply power for the Carribeau, Suffolk, Globe, and Ilium mills in case it is desired.

GUTHRIE, OKLA.—We are informed regarding the reported electric lighting of this city that as other arrangements have been made the city will not erect any plant at present. Geo. M. De Graff, Cy. Clk.

SKAMOKAWA, WASH.—An electric light plant for the sawmills, etc., is proposed, according to reports. W. W. Bollen. Elec. Engr., Portland, Ore.

OAKLAND, ORE.—The Roseberg Electric Light Co., Roseberg, Ore., is said to be making estimates for lighting this town with electricity.

MARTINEZ, CAL.—Orders are being secured by Max Kuhn, of San Francisco, and D. W. Weisenberg & Co., for a proposed electric light plant.

GALLUP, N. MEX.—Fred Ramsay, of Waltonburg, Colo., is said to contemplate putting in a complete system of electric lights for the city.

RENO, NEV.—E. R. Dodge, Dr. W. A. Phillips and Geo. Lacombe have been appointed a committee to secure data relative to electric lighting in this city.

QUEBEC, QUE.—Bids are asked until Dec. 30 for constructing an electric plant of 320 arc lights and for lighting this city from Aug. 1, according to reports. W. D. Baillarge, Asst. Cy. Inspector.

CHATHAM, ONT.—It is reported that the council will soon want bids for the construction of an electric light plant.

NEW COMPANIES.—Battery Power & Light Co., New York, N. Y.; $3,000,000, with $1,000 paid in; incorporated in West Virginia, Dec. 8; T. L. McConchie, Passaic, N. J.; J. H. Root, 150 Nassau St.; M. W. Conkling, 174 East 62d St.; G. I. Dean, 150 Nassau St.; and N. H. Millard, 401 Broadway, all of New York city.

St. Louis Electric Construction Co., St. Louis, Mo.; $600,000; Pres., Ellis Wainwright; First Vice-Pres., Charles H. Turner; Second Vice-Pres., Henry Nicolaus; and Wm. F. Nolker, Wm. T. Haarstick and others.

Cucamonga Land & Town Co., Cucamonga, San Bernardino county, Cal.; $50,000, with $22,700 paid in; to construct electric light and power plant, reservoirs, etc.; Thos. Feron, Wm. J. Mayer, Cucamonga; Fred W. Anntiage, Ontario, Cal.

George Washington Lighting Co., Jersey City, N. J.; $2,000,000; the company will manufacture gas and handle petroleum, electricity, and other illuminating materials; James C. Maguire, of Brooklyn, N. Y.; Maurice J. Power, 218 East 25th St., New York; Charles U. King, of Jersey City.

Watsonville Water & Light Co., Watsonville, Cal.; $500,000, with $2,500 paid in; Francis Smith, Santa Clara, Cal.; W. W. Montague, San Francisco; F. W. G. Moebus, Alameda, Cal.; F. W. Lougee, Daniel Wilson, San Francisco, Cal.

BRIDGES.

SOMERVILLE, MASS.—The construction of an iron bridge over the railway tracks at Kent St. is being considered by the council. E. W. Bailey, Cy. Engr.

BRIDGEPORT, CONN.—The New York, New Haven & Hartford R. R. Co. has been granted permission by the war department to construct a new drawbridge over the harbor about 300 ft. south of the present bridge. F. S. Curtis, Ch. Engr., New Haven.

NEW HAVEN, CONN.—Local papers state the finance board has decided to recommend the issuance of $335,000 in bonds for the following bridge work: Chapel St., railway crossing, bridge and approaches, $45,000; Mill River, drawbridge and approaches, Chapel St., $150,000; Derby Ave., city's half, $10,000; Edgewood Ave., city's half, $8,000; Orange St., $30,000; Tomlinson's bridge, west span and retaining wall of approach, $30,000; Barnesville, west span, $11,000 to $23,000; Washington St., city's half, $9,000, and Kimberly Ave., city's half, $30,000. Mayor Hendrick and Alderman Forsyth can be addressed.

BUFFALO, N. Y.—The last contract, that with the W. N. Y. & P. R. R. has been secured by the Grade Crossings Commissioners. Our correspondent writes that all is now ready for the $2,500,000 of work. Geo. E. Mann, Ch. Engr.

LYONS, N. Y.—The Wayne county supervisors are considering a resolution introduced by Mr. Ford, of Galen, authorizing the issuance of $6,000 in bonds for repairing the bridge over the Clyde River.

NEW YORK, N. Y.—Local papers state as follows: A change from a masonry approach to a dirt causeway for the new bridge across Spuyten Duyvil Creek is under consideration by the board of estimate. The law providing $100,000 for the construction of the bridge to connect the Kingsbridge Road with Broadway requires that the structure be built of steel, iron or masonry, and that the approach shall be of masonry. Chief Engineer McLean, of the Controller's office, has reported that a dirt causeway, with a retaining wall of masonry and a steel span, will meet the necessities of the case, and Corporation Counsel Scott has now been asked by the board of estimate to give an opinion as to whether the law will be complied with if such an approach is constructed.

NIAGARA FALLS, N Y.—Our correspondent states that a new bridge will be built over Gill Creek by the Erie R. R. Co. J. Healy, Supervisor, Buffalo.

ANNANDALE, N. J.—It is proposed by the Central R. R. of N. J. to lower the highway near this place, which now crosses its tracks and also to construct a steel bridge to cost $7,000. J. H. Thompson, Engr. of Construction, Jersey City.

MANASQUAN, N. J.—Press reports state as follows: The new iron and steel drawbridge over the Manasquan River will be 1,910 ft. in length, and will include a draw span of 135 ft. over all, with a 50-ft. opening. The bridge will have a roadway 20 ft. wide and a sidewalk 5 ft. in width on one side. The cost of the bridge will be equally divided between Monmouth and Ocean counties.

OXFORD, PA.—It is said that the trestle bridge over Big Elk Valley, between Elk View and Lincoln will be replaced by an iron structure.

AUGUSTA, GA.—The Charleston & Western Carolina Ry. Co. is reported as about to build a steel bridge over the Savannah River, about 17 miles above this city; estimated cost, about $70,000. H. Wilkins, Ch. Engr., Augusta.

WASHINGTON, D. C.—The district commissioners have petitioned Congress to construct a bridge over the Eastern Branch of the Potomac River.

SPRINGFIELD, O.—It is proposed by the park board to construct a $9,000 concrete bridge over the creek at Snyder Park, according to reports.

YOUNGSTOWN, O.—The county board has decided to build the first of the three proposed county bridges at Spring Common, Youngstown. The committee will soon advertise for objections and in 30 days will ask for bids for its construction. John M. Davis, James S. Price and C. T. Agnew compose the committee.

CHICAGO, ILL.—Local papers state that a steel and stone bridge at Jackson and Lincoln Parks, is proposed in connection with the new south shore drive, which is estimated to cost about $20,000. Pres., James W. Ellsworth.

GOLCONDA, ILL.—Bids are asked by the county commissioners until Jan. 7 for building seven steel highway bridges for Pope county; 20,000 cu. yds. of embankment and 2,000 cu. yds. of masonry for the same, as stated in our advertising columns. O. R. Rauchfuss, County Bridge Engr.

RUSHVILLE, ILL.—Press reports state that the county bridge committee has asked for bids for constructing two iron and steel bridges in Schuyler county. R. T. Briggle can be addressed.

URBANA, ILL.—Bids are asked by the county commissioners until Dec. 22 for constructing the following highway bridges complete on masonry abutments: One 160-ft., two 70-ft., one 48 ft., and one 32 ft. Bids may be addressed to the county clerk, Urbana, and further information may be obtained of Prof. Ira O. Baker, Champaign, Ill.

DULUTH, MINN.—Bids are asked until Dec. 21 for constructing a 150-ft. and a 120-ft. bridge besides approaches, on the Swan Lake Road. O. Halden, County Audr.

HEBRON, WIS.—It is stated that Hebron and Cold Spring have voted to build an iron bridge across Bark River at Prince's Point, and will receive bids for the same at the Hebron town hall.

GLENWOOD SPRINGS, COLO.—County Surveyor Rosenberg has submitted plans and estimates for a steel bridge at New Castle. The river span will be 235 ft. long and the two end spans of 80 and 38 ft. respectively; estimated cost, $7,500. The county commissioners will probably soon ask for bids for the work.

PORTLAND, ORE.—Wolff & Zewicker, of Portland, have been awarded the contract for the iron work for repaving and improving the drawbridge at Madison St. Wakefield & Co. have the contract for the wood work.

BUILDINGS

BOSTON, MASS.—Bids are asked until Dec. 22 for a heating and ventilating plant for the school building at South and Hewitt Sts.; bond, $3,000. Archs., Walker & Kimball, 29 Devonshire St., Boston; E. H. Dunn, Chn. Com.

HOLYOKE, MASS.—The aldermen have voted to ask for bids for erecting a new high school building. Arch., Gay Doran.

MALDEN, MASS.—The aldermen are considering the question of appropriating $45,000 to purchase a site on Pine St. for a new 12-room brick school building. Aldermen Warren, Robinson and Savage can be addressed.

CRANSTON, R. I.—The council is considering the question of appropriating $30,000 for two school buildings.

PROVIDENCE, R. I.—Bids are asked until Dec. 28 for gas piping, heating and ventilating the east side high school building. Archs., Martin & Hall, 502 Industrial Trust Bldg.; R. E. Perkins, Chn. Com.——The Wm. H. Low Estate Co. is to erect a 6-story store building on Westminster St. It is stated that work will not be begun until March.

HARTFORD, CONN.—The Brown school district has voted to appropriate $25,000 for erecting an extension to the Brown school building. Frank C. Sumner, A. L. Hunt and J. H. Parker are on the committee.

ALBANY, N. Y.—The council railway committee and the citizens' committee recently appointed by the mayor have conferred with the three railway companies whose roads enter this city in connection with the construction of a new union passenger station. John G. Myers, John D. Wasson and F. M. Danaher and Councilmen Cox, Hogan and Collins can be addressed.

BROOKLYN, N. Y.—Mayor Wurster Dec. 8 approved the resolutions passed by the aldermen recently giving its consent to the establishment of a free library. The bill under which the aldermen acted authorizes the city to issue $600,000 in bonds for the library. Mrs. Mary E. Craigie, Miss Annie W. Stephens, Mrs. Cornelia H. Corz, and R. Ross Appleton, of the library association, presented a petition to the mayor asking him to appoint a board of directors, which he must do under the law.——Arrangements are reported as being made for the construction of a 12 or 15-story apartment hotel at Montague, Pierrepont and Hicks Sts., to cost about $600,000 for David G. Leggett. It is probable the building will be completed by the fall of 1897.

BUFFALO, N. Y.—The mayor has signed a resolution passed by the council for the purchase of a lot 140 × 140 ft. on Ontario St. near Tonawanda St., on which it is proposed to erect a new 16-room school building.——E. P. Brink, 816 Olive St., St. Louis, Mo., has prepared plans for a 12-story brick hotel at Wells and Carroll Sts., for the Buffalo Hotel Co. noted in our issue last week. The hotel will have 250 guest rooms and is estimated to cost $700,000. R. H. Cole, of New York, has taken a 20-year lease.——The supervisors are considering the question of making repairs to the county court house, at a cost of $26,000. The repairs will include four new boilers, machinery for elevators, etc. Supervisor Chas. P. Brandel, Buffalo, can be addressed.

BUFFALO, N. Y.—Our correspondent writes us that St. Joseph's College will erect a building for a permanent home on Elmwood Ave. Several architects have submitted plans, but no decision has been made. The building will be four stories high and will cost $40,000.——Louis H. Eckert and Geo. More of this city, with L. Streuber, Chas. Schenk and W. P. Fisher of Erie, Pa., will incorporate with a capital stock of $100,000, and build a $75,000 theatre on Main St. Archs., L. H. Lempert & Son, 31 Pearl St., Rochester, N. Y.——A 10-story hotel and theatre is to be erected on the site of the Tifft House. R. A. Waite, German Insurance Bldg., drew the plans, and Joseph Gavin and A. Clark have secured the money, amounting to $1,700,000. The theatre will seat 2,000. and the hotel will have 275 guest rooms.

NEW YORK, N. Y.—Bids are asked until Dec. 28 for plumbing five hospital buildings, on Ward's Island and at Central Islip. J. G. Perry, State Arch., Albany; H. E. Howland, Pres. Bd. Manhattan State Hospital, 1 Madison Ave., New York.

NEW YORK, N. Y.—Plans have been drawn for a new Methodist Episcopal Church, at Willis Ave. and 141st St., to take the place of the old building on that site. Two lots adjoining have been purchased. The new North New York Church will cost about $60,000, and the plans include church and parsonage. The work will probably be begun about April 1. W. H. Barton, Pastor.

ROCHESTER, N. Y.—The question of petitioning the legislature for permission to construct a new arsenal, to cost about $100,000, is being discussed. A lot has been selected which is 480 × 158 ft. Capt. L. Bordman Smith, of the First Separate Company; Capt. H. B. Henderson, of the 8th Company, and Lieut. E. N. Walbridge are interested.

ATLANTIC CITY, N. J.—It is reported that the city is to grant certain land to the Pennsylvania R. R. Co. on which it is proposed to erect a new passenger station. Arrangements are also rapidly being made for a new city hall, to cost about $300,000. F. P. Story, Mayor; Geo. Long, Chn. Com.; J. R. Champion, Chas. Evans and F. P. Cook, City Hall, Comrs.

ELIZABETH, N. J.—The Consolidated Traction Co. purchased, Dec. 11, a tract of land at North Broad and Chestnut Sts., which will be used for storing the electric cars operated in this city. It is stated that an office building will also be erected on the property, which is 300 × 100 ft. The company's Elizabeth headquarters will be in the office building in North Broad St., and the car barns will be on Chestnut St.

PRINCETON, N. J.—Ground was broken Dec. 11 for Blair Hall, a new dormitory, estimated to cost $131,120. The contract has been awarded to Stacy Reeves & Sons, the building to be completed by Oct. 1, 1897. The structure will be 750 × 50 ft., and two stories in height. Archs., Cope & Stewardson, 314 Walnut St., Philadelphia.——The board of trustees of Princeton University is reported to have taken definite action towards enlarging the college buildings. A graduate college building is also proposed.

ALLEGHENY, PA.—The construction of a new city hall for this city is being actively considered by the citizens. John Heckert, Bldg. Inspector.

HARRISBURG, PA.—Bids are asked until Jan. 4 for constructing a church building for the St. Paul M. E. congregation. Archs., Miller & Hast, 219 Market St., Harrisburg.

PHILADELPHIA, PA.—Bids are asked until Dec. 22 for excavating for the U. S. Mint building in this city. Wm. M. Aiken, Supervising Arch., Washington, D. C.

PITTSBURG, PA.—The Pennsylvania R. R. Co. is said to be considering sites for a combined passenger and freight station in this city.

BALTIMORE, MD.—It is stated that four 6-story warehouses, two of them 64 × 204 ft., are to be built by the Baltimore & Ohio R. R. Co., in Baltimore.

WHEELING, W. VA.—The Vance Shoe Co. has awarded contracts for constructing a 5-story building on Main St. Archs., Franzheim, Gilsey & Faris, Library Bldg.

BEAUFORT, S. C.—The Charleston & Western Carolina Ry. Co. will build a combination passenger and freight depot and warehouse at this place at an early date, the same having been decided on last week. J. B. Cleveland, Pres., Spartanburg, S. C.

CLEVELAND, O.—Bids are asked until Jan. 4 for constructing an iron tower and pile foundation for the Maumee light station, O. Lt. Col. Jared A. Smith, U. S. Engr., Cleveland.——The following bids were received by Col. Smith Nov. 17 for furnishing the iron tower and beacons for the Maumee light station:

T. H. Brooks & Co., Cleveland (accepted)	$7,740
Russel Wheel & Foundry Co., Detroit, Mich.	8,880
The Van Dorn Iron Works, Cleveland	9,979
John P. McGuire, Cleveland	10,250
Chamblin & Scott, Richmond, Va.	12,400
Michael Rabbitt, Toledo, O.	13,888
Forest City Iron & Wire Co., Cleveland	13,900

DAYTON, O.—The council is considering sites for a new city building near Library Park. Chas. E. Pease, Chn. Com.

TOLEDO, O.—Local papers state that a new passenger station is to be built for the Ohio Central Lines. Plans have not yet been selected. J. M. Ferris, Gen. Mgr., Toledo; C. Buxton, Ch. Engr., Toledo.

URBANA, O.—It is reported that a fire at this place Dec. 12 destroyed a high school building, causing a loss of $80,000.

ROME CITY, IND.—Plans are being perfected for the opening at Rome City of a Chatauqua. A syndicate of churchmen, headed by Bishop J. H. Vincent, of Buffalo, N. Y., proposes to expend $100,000 in improving the assembly grounds at Rome City and in the erection of buildings.

PORT HURON, MICH.—Western and southern capitalists are reported as negotiating for the purchase of a site in this city on which to erect a new elevator.

CHICAGO, ILL.—Chas. M. Palmer, 1207 Monadnock Bldg., Chicago, has prepared plans for a 3-story apartment house on Grand Boulevard, 97 × 50 ft., for P. J. Ryan Pres. Ryan & O'Brien Woolen Co.——Jennings & Ross, 737 Dearborn St., Chicago, are preparing plans for a station at Edgebrook, for the Chicago, Milwaukee & St. Paul R. R. Co.——Plans are reported as also being prepared for a $20,000 brick school building and also for a church, etc. Wm. A. Merigold & Co., 156 La Salle St., Chicago, can be addressed.

LEWISTOWN, ILL.—Bids are asked until Jan. 12 for erecting a new county court house to cost about $40,000. The building it is reported is to be paid for by the people of the city by popular subscription and when completed the county board will accept it. Archs., Bell & Kent, 232 Merriam Block, Council Bluffs, Ia.; H. V. V. Clute, Chn. Com.; M. P. Rice, Secy., Lewistown,

COUNCIL BLUFFS, IA.—Henry Voss, Ware Bldg., Omaha, Neb., is said to be preparing plans for a 7-story office building on Broadway for Robinson Bros.

DES MOINES, IA.—The board of supervisors is reported as about to secure plans for an insane asylum to cost $50,000.

ST. PAUL, MINN.—It is reported that the Yellowstone Park Association, of St. Paul, is considering the question of erecting four hotels and several other buildings in Yellowstone Park, making a total cost of $225,000. W. B. Casey, of Boston, Mass., and C. E. Gibson, of St. Louis, Mo., are said to be interested.

SAN ANTONIO, TEX.—Jul. de Horvath, 119 Dearborn St., Chicago, Ill., is reported by Chicago papers as preparing plans for the Grand Hotel in this city to cost about $300,000. The structure is to have eight stories and will be 126 × 100 ft., containing 200 guest rooms. Mr. de Horvath is also preparing plans for a $150,000 bank and office building here. This building will be 220 × 120 ft. and four stories high.

COLORADO SPRINGS, COLO.—Weston & Trost, Colorado Springs, have prepared plans for a new $150,000 office building at Nevada and Pike's Peak Aves., for W. S. Stratton. Bids for the work are reported as now being received.

SANTA ANA, CAL.—The construction of a $50,000 county court house in this city is reported as being considered.

OAKLAND, CAL.—Plans have been prepared for a $40,000 theatre at San Pablo Ave. and 17th St. Geo. W. McNear and W. M. Watson are interested.

HEALDSBURG, CAL.—It is stated that an election will be held Jan. 4 to vote on the question of issuing $25,000 in bonds for constructing a new school building. W. W. Moreland, W. H. Barnes, C. H. Pond, Trustees.

MEXICO, MEX.—It is stated that the Larralde Bros. have purchased the site of the Teatro Progreso, which burned recently, and will erect on it a 3-story brick and granite building to cost $100,000.

WATER-WORKS.

LEBANON, N. H.—Chas. E. Lewis, J. L. Spring and C. D. Smith, Water Comrs., have visited several cities investigating the question of filtration. It is thought that a well system of filtering the water supply of this place can be constructed for about $1,000.

WATERBURY, VT. — The Burlington "Free Press" states that this village has closed a contract with the state for furnishing water to the state asylum; state to pay $500 a year for 50,000 gallons a day, or $800 if 100,000 gallons are used. C. F. Clough, Village Pres.

MIDDLEBORO, MASS.—It is expected that the fire district will take action this week in regard to the proposed issue of $16,000 in bonds for a standpipe.

NEW BEDFORD, MASS.—Bids are asked until Dec. 18 for the purchase of $400,000 in 4%, 30-year water bonds. James H. Hathaway, Cy. Treas.

PROVIDENCE, R. I.—Bids are asked until Dec. 19 for furnishing about 162 gross tons of 12 to 4-in. cast-iron water pipe. Robt. E. Smith, Comr. Pub. Wks.

MIDDLETOWN, CONN.—An election was called for Dec. 15 to vote on the proposed appropriation of $215,000 for a new reservoir, as noted last week. W. F. Borrows, Pres. Comrs.

BROOKLYN, N. Y.—The committee on water of the board of aldermen has decided to recommend an appropriation of $217,000 from the water budget for new water mains in New Utrecht.

CASTLETON, N. Y.—It is reported that the water commissioners have received several applications for a franchise to put in a gravity water system; no action yet taken, DE RUYTER, N. Y.—At a special election Dec. 8 it was voted to issue bonds for new water-works to be owned by the village; supply by gravity from springs; plans and specifications will be prepared in the near future; population 800. A. W. Francis, Pres.; Edwin N. Coon, Secy. Water Comrs.

NEW BRIGHTON (S. I.), N. Y.—The board of trustees is expected to take action this week in regard to a new contract with the Staten Island Water Supply Co. The contract expired a year ago and the water company is anxious for a new 5-years contract before this place becomes a part of Greater New York. The Good Government Club has for some time agitated the question of municipal ownership of the works.

SHARON SPRINGS, N. Y.—The question of water-works is reported as being agitated in this village.

TUPPER LAKE, N. Y.—It is reported probable that works will be constructed in the near future.

ASBURY PARK, N. J.—A public meeting of the township committee was held Dec. 9 to consider the granting of a franchise to a water company to supply the township. It is said that many residents of West Park and West Grove are in favor of the project.

ASBURY PARK, N. J.—Bids are asked until Dec. 28 for furnishing one duplex and one straight line air compressor, as stated in our advertising columns. Geo. H. Coffin, Supt.

PERTH AMBOY, N. J.—The board of aldermen has voted to issue $25,000 in 20-year 5% water bonds to pay for the repairs to the pumping engine, purchase of a new one and the extension of the water mains.

ROCKAWAY, N. J.—Bids are asked until Dec. 29 for the purchase of $25,000 in 4% gold bonds, as stated in our advertising columns. Morford B. Strait, Mayor, writes us that the contract for constructing works has been awarded to S. M. Neff, of Dover, N. J., at $25,000; supply by gravity from White Meadow Brook.

COATESVILLE, PA.—It is reported probable that an election will be held in February to vote on an issue of $20,000 in bonds for increasing the water supply, as noted several weeks ago.

HARRISBURG, PA.—Mayor Patterson has approved the ordinance appropriating $10,000 for the extension of the influent pipe at the water-works. The work will be started at an early date.

IRWIN, PA.—The 5-year contract with the Westmoreland Water Co. expired in August, and it is stated that the council has purchased a site near Jeannette, where municipal works will be erected. The water company will not renew its contract for a shorter period than five years.

LEBANON, PA.—Dr. J. R. Beckley, Pres. Water Dept., writes us that an ordinance is in course of passage by council authorizing the water and light commission to advertise for bids to increase the present water supply to 2,000,000 gallons daily of soft water, as noted in our issue of last week.

MARCUS HOOK, PA.—It is reported that works may be constructed at this place; supply by gravity to a reservoir. Walter Wood, Borough Engr.

McKEESPORT, PA.—Charters were granted Dec. 10 to the following three water companies, each having an authorized capital stock of $5,000, with $500 paid in: Jefferson & Mifflin Water Co., to operate south and west of the Monongahela River, bounded by lines of townships of Baldwin, Snowden and Union in Allegheny county; Yough Valley Water Co., to operate just outside the limits of city of McKeesport; Lincoln Water Co., to operate in Forward Township, Allegheny county; Treas., J. P. McIntyre, of McKeesport; other directors, D. W. Courtney, R. R. Chester, C. Biggs, R. Stevenson and Frank Chester.

ORELAND, PA.—This village is reported as planning to construct water-works.

PHILADELPHIA, P.—Charles F. Warwick, Mayor, has signed the ordinance providing for a loan of $3,000,000 for a filter plant or plants to connect with the several pumping stations embraced in the water supply of this city.

PITTSBURG, PA.—J. O. Brown, Dir. Pub. Safety, has awarded the New York Filter Mfg. Co. of New York, the contract for a filter plant at the Public Safety Building, at $1,250.

RIDGWAY, PA.—The board of health is reported to have decided to recommend to council that the water supply be filtered and that a new source of supply be obtained as soon as possible.

ROCKVILLE, MD.—This city has sold its $20,000 in 20-year 4% water bonds, to Thos. S. Grimke, 80 Broadway, New York, at 101⅛. Joseph Reading, Mayor.

WASHINGTON, D. C.—The "Evening Star" states that Architect Clark of the capitol has submitted a report to the house, estimating that a filtration plant for the capitol will cost $11,050 for the house wing and $10,900 for the senate wing; plant to furnish 300,000 gallons daily to each wing.

HARRISONBURG, VA.—N. Wilson Davis, of Atlanta, Ga., has been engaged to make plans for a gravity system of water-works at this place; surveys now in progress.

LENOIR, N. C.—The board of trade is reported as endeavoring to secure water-works and other improvements. S. T. Pender, Secy.

FORSYTHE, GA.—J. N. Hazlehurst & Co., Norcross Bldg., Atlanta, have the contract for constructing works at this place and expect to begin work the last of this month; plant is to be completed by April 1, 1897; bonds for the works were recently sold.

UNION, S. C.—A press report states that several engineers are in town consulting with the water-works commission in regard to the erection of works. It is thought that construction will be commenced in the near future.

ATLANTA, GA.—The water board has voted to lay a 6-in. main from Curran St. to the Fulton county barracks; county will pay cost of construction and city will furnish water free of charge.

CONYERS, GA.—M. H. Plunket, Cy. Clk., writes us that no steps are being taken for works at this place.

HAWKINSVILLE, GA.—S. A. Way, Mayor, writes us that as soon as the $30,000 in bonds are sold the city will be ready to construct works.

OXFORD, MISS.—The contract for constructing works is reported to have been awarded to Sanders & Porter, of Louisville, Ky., at $11,577.

WEST POINT, MISS.—This city has authorized the board of selectemen to issue $20,000 in bonds for the construction of water-works; system will be constructed the coming summer, provided bonds are sold at satisfactory prices. C. W. Gibson, Chn. Com.

NATCHITOCHES, LA.—It is reported that this place has voted to construct works.

FRANKLIN, KY.—The contract for constructing works has been relet to the original contractors, Guild & White, of Chattanooga, who were the only bidders.

LOUISVILLE, KY.—The board of public works has decided to place fire hydrants all over the city to take the place of the fire cisterns now in use, according to local papers.

MADISONVILLE, KY.—M. W. Bishop and Samuel Powers have been apponited a committee with power to employ an engineer to investigate the cost of a system of water-works, and to report same to council as soon as possible; population, 3,500. C. U. Osburn, Cy. Clk.

BRADNER, O.—It is reported that this village contemplates the construction of water-works.

CHAGRIN FALLS, O.—S. L. Wilkinson, Mayor, writes us that it is hoped to commence the construction of works within 60 days; estimated cost, $32,000 to $34,000; preliminary surveys were made by Burton J. Ashley, Opera House Block, Chicago.

HUNTINGTON, IND.—Draper & Werling have been awarded the contract for connecting wells and rebuilding pumping station, as advertised in Engineering News, at $15,497; and Fulton & Fulton the contract for sinking tubular wells at $1.35 a ft. Sturtevant & Todd, Engrs., Association Bldg., Chicago; E. Q. Drummond, Cy. Clk.

JACKSON, MICH.—Bids are asked until Dec. 17, according to reports, for constructing certain water extensions. J. K. Bogert, Supt. Pub. Wks.

SCOTTVILLE, MICH.—Bids are asked until Jan. 4 for a deep well pump, tower 70 ft. high with wooden tank 18 ft. in diameter and 20 ft. high, 8 hydrants, 13-HP. gasoline engine, and nearly a mile of 6 and 4-in. pipe. Alexander & Shaw, Engrs., 907 Chamber of Commerce, Chicago; G. H. Reader, Chn. Com.

TRAVERSE CITY, MICH.—A committee of six, including J. W. Milliken and E. J. Fulgeum, has been appointed to prepare plans and specifications for municipal works, plans to be ready Feb. 1. The contract with H. D. Campbell for a water supply does not expire for five years. H. F. Northrup, Cy. Engr.

GROSSDALE, ILL.—The council is reported as considering the construction of the proposed works. Hill & Enricht, Engrs., Chicago.

BELLEVILLE, ILL.—It is reported that Henry Leschens, of St. Louis, and others have been granted a franchise for the construction of new works in this city.

MOMENCE, ILL.—Bids are asked until Jan. 11 for constructing works, as stated in our advertising columns. C. B. Astle, Cy. Clk., writes us that it is proposed to lay the mains this winter and to complete stand-pipe, pumping engine, etc., as early in the spring as possible.

WESTERN SPRINGS, ILL.—Bids are asked until Jan. 5 for laying water supply pipes and drains in Walnut St., from Ashland to Grand Ave. F. A. Johnson, Village Clk.

KAUKAUNA, WIS.—The proposed works noted last week will cost about $80,000, consisting of 11 miles of pipe, 90 hydrants, artesian well, reservoir, pumps, etc.

CORRECTIONVILLE, IA.—An election was held Dec. 14 according to reports, to vote on the construction of water-works and an electric light plant.

ADA, MINN.—Councilman Andrews is reported as wanting bids on a 1,000-bbl. tank.

DULUTH, MINN.—Bids are asked until Jan. 4 for the purchase of $1,695,000 in 4½% 30-year water and light bonds, according to reports. F. J. Voss, Cy. Treas.

MABEL, MINN.—We are informed that nothing will be done until spring in all probability in regard to constructing works at this place. The work was advertised several months ago. The plans were prepared by Fred H. Pickles, Cy. Engr., Winona.

ROCHESTER, MINN.—Burt. W. Eaton, of Rochester, has been appointed by the court to sell the water-works on mortgage foreclosure.

GOTHENBURG, NEB.—There is some talk of constructing water-works; town voted $10,000 in bonds two years ago but could not sell the bonds at that time. C. A. Edwards, Mgr., Gothenburg Power & Irrigation Co., can probably give information.

HASTINGS, NEB.—An election will be held Dec. 21 to vote on an issue of $8,000 in bonds for extending the water-works. G. J. Evans, Mayor. E. A. Francis, Cy. Clk.

ST. LOUIS, MO.—Bids are asked by the board of public improvements until Feb. 16, according to reports, for two new pumping engines at the Chain of Rocks.

BENTONVILLE, ARK.—It is reported that a special tax has been voted for the construction of works, to cost $30,000.

SEARCY, ARK.—Ross & Carnis are said to have petitioned for a franchise to construct works.

HILLSBORO, TEX.—O. J. Morris, Supt., writes us that the proposed extensions noted Dec. 3, will include a 500,000-gallon pump, with boiler and about $11,000 worth of 10 to 4-in. water mains; supply from artesian wells.

McKINNEY, TEX.—J. M. Pearson, Mayor, writes us that this city needs water-works, but under the law cannot establish the plant until the present municipal debt is reduced; population 5,000.

ORANGE, TEX.—B. C. Miller, Mayor, writes us that owing to the burning of the high school building, which will have to be replaced at a cost of about $15,000, water-works cannot be constructed for a year at least.

PITTSBURG, TEX.—F. H. Goodjohn, Mayor, writes us that is is the intention of the council to contract next spring for a combined water-works and electric light plant, provided the cost will not be too great.

EMPIRE, COLO.—A press report from Georgetown states that a movement is on foot to construct water-works and an electric light plant at Empire. Frank L. Peck, Mayor.

PALISADES, COLO.—We are informed that a wooden tank or stand-pipe will be erected and a water supply obtained from the Grand River; only a small plant and no contracts to be awarded.

NEWBERG, ORE.—This city has not yet sold the $15,000 in bonds voted for a gravity system of water-works. J. G. Hadley, Cy. Recdr.

SHERIDAN, ORE.—The city is reported as now out of debt and in a condition to warrant the construction of water-works.

ETNA, CAL.—Works are being constructed at this place.

LAKEPORT, CAL.—A. L. Adams, Engr., has recommended a water supply from wells with a 200,000-gallon reservoir at an elevation of 100 ft. above Main St.; estimated cost of works, $17,250.

SANTA BARBARA, CAL.—The city engineer has been directed to prepare estimates for a pipe line from the tunnel to that city. J. K. Harrington, Cy. Engr.

WATSONVILLE, CAL.—The Watsonville Water & Light Co. was incorporated Dec. 5, with a capital stock of $500,000, commencing with $2,500, by Francis Smith, of Santa Clara; F. W. G. Moebus, of Alameda, and F. W. Longee, W. W. Montague and Daniel Wilson, of San Francisco.

SANTA MONICA, CAL.—The City Water Co. was incorporated Dec. 4 with a capital stock of $20,000, commencing with $400, by J. H. Claudius, E. J. Vawter, D. M. Clark and D. R. Green, all of Santa Monica.

RENO, NEV.—It is thought that water-works can be constructed for about $75,000, and that an election will be held to vote on the question. R. L. Fulton, E. R. Dodge and Henry Ruhe can give information.

SALMON CITY, IDAHO.—J. W. Birdseye, Chn. Trustees, writes us that R. W. Faris, of Idaho Falls, prepared plans and was awarded the contract in September for constructing works, $15,000 in bonds at par to be taken in payment for the plant complete. The bonds were not to be made payable in gold, and the contractor could not place them, and was unable to go on with the work. Since the election a proposition has been received to take the bonds as originally intended and go on with the work, but owing to the cold weather the matter has been postponed for the present. The supply will be by gravity from a creek.

ST. MARYS, ONT.—It is reported that the plans of Wiliam Newman, of Windsor, for works at this place have been accepted.

IRRIGATION.

WACO, TEX.—Press reports state that the people of this city propose to build a dam sufficient to irrigate 40,000 acres of land. The dam will be about 4 ft. high. I. T. Arnold can be addressed.

FORT COLLINS, COLO.—Press reports state as follows: The Larimer & Weld Reservoir Co., owner of the Terry Lake reservoir, one mile north of Fort Collins, advertised for bids about Dec. 5 for making improvements on the dam and outlet of the reservoir. The work will consist in reinforcing the embankment on the outer side, both east and west of the outlet riprapping, the inside of the dam near the outlet and the extension of the masonry of the discharge works by 100 ft. of stone archway with cement flooring.

MISSOULA, MONT.—Bids are being received, according to reports, for extending the Canon ditch, 1,500 ft., requiring 6,500 cu. yds. of earth excavation. E. S. Hathaway.

SAN LUIS POTOSI, MEX.—It is stated that the construction of an irrigation system is proposed near this place. A dam is now being built, and it is proposed to build six others. C. H. McClure, of San Luis Potosi; H. Carter, of London, England, and B. F. Jones, formerly superintendent of the Kansas City (Mo.) Water-Works.

NEW COMPANIES.—Cucamonga Land & Farm Co., Cucamonga, Cal.; $50,000, with $22,700 paid in; to build reservoirs, pipes, mains etc., buildings, electric light plants, etc.; Thos. Feron, B. H. de Jersey, Cucamonga; Fred W. Armitage, H. O. Maynard, Ontario, Cal.

SEWERAGE.

DANVERS, MASS.—Surveys are being made by J. J. Van Valkenburgh, of South Framingham, Mass., for a system of sewage disposal by filtration for the state lunatic asylum at this place. The institution has about 1,000 inmates.

MALDEN, MASS.—The construction of a 72 × 96-in. brick drain in Saugus Branch Creek has been planned; estimated cost, $75,000. G. A Wetherbee, Cy. Engr.

WATERBURY, CONN.—Press reports state as follows: Waterbury has applied to the superior court for an order of notice that the city proposes to petition the next legislature for legislation to enable it to dispose of its sewage by a trunk sewer through the Naugatuck Valley to Long Island Sound. Judge Elmer has approved the application. The proposed work will be 31 miles long, and will cost $1,500,000. It is expected opposition will be met in towns along the valley toward the sound.

BROOKLYN, N. Y.—Bids are asked until Dec. 24 for strengthening the twin main sewers in Hendricks St., between Wortman Ave. and the sewage purification building; surety, $1,900. T. B. Willis, Comr. Cy. Wks.

JAMAICA, N. Y.—We are informed that the board of sewer commissioners of Jamaica, at its meeting Dec. 8, approved plans for a chemical precipitation plant for the disposal of the sewage. J. J. McLaughlin, Engr., Jamaica.

LYONS, N. Y.—It is proposed to construct a system of sewers 15 miles in length, to cost $50,000, according to reports.

NEW ROCHELLE, N. Y.—J. K. Wilkes is engineer to the sewer commission at this place, and not Horace Crosby, as noted last week.

ROCHESTER, N. Y.—Bids are asked until Dec. 21 for constructing a sewer in University Ave. The sewer will be of 24-in. pipe and 2,100 ft. long, and is to drain the proposed subway under the N. Y. C. & H. R. R. R. tracks; estimated cost, $13,000. E. A. Fisher, Cy. Engr. ——It is proposed to construct a sewer in Jay St. to cost $5,750. T. S. Pulver, Cy. Clk.——Local papers state that W. J. Stewart, Asst. Cy. Engr., is preparing plans for outlet sewers in five streets. T. J. Neville, Clk. Executive Bd.

SANDY HILL, N. Y.—Plans have been completed and approved for the proposed sewer system for this place.

BURLINGTON, N. J.—The question of constructing a sewer system to cost about $75,000 is being considered by the council. John W. Davis, Chn. Com.

JERSEY CITY, N. J.—E. W. Harrison, Fuller Bldg.; Dennis Fowler and W. W. Ruggles, civil engineers, Jersey City, have been appointed to prepare plans for reconstructing the Ravine road sewer.

JERSEY CITY, N. J.—Bids are asked until Dec. 21 for constructing 550 ft. of 24-in. brick, and about 4,300 ft. of 18 to 12-in. pipe sewers. The work will include about 600 cu. yds. of rock excavation, 20 cu. yds. of concrete, etc. J. C. Kaiser, Chn. St. Com.

ERIE, PA.—It is proposed to extend the Liberty St. main sewer from 12th to 17th St., at a cost of $8,500. George Platt, Cy. Engr.

SCRANTON, PA.—The council is considering an ordinance providing for the extension of sewers in the second district, at a cost of $36,000. J. P. Phillips, Cy. Engr.

CINCINNATI, O.—Plans are being prepared for sewers in about 20 streets; work to be done next year.——The board of administration has decided to advertise for bids for constructing 2,300 ft. of the trunk sewer in Bloody Run, at a cost of $51,000. Aug. Herrmann, Pres.

MARION, O.—It is proposed to construct a sewer ditch with a brick cover in Silver St., at a cost of about $45,000. Councilman Shutt and City Engineer Scott can be addressed.

SPRINGFIELD, O.—Bids are asked until Jan. 11 for constructing 1,400 ft. of 30-in. pipe sewer in an alley, and 2,200 ft. of 24 and 30-in. pipe sewer in Farlow and Warden Sts. D. F. Snyder, Cy. Engr.; S. J. Wilkerson, Cy. Clk.

TOLEDO, O.—Bids are asked until Dec. 28 for constructing 24-in. brick sewers in three streets and pipe sewers in two others. L. P. Harris, Cy. Clk.

AUBURNDALE, O.—It is reported that work will soon be begun on seven miles of sewers in Auburndale, to cost $33,200. W. G. Clark, Engr., Toledo.

YOUNGSTOWN, O.—Press reports state that the board of health has notified the state board to send a commission to this city to examine the sewer system of the place. The changes needed, it is stated, will involve an expenditure of $200,000 or $300,000.

CRAWFORDSVILLE, IND.—We are informed that plans have been completed for the proposed sewers in this city; money has been raised and the work arranged for. S. C. Hutton, W. N. McCampbell, B. F. Hutchings compose the committee. Alvord & Shields, Consult. Engrs., The Rookery, Chicago, Ill.

CHICAGO, ILL.—Cogan & Pound have been awarded the contract for constructing a 42-in. brick sewer in Indiana Ave., at $49,335.—The commission of expert engineers, appointed to prepare a plan for diverting the sewage now flowing into the lake, has decided that intercepting sewers are the best means of solving the problem, and as the Lake View territory is suffering most, it has been taken up first. According to the plan practically agreed upon, an intercepting sewer will be built from Fullerton Ave. north to Lawrence Ave., and another sewer south from the north boundary of the city to Lawrence Ave. A pumping station will be located at the foot of Lawrence Ave., and a sewer built from the lake to the north branch of the river in Lawrence Ave. The sewage from the two intercepting sewers will be pumped into the Lawrence Ave. sewer and carried to the river. Joseph Downey, Comr. Pub. Wks.

WESTERN SPRINGS, ILL.—Bids are asked until Jan. 5 for furnishing the labor and materials and laying pipe sewers, drains, etc., in two streets. F. A. Johnson, Village Clk.

MILWAUKEE, WIS.—The board of public works has submitted estimates for the construction of sewers during 1897, which will cost about $310,000. Geo. H. Benzenberg, Cy. Engr.

RIPON, WIS.—We are informed that a committee of citizens has been appointed to investigate and report on the proposed sewer system for this place. No further steps have been taken. W. W. Robinson, Chn. Com.; S. E. Mason, Cy. Clk.

HILLSBORO, TEX.—We are informed that about two miles of 10 and 8-in. sewers are proposed.

HOUSTON, TEX.—We are informed that Alderman Cronan on Dec. 8 introduced a resolution to authorize the city engineer to prepare a profile, etc., for pipe sewers in Washington St. for a distance of 1¼ miles. It is also proposed to pave this part of the street, the total work to cost about $100,000.——Plans and specifications have been prepared and referred to the board of public works for putting in a 36-in. double ring brick sewer in Heiner St. for a distance of 1,965 ft. L. A. Gueringer, Cy. Engr.——W. E. Humphreyville has been awarded the contract for constructing a sewer in Elysian St. at $2,289.

COLORADO CITY, COLO.—Press reports state that the citizens of this place are discussing the question of constructing a sewer system to drain this city, Colorado Springs and Manitou. Committees are being appointed by the different cities to consider the proposition. H. D. Morse, Mayor, Colorado City; L. A. Humphrey, Chn. Sewer Com., Colorado City; Mayor Plumb, Colorado Springs.

LAJOLLA, CAL.—The construction of a sewer system is being urged by the LaJolla Improvement Society, according to reports.

SAN FRANCISCO, CAL.—Bids were asked until Dec. 29 for furnishing the Mare Island navy yard with sewer pipe, Portland cement, etc. Edwin Stewart, Paymaster General, Navy Dept., Washington, D. C.——Thos. O'Neil, R. Riechenbach and J. Touhey have been appointed a committee by the Holly Park and Five Mile Improvement clubs to prepare a bill for the legislature authorizing an appropriation of $300,000 for a sewer system in the district between 30th St. and the county line. Behrend Joost can also be addressed.

SAN FRANCISCO, CAL.—The supervisors have adopted resolutions for constructing 54 to 30-in. brick and 20 to 12-in. pipe sewers in about 15 streets. J. A. Russell, Clk.

SAN JOSE, CAL.—The city engineer is reported to have been directed by the council to prepare plans for sewer in San Carlos St., to cost $6,000. Councilmen Nolting, Hogan, Jarman, Main and Mangrum can be addressed.

LACHINE, QUE.—It is reported that the construction of a sewer system to cost about $150,000 is under discussion.

LONDON, ONT.—The following bids were received Dec. 7, for constructing Section C of the new sewer system; Ormsby Graydon, Cy. Engr.:

Harding & Leathorn, London	$10,900
C. Barfitt, London	14,863
Simpson & Murray, London	14,335
Wm. F. Grant & Co., Toronto (accepted)	9,112
J. W. Cawrse, London	9,973
A. J. Brown, Toronto, Ont	10,915
Clark & Connolly, Toronto	10,180
Geo. D. Cameron & Co., London	11,368
J. S. Fallows, London	16,272
J. S. Fallows (with hydraulic cement)	15,092
George F. Webb, Hamilton, Ont	17,389

GARBAGE DISPOSAL—STREET CLEANING.

CHICOPEE, MASS.—The board of health is reported as to recommend to the new city government that some kind of a garbage gathering system be introduced into the city.

GLOUCESTER, MASS.—The special committee on garbage removal has reported against a garbage crematory as too expensive and has recommended that the garbage be dumped into the ocean by means of a scow.

INDIANAPOLIS, IND.—Bids are asked by the board of public works until Dec. 21 for street cleaning and sweeping of permanently improved streets.

MILWAUKEE, WIS.—Local papers state that bids will be asked in a few days for a 150-ton garbage crematory; the contract with the Wisconsin Rendering Co. expires March next. Geo. H. Benzenberg, Cy. Engr.

SAN FRANCISCO, CAL.—The Sanitary Reduction Co., office at northeast corner of Montgomery and Commercial Sts., as noted Oct. 1., is reported about to construct a 600-ton Thackeray plant. Chas. Thackeray, of Montreal, inventor of the system, will superintend the work. L. R. Ellert, Pres.

STREETS AND ROADS.

WARE, MASS.—The question of issuing $50,000 in bonds is being considered by the citizens.

BROOKHAVEN (L. I.), N. Y.—A committee has been appointed ot prepare plans and to advertise for bids for maintaining the highways throughout the township, for which $10,000 was recently appropriated, according to reports.

BROOKLYN, N. Y.—The committee has recommended the paving of portions of about 20 streets and avenues. T. B. Willis, Comr. Cy. Wks.

BUFFALO, N. Y.—Bids are asked until Dec. 22 for asphalt surfacing in two streets, and also for asphalt paving in one street. R. G. Parsons, Secy. Bd. Pub. Wks.

ELIZABETHTOWN, N. Y.—The county board of supervisors has voted to construct a highway in Ticonderoga. Garrison W. Foote, Samuel Root and Joseph Wright, Comrs.; M. C. Perry, Chn. Bd.

MOUNT VERNON, N. Y.—The following bids were received Dec. 1 by Geo. M. Jenkins, Cy. Clk., for grading and improving three streets and macadamizing Bridge St.; 1, for North 3d Ave.; 2, for Bridge St.; 3, for East Lincoln Ave.; 4, for Sidney Ave.:

	1.	2.	3.	4.
Daniel Murray	....	$8,659	....	....
Edgar Henriques	....	8,830	....	....
Cortright & Kenlon	$7,385	8,733	$25,623	$3,123
Johnson & Light	3,411	8,033	16,098	1,492
John Marion	....	....	....	3,582

NIAGARA FALLS, N. Y.—The contracts for asphalt paving for which bids were opened Dec. 11, as advertised in Engineering News, have been awarded to the Barber Asphalt Paving Co., at about $98,000. The itemized bids will be published next week. W. W. Read, Cy. Engr.

NEW YORK, N. Y.—Bids are asked by the department of public works, 150 Nassau St., until Dec. 28 for grading and curbing in three streets and altering sewers in two other streets.

OLEAN, N. Y.—The council has adopted resolutions to pave Union St. to the city line. E. E. Allen, Supt. of Streets; Aldermen Baker, Frazee, Ramsey, Sloan and Ward can be addressed.

MORRISTOWN, N. J.—It is reported that the county engineer has been directed to make surveys for a macadam road from Williams Corner on Long Hill to Johnson's Bridge, near Simmit, a distance of 3 1-5 miles. W. E. King, County Engr., Landing, N. J.

PATERSON, N. J.—The aldermen have agreed to ask the legislature to grant this city authority to issue $1,000,000 in bonds for permanent street paving. Aldermen Post, Wright, Delaney, Maguire, Durgett, Lang and Sturr, can be addressed. J. T. Pollitt, Cy. Clk.

PERTH AMBOY, N. J.—The county board of freeholders is considering the question of macadamizing roads between Metuchen and Perth Amboy; between South Amboy and the South River road and also for the macadamizing of the New Brunswick and Cranberry road.

WOODBURY, N. J.—Bids are asked until Jan. 20 for building a stone road in the townships of Glassboro and Washington, as stated in our advertising columns. Chas. N. Bell, Clk.; Chas. W. Starr, Dir. Bd. Freeholders.

PITTSBURG, PA.—Bids are asked until Dec. 22 for grading and paving portions of six streets. E. M. Bigelow, Dir. Pub. Wks.

BALTIMORE, MD.—The council is considering ordinances authorizing an appropriation of about $160,000 for Belgian block and asphalt paving in four streets. W. A. Hanway, Cy. Comr.

KEY WEST, FLA.—Local papers state that the city commissioners have instructed the engineer to prepare estimates for paving four streets in the lower part of the city.

SPRINGFIELD, O.—Bids are asked until Jan. 11 for grading, curbing, etc., in five streets. D. F. Snyder, Cy. Engr.; S. J. Wilkerson, Cy. Clk.

TOLEDO, O.—Bids are asked until Jan. 11 for paving Huron St. from Washington to Lafayette St. with asphalt on concrete foundation. L. P. Harris, Cy. Clk.

MONTICELLO, IND.—The treasurer of White county has been authorized to sell $22,500 in bonds for constructing a macadam road. W. P. Bushnell, County Surv.

EVANSVILLE, IND.—The board of public works has directed the city engineer to prepare plans and specifications for brick paving in Water St. from Walnut to Ingle St. Aug. Plaffiin, Cy. Engr.

ALTON, ILL.—Bids will be asked in March for 2,100 lin. ft. of brick paving on 6 ins. concrete in Front St. from Market to Wood St., and also for constructing a retaining wall; estimates not yet completed. This work is to be done by the Cleveland, Cincinnati, Chicago & St. Louis Ry. Co., W. M. Duane, Engr. Maintenance of Way, Mattoon, Ill.; G. W. Kittredge, Ch. Engr., Cincinnati.

CHICAGO, ILL.—Local papers state that the South Park commissioners are making arrangements for the construction of the South Shore Drive, to be five miles in length. Geo. H. Hess, Secy.; James W. Ellsworth, Pres.

DULUTH, MINN.—Bids are asked until Dec. 21 for constructing 25 miles of wagon road in Swan Lake, and also for a portion of the Nuttertrunk road between Virginia and the lower road. O. Halden, County Audr.

ST. PAUL, MINN.—The park board has received plans for a boulevard on the West Side to cost $25,000.

OMAHA, NEB.—Bids are asked until Dec. 21 for constructing such permanent sidewalks as are required during 1897. We are informed that there are prospects of considerable work under this contract. R. B. Howell, Cy. Engr.

GALVESTON, TEX.—The council is considering the question of macadamizing portions of certain streets. Frank Jones, Chn. Com.

HOUSTON, TEX.—We are informed that the council is considering a motion made by Alderman Cronan for paving in Washington St. and for constructing 1¼ miles of sewers in the same street. The work will cost about $100,000. L. A. Gueringer, Cy. Engr.

OAKLAND, CAL.—Press reports state that plans are being developed for a boulevard through the hills to the city cemetery. A. H. Breed, E. C. Sessions and J. J. Warner are interested.

SANTA CRUZ, CAL.—The committee on the Cliff drive is reported to have about completed plans and specifications for grading and improving the Cliff drive.

MANUFACTURING PLANTS.

KEENE, N. H.—The Frank T. Fowler Cycle Co of Worcester, Mass., will move to this city, it is said, as soon as factory buildings are erected.

BOSTON, MASS.—Land containing 8,000 sq. ft., and fronting on East 1st St., South Boston, near L St., has been sold by C. S. Judkins to E. W. Gilmore, who it is reported is to erect at once a large 3-story frame building, to be used for the manufacture of electrical supplies.

PROVIDENCE, R. I. — The Rhode Island Tool Co. has placed the contract for its new galvanizing room with the Berlin Iron Bridge Co., of East Berlin, Conn. The building will be a fire-proof structure throughout, no woodwork being used.

WOONSOCKET, R. I.—It is stated that parties connected with the Globe Yarn Mills, in Fall River, contemplate the erection of a large mill here, if the inducements are satisfactory.

BUFFALO, N. Y.—A. G. Scheson, of Monongahela, Pa., president of the Carborundum Co., which has a large plant in operation in this city, is quoted as saying that his company will build a plant on the Canadian side of the river next spring.

CORNING, N. Y.—The Wm. Bell Co., a steel manufacturing concern of New York city, is said to contemplate locating here. The plant would cost about $325,000, and employ 200 men.

LANCASTER, N. Y.—Frank Lass, Geo. Young and Henry Caldwell, of this place, will erect a 40 × 80 ft. brick factory for the manufacture of a patent tool.

NIAGARA FALLS, N. Y.—Our correspondent writes us that Dobbie & Stuart will build a foundry to consist of five buildings. The Cataract Construction Co. will build several factory buildings for renting purposes.——The Albright & Wilson Electro Chemical Co., of Oldbury, England, will build a plant on Buffalo Ave., consisting of seven buildings covering 2½ acres, to cost, exclusive of machinery, about $40,000.

NEW YORK, N. Y.—Brazier & Simonson, 156 5th Ave., are reported to be preparing plans for a factory to be erected at 203 Bowery for Henry C. Miner, to be 64 × 100 ft., six stories high; of brick and stone, with steel beams, galvanized iron cornice and skylight, fire-escape, passenger and freight elevators, steam heat, office fixtures, asphalt roof and stone sidewalk.

STANLEY, N. J.—It is reported that the New Jersey Felt Mill has been leased to a Boston company, which will overhaul the plant and put in new machinery at an expense of about $50,000, and operate it as a paper mill.

LATROBE, PA.—A company composed of Joseph C. Head, Charles M. St. Clare, Jos. Baumgartner, Martin Cesare and John V. Toner, Greensburg, Pa., proposes to erect a brewery at this place. The capital stock, it is stated, is $50,000.

LLOYDSVILLE, PA.—The Harbison & Walker Co., Pittsburg, Pa., is said to be having plans made for a large fire-brick plant to be erected here.

McKEE'S ROCKS, PA.—D. R. Speer & Co. will enlarge their planing mill plant, increasing its capacity about one-half, it is reported.

PITTSBURG, PA.—The Electric, Gas, Light & Power Co. has been organized with a capital stock of $1,000,000. It is stated that the company will erect a machine shop in some suburban town to cost $175,000, and employment will be given to about 300 men. The object of the company is to erect gas producers in small towns for light, heat and power. Henry Hubbard, a mechanical engineer, now connected with the Manchester Traction Co., is president of the concern, and Ralph Theophilus, of the Oliver Steel Co., is the secretary.

SCOTTDALE, PA.—The National Foundry & Pipe Works Co. has closed a contract, it is said, for the erection of a large machine shop in connection with its present works.

BALTIMORE, MD.—It is reported that the Baltimore & Ohio R. R. Co. has awarded to Walsh & Bro. the contract for building a large erecting plant at Mount Clare. The work has already been commenced, and it will be pushed forward with all possible speed, the idea being to have it completed by the middle of March. A large electric crane, with a capacity of 100 tons, has been ordered. The new plant will be 300 × 75 ft.

HAGERSTOWN, MD.—J. M. Hood, Pres. Western Maryland R. R., has announced, it is reported, that the company proposes building soon large repair shops in Hagerstown.

SISTERSVILLE, W. VA.—The Hays Iron & Steel Mfg. Co., which will make oil and gas well tools and supplies, was incorporated recently, and will build a plant at once. The capital stock is $65,000, commencing with $30,000.

GREENVILLE, S. C.—The New Mills Cotton Mfg. Co., which is now installing the machinery in its buildings, will also add in a short time an electric lighting plant.

ROCK HILL, S. C.—A cotton mill, to be operated by electricity, is to be erected at this place soon. The power will be furnished by the electric plant already in operation, but a new building and machinery will be required.

SPARTANBURG, S. C.—The Spartan Cotton Mfg. Co., which is just completing its second cotton mill, will as soon as the new mill is in complete operation, begin work on another, to operate about 50,000 spindles and to cost between $300,000 and $400,000.

CHARLOTTE, N. C.—Dr. J. H. McAden will build in Gaston county, on the Catawba River, a cotton spinning mlil to be run by water power, the equipment to include an electric light plant. The contract has not yet been awarded.

GIBSONVILLE, N. C.—The Minneola cotton mill at this place will enlarge its present capacity within 60 days.

WINSTON, N. C.—We are informed that Brown Brothers, whose large tobacco factory building was destroyed by fire last week, will rebuild and equip the same without delay. The main building will be of brick, 3 or 4 stories in height and about 250 × 100 ft., costing, with equipment, more than $100,000.

EASTMAN, GA.—W. M. Clement and a syndicate of Northern capitalists will build a cotton manufacturing plant at this place, work on which will begin early in the coming year.

MILLEDGEVILLE, GA.—The "Chronicle" says that a party has made the citizens the following proposition: If they will furnish stock to the amount of $100,000, he will put in a $600,000 cotton factory, and build 800 tenement houses. If the city will guarantee exemption from taxes for five or ten years he will build the entire plant himself.

KNOXVILLE, TENN.—Reports say that Edgar, George and A. A. Du Rocher will establish a knitting plant at Knoxville. The plant will be of considerable size, and will cost about $10,000.

PERU, ILL.—The plant of the Peru Plow & Wheel Works burned Dec. 12.

DULUTH, MINN.—A permit has been issued to Stevens & Gray for the erection of a sawmill at the foot of Garfield Ave., to cost about $30,000.

OMAHA, NEB.—The establishment of a beet sugar plant at this place is being talked of. The Commercial Club is interested.

TRINIDAD, COLO. — Paul Morton, Third Vice-Pres. Atchinson, Topeka & Santa Fe Ry., Chicago, is quoted as saying that the shops of this company may be removed from Raton, N. Mex., to Trinidad.

SAN FRANCISCO, CAL.—A fire on Dec. 10 in the paint and varnish store of W. P. Fuller & Co., destroyed property to the value of from $50,000 to $100,000. The loss is in part covered by insurance.

GAS PLANTS.

NEW YORK, N. Y.—Bids are asked until Dec. 24 for furnishing illuminating gas for lighting the public markets, armories, buildings and offices of the city, from Jan. 1 to Dec. 31, 1897. C. H. T. Collis, Comr. Pub. Wks.

PLATTSBURG, N. Y.—Bids are asked until Dec. 23, according to reports, for laying gas mains and furnishing gas fixtures in buildings at Plattsburg barracks. Capt. Geo. E. Pond, Asst. Q. M.

SARATOGA SPRINGS, N. Y.—The "Saratogian" states that the Home Gas, Electric Light & Power Co. is being organized by local business men to construct a plant for furnishing illuminating gas and incandescent electric lights. The franchise has not yet been secured, but will be as soon as the organization of the company is completed.

SCHENECTADY, N. Y.—Bids are asked until Dec. 19 for a complete gas lighting plant, as stated in our advertising columns. Geo. T. Ingersoll, Supt. W. W.; Geo. T. Bradt, Secy. Water Comrs.

JERSEY CITY, N. J.—The George Washington Lighting Co. was incorporated Dec. 10 with a capital stock of $2,000,000, all paid in, to manufacture burners for gas, petroleum, electricity, or other substances for producing incandescent or other light. John C. McGuire, Brooklyn, N. Y., 19,990 shares; Maurice J. Powers, New York, 3 shares: Chas. N. King, Jersey City, N. J., 7 shares.

HINTON, W. VA.—A press report states that preparations are being made for the erection of a large plant at New River Falls, near this city, for the manufacture of acetyline gas. The stock company is composed of eastern capitalists, and it is reported that the work is to be pushed vigorously.

INDEPENDENCE, KAN.—It is announced that the Enterprise Oil & Gas Co. has been chartered under the laws of Kansas. Pres., A. C. Stich, Pres. Citizen's National Bank; Treas., Geo. T. Guernsey, Cashier Commercial National Bank; Secy., C. L. Kimble. Capital stock, $1,000,000. The company is said to hold leases on 250,000 acres of land in the Creek reservation.

MOJAVE, CAL.—It is reported that $600 has been subscribed for new gas works and that Mr. James hopes to be able to light the town by the first of the year.

MISCELLANEOUS CONTRACTS.

STEAM ROLLER.—Colorado Springs, Colo.—Local papers are urging the purchase of a steam roller. H. I. Reid, Cy. Engr.

CEMENT.—Providence, R. I.—Bids are asked until Dec. 21 for furnishing cement to be used during 1897. Bond, $5,000. Robt. E. Smith, Comr. Pub. Wks.

FORTIFICATIONS.—Seattle, Wash.—Plans for fortifying three points on Admiralty Inlet, Wash., are in an advanced state, and it is hoped to ask for bids soon.

BOILERS.—Brooklyn, N. Y.—Bids are asked until Dec. 24 for furnishing and setting three 60-HP. boilers, carrying 100 lbs. steam pressure. T. B. Willis, Comr. Cy. Wks.

GUN EMPLACEMENTS.—Portland, Me.—The lowest bid received by Lieut. Col. A. N. Damrall, Dec. 12, for constructing gun emplacements, etc., on Great Diamond Island, Portland Harbor, as advertised in Engineering News, was that of Isaac T. Brown, of New York, at $68,683, or $76,080. The detailed bids will probably be published next week.

DREDGING.—Portland, Me.—Bids are asked until Jan. 14 for dredging Portland Harbor, as stated in our advertising columns. Lieut.-Col. A. N. Damrell, U. S. Engrs.

FIRE PUMPS.—Chicago, Ill.—Bids are asked until Dec. 21 for furnishing two 750-gallon fire pumps in the public library building. W. B. Wickersham, Secy., City Hall.

DREDGING.—New York, N. Y.—Bids are asked until Jan. 5 for dredging in Peekskill Harbor, N. Y., as stated in our advertising columns. Col. G. L. Gillespie, Army Bldg.

PEDESTAL.—Philadelphia, Pa.—Bids are asked until Dec. 22 for constructing a pedestal for the Grant statue in Fairmount Park. Russell Thayer, Ch. Engr. and Supt., Room 127, City Hall.

DREDGING.—Wilmington, Del.—Bids are asked until Jan. 12 for dredging in Wilmington Harbor and Christiana River, Del., as stated in our advertising columns. Maj. Wm. F. Smith, U. S. Agent.

CITY SUPPLIES.—Philadelphia, Pa.—Bids are asked until Dec. 23 for furnishing the department of public works with lumber, shovels, nails, steel, iron pipes, castings, pig lead, bolts, gas meters, etc. T. M. Thompson, Dir.

UNDERGROUND CONDUITS.—Allegheny, Pa.—Elmer E. Loomis, Cy. Electrician, has completed plans and specifications for putting city wires underground, and it is stated that bids will be asked at once for the conduits and cables.

IRON FENCE, ETC.—New York, N. Y.—Bids are asked until Dec. 21 for erecting an iron fence around the deer paddocks in Central Park; for furnishing 10,000 cu. yds of garden mold, etc. Department of Public Parks, The Arsenal, Central Park.

BONDS.—Hoboken, N. J.—Bids are asked until Dec. 23 for the purchase of $50,000 of 20-year library construction bonds; $90,000 of school building bonds; and $92,000 main outlet sewer bonds, all to be 20-year bonds at 5%. M. V. McDermott, Cy. Clk.

PARK WORK.—St. Paul, Minn.—The county commissioners have decided to purchase 51 acres of land adjacent to Thalen Park, to be used as an addition to the park.——The park superintendent has submitted plans for a boulevard along the bluff overlooking the river on the west side; estimated cost, $50,000.

TUNNEL.—Durango, Colo.—Pret, Teachsler & Co., Windsor Hotel Bldg., were to open bids Dec. 15 for running a crosscut tunnel a distance of 550 ft. for the working of the Small Hopes mine, about 3½ miles north of La Platta City. Blair Burwell, County Surv.

ENGINES, CASTINGS, ETC.—New York, N. Y.—We are informed that the following bids were received by the board of public parks Dec. 7 for engines, castings, etc., at the Madison Ave. bridge: Joseph Edwards & Co., 414 Water St., $7,940, and Augustus Smith, C. E., 39 Cortlandt St. (accepted), $6,470.

LIFT LOCKS. —Lockport, N. Y.—It is stated that plans are about completed for the proposed steel lift locks at this place for the Erie Canal; estimated cost, $500,000. The contract will probably be let early in January. C. W. Adams, State Engr.; G. W. Aldridge, Supt. Pub. Wks., Albany.

GRANITE AND BRONZE MONUMENT.—Chickamauga, Ga.—Bids are asked until Jan. 5 for furnishing and constructing a granite and bronze monument in Chickamauga National Military Park; bond, $20,000. Gordon Lee, Secy. State Memorial Board, Chickamauga; W. M. Everett, Chn., Atlanta, Ga.

RAILWAY EQUIPMENT.—Bangor, Me.—It is reported that at a meeting of the Bangor & Aroostook R. R., in this city, Dec. 9, it was voted to buy 408 flat cars, 180 box cars and 5 cabooses, all to be fitted with Westinghouse brakes and automatic couplers. Pres., A. A. Burleigh, Houlton, Me.; Gen. Mgr., F. W. Cram, Bangor; Ch. Engr., M. Burpee, Houlton.

FIRE DEPARTMENT.—Bayport (L. I.), N. Y.—The Bayport Hook & Ladder Co. and the Bayport Fire Department which includes all the fire companies in the place, have been incorporated by Charles A. Post, William K. Post, Regis H. Post, John O. Savercool, Moses W. McMath, M. H. Packer, William H. Squires, John R. Edwards, Stephen G. Hicks and Edward W. Gillette.

REMOVAL OF TELEGRAPH SYSTEM.—Baltimore, Md. —Bids are asked until Dec. 21 for the removal of the abandoned overhead lines of the police and fire-alarm telegraph system in that part of the city included in sections 2 and 3 of the underground conduits of said system, consisting of about 27 miles of copper and 38 miles of iron wire, about 70 poles, together with cross-arms, etc. N. S. Hill, Jr., Engr. Electrical Comn., 508 Equitable Bldg.; A. Roszel Carthcart, Chn.

CANAL.—Salt Lake City, Utah.—The committee recently appointed by the council to investigate the advisability of constructing the surplus canal recommended Dec. 2 that a 60-ft. canal be constructed immediately, half the cost to be paid by the county, and that the total be not more than $20,000. It was further recommended that bids be asked at once, and that none but citizens of Salt Lake be employed in its construction. The report was adopted and the work will begin as soon as possible.

CITY SUPPLIES.—Philadelphia, Pa.—Bids are asked until Dec. 21 for furnishing the department of public safety with the following: Plumbing supplies, lumber, hardware, bolts, nuts, iron and steel, iron and malleable castings, brass castings, oil, hubs, removal of ashes, roofing, patent pavement, bricklaying, plastering, dredging, chemicals, fire signal boxes, patrol, signal and telephone stations, telephones and transmitters, mast arms, iron posts, iron and copper wire battery supplies, cables, poles, cross arms, manhole covers, conduits, creosoted lumber and such other supplies as may be required by the several bureaus connected with the department. F. M. Riter, Dir., Room 217, City Hall.

TELEPHONE EXTENSION.—Spokane, Wash.—Local papers state that the Inland Telephone & Telegraph Co., 4th floor, Hazel Block, has decided to extend its system to Seattle and Tacoma, a distance of 290 miles, and to a number of other places, making the total extensions 536 miles. The estimates for this work call for 16,000 poles, 1,884 miles of No. 10 hard drawn copper wire, 15,000 cross arms and braces and 32,000 pins and insulators. The estimated cost of material and labor is $72,000. The work will be commenced March 1 if the weather will permit, and completed by the middle of the summer. C. B. Hopkins, Gen. Mgr.——It is also stated that Sunset Telephone Co., of San Francisco, Cal., and of Spokane, will extend its system.

FIRE EQUIPMENT, ETC.—Philadelphia, Pa.—Bids are asked until Dec. 21 for furnishing the following supplies to the department of public safety: Fire hose; hand fire extniguishers; one or more steam engines to weigh about 7,000 lbs., with pumps of sufficient capacity to discharge 700 gallons of water per min., and one or more steam fire engines with pumps of sufficient capacity to discharge 500 gallons per min.; combination hose wagons and chemical engines combined; chemical engines, with two 60-gallon horizontal tanks, nickel-plated sarvon wheels, with 500 ft. of hose; Duval water towers for aerial trucks; aerial extension ladders; general electrical supplies; bicycles; Pedrick & Ayer air compressor; radial head for milling machine and for coal hoist. Frank M. Riter, Dir.

DREDGES.—St. Louis, Mo.—The following bids are reported to have been received Nov. 11 by Capt. H. E. Waterman, U. S. Engr. and Secy. Missouri River Comn., for furnishing two hydraulic dredges, as advertised in Engineering News:

Item 1, for one dredge with water jet agitators; 2, for one dredge with mechanical agitators; 3, for two dredges with water jet agitators; 4, for two dredges with mechanical jet agitators.

Springfield Boiler & Mfg. Co., Springfield, Ill., 1, $105,508; 2, $109,981; 3, $102,000 each, accepted for one; 4, $106,000 each, accepted for one.

John S. George and H. P. Eells receivers Bucyrus Steam Shovel & Dredge Co., South Milwaukee, Wis., 1, $119,750; 2, $129,750; 3, $119,500; 4, $129,500.

New York Dredging Co., World Bldg., New York, 1, $200,000 and $105,000; 2, $200,000 and $105,000; 4, $100,000.

CONTRACT PRICES.

BREAKWATER.—Philadelphia, Pa.—Maj. C. W. Raymond received the following bids Dec. 10 for constructing the proposed new stone breakwater and harbor of refuge at the entrance to Delaware Bay, as advertised in Engineering News; contracts not to exceed $4,660,000 have been authorized for this work; estimates made several years ago, placed cost of stone in substructure at $3 a ton, and in superstructure at $4 a ton; contractor is required to deposit 200,000 tons of stone the first year, and 280,000 tons each subsequent year:

Bidder.	Stone per net ton. Structure, 1,210,665 tons.	Superstructure, 173,745 tons.
James McCarron, Philadelphia	$1.31	$1.39
